

Reporting method

The term “managed operations” refers to subsidiaries managed by AngloGold Ashanti and included in its consolidated reporting, while the term “non-managed joint ventures” (i.e., Kibali) refers to equity-accounted joint ventures that are reported based on AngloGold Ashanti's share of attributable earnings and are not managed by AngloGold Ashanti.

Non-GAAP financial measures

This communication may contain certain “Non-GAAP” financial measures, including, for example, “total cash costs”, “total cash costs per ounce”, “all-in sustaining costs”, “all-in sustaining costs per ounce”, “average gold price received per ounce”, “sustaining capital expenditure” and “non-sustaining capital expenditure”. AngloGold Ashanti utilises certain Non-GAAP performance measures and ratios in managing its business. Non-GAAP financial measures should be viewed in addition to, and not as an alternative for, the reported operating results or cash flow from operations or any other measures of performance prepared in accordance with IFRS. In addition, the presentation of these measures may not be comparable to similarly titled measures other companies may use. Reconciliations from IFRS to Non-GAAP financial measures can be found in AngloGold Ashanti’s Q2 2026 Earnings Release, which is available on its website.
