HARMONY'S FULL-YEAR OPERATIONAL AND FINANCIAL PERFORMANCE ELEVATES COMPANY TO NEW HEIGHTS ON THE BACK OF HIGH RECOVERED GRADES, SUSTAINED OPERATIONAL EXCELLENCE AND RECORD GOLD PRICES

Johannesburg, South Africa. Thursday, 5 September 2024. Harmony Gold Mining Company Limited is pleased to report our financial and operational results for the financial year ended 30 June 2024.

KEY HIGHLIGHTS

for the financial year 2024 (FY24) vs the financial year 2023 (FY23)

- Proactive safety strategy with group LTIFR¹ of 5.53 from 5.49 per million hours worked, below 6 for third consecutive financial year
- 132% increase in headline earnings per share to 1 852 SA cents (99 US cents) per share from 800 SA cents (45 US cents) per share
- A final dividend^{2, 3} declared of 94 SA cents (5 US cents) per share
- Record operating free cash flow⁴, up 111% to R12 743 million (US\$681 million) driven by higher recovered grades and a higher average gold price received
- 6% increase in underground recovered grades to 6.11g/t from 5.78g/t
- 6% increase in total gold production to 48 578kg (1 561 815oz) from 45 651kg (1 467 715oz)
- Increase in production of 17% at Mponeng, 34% at Mine Waste Solutions and 17% at Hidden Valley due to improved recovered grades
- 1% increase in group all-in sustaining costs (AISC) to R901 550/kg (US\$1 500/oz) from R889 766/kg (US\$1 558/oz)
- 16% increase in average gold price received to R1 201 653/kg (US\$1 999/oz) from R1 032 646/kg (US\$1 808/oz)
- 25% increase in group revenue to R61 379 million (US\$3 282 million) from R49 275 million (US\$2 774 million)
- Operating free cash flow of R2 188 million (US\$117 million) generated by Hidden Valley due to excellent recovered grades, compared to R615 million (US\$35 million)
- Strong, flexible balance sheet now in a net cash position of R2 899 million (US\$159 million)
- Liquidity of R12 649 million (US\$695 million) in cash and undrawn facilities
- Copper represents 21% of total declared Mineral Resources of 136.5 million ounces (Moz); declared Mineral Reserves increased by 2% to 40.3Moz
- Expanded renewable programme to over 500MW from 363MW to support life-of-mine extensions

* The condensed consolidated financial statements for the full year ended 30 June 2024 on pages 25 to 45 have been reviewed by our external auditors, Ernst & Young Inc. Operating free cash flow, cash operating costs, total all-in sustaining costs, total all-in costs, reconciliation of non-GAAP measures and the convenience translation are considered to be pro forma financial information in terms of the JSE Listings Requirements and have been extracted, without adjustment, from the document titled Pro forma Financial Information for the year ended 30 June 2024. This document, along with the independent auditor's assurance report thereon, is available for inspection at the Company's registered offices.

¹ LTIFR – lost time injury frequency rate

² See dividend notice on page 10 for the details

³ Illustrative equivalent based on the closing exchange rate of R17.82/US\$1 as at 30 August 2024

⁴ Operating free cash flow = revenue – cash operating cost – capital expenditure - Franco-Nevada non-cash adjustment +/- impact of run-of-mine as per operating results

MESSAGE FROM THE CHIEF EXECUTIVE OFFICER

OVERVIEW

In the past financial year, Harmony delivered an exceptional combined performance across our operations. This achievement was a result of clear strategic intent and successful execution, enabling us to deliver above plan and capitalise on higher gold prices. This resulted in a record year for the Company. We aim to excel at what we do and I believe we achieved this goal.

While the gold price received continues to provide sustained tailwinds, the true driver of value has been our investment in quality ounces alongside our demonstrated capability in the regions we operate. As we transform into a global gold-copper producer, the foundations are in place which will enable us to continue on this growth trajectory through the extraction of safe, profitable ounces and value accretive acquisitions.

Sustainable mining and embedded environmental, social and governance (ESG) practices have resulted in a lower overall risk profile. Safety remains our priority. We continue to strive for zero harm through the proactive monitoring of leading indicators, the use of real-time data and the continual reinforcement of personal ownership of safety. Our long-term safety record continues to trend in the right direction. Our lost time injury frequency rate for FY24 is 5.53 per million hours worked from 5.49 in FY23. We remain on the right path, evidenced by our leading and lagging safety indicators which continue to improve.

Our strong operational metrics, which include grade, costs and production, have resulted in an expansion in operating free cash flow margins and improved profitability. Our ongoing investment in quality ounces is delivering the desired results resulting in improved cash certainty. We have created a long, diversified production profile with substantial gold and copper Mineral Resources of 136.5 million ounces and Mineral Reserves of 40.3 million ounces. This offers excellent Mineral Reserve conversion potential and cash generation, both now and in years to come.

Group production for this reporting period increased by 6% to 48 578kg (1 561 815oz) from 45 651kg (1 467 715oz) in FY23. This was mainly due to higher recovered grades at Mponeng, Hidden Valley and Mine Waste Solutions.

Recovered grades at the South African underground operations increased by 6% to 6.11g/t from 5.78g/t in the previous reporting period. This was driven by our high-grade operations, Mponeng and Moab Khotsong. Recovered grades at Hidden Valley increased by 33% to 1.52g/t from 1.14g/t in FY23 while Mine Waste Solutions delivered a 36% increase in recovered grade to 0.166g/t in this financial year from 0.122g/t.

MESSAGE FROM THE CHIEF EXECUTIVE OFFICER continued

Group revenue for this reporting period increased by 25% to R61 379 million (US\$3 282 million) from R49 275 million (US\$2 774 million). This increase was a result of the higher recovered grades and a 16% increase in average gold price received to R1 201 653/kg (US\$1 999/oz) from R1 032 646/kg (US\$1 808/oz) in FY23. Gold revenue increased by 23% to R58 269 million (US\$3 116 million) from R47 519 million (US\$2 675 million). The streaming contract with Franco Nevada concludes in the second quarter of the 2025 financial year. This contract resulted in Mine Waste Solutions' average gold price received for FY24 to be approximately 18% below the average gold price received at our other operations. Once this contract ends, we expect a further boost to gold revenue and cash flows.

Silver production increased by 39% to 114 240kg (3 672 899oz), from 82 093kg (2 639 344oz) in FY23. Hidden Valley contributes the majority of our silver production. The average silver price received also increased by 19% to R14 853/kg (US\$24.72/oz), from R12 505/kg (US\$21.89/oz) in FY23. As a result, we generated R1 667 million (US\$89 million) in silver revenue in FY24 compared to R1 021 million (US\$57 million) in the comparable reporting period.

Uranium is a by-product from the gold extraction process at Moab Khotsong. Uranium production for this reporting period increased by 13% to 267 667kg (590 104lb) from 237 438kg (523 461lb) in FY23. Year-on-year, the average uranium price received increased by 52% to US\$76.23/lb from US\$50.05/lb, resulting in uranium revenue of R866 million (US\$46 million) compared to R304 million (US\$17 million) in the previous reporting period.

Group operating free cash flows increased by 111% to R12 743 million (US\$681 million), from R6 031 million (US\$339 million). This is the highest operating free cash flow ever generated at Harmony. Operating free cash flow margins increased to 22% from 13% in the previous financial year. We believe these improved margins are sustainable as a result of higher recovered grades and the increase in contribution from our high-margin surface source operations.

Operating costs are actively managed and we again demonstrated that our costs remain under control. In US dollar terms, all-in sustaining costs decreased by 4% to \$1 500/oz mainly as a result of the higher recovered grades alongside a 5% depreciation in the average exchange rate from R17.76 to R18.70 against the US dollar. The higher by-product credits from silver and uranium provided a further offset to our costs per unit.

- Cash operating costs in FY24 increased by 3% (which is well below mining inflation of 9%), to R758 736/kg (US\$1 262/oz) from R735 634/kg (US\$1 288/oz)
- AISC increased by 1% to R901 550/kg (US\$1 500/oz) from R889 766/kg (US\$1 558/oz)
- All-in costs (AIC) increased by 3% to R969 085/kg (US\$1 612/oz) from R938 997/kg (US\$1 644/oz). This was mainly as a result of the ongoing major capital spent at Mine Waste Solutions to extend the Kareerand Tailings Storage Facility (TSF) and the Moab Khotsong extension project.

Effective capital allocation, good financial discipline and operational excellence have resulted in record operating free cash flows this financial year and remain critical for the success of our project execution as we continue creating long-term value for our shareholders and stakeholders.

It is important we continue development at our mature assets to maintain flexibility and optimise cash-generation over life-of-mine. Sustaining capital will therefore increase in FY25 as we increase development meters. While we are in a period of high-capital expenditure, capital intensity is affordable and our balance sheet has remained strong and flexible. We continue allocating the lion's share of our major capital to our South African underground high-grade mines and our South African surface source operations as we aim to create meaningful shareholder

value through improved returns on capital. The South African underground optimised assets continue to receive sustaining capital as we maintain flexibility and generate optimal operating free cash flows over the life of these assets.

Group capital expenditure for FY24 increased by 10% to R8 327 million (US\$445 million) from R7 598 million (US\$428 million) in FY23, primarily as a result of the Mine Waste Solutions TSF extension project. This project is progressing well and first deposition is imminent.

Our large capital projects include the Moab Khotsong and Mponeng extensions and Eva Copper (pending the outcome of the feasibility study update). To manage project execution risk, we have established a central projects team to ensure we deliver our projects on time, within budget and at the highest possible standards.

We remain in a meaningful net cash position with excellent liquidity as we build a war chest to fund our comprehensive project pipeline aimed at transforming Harmony into a global gold-copper company. With R12 649 million (US\$695 million) in available headroom through cash and undrawn facilities, we are well-positioned to execute on our project pipeline. US\$200 million (R3 747 million) was repaid on the US\$400 million facility during the financial year. We aim to keep net debt to EBITDA below 1 times and are fortunate to have a net cash position of R2 899 million (US\$159 million) as at the end of June 2024.

Basic earnings per share increased by 78% to 1 386 SA cents (74 US cents) compared to 780 SA cents (44 US cents) per share in the previous reporting period. Headline earnings per share increased by 132% to 1 852 SA cents (99 US cents) per share compared to 800 SA cents (45 US cents) per share in FY23.

Harmony's dividend policy is to pay a return of 20% of net free cash generated* to shareholders at the discretion of the board of directors. Therefore, we are pleased to announce a final dividend** of 94 SA cents (5 US cents) per share for this reporting period, bringing the total cash returned to shareholders for the financial year to R1 394 million.

* Net free cash is defined as operating free cash flow after capital, interest, tax, corporate and other expenses.

** The dividend was converted using a closing exchange rate of R17.82/US\$1 at 30 August 2024.

RESPONSIBLE STEWARDSHIP

Health and safety

We strive for continuous improvement through an iterative process to ensure we remain on track to achieve our goal of zero loss of life. We are focussing on reinforcing personal ownership of all aspects of safety. Risk management is embedded throughout Harmony and we identify and eliminate potential hazards in a proactive manner. The implementation and monitoring of real-time data points has given us better visibility and understanding of the key risks associated with our operations, enabling us to address leading indicators that may result in safety incidents.

As we continue on our safety journey, we should also recognise those achievements which reflect the tireless work which goes into creating a safe operating mine. Some notable milestones achieved in FY24 include:

- Joel (2 287 days), Moab Khotsong (687 days) and Masimong (2 416 days), each achieved over 3 million loss-of-life free shifts
- Target 1 (1 243 days) achieved over 1 million loss-of-life free shifts.

MESSAGE FROM THE CHIEF EXECUTIVE OFFICER continued

We are deeply saddened that seven of our colleagues lost their lives in mine-related accidents during the financial year. We pay our respects and send our heartfelt condolences to the families and loved ones of our colleagues who tragically passed away.

