ANGLOGOLDASHANTI

Building safety procedure

SAFETY

IS OUR FIRST VALUE

in case of an emergency…

A siren will sound and information will be broadcast over the public address system

Move quickly to the nearest exit points, which are on both sides of the auditorium and at the back right hand corner

Please gather at the open car park behind Turbine Square where safety wardens will advise you on any additional procedures

Disclaimer

Certain statements contained in this document, other than statements of historical fact, including, without limitation, those concerning the economic outlook for the gold mining industry, expectations regarding gold prices, production, total cash costs, all-in sustaining costs, all-in costs, cost savings and other operating results, return on equity, productivity improvements, growth prospects and outlook of AngloGold Ashanti's operations, individually or in the aggregate, including the achievement of project milestones, commencement and completion of commercial operations of certain of AngloGold Ashanti's exploration and production projects and the completion of acquisitions, dispositions or joint venture transactions, AngloGold Ashanti's liquidity and capital resources and capital expenditures and the outcome and consequence of any potential or pending litigation or regulatory proceedings or environmental health and safety issues, are forward-looking statements regarding AngloGold Ashanti's operations, economic performance and financial condition.

These forward-looking statements or forecasts involve known and unknown risks, uncertainties and other factors that may cause AngloGold Ashanti's actual results, performance or achievements to differ materially from the anticipated results, performance or achievements expressed or implied in these forward-looking statements. Although AngloGold Ashanti believes that the expectations reflected in such forward-looking statements and forecasts are reasonable, no assurance can be given that such expectations will prove to have been correct. Accordingly, results could differ materially from those set out in the forward-looking statements as a result of, among other factors, changes in economic, social and political and market conditions, the success of business and operating initiatives, changes in the regulatory environment and other government actions, including environmental approvals, fluctuations in gold prices and exchange rates, the outcome of pending or future litigation proceedings, and business and operational risk management.

For a discussion of such risk factors, refer to AngloGold Ashanti's annual reports on Form 20-F filed with the United States Securities and Exchange Commission. These factors are not necessarily all of the important factors that could cause AngloGold Ashanti's actual results to differ materially from those expressed in any forward-looking statements. Other unknown or unpredictable factors could also have material adverse effects on future results. Consequently, readers are cautioned not to place undue reliance on forward-looking statements. AngloGold Ashanti undertakes no obligation to update publicly or release any revisions to these forward-looking statements to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events, except to the extent required by applicable law. All subsequent written or oral forward-looking statements attributable to AngloGold Ashanti or any person acting on its behalf are qualified by the cautionary statements herein.

This communication may contain certain "Non-GAAP" financial measures. AngloGold Ashanti utilises certain Non-GAAP performance measures and ratios in managing its business. Non-GAAP financial measures should be viewed in addition to, and not as an alternative for, the reported operating results or cash flow from operations or any other measures of performance prepared in accordance with IFRS. In addition, the presentation of these measures may not be comparable to similarly titled measures other companies may use. AngloGold Ashanti posts information that is important to investors on the main page of its website at www.anglogoldashanti.com and under the "Investors" tab on the main page. This information is updated regularly. Investors should visit this website to obtain important information about AngloGold Ashanti.

Introduction

Venkat

Positioned to deliver value through the cycle

We continue to respond decisively and proactively to the current market…

- **Consistently strong operating performance and delivery**
- **Decisive action on operations, balance sheet**
- **Leading cost management performance – overheads, operations, exploration and capital**
- **Portfolio improvements and rationalisation**
- **Optionality across portfolio – brownfields and greenfields potential**
- **Continued focus on making sustainable improvements to margins and cash flow**

…to ensure we remain ahead of the curve in volatile conditions.

2015 Third quarter highlights

Delivered another consistent operating and financial performance…

Production **974koz**	Beat guidance *of* ***900 - 950k/oz***
Total cash costs **$735/oz**	*10%* *Improvement year-on-year; beat guidance of $770/oz-$820/oz*
AISC **$937/oz**	*9%* *Improvement year-on-year*
Net Debt **$2.319bn**	*21% down y-on-y* *Net Debt: Adjusted EBITDA around targeted levels of 1.5x; well within covenant*

Tender offer for 8.5% high-yield bond **reduces debt and interest payments**

Potential joint venture at **Obuasi improves long-term potential**

Focus on costs and operational improvement remains **core to strategy of improving free cash flow**

International operations delivered cost reductions from Geita, Tropicana, & S America

…with marked reduction in debt levels and eleven consecutive quarters of delivery.

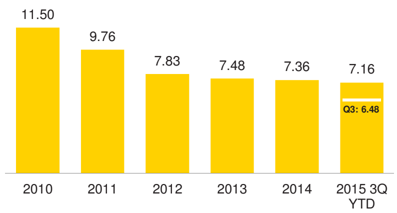
Safety performance

Difficult quarter in South Africa with five fatalities...

