**WHY A REPORT TO SOCIETY?**

We recognise that we have a diverse set of stakeholders with different information needs. We seek to balance these needs with our regulatory requirements by preparing a number of reports (details of which can be found on pages 10 and 11). Our annual integrated report, our primary report for our shareholders, provides a holistic assessment of how our strategy, governance, performance and prospects create value over time.

This report, our report to society, is for a broader set of stakeholders. It aims to communicate, in a concise and accessible way, how we create shared value for you. Our focus is on the material issues that affect you, our stakeholders, and our ability to deliver on our purpose – Africa is our home, we drive her growth.

**FOR MORE ON OUR VALUE DRIVERS SEE OUR ANNUAL INTEGRATED REPORT.**

**WE ARE OUR VALUES**

**SEE SHARED VALUE**

We understand shared value quite simply: in order for us to continue as a successful and sustainable business we must measure value beyond financial outcomes.

During 2016, we determined that our progress on our strategy is measured with strategic value drivers, as follows:

- **ECONOMIC**

  The value Standard Bank creates for our shareholders and more broadly for society, by driving inclusive economic growth in Africa, developing and implementing better ways of doing business, and supporting African economic integration and development.

- **SOCIAL**

  The value Standard Bank creates for society, as measured by the value created for our people in areas such as skills development and transformation; the shared value our business generates for our customers and clients, and other stakeholders, through deepening financial inclusion, investing in infrastructure, and supporting job creation through enterprise development and financing entrepreneurs; and our investments in education that benefit communities and future generations.

- **ENVIRONMENTAL**

  The value Standard Bank creates for the natural environment, through businesses we finance or do not finance, investments towards reducing carbon emissions and any other environmental degradation, and by helping our customers to lessen and adapt to the impacts of climate change.

**OUR SEE FRAMEWORK**

- Client focus
- Employee engagement
- Risk and conduct
- Financial outcome

**ECONOMICAL + SOCIAL + ENVIRONMENTAL = SOCIAL, ECONOMIC AND ENVIRONMENTAL (SEE) OUTcomes OR SHARED VALUE.**

This report covers the group’s banking activities, including our subsidiaries. It excludes Liberty Holdings which publishes its own annual integrated report and sustainability report. Unless indicated otherwise, references to Standard Bank and all the reported data fall within these parameters.

For more on our value drivers see our annual integrated report.
Our strategy

**Purpose**: The reason we exist
Africa is our home, we drive her growth.

**Vision**: What we aspire to be
To be the leading financial services organisation in, for and across Africa, delivering exceptional client experiences and superior value.

**Values**: The behaviours and qualities that define us at our best
Our values support our legitimacy, and are the basis on which we earn the trust of our stakeholders:
- Being proactive
- Constantly raising the bar
- Delivering to our shareholders
- Serving our customers
- Growing our people
- Working in teams
- Respecting each other
- Upholding the highest levels of integrity

Our strategy is centred on our commitment to Africa and directs our growth and evolution for the shared benefit of our clients, our people and all our stakeholders. It drives us to lead with purpose, to build a better business, and to position our footprint and platform for the future.

**DISTRIBUTIONS SUPPORTING OUR ECONOMIES AND SOCIETIES**

- **Total income**: R100.0 billion
- **Suppliers and operational charges**: R28.0 billion
- **Taxation** (direct only): R9.5 billion
- **Bad debts**: R9.5 billion
- **Distributed as dividends**: R11.5 billion
- **Reinvested for growth on the African continent**: R10.5 billion
- **Remaining income**: R90.5 billion
- **Total tax**: R22.3 billion
- **Salaries**: R31.0 billion
- **to 54,348 employees**
- **Brand**: R173 million

**MORE ON THE ECONOMIC VALUE CREATED FOR AFRICA**

- **Standard Bank International**: R0.5 billion
- **Africa Regions**: R6.3 billion
- **South Africa**: R15.5 billion
- **Corporate social investment (CSI)**: R173 million

**OUR PEOPLE**

Total number of employees by type of employment contract

ABOUT STANDARD BANK
Also trading as Stanbic Bank

We are a financial services company, in, for and across Africa. We are more than just a bank, our role in society is greater than simply the products and services we provide. We are a driver of inclusive economic growth in Africa and our success and long-term profitability depends on the stability and wellbeing of this continent that we call home.

We strive to use the fundamental power of financial services to make a better life for fellow Africans – giving people the financial tools they need to grow as individuals and business owners. We believe we can, and do, make a positive difference to the lives of our fellow Africans, in a lasting and powerful manner.

We operate in 20 African countries and are headquartered in Johannesburg. Our primary listing is on the Johannesburg Stock Exchange (JSE) in South Africa, with a secondary listing in Namibia. Subsidiary banks are listed on exchanges in Kenya, Malawi, Nigeria and Uganda.