We have a holistic approach to healthcare and proactively manage occupational and non-occupational diseases, and the mental health of our employees and host communities.

Sustainable development

Responsible Stewardship is embedded in our operating model. Our sustainable development strategy aims to reduce risk while maximising opportunities, leaving a positive impact through shared value creation. Our strategic direction and decision making are guided by clear, measurable goals, while keeping our stakeholders' needs and interests top of mind.

Upholding the Harmony values at all times is integral to our success and we remain committed to living our five values both at home and at work. Our values are: Safety, Accountability, Achievement, Connectedness and Honesty.

We continue to receive positive external recognition for our embedded approach to sustainability and disclosure transparency. These include:

- inclusion in the FTSE4Good Index for the seventh consecutive year and in the top 5% of the sub-sector
- inclusion in the Bloomberg Gender-Equality Index for six consecutive years, evidence that we embrace gender diversity and inclusivity, and treat all our employees fairly, without bias or prejudice of any kind
- a score of 'A' from the CDP for our best practice water management strategy in 2023.

Our decarbonisation strategy considers climate change-related risks and opportunities, rebalancing our asset portfolio, driving energy efficiency, improving the reliability and sustainability of our energy mix, as well as adaptation to climate change. As at the end of FY24, we have reduced our energy consumption by a cumulative 1.9 terawatt hours. This translates to cumulative energy savings of R2 240 million (US\$143 million) or 2.1 million tonnes of carbon dioxide equivalents since 2016.

On the back of various life-of-mine extensions, we have had to revise our renewable energy programme and are pleased to announce an expanded renewable energy programme. Our previous plan included 363MW in installed capacity from renewable energy sources by financial year 2026. Our revised plan has increased this to over 500MW plus an opportunity for an additional 200MW through short-term purchase power agreements (PPA) by 2028.

We expect to break ground on Phase 2a of our renewable programme in the first quarter of the financial year 2025. The construction of this 100MW solar photovoltaic plant at Moab Khotsong will be funded partially through our existing green loan facility.

We remain committed to meeting our targets to reduce absolute Scope 1 and 2 emissions by 63% by financial year 2036 from a 2021 base year as approved by the Science Based Targets initiative (SBTi).

More information is available on our website. Our FY24 ESG and climate-related financial disclosure reports will be published on 25 October 2024.

** This amount was converted using the spot exchange rate of R18.19/US\$1 at 30 June 2024.*

OPERATIONAL AND FINANCIAL RESULTS FOR FY24

Our South African high-grade operations, Mponeng and Moab Khotsong, continue to demonstrate the importance of grade and once again delivered an outstanding set of operating results. The South African surface operations also delivered vastly improved operational metrics overall, with higher production from Mine Waste Solutions being the main driver of the improved contribution. Hidden Valley's strong performance was attributable to the high-grade 'Big Red' ore body which we have now mined out, as previously communicated. Not only did this drive higher recovered grades, but also resulted in record silver production.

1. South African underground operations: high-grade

Mponeng and Moab Khotsong delivered a combined 15% improvement in underground recovered grades to 9.02g/t in FY24 from 7.83g/t in FY23.

Production for FY24 increased by 9% to 15 350kg (493 512oz) compared to 14 117kg (453 871oz) in FY23.

At Mponeng, underground recovered grades increased by 18% to 9.94g/t in FY24 from 8.43g/t in FY23. This contributed to a 17% increase in gold production at Mponeng for the full year to 8 751kg (281 350oz) from 7 449kg (239 490oz) in FY23. We are currently mining through high-grade areas on both the eastern and western blocks on 123 and 126 levels, and therefore expect good grades to be sustained well into the 2025 financial year.

Early works on the Mponeng life-of-mine extension project continue, with the main project starting in the first quarter of the 2025 financial year. This project will access the Ventersdorp Contact Reef (VCR) and Carbon Leader Reef (CLR) orebodies below existing infrastructure. This will be achieved through the selective extraction of the high-grade VCR areas to the east and west, through independent accesses, while eliminating the requirement to mine the lower-grade fretted terrace in the geographical centre of the orebody. We will also mine the CLR at the TauTona shaft pillar, accessing this through the 75 level at Mponeng. This entire project extends the life of Mponeng to 20 years and added 2.34Moz in Mineral Reserves.

The Moab Khotsong life-of-mine extension project remains on schedule.

AISC for our high-grade underground operations remained largely flat year-on-year, increasing by 1% to R791 088/kg (US\$1 316/oz) in FY24 from R783 311/kg (US\$1 371/oz) in FY23.

Operating free cash flows from these two mines increased by 73% to R5 981 million (US\$320 million) in FY24 from R3 448 million (US\$194 million) in FY23, mainly due to the higher recovered grades and the higher average gold price received. Mponeng generated R3 817 million (US\$204 million) in operating free cash flows during this financial year compared to R2 139 million (US\$120 million) in FY23.

2. South African underground operations: optimised

Our South African optimised operations comprise Tshepong North, Tshepong South, Joel, Target 1, Masimong, Doornkop and Kusasaletu. These operations delivered a steady operating performance in FY24 supported by an improved year-on-year performance at Target 1 and Kusasaletu.

These assets offer good operational gearing and have helped enable transformative opportunities such as the acquisition of Moab Khotsong, Mponeng and related assets. While the optimised assets are typically more mature, they play a critical role in maintaining our social license to operate and in generating the internal capital which will be used in part to help fund our high-grade projects.

MESSAGE FROM THE CHIEF EXECUTIVE OFFICER *continued*

Production in FY24 from these operations was down 3% year-on-year at 19 061kg (612 826oz) compared to 19 641kg (631 474oz) in FY23.

Average underground recovered grades at these operations remained largely flat at 4.86g/t from 4.87g/t in the previous reporting period.

The AISC for the South African underground optimised operations increased by 12% to R1 110 814/kg (US\$1 848/oz) in FY24 from R989 249/kg (US\$1 732/oz) in FY23. This increase was mainly due to inflationary increases and lower production.

Despite the higher costs, operating free cash flows from these operations increased by 78% to R1 989 million (US\$106 million) from R1 115 million (US\$63 million) in the previous reporting period.

At current gold prices, these assets are generating meaningful returns and continue delivering significant socio-economic benefits. We will continue investing in these assets as long as we can mine both safely and profitably.

3. South African surface operations

Our South African surface assets which include Mine Waste Solutions, Phoenix, Central Plant Reclamation, Savuka tailings, the rock dumps and Kalgold, all delivered an excellent set of operating results. This affirms our decision to further invest in our surface retreatment assets.

The Kareerand TSF expansion project at Mine Waste Solutions is progressing as planned, with first deposition imminent. We are also in the process of bringing on a fourth processing stream at Mine Waste Solutions. This will increase the total processing capacity from 78 000 tonnes per day to 86 000 tonnes per day. This will only be possible once the Kareerand TSF extension is complete to accommodate the additional residue deposition.

Tailings retreatment presents a fantastic opportunity for Harmony due to the lower risk, high margins and positive ESG story associated with these operations. Harmony has an abundance of resources in old gold tailings dams in the Free State, North West and Gauteng regions. We are therefore continuing studies to determine the feasibility of converting 5.7 million ounces in Mineral Resources to Mineral Reserves in the Free State region. This is an excellent example of capital allocation which delivers both commercial and ESG benefits.

FY24 production from surface sources increased by 21% to 9 066kg (291 477oz) from 7 523kg (241 872oz) in FY23 mainly as a result of a 36% increase in recovered grades at Mine Waste Solutions and improved performance at Kalgold.

The South African surface operations' AISC for FY24 decreased by 8% to R703 730/kg (US\$1 171/oz) compared to R764 285/kg (US\$1 338/oz) in the previous reporting period. This was mainly due to a 17% increase in recovered grades to 0.21g/t from 0.18g/t in FY23 across these operations.

Operating free cash flows generated by these operations increased by 210% to R2 586 million (US\$138 million) in FY24 from R835 million (US\$47 million) in the previous reporting period. R1 352 million (US\$72 million) in major capital was deployed at Mine Waste Solutions. We expect to deploy another R1 198 million (US\$66 million) in major capital at Mine Waste Solutions in FY25 to complete the TSF expansion and bring the fourth stream and additional retreatment sources online.

4. International

Hidden Valley

Gold production in FY24 at Hidden Valley increased by 17% to 5 101kg (164 000oz) from 4 370kg (140 498oz) in FY23. Silver production also increased by 41% to 110 195kg (3 542 852oz) from 78 386kg (2 520 163oz) in FY23. The improved performance was on the back of significantly higher recovered grades from the Kaveroi saddle and Big Red areas, which have now been mined out.

Recovered grades in FY24 increased by 33% to 1.52g/t compared to 1.14g/t in the comparable reporting period. Recovered grades will be lower in FY25, now that we have commenced with mining and waste stripping in Stage 8.

AISC for FY24 declined by 20% to R814 375/kg (US\$1 352/oz) from R1 014 228/kg (US\$1 785/oz) due to the higher recovered grades and record silver production.

Hidden Valley generated operating free cash flows of R2 188 million (US\$117 million) in FY24 compared to R615 million (US\$35 million) in FY23. This contribution to the group's operating free cash flows, was the second highest after Mponeng.

Studies are underway to determine whether Hidden Valley can be extended beyond financial year 2028. Additional deposition capacity is being sought which could allow for a Stage 9 cutback. Total capital expenditure at Hidden Valley in FY25 remains elevated as we continue with the Stage 8 cutback, procure necessary replacement fleet and continue with TSF expansion work.

Wafi-Golpu project

Negotiations continue between Harmony, our joint venture partner Newmont Corporation and the Papua New Guinea Government regarding the terms of a Mining Development Contract (which is required for a Special Mining Lease). Harmony remains committed to permitting this Tier 1 copper-gold asset.

Eva Copper project

The feasibility study update for Eva is still underway. We received conditional grant funding of A\$20.7 million from the Queensland government after it had declared the Eva project as a 'Prescribed Project', given its strategic importance to the region. The grant funding, which will help accelerate development of this project, is subject to a number of conditions, including that Harmony reaches a positive final investment decision (FID) by January 2026. The grant of A\$20.7 million is earmarked for preparatory works at the project site, located 75 kilometres north of Cloncurry and 95 kilometres north-east of Mount Isa, on the traditional lands of the Kalkadoon People.

Since the acquisition, 82 000 metres have been drilled to grow the project's resource base. We have significantly de-risked this project and enhanced confidence in the resource estimates as we continue with the update of the feasibility study.

Harmony's current declared Mineral Resource for Eva Copper is 366 million tonnes (Mt) @ 0.40% copper (Cu) for 1 472 kilo tonnes (kt) of copper and 196Mt @ 0.07g/t gold (Au) for 440 kilo ounces (koz) of gold. This is a 1% decrease in copper and a 2% increase in gold from the previous Mineral Resource of 354Mt @ 0.42% Cu for 1 492kt of copper and 184Mt @ 0.08g/t Au for 431koz of gold.

As a result of the planned increase in milling throughput, we expect average annual copper production of between 50 000 tonnes and 60 000 tonnes at an AISC which lies in the middle of the global cost curve. This data is subject to the finalisation of the feasibility study.

Cost management

Total cash operating costs in FY24 increased by 10% to R36 858 million (US\$1 971 million) from R33 582 million (US\$1 890 million) in FY23. Labour and electricity continue to form the largest components of our cost base. Fixed labour cost escalations remain predictable as a result of the five-year wage agreement which was concluded in April 2024. Electricity tariffs are also regulated in South Africa and we have implemented various energy savings initiatives alongside our renewable energy programme to further manage electricity cost increases. Over 90% of our operating costs are in South African rand which has provided further benefit due to the depreciation against the US dollar. Our stringent planning cycle ensures cost increases remain predictable and in line with our planning parameters.