Fatal Injuries

	2013	2014	2015 Q3 YTD
AGA International	2	2	1
South Africa	6	4	8
AGA Total	**8**	**6**	**9**

All injury frequency rate (AIFR)
Per million hours worked



- Regrettably five fatalities in South Africa
- Improvement on other safety metrics: AIFR by 12% q-on-q at 6.48, LTIFR by 16% at 4.50. FIFR was at 0.16
- **Continental Africa** maintains strong quarterly AIFR performance, with Siguiri, Iduapriem, and Sadiola injury-free
- **TauTona record** – achieved record 3m fatality-free shifts
- Focus on Major Hazard Management continues; Safety strategy review underway

...reminds us that reaching zero harm will continue to require hard, proactive work.

Key metrics: Comparative performance

While results reflect declines in gold price and SA production year-on-year...

	Performance update	Q3 2015	Q3 2014*	Change Year-on-Year
	Price received ($/oz)	1,123	1,281	-12%
	Production (koz), *normalised for CC&V and Obuasi*	955	1006	-5%
Controllable Factors	Total cash costs ($/oz)	735	820	-10%
	Corporate and marketing costs** ($m)	13	24	-46%
	Exploration and evaluation costs ($m)	33	35	-6%
	Capital expenditure ($m)	207	261	-21%
	All-in sustaining costs*** ($/oz)	937	1,034	-9%
	All-in costs*** ($/oz)	1,024	1,117	-8%
	Cash inflow from operating activities ($m)	243	320	-24%
	Adjusted EBITDA ($m)	291	383	-24%
	Adjusted EBITDA margin (%)	30.8	31.3	-2%
	Free cash flow ($m), *excludes cash expense of $59m incurred in the bond tender offer*	3	30	-90%

*CC&V disclosed as a discontinued operation and the comparative results have been restated
** Includes administration and other expenses
*** World Gold Council standard, excludes stockpiles written off

...we've continued to manage down all costs and keep margins steady.

South Africa

Chris Sheppard

Wage negotiations

We have made what we believe is a generous, above-inflation offer…

WHAT THE OFFER MEANS FOR YOU **IN REAL MONEY**

Guaranteed pay (CAT 4 underground employees)

CCMA conciliated offer made on 15 September 2015

YEAR	MONTHLY CASH PAY								MONTHLY BENEFITS		ADDITIONAL	TOTAL MONTHLY GUARANTEED PAY
NOW	Basic pay	Holiday leave allowance/ 13th cheque	Living out allowance	Average calendar premium	Meal allowance	Average shift allowance	Average service increment	Total cash remuneration	Estimated medical	Employer provident/ retirement	Average overtime

1 July 2017	Increase on basic ▲ R800	Holiday leave allowance/ 13th cheque	Living out allowance	Average calendar premium	Meal allowance	Average shift allowance	Average service increment	Total cash remuneration	Estimated medical	Employer provident/ retirement	Average overtime	Total increase ▲ R1,213
	R8,111	R699	R2,100	R509	R100	R17	R275	R11,811	R1,062	R1,254	R823	R14,950

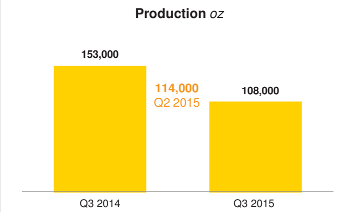
THE FIGURES ABOVE EXCLUDE MONTHLY PRODUCTION BONUSES WHICH COMPRISE A SIGNIFICANT PART OF AN EMPLOYEE'S WAGES

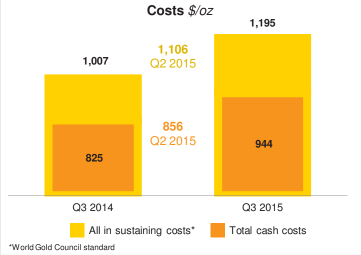
…particularly given the major challenges faced by the SA gold industry.

