Results for the quarter ended 30 September 2019

Q3 MARKET UPDATE 2019
Certain statements contained in this document, other than statements of historical fact, including, without limitation, those concerning the economic outlook for the gold mining industry, expectations regarding gold prices, production, total cash costs, all-in sustaining costs, all-in costs, cost savings and other operating results, productivity improvements, growth prospects and outlook of AngloGold Ashanti Limited’s (AngloGold Ashanti or the Company) operations, individually or in the aggregate, including the achievement of project milestones, commencement and completion of commercial operations of certain of AngloGold Ashanti’s exploration and production projects and the completion of acquisitions, dispositions or joint venture transactions, AngloGold Ashanti’s liquidity and capital resources and capital expenditures and the outcome and consequence of any potential or pending litigation or regulatory proceedings or environmental health and safety issues, are forward-looking statements regarding AngloGold Ashanti’s operations, economic performance and financial condition. These forward-looking statements or forecasts involve known and unknown risks, uncertainties and other factors that may cause AngloGold Ashanti’s actual results, performance or achievements to differ materially from the anticipated results, performance or achievements expressed or implied in these forward-looking statements. Although AngloGold Ashanti believes that the expectations reflected in such forward-looking statements and forecasts are reasonable, no assurance can be given that such expectations will prove to have been correct. Accordingly, results could differ materially from those set out in the forward-looking statements as a result of, among other factors, changes in economic, social and political and market conditions, the success of business and operating initiatives, changes in the regulatory environment and other government actions, including environmental approvals, fluctuations in gold prices and exchange rates, the outcome of pending or future litigation proceedings, and business and operational risk management. For a discussion of such risk factors, refer to AngloGold Ashanti’s annual report on Form 20-F for the year ended 31 December 2018, which has been filed with the United States Securities and Exchange Commission (SEC). These factors are not necessarily all of the important factors that could cause AngloGold Ashanti’s actual results to differ materially from those expressed in any forward-looking statements. Other unknown or unpredictable factors could also have material adverse effects on future results. Consequently, readers are cautioned not to place undue reliance on forward-looking statements. AngloGold Ashanti undertakes no obligation to update publicly or release any revisions to these forward-looking statements to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events, except to the extent required by applicable law. All subsequent written or oral forward-looking statements attributable to AngloGold Ashanti or any person acting on its behalf are qualified by the cautionary statements herein.

The financial information in this document has not been reviewed or reported on by the Company’s external auditors.

Non-GAAP financial measures
This communication may contain certain “Non-GAAP” financial measures. AngloGold Ashanti utilises certain Non-GAAP performance measures and ratios in managing its business. Non-GAAP financial measures should be viewed in addition to, and not as an alternative for, the reported operating results or cash flow from operations or any other measures of performance prepared in accordance with IFRS. In addition, the presentation of these measures may not be comparable to similarly titled measures other companies may use.

Conclusion
POSITIONED TO CREATE VALUE THROUGH THE CYCLE

Generate sustainable cash flows and shareholder returns by focusing on five key areas...

- Excellence in Environmental, Social, and Governance
- Robust balance sheet
- Disciplined capital allocation
- Improving portfolio
- Focusing on reserve growth

...these focus areas are aimed at driving our investments to deliver improving margins, extended mine lives and a pipeline for the future.
TARGETING ZERO HARM
LONG-TERM SAFETY IMPROVEMENTS CONTINUE

> Working towards zero harm, excellence in environmental stewardship and community development

- Fatalities down 100% & AIFR down 55% since 2012
- 541 consecutive fatality-free days since Q2 2018
- AIFR improved 24% year-on-year
- Integrated safety strategy bearing fruits

Fatalities

AIFR per million hours worked

Reportable environmental incidents

*2019 YTD – first 9 months 2019
Q3 2019 HIGHLIGHTS

- Free cash flow increased by 12% to $87m in Q3 2019, a 156% improvement on Q3 2018
- Production increased by 3% to 825koz in Q3 2019 supporting expected production improvements in Q4 2019
- All-in sustaining (AISC*) costs rose 12% year-on-year to $1,031/oz, mainly due to an increase in total cash costs
- Maintaining guidance - production at lower half, cost at upper end of range
- Adjusted net debt declined by 6% year-on-year to $1.646bn; adjusted net debt to adjusted EBITDA ratio decreased year-on-year to 1.06 times
- AIFR remains near all-time lows at 3.23 injuries per million hours worked in Q3 2019, a 24% improvement on Q3 2018
- Obuasi Redevelopment Project on budget and schedule for first gold pour by year-end and Phase 2 completion by the end of 2020
- Sales processes to streamline portfolio continue to make steady progress
- Gramalote JV - transfer of management to B2Gold, $13.9m to earn back to 50%, feasibility study targeted for 2020

**Americas**
- Production 179koz
- AISC $1,118/oz

**Continental Africa**
- Production 387koz
- AISC $900/oz

**South Africa**
- Production 113koz
- AISC $1,127/oz

**Australia**
- Production 146koz
- AISC $1,066/oz

Conclusion
Q3 AFRICAN OPERATIONS PERFORMANCE

Continental Africa

- Geita - increase in tonnes treated due to improved plant utilisation
- Iduapriem - higher tonnes treated and improved grades
- Kibali - planned reduction in open pit mining, shift in focus to sourcing ore from underground mining
- Siguiri - impacted by ramp-up of the new combination plant

South Africa

- Mponeng - lower grades, face length availability due to increased seismicity
- However, seeing improvements in face advance and grades

Conclusion
OBUASI REDEVELOPMENT PROJECT UPDATE

Phase 1 Construction

✓ Refurbishment on track at 78% completion – key to ramp-up to 2,000tpd

Phase 2 Construction

✓ The engineering, procurement and construction (including the demolition, refurbishment and new build) is 44.5% complete

Operational Readiness

✓ Project remains within budget and on schedule to achieve the planned production rate of 4,000tpd at the end of 2020

✓ Operational Readiness and mobilised

Both production and cost estimates assume neither operational or labour interruptions, or power disruptions, nor any changes to asset portfolio and/or operating mines (and thus do not give effect to any of the contemplated divestitures in South Africa, Argentina and Mali) and have not been reviewed by our external auditors. Other unknown or unpredictable factors could also have material adverse effects on our future results and no assurance can be given that any expectations expressed by AngloGold Ashanti will prove to have been correct. Accordingly, actual results could differ from guidance and any deviation may be significant. Please refer to the Risk Factors section in AngloGold Ashanti’s annual report on Form 20-F for the year ended 31 December 2018, filed with the United States Securities and Exchange Commission (SEC).

The overall Obuasi project budget remains intact. Economic assumptions are as follows: ZAR14.50/$, $/A$0.70, BRL3.94/$, AP50.00/$; Brent $64/bl.
The pursuit of an even healthier balance sheet will guide sound capital decision-making and investment strategies.

Conclusion
ANGLOGOLD ASHANTI IS A PREMIER GOLD INVESTMENT

2019 Priorities

• Continued focus on sustainability and safety improvements
• Target increased reserve conversion
• Aim to progress divestment process in South Africa
• First production at Obuasi by year-end
• Optimise margins and cash conversion
• Enforce capital discipline in rising gold price environment