On a per-unit basis, cash operating costs increased by 3% to R758 736/kg (US\$1 262/oz) from R735 634/kg (US\$1 288/oz) in FY23.

Key factors impacting our cash operating costs year-on-year include:

- total labour costs increased by 9% mainly due to salary increases and higher production related bonuses
- electricity costs increased by 21% mainly as a result of higher annual tariff increases charged by Eskom
- royalties increased by 96% due to the higher revenue and profitability of our operations.

Foreign exchange gains and losses

A foreign exchange translation gain of R97 million (US\$5 million) was recognised in FY24 compared to a loss of R634 million (US\$36 million) in FY23. This was predominantly as a result of the strengthening of the South African rand to a closing exchange rate of R18.19/US\$1 at 30 June 2024 compared to R18.83/US\$1 in the previous reporting period, which had a positive impact on US dollar loan balances.

Taxation

A total taxation expense of R3 082 million (US\$165 million) was recognised for the group in FY24 compared to R1 723 million (US\$97 million) in FY23. This is a significant contribution to the countries in which we operate.

Current tax increased by 276% to R2 416 million (US\$129 million) from R643 million (US\$36 million) mainly due to the increase in production profits which resulted in higher taxable income.

Deferred tax decreased to R666 million (US\$36 million) in FY24 from R1 080 million (US\$61 million) in FY23 mainly as a result of the annual revision of the deferred tax rates resulting in a decreased rate at Mponeng.

Refer to note 5 in the financial statements.

Impairment of Target North Project

The impairment of R2 793 million (US\$154 million) was resultant of new preliminary Mineral Resource estimates, received by management during August 2024 for the Target North project. This was after completion of the surface exploration drilling programme which has been ongoing since 2019. Additional drilling information enabled a better understanding of the geological depositional and mineralisation models whereby constrained estimation domains could be used in the estimation process. The application of industry best practice estimation techniques indicated reduced ounces at a higher grade than the previous estimate.

Since 2007, Target North has been excluded from the reported Mineral Resources until such time that there is enough evidence for the Reasonable Prospect for Eventual Economic Extraction.

Refer to note 7 in the financial statements for details on the impairments on property, plant and equipment.

Contingent liability

The contingent consideration liability increased by R376 million (US\$21 million) due to the remeasurement of the liability relating to Mponeng as a result of the inclusion of R268 million (US\$15 million) for the Mponeng below-infrastructure royalty. This was partially offset by a payment of R108 million (US\$6 million) to AngloGold Ashanti relating to the original Mponeng consideration. Additionally, the liability relating to Eva Copper increased by R193 million (US\$11 million) as a result of changes in the assumptions used in the fair value measurement.

Derivatives and hedging

The South African rand gold price experienced a notable surge in the fourth quarter of the financial year, fluctuating between R1 350 000/kg and R1 470 000/kg. The US dollar gold price moved above US\$2 400/oz in the same quarter. This provided hedging opportunities for the group under the selective hedging approach as defined in our hedging strategy and the gold hedge book was filled up to the new higher hedge limits during the second half of FY24.

As previously communicated, we have expanded our hedging strategy to protect the group against adverse commodity and currency market fluctuations, reducing our market risk and supporting our capital and growth commitments. Gold collar hedging was introduced to our derivative programme.

As at 30 June 2024, we have hedged 638 000 ounces (19 844kg) with Rand gold forward contracts at an average forward price of R1 373 000/kg.

In this reporting period, we recorded a net gain on derivatives of R453 million (US\$24 million) compared to a net loss of R194 million (US\$11 million) in FY23. The gain on foreign exchange derivatives was mainly attributable to the floor rates of the zero cost collars and the average locked-in rates of the forward exchange contracts being higher than the spot exchange rate of R18.19/US\$1 at 30 June 2024.

Revenue includes a realised hedging loss of R1 265 million (US\$68 million) in FY24 compared to R184 million (US\$10 million) in FY23 relating to the realised effective portion of hedge-accounted gold derivatives.

Refer to notes 2 and 8 in the financial statements for details on the derivative programme.

Final dividend

In line with our capital allocation framework and dividend policy, and following on the payment of an interim dividend in April 2024, we have declared a final dividend of 94 SA cents (5 US cents) per share. This is on the back of the operating free cash generated throughout the financial year.

This, in addition to the interim dividend paid, translates to a full year dividend yield of approximately 1.4% based on our closing share price on 30 August 2024. The decision to pay a dividend is made on the basis that it will be sustainable and will not inhibit future expansion opportunities.

MINERAL RESOURCES AND MINERAL RESERVES

Harmony has a globally significant resource base which includes copper and offers excellent reserve conversion potential.

The company's attributable gold and gold equivalent Mineral Resources are declared as 136.5Moz as at 30 June 2024, a 1% decrease from the 137.8Moz declared as at 30 June 2023. The total gold contained in the Mineral Resources at the South African operations represents 66% of the company total. The Papua New Guinean assets represent 28% and Eva Copper in Australia represents 6% of Harmony's total gold and gold equivalent Mineral Resources as at 30 June 2024. Copper now represents 21% of our declared Mineral Resources.

Harmony's attributable gold and gold equivalent Mineral Reserves amount to 40.3Moz, a 2% increase from the 39.3Moz declared at 30 June 2023. This increase was mainly due to the Mponeng life-of-mine extension. The gold reserve ounces in South Africa represent 56%, while the Papua New Guinea gold and gold equivalent ounces represent 44% of Harmony's total Mineral Reserves as at 30 June 2024. The Australian gold and gold equivalent ounces attributable to Eva Copper will be declared once the feasibility study is concluded.

FY25 GROUP GUIDANCE

Year-on-year production guidance for the group is between 1 400 000 ounces and 1 500 000 ounces at an AISC of between R1 020 000/kg and R1 100 000/kg. Underground recovered grade for FY25 is guided at above 5.8g/t.

We remain conservative in our planning assumptions and it should be noted that much of the performance this past year was due to an overachievement at Hidden Valley, Mine Waste Solutions and Mponeng as a result of higher recovered grades. Guidance at our other operations remains largely unchanged. We do, however expect lower production from Doornkop in FY25 as plans at this mine have been revised to ensure we can continue mining both safely and profitably.

Our FY25 guidance reflects the higher capital expenditure required to sustain production and our growth plans. Capital expenditure remains manageable and affordable and ensures we continue our current production levels and strong free cash flow generation well into the future. As a result, capital expenditure in FY25 is expected to increase to R10 814 million (US\$592 million) mainly as a result of our investment in our major high-grade and surface retreatment projects which have improved the quality of our ounces. We are also increasing our total sustaining capital which includes the necessary fleet replacement at Hidden Valley. We are currently updating the Eva Copper feasibility study. Upon completion, we will provide an updated guidance on the project development costs and proposed funding structure.

We have confidence in our planning and cash flow assumptions as a result of the improvement in margins, predictable costs and affordable capital intensity. Our strong balance sheet and operational flexibility means we remain well positioned to maintain the momentum we have built.

Refer to assumptions in the summary update of our Mineral Resources and Mineral Reserves on page 11 for further detail. Also refer to our forward-looking statements on page 8 in this regard. Any forward-looking statements contained in these financial results have not been reviewed or reported on by Harmony's external auditors.

LOOKING AHEAD

After 45 years in the industry, I am retiring at the end of this calendar year. Looking back over the past eight years as CEO of Harmony, I am pleased that our goals and objectives have largely been achieved. This has been a monumental team effort and I have no doubt there is a solid foundation on which Harmony will continue going from strength to strength.

Our focus on embedding sustainability in all decision-making has enabled us to lower our overall risk profile. We continue to prioritise improving our safety record and I believe zero loss-of-life can be achieved by taking personal ownership of safety at all times.

Through operational excellence, we have improved our key operational metrics, including grade, production and costs. We continue focussing on enhancing safety and productivity throughout Harmony.

Through continued investment, we have created a long and diversified production profile with significant copper exposure through two international copper projects. Some of our most profitable operations now have commercial lives of at least 20 years and our significant Mineral Resource base offers further quality Mineral Reserve conversion potential for years to come.

We have a clear capital allocation framework which balances our growth aspirations and shareholder returns. This has helped us improve the quality of our ounces while building and maintaining the strong and flexible balance sheet necessary to progress and fund our key projects. We operate with financial discipline and aim to maintain a manageable level of gearing at all times. Our hedge programme and available headroom provides further downside protection to any adverse movements in the gold price as we progress our exciting project pipeline.

For over seven decades, Harmony has demonstrated resilience and its ability to extend the life of its assets and create value for all its stakeholders. This foundation has been built on Harmony's five values.

Our commitment to the countries in which we operate has ensured that current production levels can be sustained for many more years. Harmony remains an employer and partner of choice wherever we operate, and I believe our operating model presents one of the strongest ESG case studies globally. This is epitomised by 'Mining with Purpose'.

A special thank you to my team for their dedication and commitment towards achieving our goals. I would also like to thank our unions for their continued support. We remain grateful to our board, shareholders and other stakeholders for enabling us to position Harmony as a specialist gold producer with a growing international copper footprint.

Peter Steenkamp
Chief executive officer

FORWARD-LOOKING STATEMENTS

This booklet contains forward-looking statements within the meaning of the safe harbour provided by Section 21E of the Exchange Act and Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), with respect to our financial condition, results of operations, business strategies, operating efficiencies, competitive positions, growth opportunities for existing services, plans and objectives of management, markets for stock and other matters. These forward-looking statements, including, among others, those relating to our future business prospects, revenues, and the potential benefit of acquisitions (including statements regarding growth and cost savings) wherever they may occur in this booklet, are necessarily estimates reflecting the best judgment of our senior management and involve a number of risks and uncertainties that could cause actual results to differ materially from those suggested by the forward-looking statements. As a consequence, these forward-looking statements should be considered in light of various important factors, including those set forth in our integrated annual report. By their nature, forward-looking statements involve risk and uncertainty because they relate to future events and circumstances and should be considered in light of various important factors, including those set forth in this disclaimer. Readers are cautioned not to place undue reliance on such statements. Important factors that could cause actual results to differ materially from estimates or projections contained in the forward-looking statements include, without limitation: overall economic and business conditions in South Africa, Papua New Guinea, Australia and elsewhere; the impact from, and measures taken to address, Covid-19 and other contagious diseases, such as HIV and tuberculosis; high and rising inflation, supply chain issues, volatile commodity costs and other inflationary pressures exacerbated by the geopolitical risks; estimates of future earnings, and the sensitivity of earnings to gold and other metals prices; estimates of future gold and other metals production and sales; estimates of future cash costs; estimates of future cash flows, and the sensitivity of cash flows to gold and other metals prices; estimates of provision for silicosis settlement; increasing regulation of environmental and sustainability matters such as greenhouse gas emission and climate change, and the impact of climate change on our operations; estimates of future tax liabilities under the Carbon Tax Act (South Africa); statements regarding future debt repayments; estimates of future capital expenditures; the success of our business strategy, exploration and development activities and other initiatives; future financial position, plans, strategies, objectives, capital expenditures, projected costs and anticipated cost savings and financing plans; estimates of reserves statements regarding future exploration results and the replacement of reserves; the ability to achieve anticipated efficiencies and other cost savings in connection with past and future acquisitions, as well as at existing operations; fluctuations in the market price of gold and other metals; the occurrence of hazards associated with underground and surface gold mining; the occurrence of labour disruptions related to industrial action or health and safety incidents; power cost increases as well as power stoppages, fluctuations and usage constraints; ageing infrastructure, unplanned breakdowns and stoppages that may delay production, increase costs and industrial accidents; supply chain shortages and increases in the prices of production imports and the availability, terms and deployment of capital; our ability to hire and retain senior management, sufficiently technically-skilled employees, as well as our ability to achieve sufficient representation of historically disadvantaged persons in management positions or sufficient gender diversity in management positions or at Board level; our ability to comply with requirements that we operate in a sustainable manner and provide benefits to affected communities; potential liabilities related to occupational health diseases; changes in government regulation and the political environment, particularly tax and royalties, mining rights, health, safety, environmental regulation and business ownership including any interpretation thereof; court decisions affecting the mining industry, including, without limitation, regarding the interpretation of mining rights; our ability to protect our information technology and communication systems and the personal data we retain; risks related to the failure of internal controls; our ability to meet our environmental, social and corporate governance targets; the outcome of pending or future litigation or regulatory proceedings; fluctuations in exchange rates and currency devaluations and other macroeconomic monetary policies, as well as the impact of South African exchange control regulations; the adequacy of the Group's insurance coverage; any further downgrade of South Africa's credit rating and socio-economic or political instability in South Africa, Papua New Guinea, Australia and other countries in which we operate; changes in technical and economic assumptions underlying our mineral reserves estimates; geotechnical challenges due to the ageing of certain mines and a trend toward mining deeper pits and more complex, often deeper underground, deposits; and actual or alleged breach or breaches in governance processes, fraud, bribery or corruption at our operations that leads to censure, penalties or negative reputational impacts.