ANGLOGOLDASHANTI

Regional overview: West Wits

Safety related challenges hampered output at Mponeng…



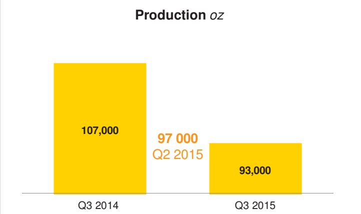


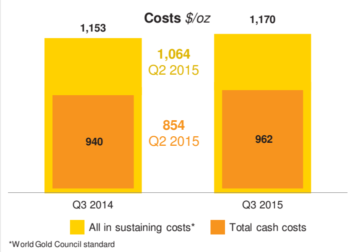
- Weaker performance given continued safety-related challenges and disruptions; cautious ramp-up from disruptions continues in fourth quarter
- Safety and face-length improvements are critical to region's recovery in 2016
- **Mponeng** continues plan to mitigate seismicity challenges by reducing extraction rate in specific areas. Key focus areas include:
  - *safety improvements are key to increasing volumes*
  - *focus on improving face length at L113/L116/L120*
  - *L123 project area production ramp-up underway with first raise lines through and ledging commenced*
- **TauTona** makes modest efficiency improvements during quarter. Highlights include:
  - *Development rates ahead of plan*
  - *Reef boring in shaft pillar making good progress; new machines delivering continued improvements in cycle times*

…overshadowing an improved performance at TauTona.

Regional overview: Vaal River

Moab Khotsong delivered relatively stable results…



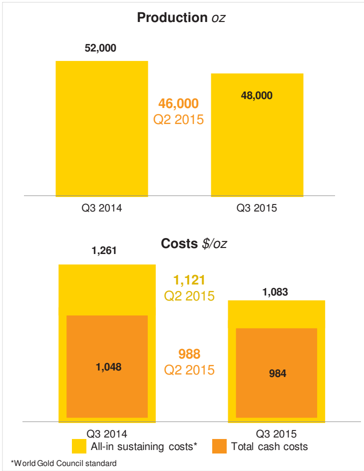


- **Vaal River** performance also overshadowed by regulatory safety stoppages resulting in approximately 31,000 ounces of lost production
- Despite currency weakness and concerted efforts to contain inflationary pressures, total cash costs were adversely impacted by lower production levels and higher winter power tariffs
- **Moab Khotsong** remained the lowest cost producer for the South African region at a total cash cost of $876/oz

…despite lost production due to regulatory safety stoppages.

Regional overview: Surface Operations

Costs at surface operations see benefit of currency and containment initiatives…



- Production at **Surface operations** reflects a reduction in head grades
- Plans are underway to improve grades from the **Kopanang** Marginal Ore Dump via an enhanced screening process
- Availability at **Mine Waste Solutions** were aided by the commissioning of East pump station
- The Buffels 4 pump station was decommissioned, resulting in reduced maintenance and electricity costs

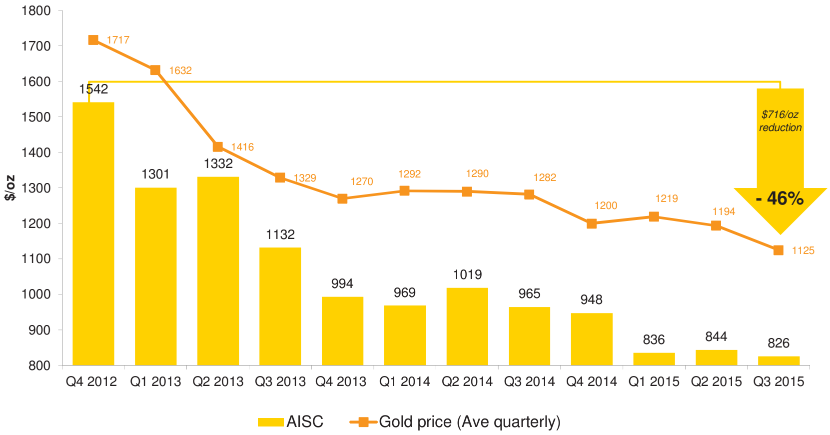
…despite lower grades and production, and higher power tariffs.

International

Ron Largent

All-in Sustaining Costs: International Operations

The international operations continue to deliver improvements to AISC…

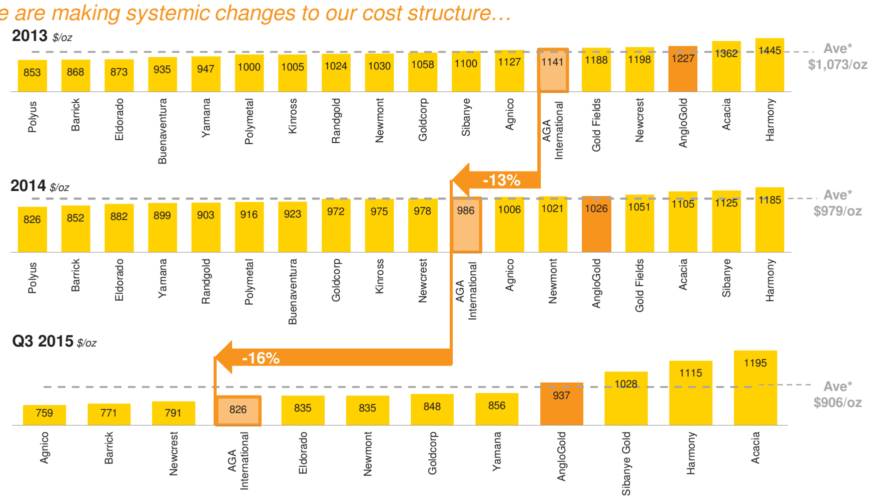


Source: Factset

…as the focus to widen margins is intensified.

