2021 Preliminary Results Short Form Announcement

Johannesburg, 22 February 2022 - AngloGold Ashanti Limited ("AngloGold Ashanti", "AGA" or the "Company") continued taking clear steps under CEO Alberto Calderon to ensure delivery on its strategic objectives, with an improved second-half performance complemented by changes to its leadership team and implementation of a new Operating Model.

The recovery from a difficult first half of 2021 continued, with a 12% step-up in production from operating assets* in the second half of the year versus the first half. Cash costs fell 8% over that period.

The Company continued to show exploration success, with the addition of 2.7Moz of new Ore Reserve in 2021, more than replacing depletion. A 3.4Moz new Mineral Resource was added at the Silicon project in the US, and the Obuasi mine in Ghana resumed production in January 2022 as planned. Free cash flow for the year was \$104m, more than reversing a first half outflow.

The new Operating Model is now being implemented, simplifying the organisational structure, eliminating duplication, and ensuring the operating sites are properly resourced to safely deliver planned production. This restructuring resulted in the reduction of functional support roles at mid- and senior management level across the global business, from 526 to 311, for an estimated annualised saving of \$40m.

"This new operating model brings a profound change to the business; it sharpens our focus on safe, consistent delivery, reduces wasteful effort and spending, and ensures clear, single-point accountability for meeting our commitments," Mr. Calderon said. "These are all essential elements for us to start closing the value gap with our peers."

The Company continued to reinforce its leadership team. In addition to Mr. Calderon's appointment in September, three key external appointments have been made in recent months adding significant experience in transformation, talent management, business improvement and mine planning, to a seasoned group of existing executives.

Terry Briggs, a 30-year veteran of the industry and currently Vice President: Planning at Newmont, has been appointed Chief Development Officer, with oversight of planning, exploration and business development; Lisa Ali, joins on 1 April 2022 as Chief People Officer after a long career with senior leadership roles at BP and most recently Newcrest; and Marcelo Godoy was appointed in November 2021 as Chief Technology Officer from a senior leadership role at Newmont, where he served for nine years and latterly headed up exploration.

* Excludes production performance at the Obuasi mine.