The foregoing factors and others described under "Risk Factors" in our Integrated Annual Report (www.har.co.za) and our Form 20-F should not be construed as exhaustive. We undertake no obligation to update publicly or release any revisions to these forward-looking statements to reflect events or circumstances after the date of this annual report or to reflect the occurrence of unanticipated events, except as required by law. All subsequent written or oral forward-looking statements attributable to Harmony or any person acting on its behalf are qualified by the cautionary statements herein. Any forward-looking statements contained in these financial results have not been reviewed or reported on by Harmony's external auditors.

Competent Person's statement

The information in this booklet that relates to Mineral Resources or Ore Reserves has been extracted from our Reserves and Resources statement published as at 30 June 2024. Harmony confirms that it is not aware of any new information or data that materially affects the information included in the statement, in the case of Mineral Resources or Mineral Reserves, that all material assumptions and technical parameters underpinning the estimates in the original release continue to apply and have not materially changed. Harmony confirms that the form and context in which the competent person's findings are presented have not been materially modified from the original release.

Eva Copper – The information in this announcement that relates to Mineral Resources or Ore Reserves has been extracted from the Copper Mountain Mining Corporation Mineral Reserve and Resource Estimate (as at 1 August 2022).

NOTICE OF FINAL GROSS CASH DIVIDEND

Our dividend declaration for the 12 months ended 30 June 2024 is as follows:

Declaration of final gross cash ordinary dividend no. 95

The Board has approved, and notice is hereby given, that a final gross cash dividend of 94 SA cents (5.27497 US cents*) per ordinary share in respect of the 12 months ended 30 June 2024, has been declared payable to the registered shareholders of Harmony on Monday, 14 October 2024.

In accordance with paragraphs 11.17(a)(i) to (x) and 11.17(c) of the JSE Listings Requirements the following additional information is disclosed:

- The dividend has been declared out of income reserves;
- The local Dividend Withholding Tax rate is 20%;
- The gross local dividend amount is 94.00000 SA cents (5.27497 US cents*) per ordinary share for shareholders exempt from the Dividend Withholding Tax;
- The net local dividend amount is 75.20000 SA cents per ordinary share for shareholders liable to pay the Dividend Withholding Tax;
- Harmony currently has 632 634 413 ordinary shares in issue (which includes 12 698 906 treasury shares); and
- Harmony's income tax reference number is 9240/012/60/0.

A dividend No. 95 of 94.00000 SA cents (5.27497 US cents*) per ordinary share, being the dividend for the 12 months ended 30 June 2024, has been declared payable on Monday, 14 October 2024 to those shareholders recorded in the share register of the company at the close of business on Friday, 11 October 2024. The dividend is declared in the currency of the Republic of South Africa. Any change in address or dividend instruction to apply to this dividend must be received by the company's transfer secretaries or registrar not later than Friday, 4 October 2024.

Dividends received by non-resident shareholders will be exempt from income tax in terms of section 10(1)(k)(i) of the Income Tax Act. The dividends withholding tax rate is 20%, accordingly, any dividend will be subject to dividend withholding tax levied at a rate of 20%, unless the rate is reduced in terms of any applicable agreement for the avoidance of double taxation (DTA) between South Africa and the country of residence of the shareholder.

Should dividend withholding tax be withheld at a rate of 20%, the net dividend amount due to non-resident shareholders is 75.20000 SA cents per share. A reduced dividend withholding rate in terms of the applicable DTA may only be relied on if the non-resident shareholder has provided the following forms to their CSDP or broker, as the case may be in respect of uncertificated shares or the company, in respect of certificated shares:

- (a) a declaration that the dividend is subject to a reduced rate as a result of the application of a DTA; and

- (b) a written undertaking to inform the CSDP or broker, as the case may be, should the circumstances affecting the reduced rate change or the beneficial owner cease to be the beneficial owner,

both in the form prescribed by the Commissioner for the South African Revenue Service. Non-resident shareholders are advised to contact their CSDP or broker, as the case may be, to arrange for the abovementioned documents to be submitted prior to the payment of the distribution if such documents have not already been submitted.

In compliance with the requirements of Strate Proprietary Limited (Strate) and the JSE Listings Requirements, the salient dates for payment of the dividend are as follows:

Last date to trade ordinary shares cum-dividend is	Tuesday, 8 October 2024
Ordinary shares trade ex-dividend	Wednesday, 9 October 2024
Record date	Friday, 11 October 2024
Payment date	Monday, 14 October 2024

No dematerialisation or rematerialisation of share certificates may occur between Wednesday, 9 October 2024 and Friday, 11 October 2024 both dates inclusive, nor may any transfers between registers take place during this period.

On payment date, dividends due to holders of certificated securities on the SA share register will either be electronically transferred to such shareholders' bank accounts or, in the absence of suitable mandates, dividends will be held in escrow by Harmony until suitable mandates are received to electronically transfer dividends to such shareholders.

Dividends in respect of dematerialised shareholdings will be credited to such shareholders' accounts with the relevant Central Securities Depository Participant (CSDP) or broker.

The holders of American Depositary Receipts (ADRs) should confirm dividend details with the depository bank. Assuming an exchange rate of R17.82/US\$1* the dividend payable on an ADR is equivalent to 5.27497 US cents for ADR holders before dividend tax. However, the actual rate of payment will depend on the exchange rate on the date for currency conversion.

* Based on an exchange rate of R17.82/US\$1 at 30 August 2024. However, the actual rate of payment will depend on the exchange rate on the date for currency conversion.

SUMMARY UPDATE OF HARMONY'S MINERAL RESOURCES AND MINERAL RESERVES

Harmony's statement of Mineral Resources and Mineral Reserves as at 30 June 2024 is produced in accordance with the South African Code for the Reporting of Exploration Results, Mineral Resources and Mineral Reserves (SAMREC), section 12.13 of the JSE Listings Requirements (as updated from time to time) and the requirements of the United States Securities and Exchange Commission (SEC) regulation S-K Subpart 1300. It should be noted that the Mineral Resources are reported inclusive of the Mineral Reserves. In our Form 20-F the Mineral Resources are reported exclusive of reserves. United States investors are urged to consider the disclosure in this regard in our Form 20-F which will be available on our website at www.harmony.co.za/invest/annual-reports on 31 October 2024.

This report provides a summary of the update, while the detailed statement of the Mineral Resources and Mineral Reserves will be published in the Integrated Annual Report on 25 October 2024, which will be available at www.harmony.co.za/invest. Refer to the website (www.harmony.co.za) for the updated reserves and resources tables as at 30 June 2024.

INTRODUCTION

Harmony's strategy is to produce safe, profitable ounces and increase margins. This includes delivering safely on our operational plans, reducing costs and improving productivity. Harmony's growth journey entails acquiring quality assets. In FY17, Harmony invested in the life-of-mine extension at Hidden Valley and in FY18 acquired and integrated the higher-grade Moab Khotsong operations. In FY21, Harmony acquired the remainder of the AngloGold Ashanti South African assets – Mponeng and related assets. In FY22, Harmony invested in the life-of-mine extension of the Moab Khotsong operation. In FY23, Harmony acquired the low-risk Eva Copper Project and surrounding exploration tenements from Copper Mountain Mining Corporation. In FY24, Harmony approved the investment in the life-of-mine extension of the Mponeng operation.

HARMONY – TOTAL

The company's attributable gold and gold equivalent Mineral Resources are declared as 136.5Moz as at 30 June 2024, a 1% decrease year-on-year from the 137.8Moz declared as at 30 June 2023. The total gold contained in the Mineral Resources at the South African operations represents 66% of the company total, with the Papua New Guinea operations representing 28% and Australian operations 6% of Harmony's total gold and gold equivalent Mineral Resources as at 30 June 2024.

Harmony's attributable gold and gold equivalent Mineral Reserves amount to 40.3Moz, a 2% increase from the 39.3Moz declared at 30 June 2023. The gold reserve ounces in South Africa represent 56%, while the Papua New Guinea gold and gold equivalent ounces represent 44% of Harmony's total Mineral Reserves as at 30 June 2024. The Australian gold and gold equivalent ounces will be declared once the feasibility study is concluded.

South Africa

South African underground operations

The company's Mineral Resources at the South African underground operations as at 30 June 2024 are 76.8Moz (240.2Mt at 9.94g/t), an increase of 0.5% year-on-year from the 76.4Moz (237.4Mt at 10.01g/t) declared as at 30 June 2023. This increase is mainly due to an increase in Mineral Resources at the Tshepong North, Mponeng and Doornkop operations as result of geological model changes.

The company's Mineral Reserves at the South African underground operations as at 30 June 2024 are 12.9Moz (59.6Mt at 6.72g/t), an increase of 23% year-on-year from the 10.4Moz (50.0Mt at 6.50g/t) declared as at 30 June 2023. The increase in ounces is mainly as a result of the Mponeng extension project.

South African surface operations, including Kalgold

The company's Mineral Resources at the South African surface operations as at 30 June 2024 are 13.7Moz (1 544.4Mt at 0.28g/t), a decrease of 2% mainly due to normal depletion that was partially offset by the increase of Mineral Resources at the Kalgold operation.

The company's Mineral Reserves at the South African surface operations as at 30 June 2024 are 9.6Moz (1 143.2Mt at 0.26g/t) a decrease of 1% mainly due to normal depletion that was partially offset by the increase of Mineral Resources at the Kalgold operation as result of the change in the life-of-mine strategy.

Papua New Guinea

The company's attributable gold and gold equivalent Mineral Resources at the Papua New Guinea operations as at 30 June 2024 are 38.2Moz, a decrease of 3% year-on-year from the 39.3Moz declared as at 30 June 2023. This decrease is mainly due to normal depletion and a decrease in gold equivalents due to commodity price changes.

The company's gold and gold equivalent Mineral Reserves at the Papua New Guinea operations as at 30 June 2024 are 17.7Moz, a decrease of 8% year-on-year from the 19.2Moz declared as at 30 June 2023. The decrease is mainly due to normal depletion, geological model changes and a decrease in gold equivalents due to commodity price changes.

Australia

The company's gold and gold equivalent Mineral Resources at the Australian operations as at 30 June 2024 are 7.8Moz, a decrease of 4% year on year from the 8.1Moz declared as at 30 June 2023. The decrease is mainly due to geological model changes and a decrease in gold equivalents due to commodity price changes. The company's gold and gold equivalent Mineral Reserves at the Australian operations will be declared once the feasibility study is concluded.