Improvements on industry all-in sustaining costs

We are making systemic changes to our cost structure…



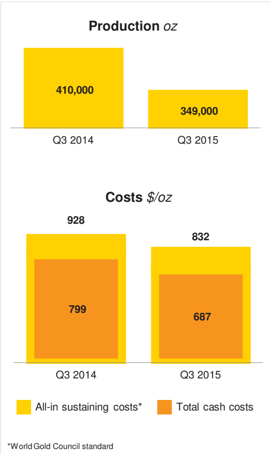
*Average AISC for companies excludes AngloGold Ashanti International Operations
**no reported quarterly AISC figures for Buenaventura, Polymetal and Polyus; AGA International AISC excludes central corporate overhead

Source: Company reports, JPM

…working our way down the industry cost curve.

Regional overview: Continental Africa

Good performance from Kibali, Geita, and Iduapriem...

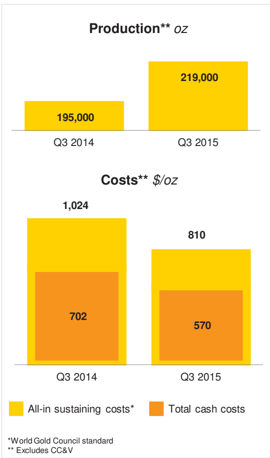


- Lower production principally due to **Obuasi** move to limited operating state
- All-in sustaining costs down 10% year-on-year reflecting higher grades from **Geita**, lower mining and fuel costs, and continued success from cost improvement initiatives
- **Kibali** production increases due to higher tonnage, partially offset by lower grades
- **Iduapriem** resumes mining operations following stockpile processing – costs and production increase
- **Siguiri** grade decline affects production and costs

...while production from marginal sources has been scaled back.

Regional overview: Americas

As the region continues to deliver solid operating performance...

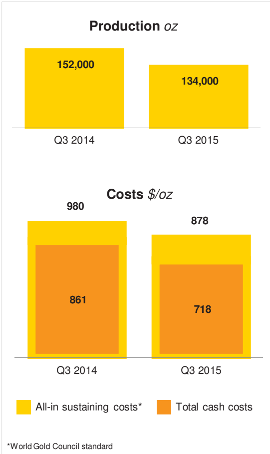


- Efficiency and production improvements continued, with focus on:
  - *underground mine expansion*
  - *mill throughput*
  - *silver recovery*
  - *capex*
- Brazil production increasing due to planned feed-grade improvements at **Cuiabá** and **Corrego do Sitio**
- Costs continue to improve, despite wage increases in August in **Brazil**, with some help from weaker currency
- In **Argentina**, higher grades and operational efficiencies result in strong production and cost performance

...focus is aimed at unlocking cost and production potential from the region.

Regional overview: Australia

Throughput and recoveries at Tropicana remained steady...



- Strong performance from Tropicana and weaker currency have contributed to costs improvements for the region
- Tropicana continues to deliver solid operating performance, with throughputs and grades performing according to plan
- Strong development and throughput rates at Sunrise Dam are being offset by poor grade reconciliation; changes have been made to improve grade-control modelling

...while a mill optimisation study looks at increasing throughput.

International operations portfolio

Our investments will be focussed on a core suite of long term quality assets…

Geita	**Underground Contractor mobilised** at Star-and-Comet, with other underground at Nyankanga and Geita hill
Mineração	Continue drilling Lamego and **satellite targets**; plant throughput and ore-sorting opportunities under evaluation
Kibali	Continue **underground development** and expansion
Obuasi	**Study Review**; Complete development plan and continue dialogue with key stakeholders; Meet all conditions precedent for JV
La Colosa	**Pre Feasibility Study** in phased approach to end 2017; Review high-grade starter option with lower capital; ration spending
Sunrise Dam	Drilling for **resource conversion** at Vogue, and for extension of Cosmo ore bodies; evaluate ore-sorting and handling options
Sadiola	Work now underway on new, **lower capex mine-plan**
Siguiri	**Feasibility Study** underway on hard rock plant
SerraGrande	**Preparatory work** underway to mine Palmeiras and Inga ore bodies
Gramalote	Feasibility Study to proceed once environmental permits received
Tropicana	Exploration continues for **additional ore sources**; in-pit backfilling options?
Iduapriem	Exploring additional **potential mining areas**
CVSA	Focus continues on **regional opportunities**

…carefully considering options in lower margin assets.

