NEWS RELEASE

AngloGold Ashanti Trebles Q1 Cash Flow from Operating Activities; Bolsters Liquidity to $2bn

(PRESS RELEASE – JOHANNESBURG) – AngloGold Ashanti bolstered its available liquidity to more than $2bn, improved leverage and more than trebled first quarter cash flow from operating activities as key mines delivered solid performances.

A diverse portfolio of 14 mines in nine countries helped limit the impact of COVID-19-related stoppages to 11,000oz during the first quarter of 2020. First quarter free cash flow before investment in growth projects – the measure on which dividend payments are based - rose 231% year-on-year to $94m. Cash flow from operating activities rose by 227 % from $67m to $219m over the same period.

“Cash flow is strong, leverage is down, and all operations are running,” Chief Executive Officer Kelvin Dushnisky said. “We’re making good progress on achieving our core strategic objectives – including asset sales and the redevelopment of Obuasi – and have worked hard to ensure we have the liquidity to weather potential disruptions.”

AngloGold Ashanti received a strong tailwind from bullion prices which averaged $1,506/oz during the first quarter of 2020 and have continued to rise in subsequent weeks as investors sought a safe haven. The Company secured an additional $1bn credit facility to supplement cash on hand of around $1.1bn\(^2\) as it increased its liquidity position to withstand any potential disruptions from the COVID-19 epidemic.

AngloGold Ashanti has made good progress in achieving its strategic objectives, namely the ongoing redevelopment of its Obuasi Gold Mine, investment in the increase of reserves and mine lives of its key assets, and the process to conclude the announced sales of assets in South Africa and Mali. These milestones were achieved despite disruption caused by COVID-19-related stoppages at Serra Grande, Cerro Vanguardia and the South Africa operations, which straddled the first and second quarters and have since been lifted.

The announced sale of the South African Operations to Harmony Gold crossed an important hurdle after the South African Competition Tribunal approved the transaction, without conditions, on 29 April 2020. AngloGold Ashanti will no longer be
selling its Cerro Vanguardia mine in Argentina, after concluding it can derive more value for shareholders by developing the remaining potential in the ore body.

The ramp-up of Obuasi’s mining rate to 4,000 tonnes per day, from 2,000 tonnes per day, is now expected to occur in the first quarter of next year. This is due to slower shipments of certain equipment to Ghana and difficulties in ensuring key, skilled employees can travel to the site amidst COVID-19-related border closings. The project remains on budget.

The Company has taken a pragmatic approach in limiting the impact of the COVID-19 pandemic on its operations by building inventories of critical spares and ore stockpiles to improve the ability to respond to operational disruptions. The Company has also implemented innovative relief interventions across all host countries, working closely with governments, peers, and communities to help slow the spread of the pandemic.

**PRODUCTION**

Production was 716,000oz at a total cash cost of $814/oz for the quarter ended 31 March 2020, from 752,000oz at $791/oz in the same period last year. All-in sustaining cost (AISC) was $1,047/oz for the three months ended 31 March 2020, compared with $1,009/oz in the same period last year. Geita and Iduapriem delivered standout performances, offsetting lower production at Siguiri, Sunrise Dam and AGA Mineração.

Adjusted earnings before interest, tax, depreciation and amortisation (Adjusted EBITDA) jumped 54% to $473m while free cash flow, before capital expenditure on growth projects, soared by 231% to $94m. Free cash flow improvements were achieved despite higher capital expenditure, with growth investment of $90m -- principally at the Obuasi project as its redevelopment continued and outstanding cash balances available of $252m awaiting repatriation from the Democratic Republic of the Congo.

**BALANCE SHEET**

The balance sheet continues to improve as strong cash flows helped with the continued reduction in Adjusted net debt. Adjusted net debt to Adjusted EBITDA was 0.85* times at 31 March 2020, below targeted levels of 1.0 times through the cycle. Adjusted net debt was 10% lower at $1.6bn at quarter end, from $1.78bn at the same time last year.

The Company is in a strong cash position of $1.1bn after it redeemed the 10-year $700 million bond and the coupon and has secured additional credit facilities of $1bn, providing further liquidity in the event of operational disruptions.

**SAFETY**

Tragically, we lost four colleagues in the first quarter of the year in two separate incidents in March at the Mponeng mine. The first incident occurred on 5 March 2020 when three of our colleagues were fatally injured by a fall of ground, caused by a large seismic event roughly 3.6km below surface. The second took place on 16 March 2020...
in a tragic accident during an underground horizontal transport incident, which fatally injured one employee. Subsequent to the quarter end, an employee of Covalent Water, a wholly owned subsidiary in South Africa, passed away as a result of injuries sustained in an electricity-related incident.

Despite these fatalities, our pursuit of zero harm remains the priority. The Company is absolutely focused on this critical area of our business and no effort will be spared to not only understand the cause of each of these incidents, but also the root cause of other high potential incidents that could have resulted in fatalities.

The information contained in this announcement has not been reviewed or reported on by the Company’s external auditors.

(‡) The above results include continuing and discontinued operations.

Certain statements contained in this document, other than statements of historical fact, including, without limitation, those concerning the economic outlook for the gold mining industry, expectations regarding gold prices, production, total cash costs, all-in sustaining costs, all-in costs, cost savings and other operating results, return on equity, productivity improvements, growth prospects and outlook of AngloGold Ashanti’s operations, individually or in the aggregate, including the achievement of project milestones, commencement and completion of commercial operations of certain of AngloGold Ashanti’s exploration and production projects and the completion of acquisitions, dispositions or joint venture transactions, AngloGold Ashanti’s liquidity and capital resources and capital expenditures and the outcome and consequence of any potential or pending litigation or regulatory proceedings or environmental health and safety issues, are forward-looking statements regarding AngloGold Ashanti’s operations, economic performance and financial condition. These forward-looking statements or forecasts involve known and unknown risks, uncertainties and other factors that may cause AngloGold Ashanti’s actual results, performance or achievements to differ materially from the anticipated results, performance or achievements expressed or implied in these forward-looking statements. Although AngloGold Ashanti believes that the expectations reflected in such forward-looking statements and forecasts are reasonable, no assurance can be given that such expectations will prove to have been correct. Accordingly, results could differ materially from those set out in the forward-looking statements as a result of, among other factors, changes in economic, social and political and market conditions, the success of business and operating initiatives, changes in the regulatory environment and other government actions, including environmental approvals, fluctuations in gold prices and exchange rates, the outcome of pending or future litigation proceedings, any supply chain disruptions, any public health crises, pandemics or epidemics (including the COVID-19 pandemic), and other business and operational risks and other factors. For a discussion of such risk factors, refer to AngloGold Ashanti’s annual report on Form 20-F for the year ended 31 December 2019, which has been filed with the United States Securities and Exchange Commission (SEC). These factors are not necessarily all of the
important factors that could cause AngloGold Ashanti’s actual results to differ materially from those expressed in any forward-looking statements. Other unknown or unpredictable factors could also have material adverse effects on future results. Consequently, readers are cautioned not to place undue reliance on forward-looking statements. AngloGold Ashanti undertakes no obligation to update publicly or release any revisions to these forward-looking statements to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events, except to the extent required by applicable law. All subsequent written or oral forward-looking statements attributable to AngloGold Ashanti or any person acting on its behalf are qualified by the cautionary statements herein.