ASSUMPTIONS

In converting the Mineral Resources to Mineral Reserves, the following commodity prices and exchange rates were applied:

- A gold price of US\$1 772/oz
- An exchange rate of R18.26/US\$
- The above parameters resulted in a Rand/kg gold price of R1 040 000/kg for the South African assets
- The Hidden Valley mine and the Wafi-Golpu project used commodity prices of US\$1 772/oz Au, US\$23.00/oz Ag and US\$4.00/lb Cu at an exchange rate of AUD1.42 per US\$
- Gold equivalent ounces are calculated assuming US\$1 772/oz Au, US\$4.00/lb Cu and US\$23.00/oz Ag, and assuming a 100% recovery for all metals.

SUMMARY UPDATE OF HARMONY'S MINERAL RESOURCES AND MINERAL RESERVES continued

Independent review

Harmony's South African Mineral Resources and Mineral Reserves at Mponeng, Doornkop and Joel as well as the group SAMREC statement were independently reviewed by The Mineral Corporation for compliance with SAMREC.

Note: Au = gold; Cu = copper; Ag = silver, Mo = molybdenum, Moz = million ounces

* Represents Harmony's equity portion of 50%

** In instances where individual deposits may contain multiple valuable commodities with a reasonable expectation of being recovered (for example, gold and copper in a single deposit), Harmony computes a gold equivalent to more easily assess the value of the deposit against gold-only mines. Harmony does this by calculating the value of each of the deposits' commodities, then dividing the product by the price of gold. For example, the gold equivalent ounces for the copper portion of a deposit would be calculated as follows: (copper pounds x copper price per pound)/gold price per ounce. All gold equivalent calculations are done using metal prices and parameters as stipulated above

Note: Rounding of numbers may result in slight computational discrepancies

EXPLORATION

Our exploration strategy is to predominantly pursue brownfields exploration targets close to existing infrastructure. This will drive short- to medium-term organic ore reserve replacement and growth to support our current strategy of increasing quality ounces and mitigate the risk of a depleting ore reserve base.

Key workstreams underpinning the FY24 exploration programme include:

- resource extension and greenfield exploration at Eva Copper
- brownfield exploration at Hidden Valley, Kerimenge and Kalgold to optimise existing open pit operations and extend mine life
- brownfield exploration at our underground operations in South Africa
- reviewing exploration opportunities as part of our new business strategy.

A detailed report of the Exploration Results will be provided as part of the suite of annual reports to be published on 25 October 2024.

LEGAL ENTITLEMENT TO THE MINERALS BEING REPORTED UPON

Harmony's South African operations operate under new order mining rights in terms of the Minerals and Petroleum Resources Development Act of 2002 (Act No. 28 of 2002) (MPRDA). In Papua New Guinea, Harmony operates under the Independent State of Papua New Guinea Mining Act 1992. All required operating permits have been obtained, and are in good standing. The legal tenure of each operation and project has been verified to the satisfaction of the accountable Competent Person.

¹Includes a non-cash consideration to Franco-Nevada (Jun 24:R323.276m, Jun 23:R337.614m) under Mine Waste Solutions, excluded from the gold price calculation.

²Excludes run-of-mine costs for Kalgold (Jun 24:-R1.513m, Jun 23:-R9.793m) and Hidden Valley (Jun 24:-R16.809m, Jun 23:-R39.628m).

Operating free cash flow = revenue - cash operating cost - capital expenditure - Franco-Nevada non-cash adjustment +- the impact of run-of-mine

NON-GAAP MEASURES (RAND/METRIC)

The information presented in this report contains non-GAAP measures. The company presents the following non-GAAP measures: All-in sustaining cost, all-in sustaining costs per kilogram, all-in cost, cash operating costs, operating free cash flow. These measures should not be considered by investors in isolation or as an alternative to production costs, cost of sales, or any other measure of financial performance calculated in accordance with IFRS. Rounding differences may occur in the below reconciliations provided.

The calculations of these non-GAAP measures may vary significantly among gold mining companies and, by themselves, do not necessarily provide a basis for comparison with other gold mining companies. Nevertheless, Harmony believes that these measures are useful indicators to investors and management as they provide an indication of profitability, efficiency and cash flows, the trend in costs as the mining operations mature over time on a consistent basis and an internal benchmark of performance to allow for comparison against other mines, both within the group and at other gold mining companies.

The following is a reconciliation of total all-in sustaining costs, as a non-GAAP measure, to the nearest comparable GAAP measure, cost of sales:

Figures in million	Year ended	
	30 June 2024 (Unaudited)	30 June 2023 (Unaudited)
Cost of sales	47 233	39 535
Amortisation and depreciation	(4 642)	(3 454)
Rehabilitation expenditure	(3)	(32)
Care and maintenance costs of restructured shafts	(246)	(227)
Employment termination and restructuring costs	(86)	(597)
Share-based payments	(171)	(51)
Impairment of assets	(2 793)	—
Toll treatment costs	(420)	(323)
By-products credits	(2 533)	(1 325)
Stripping activities	892	1 514
Local economic development expenditure	165	189
Corporate, administration and other expenditure costs	1 140	1 044
Capital expenditure (OCD)	2 547	2 614
Capital expenditure (exploration, abnormal expenditure and shaft capital)	1 895	1 402
Other	496	364
Total all-in sustaining costs	43 474	40 653
Per kilogram calculation:		
Kilograms sold	48 222	45 690
Total all-in sustaining costs per kilogram	901 550	889 766

The following is a reconciliation of total all-in costs, as a non-GAAP measure, to the all-in sustaining costs, which has been reconciled above to the nearest comparable GAAP measure, cost of sales:

Figures in million	Year ended	
	30 June 2024 (Unaudited)	30 June 2023 (Unaudited)
Total all-in sustaining costs	43 474	40 653
Social expenditure (non-sustaining)	47	35
Exploration (non-sustaining)	216	146
Capital expenditure (exploration, abnormal expenditure and shaft capital) (non-sustaining)	2 994	2 068
Other (non-sustaining)	—	1
Total all-in costs	46 731	42 903
Per kilogram calculation:		
Kilograms sold	48 222	45 690
Total all-in costs per kilogram	969 085	938 997

The following is a reconciliation of total cash operating costs, as a non-GAAP measure, to the nearest comparable GAAP measure, cost of sales:

Figures in million	Year ended	
	30 June 2024 (Unaudited)	30 June 2023 (Unaudited)
Cost of sales	47 233	39 535
Amortisation and depreciation	(4 642)	(3 454)
Rehabilitation expenditure	(3)	(32)
Care and maintenance costs of restructured shafts	(246)	(227)
Employment termination and restructuring costs	(86)	(597)
Share-based payments	(171)	(51)
Impairment of assets	(2 793)	—
By-products credits	(2 533)	(1 325)
Gold and uranium inventory movement	468	894
Other	(369)	(1 161)
Total cash operating costs	36 858	33 582
Per kilogram calculation:		
Kilogram produced	48 578	45 651
Total cash operating costs per kilogram	758 736	735 634

NON-GAAP MEASURES (RAND/METRIC) continued

The following is a reconciliation of total operating free cash flows, as a non-GAAP measure, to the nearest comparable GAAP measure, gross profit:

Figures in million	Year ended	
	30 June 2024 (Unaudited)	30 June 2023 (Unaudited)
Gross profit	14 146	9 740
Toll treatment services	(576)	(430)
Toll treatment costs	420	323
Impairment of assets	2 793	—
Amortisation and depreciation	4 642	3 454
Other cost of sales items	455	892
Production profit	21 880	13 979
Consideration from streaming contract	(323)	(338)
Gold and uranium inventory movement	(468)	(41)
Run-of-mine adjustment and deferred stripping	(19)	29
Total capital expenditure	(8 327)	(7 598)
Total operational free cash flows	12 743	6 031

INDEPENDENT AUDITOR'S REVIEW REPORT ON THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2024

TO THE SHAREHOLDERS OF HARMONY GOLD MINING COMPANY LIMITED

We have reviewed the condensed consolidated financial statements of Harmony Gold Mining Company Limited, contained in the accompanying FY24 Results booklet on pages 25 to 45, which comprise the condensed consolidated balance sheet as at 30 June 2024, the condensed consolidated income statement, statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended and selected explanatory notes.

Directors' Responsibility for the Condensed Consolidated Financial Statements

The directors are responsible for the preparation and presentation of these condensed consolidated financial statements in accordance with the requirements of the JSE Limited Listings Requirements for condensed financial statements, as set out in note 1 to the condensed consolidated financial statements, and the requirements of the Companies Act of South Africa, and for such internal control as the directors determine is necessary to enable the preparation of the condensed consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express a conclusion on these condensed consolidated financial statements. We conducted our review in accordance with International Standard on Review Engagements (ISRE) 2410, which applies to a review of historical information performed by the independent auditor of the entity. ISRE 2410 requires us to conclude whether anything has come to our attention that causes us to believe that the condensed consolidated financial statements are not prepared in all material respects in accordance with the applicable financial reporting framework. This standard also requires us to comply with relevant ethical requirements.

A review of the condensed consolidated financial statements in accordance with ISRE 2410 is a limited assurance engagement. We perform procedures, primarily consisting of making inquiries of management and others within the entity, as appropriate, and applying analytical procedures, and evaluate the evidence obtained.

The procedures performed in a review are substantially less than those performed in an audit conducted in accordance with International Standards on Auditing. Accordingly, we do not express an audit opinion on these condensed consolidated financial statements.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the condensed consolidated financial statements of Harmony Gold Mining Company Limited for the year ended 30 June 2024 are not prepared, in all material respects, in accordance with the requirements of the JSE Limited Listings Requirements for condensed financial statements, as set out in note 1 to the condensed consolidated financial statements, and the requirements of the Companies Act of South Africa.

Other matter – Prior period audited by another auditor

The annual financial statements of Harmony Gold Mining Company Limited for the year ended 30 June 2023 were audited by another auditor who expressed an unmodified opinion on those financial statements on 25 October 2023.

The accompanying notes are an integral part of these condensed consolidated financial statements.

The condensed consolidated financial statements (condensed consolidated financial statements) for the year ended 30 June 2024 have been prepared by Harmony Gold Mining Company Limited's corporate reporting team headed by Michelle Kriel CA(SA). This process was supervised by the financial director, Boipelo Lekubo CA(SA) and approved by the board of Harmony Gold Mining Company Limited on 4 September 2024.

These condensed consolidated financial statements have been reviewed by the group's external auditor, Ernst & Young Inc. The unmodified review report is included on page 23 and 24. The auditor's report does not necessarily report on all of the information contained in these results. Shareholders are therefore advised that in order to obtain a full understanding of the nature of the auditor's engagement they should refer to the auditor's report.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 JUNE 2024 (RAND)

1. ACCOUNTING POLICIES

Basis of accounting

The condensed consolidated financial statements for the year ended 30 June 2024 have been prepared in accordance with and contain information required by IAS 34 *Interim Financial Reporting*, the JSE Limited Listings Requirements and the requirements of the Companies Act no. 71 of 2008 of South Africa. The JSE Listings Requirements require condensed financial statements to be prepared in accordance with the framework concepts and the measurement and recognition requirements of International Financial Reporting Standards (IFRS accounting standards) as issued by the International Accounting Standards Board (IASB), the information required by Financial Reporting Pronouncements as issued by the Financial Reporting Standards Council and SAICA Financial Reporting Guides as issued by the Accounting Practices Committee. The accounting policies applied in the preparation of the condensed consolidated financial statements are in terms of IFRS accounting standards and are consistent with those applied in the previous audited consolidated annual financial statements. There were no new standards, amendments to standards or interpretations that became effective that had a material impact on the group's results or financial position.

The condensed consolidated financial statements have been prepared to the nearest million and rounding may cause differences.

The condensed consolidated financial statements have been prepared on a going concern basis.