Projects, Planning & Exploration

Graham Ehm

Project update: Kibali

Kibali underground development making strong progress…

Kibali - Dam wall and Stilling basin

- Vertical shaft sinking was completed ahead of schedule in July 2015; focus shifting to equipping and off-shaft development
- Development remains on track with 2,702 metres achieved in 3Q; paste plant operating according to plan
- Concentrate desliming circuit aimed at facilitating the increase in sulphide ore from 2016 was commissioned
- First phase of Ambarau, the second hydropower station was completed; commissioning underway
- Design of the 3rd hydropower station at Azambi commenced

…as production from surface sources funds development and delivers cash.

Pipeline update: Colombia

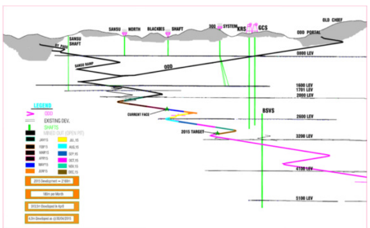
Colombia provides a significant opportunity in the long term…

- We are aiming to further reduce our spending next year while preserving optionality
- At La Colosa, work is underway to explore project options of varying scales, including options that start small and can grow on cash flows
- At Gramalote, test work aimed at improving project economics through technical enhancements is underway. Progressing to Prefeasibility in 2016-2017
- Nuevo Chaquiro scoping study continues

…with viable long term production options that need to be managed.

Project update: Obuasi

Decisive action continues to reset this world-class ore body…

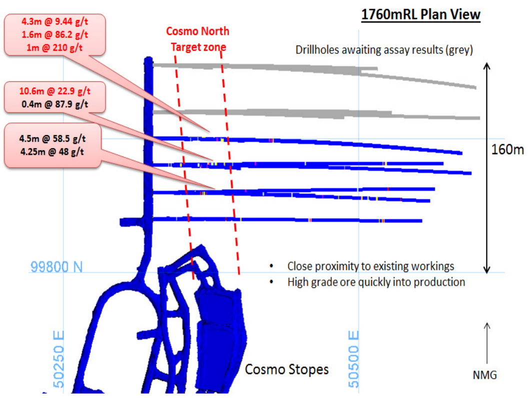


- Limited operations continued, producing 13,000oz from retreatment of tailings and remnant stockpiles
- Obuasi Deeps Decline development tracking according to plan; tailings retreatment completion expected by year end
- Optimisation of draft study now underway, including examination of project schedule, asset integrity, and recovery enhancement
- Application for extension of APMO has been submitted
- Investment agreement with Randgold
- Randgold progressing with preparation of a development plan
- Joint engagement with the Government of Ghana

…with progress in key areas during limited operations phase.

Exploration update: Sunrise Dam

Significant intercepts at Cosmo North...



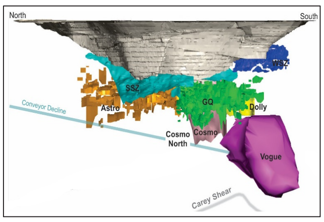
Cosmo North Extensions

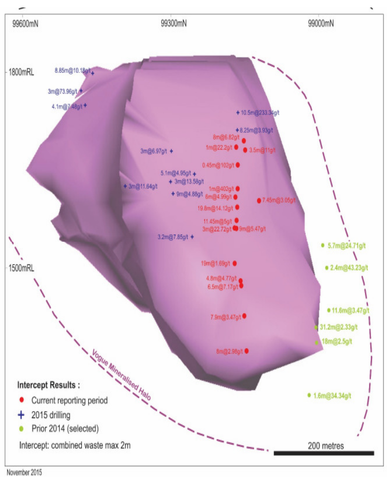
- Four significant intersections in the Cosmo North area directly along strike to the north of the Cosmo ore-body; potentially adding higher grade ore into the production profile in the medium term
- Best result was 10.6m @ 22.9 g/t, hosted in volcaniclastic sandstone, exhibits strong sericite-silica-carbonate alteration with abundant fine grained pyrite and has visible gold

...suggest an opportunity to bolster production from adjacent mining areas.

Exploration update: Sunrise Dam

Significant intercepts at Vogue...