2. REVENUE

Figures in million	Year ended	
	30 June 2024 (Reviewed)	30 June 2023 (Audited)
Commodities		
Gold ¹	59 212	47 366
Silver ²	1 667	1 021
Uranium ³	866	304
	61 745	48 691
Toll treatment services ⁴	576	430
Revenue from contracts with customers	62 321	49 121
Consideration from streaming contract ⁵	323	338
Hedging loss ⁶	(1 265)	(184)
Total revenue⁷	61 379	49 275

¹ The increase in gold revenue during the 2024 financial year is due to the average dollar gold price increasing by 10.6%, combined with a 5.5% increase in gold sold from 45 690kg to 48 222kg. The weakening of the Rand/US\$ exchange rate from an average of R17.76/US\$ to R18.70/US\$ resulted in a 5.3% increase in revenue.

² Silver is mainly derived from the Hidden Valley mine in Papua New Guinea. The increase in silver revenue in the 2024 financial year is mainly due to an increase in production of 39.2% to 114 240kg from 82 093kg in 2023. In addition, the average dollar silver price increased by 12.9% from US\$21.89/oz in the 2023 year to US\$24.72/oz.

³ Uranium is derived from the Moab Khotsong operation. The increase is driven by kilograms produced and the average uranium price. Production increased by 12.7% to 267 667kg from 237 438kg in June 2023, together with an increase in the average uranium price of 59.2% to R3 121/kg from R1 960/kg.

⁴ Relates to services rendered for the treatment of third-party gold-bearing material at the Doornkop and Moab Khotsong operations. Production from third parties increased from 2 392kg in 2023 to 2 840kg in 2024 resulting in an increase in toll treatment services income of R116 million while management fees increased by R30 million.

⁵ Relates to the recognition of non-cash consideration recognised as part of revenue for the streaming arrangement.

⁶ Relates to the realised effective portion of the hedge-accounted gold derivatives. The average gold market spot price during the 2024 financial year was R1 249 344/kg (2023: R1 045 527/kg) compared to the average forward price of matured contracts of R1 134 735/kg (2023: R1 028 764/kg). Refer to note 8 for further information.

⁷ A geographical analysis of revenue is provided in the segment report.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 30 JUNE 2024 (RAND)

3. COST OF SALES

Figures in million	Year ended	
	30 June 2024 (Reviewed)	30 June 2023 (Audited)
Production costs – excluding royalty ¹	37 646	34 215
Royalty expense ²	1 277	651
Amortisation and depreciation ³	4 642	3 454
Impairment of assets ⁴	2 793	—
Rehabilitation expenditure	3	32
Care and maintenance cost of restructured operations	246	227
Employment termination and restructuring ⁵	86	597
Share-based payments	171	51
Toll treatment costs	420	323
Other	(51)	(15)
Total cost of sales	47 233	39 535

¹ Production costs increased during the 2024 year, mainly due to inflationary pressures on costs including labour, contractors and electricity. Increased production-based bonuses also contributed to higher labour costs. A decrease in stripping activities of Hidden Valley's stage 7 also impacted the total, resulting in a lower credit to production costs of R676 million compared to R1 330 million for the 2023 year.

² The royalty tax increased due to a higher rate being applied due to higher profits, as well as the increased revenue base to which it is applied.

³ Higher production at the Hidden Valley and Kalgold operations led to increased depreciation, primarily for stripping activities, with an increase of R535 million year on year. A further increase relates to assets brought into use during the year, in addition to the impact of the increased production and the year-on-year change in the reserve tonnes which is used to calculate depreciation based on the units-of-production method.

⁴ During the 2024 year, an impairment was recognised for the property, plant and equipment of Target North. Refer to note 7 for further details.

⁵ The decrease was as a result of fewer employees taking up voluntary severance packages compared to the 2023 year. The higher costs in 2023 were attributable to the voluntary severance packages that were taken up following the disaggregation of the Tshepong Operations into Tshepong North and Tshepong South and the closure of Bambanani in June 2022.

4. OTHER INCOME STATEMENT ITEMS

Exploration expenditure

An increase in exploration expenditure of R541 million, mainly due to costs incurred for: the updated feasibility study of the Eva Copper project, a significant drill program and the start of early work site activities.

Other operating expenses

The majority of the increase in other operating expenses is attributable to the remeasurement of the contingent consideration liability relating to Mponeng of R291 million. This is mainly as a result of the addition of the Mponeng below-infrastructure royalty following the approval in February 2024 of the Mponeng life-of-mine extension and deepening project. Additionally, Eva Copper contingent consideration increased by R193 million. Refer to note 13 for details on the assumptions used in the fair value measurement.

5. TAXATION

Current taxation

The increased current tax expense is mainly attributable to mining taxes recognised for majority of the group's operations. The increased gold price realised resulted in a significant increase in the profitability of the group's operations.

The following legal entities contributed significantly to the current tax expense:

Figures in million	Year ended	
	30 June 2024 (Reviewed)	30 June 2023 (Audited)
Harmony Gold Mining Company Limited (Harmony Company)	241	—
Golden Core Trade and Invest (Proprietary) Limited (Mponeng)	1 129	272
Freegold (Harmony) (Proprietary) Limited (Freegold)	235	—
Harmony Moab Khotsoong Operations (Proprietary) Limited (Moab)	539	260

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS continued

FOR THE YEAR ENDED 30 JUNE 2024 (RAND)

5. TAXATION continued

Deferred taxation

The movement in the net deferred tax liability is mainly attributable to an increase in net taxable temporary differences as well as in deferred tax rates for the majority of the group's South African mining companies. The amount recognised at 30 June 2024 is as follows:

Figures in million	At	
	30 June 2024 (Reviewed)	30 June 2023 (Audited)
Balance at beginning of year	2 105	1 383
Expense per income statement (a)	666	1 080
Tax expense/(credit) directly charged to other comprehensive income (b)	40	(358)
Balance at end of year	2 811	2 105
Deferred tax asset per balance sheet (c)	(140)	(189)
Deferred tax liability per balance sheet	2 951	2 294

(a) The main contributors to the increases were:

- Increase of temporary differences related to the carrying value of property, plant and equipment resulted in an increase of R510 million in the deferred tax expense (2023: R377 million increase)
- Unwinding of temporary differences related to the utilisation of unredeemed capital expenditure and assessed loss balances resulted in an increase of R74 million (2023: R169 million increase) and R120 million (2023: R9 million increase) in the deferred tax expense, respectively
- The change in deferred tax rates of the remaining legal entities in the group, applied to balances excluding hedge accounted derivatives, resulted in an increase in the deferred tax expense and liability to the amount of R 233 million (2023: R444 million increase)
- The change in deferred tax rate of Mponeng from 17.7% to 8.1%, applied to balances excluding hedge accounted derivatives, resulted in a decrease in the deferred tax expense and liability to the amount of R 379 million (2023: R144 million increase).

(b) The movement in the net derivative position (refer to note 8) resulted in an increase of R39 million (2023: R359 million decrease) in the net deferred tax liability.

(c) As at 30 June 2024, a deferred tax asset was recognised in Harmony Company. A deferred tax asset continues to be recognised as it is probable that sufficient future taxable profits will be available against which the remaining deductible temporary differences existing at the reporting date can be utilised.

6. EARNINGS PER ORDINARY SHARE

	Year ended	
	30 June 2024 (Reviewed)	30 June 2023 (Audited)
Weighted average number of shares (million)	619	618
Weighted average number of diluted shares (million) ¹	630	620
Total earnings per share (cents):		
Basic earnings	1 386	780
Diluted earnings ¹	1 364	777
Headline earnings	1 852	800
Diluted headline earnings	1 822	796

¹ The increase in the weighted average number of diluted shares is as a result of the significant increase in the Harmony share price during the year. This impacted the base as well as the percentage applied to it to determine the bonus element. As a result, there are a larger number of dilutive shares across all active shares schemes, with the exception of the new ESOP scheme, which is anti-dilutive. This, combined with the 2023 deferred share plan implemented in September 2023, resulted in an increase in the diluted shares.

Headline earnings	11 474	4 941

7. PROPERTY, PLANT AND EQUIPMENT

Additions to property, plant and equipment

Refer to note 14 for capital expenditure related to property, plant and equipment and additions from stripping activities during the year ended 30 June 2024.

Foreign exchange impact

The foreign exchange translation movement on property, plant and equipment from the consolidation of the group's foreign operations resulted in a decrease of R1 003 million for the year ended 30 June 2024.

Depreciation of property, plant and equipment

Depreciation recognised on property, plant and equipment amounted to R4 628 million for the year ended 30 June 2024. Refer to note 3.

Impairment of property, plant and equipment

At 30 June 2024, management performed an assessment for indicators of impairment as well as indicators of reversal of previously recorded impairment losses in terms of IAS 36 *Impairment of Assets*. Specific circumstances surrounding each of the individual cash generating units (CGUs) were considered in this assessment in order to identify significant changes in the current financial year.

The Target 1 and Doornkop CGUs experienced operational issues during the year ended 30 June 2024. Additionally, there were significant adverse changes to Doornkop's life-of-mine (LOM) plan. These operational issues and the changes in the LOM plan of Doornkop were considered to be indicators of potential impairment and therefore an impairment assessment was performed for the Target 1 and Doornkop CGUs.

Subsequent to 30 June 2024, management received information relating to the preliminary results of the exploration drilling programme conducted for Target North. These preliminary results indicated that a decrease of the mineral resource estimation attributable to Target North is likely. The decrease in the attributable ounces indicated by the preliminary results constitutes an indication of impairment. Even though the information was received after the reporting date, it has been assessed to be an adjusting event in terms of IAS 10, *Events after the Reporting Date*, as it provides more reliable information of circumstances that already existed as at 30 June 2024. Therefore an impairment assessment was also performed for Target North.

For the 2023 financial year, impairment assessments were performed for the Target 1, Kalgold and Kusasaletu CGUs as a result of the operational issues experienced.

The recoverable amounts for these CGUs were determined on a fair value less cost to sell basis using assumptions in the discounted cash flow models and attributable resource values. These are fair value measurements classified as level 3 within the fair value hierarchy.

Critical accounting estimates and judgements

The recoverable amount of mining assets is determined utilising real discounted future cash flows. Where insufficient information is available to value a resource base or undeveloped property on a discounted cash flow approach, a gold resource multiple valuation is applied which is a market-based valuation technique. In determining the commodity prices and exchange rates assumptions to be used, management assesses the short-, medium- and long-term views of several reputable institutions. The long-term price was determined as part of the annual budgeting process and is used in the life-of-mine plans and is also the cut-off price for calculating reserves included in the declaration of resources and reserves in terms of the South African Code for the Reporting of Exploration Results, Mineral Resources and Mineral Reserves (SAMREC). The resource multiple values have remained consistent with the prior year, as no new market transactions have taken place in the South African gold mining industry that would provide more recent information compared to prior year information.

Post-tax real discount rates of 10.7% and 12.2% were used to determine the recoverable amounts for the Doornkop and Target 1 CGUs, respectively. In 2023, post-tax real discount rates ranging between 11.7% and 13.2% were used for the CGUs tested. No material difference in recoverable amounts is expected should future cash flows be discounted on a pre-tax basis. The recoverable amounts of Target North and Doornkop's Kimberley reef have been determined using resource multiple valuations.

FOR THE YEAR ENDED 30 JUNE 2024 (RAND)

7. PROPERTY, PLANT AND EQUIPMENT continued

Impairment of property, plant and equipment continued

The commodity price, exchange rate and resource multiple assumptions used in the impairment assessments are as follows:

	Year ended	
	30 June 2024 (Reviewed)	30 June 2023 (Audited)
US\$ gold price per ounce		
– Year 1	2 258	1 932
– Year 2	2 173	1 844
– Year 3	2 049	1 725
– Long term (Year 4 onwards)	1 772	1 582
Exchange rate (R/US\$)		
– Year 1	18.39	18.28
– Year 2	17.96	17.44
– Year 3	18.36	17.13
– Long term (Year 4 onwards)	18.26	16.22
Rand gold price (R/kg)		
– Year 1	1 335 000	1 135 000
– Year 2	1 255 000	1 034 000
– Year 3	1 209 000	950 000
– Long term (Year 4 onwards)	1 040 000	825 000
Resources multiples (US\$/oz) (underground operations)		
Measured	16.50	n/a
Indicated	9.00	n/a
Inferred	3.60	n/a

Included in the discounted cash flow models used for determining recoverable amounts of the respective CGUs, management incorporated the estimated production cost and carbon tax savings arising from the rollout of Harmony's renewable energy programme, as part of its greater decarbonisation strategy.