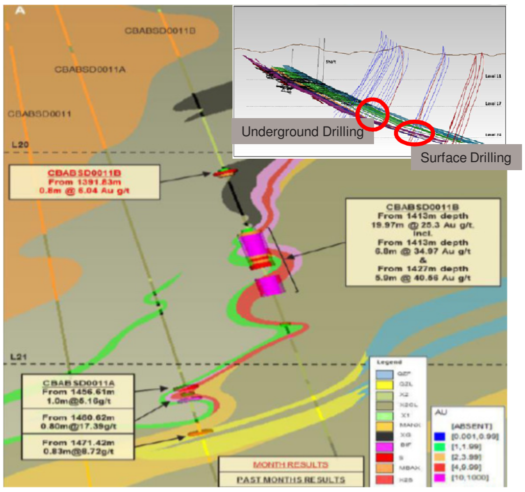
Vogue South Extensions

- Underground drill access established to top of Vogue
- 16 significant intercepts including:
  - 8m @ 6.8g/t
  - 6m @ 5.0g/t
  - 4.8m @4.8g/t
  - 19.8m @14.1g/t

...are increasing confidence in this area.

Exploration update: Cuiabá

Drilling confirms continuation of Cuiabá...



- Underground drilling is confirming the continuation of the Serrontinho orebody below 17 level.
- Quartz veins are present in the hanging wall of the structure containing significant high grade mineralisation.

Significant intersections:

Underground Extension drilling

- SERBUD0058 6.3m* @ 20.26g/t Au from 199m
- SERBUD0056 5.57m* @ 69.72g/t Au from 55m
- SERBUD0056 12.6m* @ 11.44g/t Au from 201m
- SERBUD0057 7.6m* @ 22.12g/t Au from 55m
- SERBUD0051 6.76m* @ 42.92g/t Au from 24m
- SERBUD0051 21.6m* @ 17.7g/t Au from 168m
- SERBUD0054 10.05m* @ 17.68g/t Au from 174m
- SERBUD0059 4.93m* @ 30.85g/t Au from 135m

Surface Drilling

- CBABSAD0011B 19.97m* @ 25.03g/t Au from 1413m (Refer to cross section)

...with significant high grade mineralisation in the hanging wall.

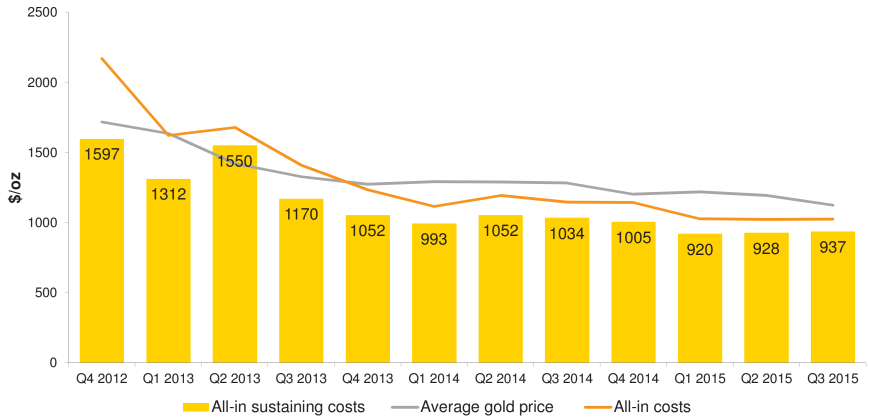
Focusing on margins

We remain focused on margins in a challenging gold price environment…

All-in sustaining costs, All-in costs and Average gold price*



* Restated to treat CC&V as discontinued

…through a focus on cost control, portfolio improvements and operational excellence.

Quarterly financial and operating metrics

Net debt has decreased sharply…

Performance update	Q3 2015	Q3 2014*	Year-on-year change
Price received ($/oz)	1,123	1,281	-12%
Production from continuing and discontinued operations (kozs)	974	1,128	-14%
All-in sustaining costs** ($/oz)	937	1,034	-9%
All-in costs** ($/oz)	1,024	1,117	-8%
Adjusted EBITDA ($m)	291	383	-24%
Income taxes ($m)	54	82	-34%
Income from equity investments ($m)	6	19	-68%
Free cash flow ($m), *(inc. $59m cost incurred in bond tender offer)*	(56)	30	-287%
Financing costs ($m)[1]	65	69	-6%
Free cash inflow ($m) before once-off offer costs	3	30	-90%
Net debt ($m)	2,319	2,952	-21%

Cash cost sensitivities	Δ	$
Oil price	$10/bl	~$9/oz
Currencies	1%	~$6/oz

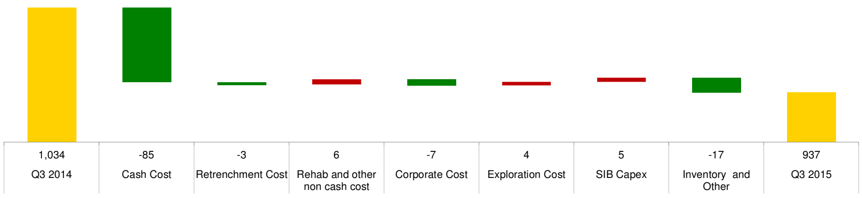
*CC&V has been disclosed as a discontinued operation and the comparative results have been restated.
**World Gold Council standard, excluding stockpiles written-off.
1. Finance costs as disclosed in the income Statement

…due to delivery on our self-help measures.