Results of impairment and assessment

Based on the impairment tests performed, the following impairment of property, plant and equipment was recorded for the 2024 financial year:

Figures in million	Year ended	
	30 June 2024 (Reviewed)	30 June 2023 (Audited)
Target North (a)	2 793	—
Total impairment	2 793	—

- (a) Target North is a greenfields exploration project. The impairment was as a result of information received during August 2024 by management relating to the preliminary results of the exploration drilling programme conducted. These preliminary results indicated a decrease in the mineral resource estimation. The mineral resource estimate used to determine the recoverable amount of Target North changed from the previous estimate of 56.4 million resource ounces, consisting of 22 million indicated resources and 34.4 million inferred resources, to the current mineral resource estimate of 13.8 million ounces of inferred resources. The gold resource multiple price in US dollar terms was unchanged from previous assessments. The recoverable amount of Target North was determined as R888 million. Any reasonable possible changes to the unobservable inputs of the mineral resource estimate for Target North would have resulted in immaterial changes.

Where CGUs had previously been impaired, management considered indicators of whether the impairment loss (or the contributors to the previously recognised impairment loss) no longer exists or might have decreased. Management considered general and specific factors for each CGU and concluded that although overall the gold price had improved from the time that the impairment losses had been recognised, the specific circumstances that led to the original impairments had not reversed. Furthermore, the service potential of the asset has not increased. Management therefore deemed it appropriate for no reversal of previously recognised impairment losses to be recorded for the year ended 30 June 2024.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS continued

FOR THE YEAR ENDED 30 JUNE 2024 (RAND)

7. PROPERTY, PLANT AND EQUIPMENT continued

Impairment of property, plant and equipment continued

Sensitivity analysis

One of the most significant assumptions that influence the life-of-mine plans, and therefore impairment assessments, is the expected commodity prices. Management determined a reasonably possible change of 11.9% in gold prices and resource values based on the standard deviation of market analysts' forecasted long-term gold price assumptions. A 11.9% decrease/increase in the gold price assumptions (with all other variables held constant) would have resulted in the following post-tax impairment being recorded as at 30 June 2024:

Figures in million	30 June 2024 (Reviewed)
11.9% decrease	
Target 1	450
Target North	2 898
Doornkop	2 623
11.9% increase	
Target North	2 688

¹ Harmony introduced gold collar hedging contracts to its derivative programme during April 2024 to hedge the risk of lower gold prices. Cash flow hedge accounting is applied to these contracts, resulting in the effective portion of the unrealised gains and losses being recorded in other comprehensive income. Refer to note 13 for details on the hedging policy.

¹ July – December

² January – June

Refer to note 13 for details on the fair value measurements.

9. RESTRICTED CASH AND INVESTMENTS

The balance at 30 June 2024 increased by R371 million, mainly due to interest received on restricted investments (R329 million), which increased year on year due to higher interest rates in 2024.

10. PROVISION FOR ENVIRONMENTAL REHABILITATION

The decrease in the provision of R318 million is mainly due to the change in estimate of R527 million. The majority of the change relates to the inclusion of the deepening project for Mponeng in its life-of-mine plan. This increased the number of years and together with higher discount rates resulted in a significant decrease in the net present value of the liability. Furthermore, the translation of the balance for Australasia of R159 million contributed to the decrease in the provision. The decrease is offset by the time value of money unwind of R486 million.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS continued

FOR THE YEAR ENDED 30 JUNE 2024 (RAND)

11. TRADE AND OTHER PAYABLES

The increase of R391 million is mainly due to timing of payments and receipt of invoices relating to shaft-related costs. Refer to note 3 for the increase in certain cost categories year on year.

12. BORROWINGS

Summary of facilities' terms

Figures in million	US\$ term loan US dollar	US\$ RCF US dollar	Green loan SA rand ¹	Rand RCF SA rand
At 30 June 2024 (Reviewed)				
Original facility (million)	100	300	1 500	2 500
Drawn down/loan balance (million)	100	—	—	—
Undrawn committed borrowing facilities (million)	N/A	300	1350 ³	2 500
Maturity	May 2027 ²	May 2027 ²	November 2028	May 2027 ²
Repayment terms	On maturity	On maturity	Bi-annual ³	On maturity
Interest rate	SOFR + 2.85%	SOFR + 2.70%	JIBAR + 2.65%	JIBAR + 2.40%

¹ This facility can only be drawn down for qualifying projects.

² During March 2024, a 12-month extension has been granted from May 2026.

³ Initially ten equal bi-annual instalments starting from June 2024, with the final instalment on maturity. As no drawdowns have occurred as of 30 June 2024, the first R150 million is no longer available.

Interest bearing borrowings

Figures in million	At	
	30 June 2024 (Reviewed)	30 June 2023 (Audited)
Non-current borrowings		
US\$400 million facility – sustainability linked	1 785	5 592
Total non-current borrowings	1 785	5 592
Current borrowings		
US\$400 million facility – sustainability linked	9	103
Total current borrowings	9	103

The following draw downs and repayments were made during the 2024 year:

- R2.5 billion facility – sustainability linked : R300 million draw down and subsequent repayment of R300 million
- US\$400 million facility – sustainability linked: US\$200 million (R3 747 million) repayment.

The debt covenant tests for both the Rand and the US\$ facilities are as follows:

- The group's interest cover ratio shall be more than five times (EBITDA¹/ Total Interest paid)
- Leverage² shall not be more than 2.5 times.

¹ Earnings before interest, taxes, depreciation and amortisation (EBITDA) as defined in the agreement also excludes unusual items such as impairment, restructuring cost and gains/losses on disposal of property, plant and equipment.

² Leverage is defined as total net debt to EBITDA.

Loan covenants tests were performed for the loans for the year ended 30 June 2024 and no breaches were noted. For the June 2024 year, the group's interest cover ratio was 44.1 times (2023: 26.0 times) while the group's leverage was negative 0.2 (2023: 0.2). Management believes that it is very likely that the covenant requirements will be met in the foreseeable future given the current earnings and interest levels, as well as the net cash position.

Closing/spot	18.19	18.83
Average	18.70	17.76

¹ The remainder of foreign exchange transaction gain or loss included in profit or loss mainly relates to the translation of cash from a foreign currency to the functional currencies of the operating entities.

13. FINANCIAL RISK MANAGEMENT ACTIVITIES

Foreign exchange risk

Harmony's revenues are sensitive to the R/US\$ exchange rate as majority of revenues are denominated in US\$. A weakening of the Rand will increase the reported revenue total; conversely a strengthening will decrease it.

Harmony maintains a foreign currency derivative programme to manage foreign exchange risk. The limit currently set by the Board is 25% of the group's foreign exchange risk exposure for a period of 24 months. The audit and risk committee reviews the details of the programme quarterly. Refer to note 8 and the fair value determination section below for further detail on these contracts.

The Rand strengthened during the 2024 year from a closing rate of R18.83/US\$1 on 30 June 2023 to R18.19/US\$1 on 30 June 2024. The strengthening of the Rand resulted in the average locked-in rates being higher than the spot exchange rate at 30 June 2024, which had a positive impact on the contracts that matured during the period as well as those that were outstanding as at 30 June 2024. The strengthening of the Rand also had a positive impact on the translation of the US\$ debt facilities at 30 June 2024. Refer to note 12 for detail.

The Kina weakened from a closing rate of PGK2.38/A\$1 on 30 June 2023 to PGK2.57/A\$1 on 30 June 2024 and the Rand strengthening during the year to R12.14/A\$ on 30 June 2024 from a closing rate of R12.56/A\$ on 30 June 2023. This impacted the translation of balances from Kina to Australian dollar and Australian dollar to Rand on consolidation as well as the average rate at which income statement items were translated at. These changes resulted in a foreign exchange translation loss of R943 million for the 2024 year.

The relevant exchange rates traded in the following ranges:

	Year ended	
	30 June 2024 (Reviewed)	30 June 2023 (Audited)
R/US\$ foreign exchange rate range for the year	17.54 – 19.51	16.17 – 19.81
R/A\$ foreign exchange rate range for the year	11.71 – 12.72	11.19 – 12.94
A\$/PGK foreign exchange rate range for the year	2.30 – 2.60	2.18 – 2.52

Commodity price sensitivity

The profitability of the group's operations, and the cash flows generated by those operations, are mainly affected by changes in the market price of gold, and in the case of Hidden Valley, silver as well. Harmony entered into derivative contracts to manage the variability in cash flows from the group's production, in order to create cash certainty and protect the group against lower commodity prices. A new limit for gold hedging was approved by the Board in April 2024 as 30%, 20% and 10% of production in a 12-, 24- and 36-month period, respectively, for contracts going forward. Prior to April 2024, the limit was 20% for a 24-month period. The limit set by the Board is 50% of silver exposure over a 24-month period. The audit and risk committee reviews the details of the programme quarterly. Refer to note 8 and the fair value determination section below for further detail on these contracts.

An increase in the price of gold in US\$ terms resulted in the average locked-in gold forward prices being lower than the gold spot price which had a negative impact on the gold forward hedging contracts that matured during the period as well as those that were outstanding as at 30 June 2024.

Gold traded in the following ranges:

	Year ended	
	30 June 2024 (Reviewed)	30 June 2023 (Audited)
Gold price range in US\$/oz for the year	1 820 – 2 425	1 622 – 2 051

Interest rate risk

With inflation rates easing and economies recovering, central banks have kept interest rates unchanged during the year ended 30 June 2024. The stable interest rates coupled with a reduction in borrowings has had a positive impact on Harmony's cost of borrowings. The group has therefore not entered into interest rate swap agreements as the interest rate risk continues to be assessed as low. The audit and risk committee reviews the group's risk exposure quarterly.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS continued

FOR THE YEAR ENDED 30 JUNE 2024 (RAND)

13. FINANCIAL RISK MANAGEMENT ACTIVITIES continued

Credit risk

Financial instruments which are subject to credit risk are restricted cash and investments, derivative financial instruments and cash and cash equivalents, all of which are invested with financial institutions that meet the group's policy requirements for credit quality, as well as trade and other receivables (excluding non-financial instruments). In assessing the creditworthiness of local institutions, management uses the national scale long-term ratings.

At 30 June 2024, the national scale investment grade rating of the major South African banks remained unchanged at AA+, which is in line with the group's credit risk policy. An assessment of the expected credit losses (ECLs) for the financial assets measured at amortised costs at 30 June 2024 resulted in an immaterial amount for each instrument. The credit rating of the group's Australian counterparts changed from A+ at 30 June 2023 to AA- at 30 June 2024. The assessed ECL remained immaterial.

Management will continue to review the underlying strength of the economies we operate in as well as the creditworthiness of the financial institutions and make any changes deemed necessary to safeguard the assets and reduce the credit risk.

Capital risk management

The group made repayments of R4 047 million during the year ended 30 June 2024. It remains the group's objective to adhere to a conservative approach to debt and maintain low levels of gearing in order to be well positioned for upcoming increased capital expenditure.

Net cash/(debt) is as follows:

Figures in million	At	
	30 June 2024 (Reviewed)	30 June 2023 (Audited)
Cash and cash equivalents	4 693	2 867
Borrowings	(1 794)	(5 695)
Net cash/(debt)	2 899	(2 828)

Fair value determination

The fair value levels of hierarchy are as follows:

- Level 1: Quoted prices (unadjusted) in active markets
- Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset, either directly (that is, as prices) or indirectly (that is, derived from other prices)
- Level 3: Inputs for the asset that are not based on observable market data (that is, unobservable inputs).