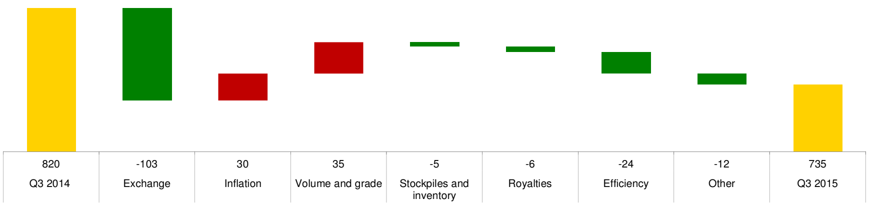
Cost performance

Weaker currencies, lower oil prices and cost efficiencies have offset inflation pressures...

All-in sustaining cost $/oz sold *(excluding Stockpile NRV and other adjustments)*



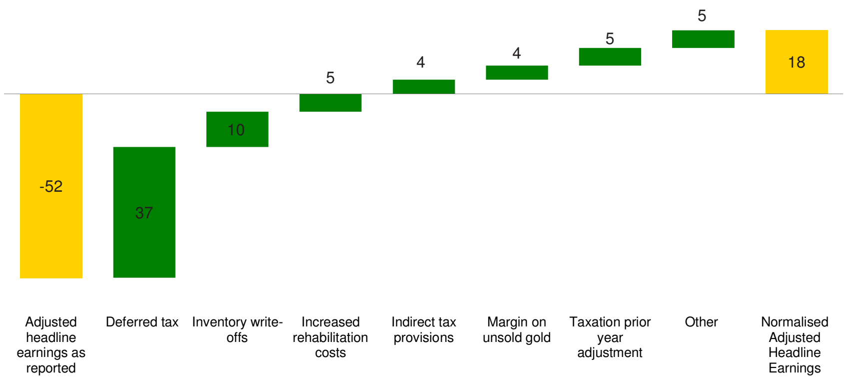
Total Cash Cost $/oz produced



...while operational improvements continue to benefit our cost structure.

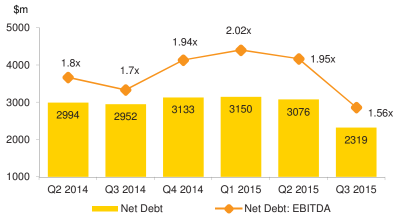
AHE Normalised

Q3 Earnings $m

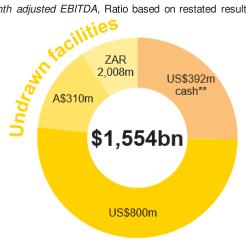


Continued financial flexibility

Strong liquidity, no material bond maturities until 2020, and significant covenant headroom…



**Last-12-month adjusted EBITDA*, Ratio based on restated results



- **Net debt: Adjusted EBITDA** 1.56 times, after receipt of CC&V sale proceeds – applied against high yield bond
- Net debt to Adjusted EBITDA ratio has improved in line with targeted range of 1.5X through the cycle
- Well-positioned to weather
  - lower gold price
  - production disruptions
  - Currency volatility and macro-challenges
- Debt covenant – leverage ratio 3.5X

Total calculated with ZAR facility at R13.84/$, AUD facility at 0.70$ to A$
***Cash $392m at 30 Sept 2015; CC&V sale proceeds received on 3 August 2015*

…which, along with reduced debt, provides additional flexibility in a volatile market.

Outlook

Improved cost performance and updated capex profiles…

	Production (Koz)	*Total cash costs ($/oz)*	*Assumptions*
Q4 2015e	900 – 950	720 - 770	*Exchange rates of ZAR13.60/$, $0.70/A$, BRL3.80/$ and AP9.70/$; Brent $48/bl.*

	Production *Moz*	**Total cash costs** *$/oz*	**AISC** *$/oz*	**Capex**	**Assumptions**
Previous guidance 2015e	3.8 – 4.1	770 - 820	1,000 - 1,050	$900m- $1bn	*Exchange rates of ZAR12.05/$, $0.78/A$, BRL2.98/$ and AP9.19/$; Brent $62/bl.*
2015e Full Year *(Includes CC&V for 7 months)*	3.8 – 4.0	720 - 770	950 - 980	c.900m	*Exchange rates of ZAR12.60/$, $0.75/A$, BRL3.32/$ and AP9.15/$; Brent $53/bl.*

Both production and cost estimates assume neither labour interruptions, power disruptions, or changes to asset portfolio and/or operating mines. Other unknown or unpredictable factors could also have material adverse effects on our future results and no assurance can be given that any expectations expressed by AngloGold Ashanti will prove to have been correct. Please refer to the Risk Factors section in AngloGold Ashanti's annual report on Form 20-F for the year ended 31 December 2014, filed with the United States Securities and Exchange Commission.

…are reflected in our tighter guidance.

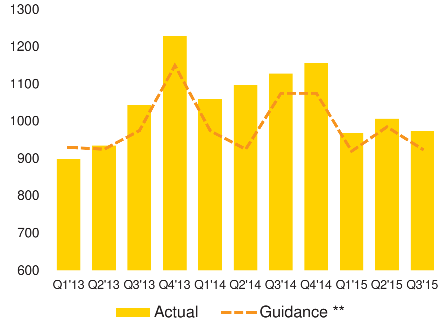
Q3 2015 conclusion

Venkat

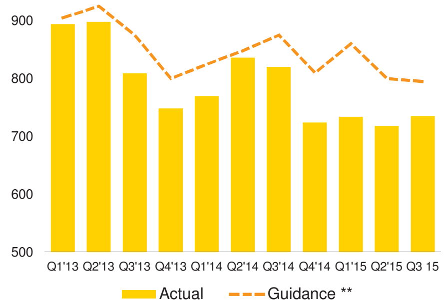
Operating performance vs. guidance

We continue to show consistent performance…

Production
'000oz



Cash costs
$/oz

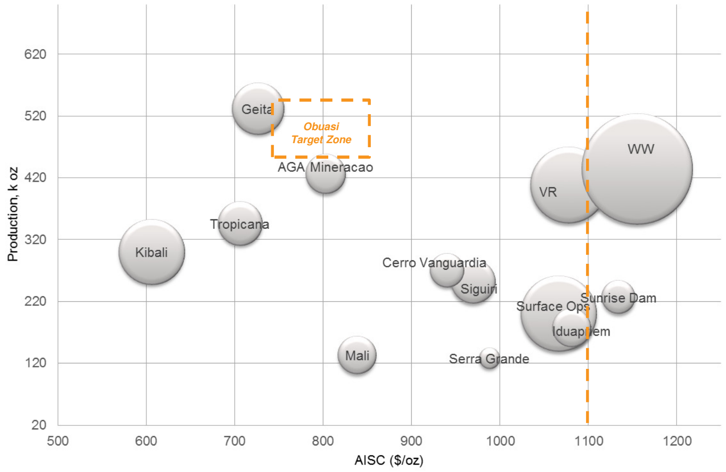


**Guidance refers to midpoints of guidance provided for each period

…in delivering on our commitments.

Portfolio improvements

Working to improve operating performances and adapt mine plans…



Bubble size = reserve size; Trailing 12-Month AISC and Production

…to move key assets further down the cost curve.

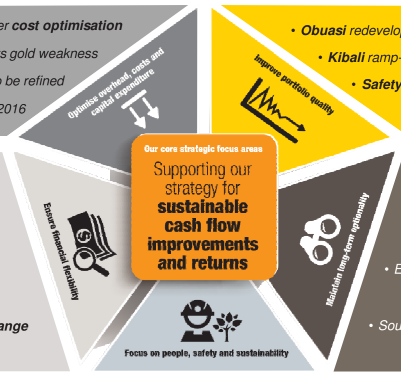
ANGLOGOLDASHANTI

Positioned to create shareholder value

After delivering on strategic objectives in 2015….

- ***P500*** *to seek further* ***cost optimisation***
- ***Currency benefit*** *offsets gold weakness*
- ***Overhead structures*** *continue to be refined*
- *Colombia* ***cost reduction*** *planned for 2016*

- ***Obuasi*** *redevelopment plan underway*
- ***Kibali*** *ramp-up continues*
- ***Safety*** *a key lever for SA improvement*
- *Brownfield project* ***opportunities evaluated***



- *CC&V sold for $820m, plus royalty*
- *Tender offer cuts* ***HY bond*** *by $779m;* ***reduces annual interest*** *by $66m*
- *Net debt: EBITDA of 1.56X -* ***in target range*** *of 1.5X through the cycle*

- ***Colombia*** *remains key* ***long-term opportunity***
- *Exploration* ***delivering ounces*** *into inventory*
- *South Africa potential through* ***reef boring***

- ***Safety*** *a key lever for* ***SA improvement***
- ***Safety gains*** *across International portfolio*
- *Focus on retaining* ***key talent***
- ***Successful*** *conclusion of* ***SA wage talks***

…we continue to unlock value in 2016.