Derivative financial liabilities (c)	Level 2	(2 111)	(1 531)
Loan to ARM BBEE Trust (d)	Level 3	68	101
Contingent consideration liability (e)	Level 3	(965)	(589)

- (a) The majority of the balance relates to the equity investment in Rand Mutual Assurance. The fair value of the investment was estimated with reference to an independent valuation. A combination of the "Embedded Valuation" and "Net Asset Value" techniques were applied to revalue the investment as at 30 June 2024. In evaluating the group's share of the business, common practice marketability and minority discounts as well as additional specific risk discounts were applied. There are no inputs to the valuation that a reasonably possible change would result in a material change in the fair value of the investment.
- (b) The level 1 valued assets comprise of listed equity securities designated as fair value through other comprehensive income instruments. The majority of the level 2 valued assets are directly derived from the Top 40 index on the JSE and are discounted at market interest rates. This relates to equity-linked deposits in the group's environmental rehabilitation trust funds. The remaining balance of the environmental trust funds is carried at amortised cost and therefore not disclosed here.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS continued

FOR THE YEAR ENDED 30 JUNE 2024 (RAND)

13. FINANCIAL RISK MANAGEMENT ACTIVITIES continued

Fair value determination continued

- (c) The mark-to-market remeasurement of the derivative contracts (refer to note 8 for further details) was determined as follows:
- Foreign exchange contracts comprise of zero cost collars and forward exchange contracts (FECs): The zero cost collars were valued using a Black-Scholes valuation technique derived from spot Rand/US\$ exchange rate inputs, implied volatilities on the Rand/US\$ exchange rate, Rand/US\$ interest rates with discounting at the market interest rate (zero-coupon interest rate curve). The value of the FECs is derived from the forward Rand/US\$ exchange rate and discounted at a market interest rate (zero coupon interest rate curve).
 - Rand gold contracts (forward sale contracts): spot Rand/US\$ exchange rate, Rand and dollar interest rates (forward points), spot US\$ gold price, differential between the US interest rate and gold lease interest rate which is discounted at a market interest rate.
 - US\$ gold contracts (forward sale contracts): spot US\$ gold price, differential between the US interest rate and gold lease interest rate and discounted at a market interest rate.
 - Silver contracts (zero cost collars): a Black-Scholes valuation technique, derived from spot US\$ silver price, strike price, implied volatilities, time to maturity and interest rates and discounted at a market interest rate.
 - Rand gold zero cost collar contracts: a Black-Scholes valuation technique, derived from spot Rand/US\$ exchange rate, spot US\$ gold price, Rand and dollar interest rates (forward points) with discounting at the market interest rate (zero-coupon interest rate curve), US\$ gold forward rates, time to maturity and implied volatilities.
 - US\$ gold zero cost collar contracts: a Black-Scholes valuation technique, derived from spot US\$ gold price, US\$ gold forward rates, US\$ interest rates with discounting at the market interest rate (zero-coupon interest rate curve), time to maturity and implied volatilities.

- (d) At 30 June 2024, the fair value movement was calculated using a discounted cash flow model, taking into account forecasted dividend payments over the estimated repayment period of the loan at a rate of 12.6% (2023: 12.7%). A 73 basis points (2023: 37 basis points) change in the discount rate, which would represent a reasonably possible change based on expected movements in lending rates, would not cause a material change in the fair value of the loan. The loan balance forms part of other non-current assets in the balance sheet. During the 2024 year, repayments to the value of R42 million (2023: R74 million) were received. Refer to the statement of cash flows.

- (e) Contingent consideration liabilities consist of the following:

- Mponeng operation

As part of the acquisition of the Mponeng operation and related assets, it was agreed that the purchase price would comprise contingent consideration based on the following criteria:

- US\$260/oz payable on all underground production from the Mponeng, Savuka and Tau Tona mines in excess of 250 000 ounces per calendar year for six years, commencing 1 January 2021 and
- US\$20/oz payable on underground production from the Mponeng, Savuka and Tau Tona mines sourced from levels developed in the future below the current infrastructure.

The contingent consideration was determined using the expected gold production profile for Mponeng. At 30 June 2024, the liability was valued at R587 million (2023: R404 million), using a discounted cash flow valuation method at a post-tax real rate of 10.5% (2023: 9.6%). Should the expected gold production profile increase by 17.0% or decrease by 17.0%, the contingent consideration liability would increase by R624 million (2023: R411 million at 9.8%) or decrease by R364 million (2023: R314 million at 9.8%) respectively. This represents reasonably expected changes which were determined based on the standard deviation of previous years' production of the Mponeng operation. No other reasonably expected changes in key unobservable inputs would have caused a material change in the fair value of the liability. The remeasurement of the liability has been included in other operating income/(expenses).

- Eva Copper

The consideration for Eva Copper includes contingent consideration valued at R378 million (2023: R185 million), using a probability weighted method for the new resource payment and a discounted cash flow valuation for the excess payment, both discounted at a post-tax nominal rate of 11.4% (2023: 12.9%). A long-term copper price of US\$4.00/lbs (2023: US\$3.50/lbs) was applied in the valuation. A 10.4% change in the long-term copper price, which would represent a reasonably possible change based on the standard deviation of market analysts long-term forecasts of the copper price, would not cause a material change in the fair value of the contingent consideration. The remeasurement of the liability has been included in other operating income/(expenses).

Reconciliation of the contingent consideration liabilities:

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS continued

FOR THE YEAR ENDED 30 JUNE 2024 (RAND)

13. FINANCIAL RISK MANAGEMENT ACTIVITIES continued

Fair value determination continued

The carrying values (less any impairment allowance) of short-term financial instruments are assumed to approximate their fair values. This includes restricted cash and investments carried at amortised cost. The carrying values of borrowings fairly approximates their fair values, as these values do not differ materially due to the interest payable on the borrowings being set at market-related floating interest rates.

14. CASH GENERATED BY OPERATIONS

15. COMMITMENTS AND CONTINGENCIES

Figures in million	At	
	30 June 2024 (Reviewed)	30 June 2023 (Audited)
Capital expenditure commitments:		
Contracts for capital expenditure	1 702	2 053
Authorised by the directors but not contracted for ¹	14 442	8 525
Total capital commitments	16 144	10 578

¹ The increase relates mainly to the additional capital included for renewable energy projects and the Zaaiploaats project, increasing approximately R1.5 billion and R1.0 billion respectively. Also contributing is the inclusion of approximately R2.9 billion for the Mponeng life of mine extension and deepening project.

The solar projects will be financed through the green loan (refer to note 12), with the rest of the expenditure being financed from existing resources and where appropriate, borrowings.

Contingent liabilities

Randfontein Estates Limited (REL), a subsidiary of Harmony has an existing legal dispute with the Merafong Municipality (Merafong) relating to rates payable in terms of Merafong's Supplementary Valuation Roll 6 (SVR6). REL lodged appeals against the market values contained in SVR6. Merafong is contending for total rates payable of between R124 million and R164 million under SVR6, while Harmony is contending for total rates payable of between R17 million and R69 million on the basis that certain items of the mining operations are not rateable and/or disregarded for valuation purposes and that depreciation, rehabilitation, phasing-in and category use changes are favourably considered by the Merafong Valuation Appeal Board (Merafong VAB). Payment arrangements have been concluded between REL and Merafong in relation to these rates disputes. The Merafong VAB hearings are currently underway with other mining companies with similar legal disputes. Harmony's appeal hearings have been extended to end in October 2024, where the outcome of the matter will be decided upon by the Merafong VAB.

Apart from the above matter, there were no significant changes to Harmony's contingent liabilities. Refer to Harmony's annual financial statements for the financial year ended 30 June 2023.

16. RELATED PARTIES

The following directors and prescribed officers owned shares in Harmony at year end. The balance of shares held is attributable to shares held privately and in terms of the minimum shareholding requirement as set out in our remuneration policy:

(a) These balances relate to Wafi-Golpu assets and assets that provide services to several segments, such as Harmony One Plant.

(b) Undeveloped properties comprise of the Target North property, Eva Copper and Wafi-Golpu's undeveloped properties. Refer to note 7 for details on Target North.

(c) Assets under construction consist of the Wafi-Golpu assets.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS continued

FOR THE YEAR ENDED 30 JUNE 2024 (RAND)

19. SUBSEQUENT EVENTS

- (a) During August 2024, management received information relating to the preliminary results of the exploration drilling programme conducted for Target North. These preliminary results indicated that a decrease of the mineral resource estimation attributable to Target North is likely. The decrease in the attributable ounces as indicated by the preliminary results constitutes an indication of impairment. The indicator is considered to be an adjusting event as it provides more reliable information of circumstances that already existed as at 30 June 2024. Therefore an impairment assessment was performed for Target North at the reporting date. Please refer to note 7 for more information relating to the impairment considerations of Target North.
- (b) On 30 July 2024, the Queensland Government announced its decision to provide conditional grant funding of A\$20.7 million for Eva Copper under the Mount Isa Mining Acceleration Programme. The grant is subject to a number of conditions, including that Harmony reaches a positive Final Investment Decision by January 2026. This constitutes a non-adjusting subsequent event. Management is still assessing the 2025 financial year accounting treatment and impact of the government grant.
- (c) On 4 September 2024, a final dividend of 94 SA cents was declared, payable on 14 October 2024.
- (d) Effective from 1 September 2024, Harmony has entered into an agreement with RMA Life Assurance Company Limited (RMA) to transfer the liability in respect of the medical promise and medical aid subsidy, and the administration thereof, from Harmony to RMA. During September 2024, Harmony will transfer a once-off amount of R350 million to RMA as a single premium for the transfer of the on-balance sheet liability of R290 million. In terms of the agreement, RMA will assume responsibility for the administration of the medical promise in respect of all Continuation and Widows Members Society (CAWMS) members and good leavers while Harmony will remain responsible for all active members until such a date as they become either CAWMS or good leavers. Once Harmony and RMA have fulfilled all the relevant clauses per the contract, the liability will be derecognised.

COMPETENT PERSON'S DECLARATION

Harmony Gold Mining Company Limited's statement of Mineral Resources and Mineral Reserves as at 30 June 2024 is produced in accordance with the South African Code for the Reporting of Exploration Results, Mineral Resources and Mineral Reserves (SAMREC). It should be noted that the Mineral Resources are reported inclusive of the Mineral Reserves.

In South Africa, Harmony employs an ore reserve manager at each of its operations who takes responsibility as competent person for the compilation and reporting of Mineral Resources and Mineral Reserves at their operations. In Papua New Guinea and Australia, competent persons are appointed for the Mineral Resources and Mineral Reserves for specific projects and operations.

The Mineral Resources and Mineral Reserves in this report are based on information compiled by the following competent persons:

Mineral Resources and Mineral Reserves of South Africa:

Theo van Dyk, BSc (Hons), Pr.Sci.Nat, MGSSA, has 26 years relevant experience and is registered with the South African Council for Natural Scientific Professions (SACNASP) and a member of the Geological Society of South Africa (GSSA).

Theo van Dyk

Physical address:

Randfontein Office Park
Corner of Main Reef Road and Ward Avenue
Randfontein
South Africa

Postal address:

PO Box 2
Randfontein
1760
South Africa

Mineral Resources and Mineral Reserves of Papua New Guinea and Australia:

Gregory Job, BSc (Geo), MSc (Min Econ), F AusIMM, has 36 years relevant experience and is a Fellow of the Australian Institute of Mining and Metallurgy (AusIMM) South East Asia.

Greg Job

Physical address:

Level 2, 189 Coronation Drive
Milton, Queensland
4064
Australia

Postal address:

PO Box 1562
Milton, Queensland
4064
Australia

Both these competent persons, who are full-time employees of Harmony, consent to the inclusion in the report of the matters based on the information in the form and context in which it appears.