We serve three broad client groups:

- PERSONAL & BUSINESS BANKING (PBB) provides banking and other financial services to individual customers and small and medium-sized enterprises (SMEs).
- CORPORATE & INVESTMENT BANKING (CIB) offers corporate and investment banking services to clients, including governments, parastatals, big businesses, multinationals, financial institutions and international counterparties.
- WEALTH (inclusive of Liberty and Stanlib) offers investment management, fiduciary services, long- and short-term insurance, and wealth management services for high net worth individuals. Currently, our Wealth services are available to our clients in South Africa, Ghana, Kenya, Mauritius, Nigeria, Jersey and London.

47% of Standard Bank is owned by South Africans; primarily through the South African Government Employees Pension Fund (GEPF), which has a 12% stake, as well as other institutional shareholders representing retirement funds and ordinary savers. Industrial and Commercial Bank of China Ltd (ICBC), the world’s largest bank by assets, is a 20% shareholder. This strategic relationship enables Standard Bank and ICBC to work together to facilitate investment flows and commercial relationships between China and Africa.

DOING THE RIGHT BUSINESS, THE RIGHT WAY

Our values and code of ethics provide our framework for doing the right business in the right way and building trust with our stakeholders, and support values-based behaviour.

Our code of ethics is in line with globally recognised anti-corruption and corporate governance legislation and principles. It has been certified by the Ethics Institute of South Africa as conforming to the highest standards of international best practice.

Our employee training and engagement programmes place a strong emphasis on assessing behaviour in line with our ethics and values, which ultimately influences how people are rewarded.

OUR CODE OF ETHICS ADDRESSES THE FOLLOWING:

- Treating customers fairly
- Providing secure banking facilities
- Providing professional development opportunities
- Evaluating performance objectively
- Sustainable value creation for shareholders
- Adhering to good corporate governance
- Engaging in political activities responsibly
- Protecting intellectual property
- Avoiding anti-competitive behaviour
- Rewarding innovation
- Working in unity
- Respecting human dignity
- Protecting our physical assets
- Honesty
- Addressing conflicts of interest
- Combating unethical and criminal activities
- Prohibiting giving and receiving of bribes
- Prohibiting facilitation payments
- Responsibly giving and receiving gifts.

Our commitment to shared value is embedded in our values and code of ethics and is fundamental to the success of our vision and fulfilment of our purpose. This report illustrates our journey towards developing a systematic approach to measuring and reporting on the shared value we create, and in this way accounting to our stakeholders for our performance.
WHAT CONCERNS OUR STAKEHOLDERS

If you’re reading this report, you’re a Standard Bank stakeholder. You’re someone we recognise as a partner in driving Africa’s growth. Whether you are a first-time home buyer looking for a home loan, a small business needing working capital, an employee growing your career, a shareholder wanting to better understand our strategy, a supplier in our value chain, a policymaker in government, a parliamentarian, a regulator overseeing our conduct, a student with a Standard Bank bursary, or a young professional considering a career in banking, you are affected by our activities.

We are working to better understand what matters to you and to create long-lasting shared value. We seek to do this by providing financial solutions tailored for African markets, which contribute to Africa’s economic growth, support job creation, and help to economically empower individuals and businesses. In doing so, we simultaneously expand the market for our products and services, making Standard Bank a more viable and sustainable business.

We are working to better understand what matters to you and to create long-lasting shared value. We seek to do this by providing financial solutions tailored for African markets, which contribute to Africa’s economic growth, support job creation, and help to economically empower individuals and businesses. In doing so, we simultaneously expand the market for our products and services, making Standard Bank a more viable and sustainable business.

Refer to our annual integrated report for more on the above capitals.
**STAKEHOLDER ENGAGEMENT IN 2016**

- **CEO Initiative**: A number of Standard Bank’s leaders have been working with government, organised labour, and other corporations, to enhance the competitiveness of the South African economy, and build investor confidence.

- **ASSURANCE OF THIS REPORT**: The Standard Bank Group (SBBG) has a series of internal policies, procedures and controls in place to ensure that accurate data is provided. The SBBG’s social and ethics committee provided oversight of this report. KPMG provided limited external assurance on selected performance data in this report, indicated by a SE. More information on page 79 of this report.

- **MEASURING SOCIAL AND RELATIONSHIP CAPITAL**: Measuring social and relationship capital is about understanding the networks of relationships between people and organisations. Social capital underpins and supports a well-functioning society and productive economy.

- **STAKEHOLDER RELATIONSHIP ASSESSMENT**

- **WHAT CONCERNS OUR STAKEHOLDERS?**: We produce a full suite of reports to cater for the diverse needs of our broad stakeholder base. These reports account to our stakeholders for our progress against objectives and targets. The following reports supplement this report and are tailored to meet our readers’ specific information requirements.

- **GOVERNANCE AND REPORTING BACK TO STAKEHOLDERS**
  - Stakeholder engagement policy
  - Quarterly reporting to board
  - Annual general meeting
  - Reporting suite

  We produce a full suite of reports to cater for the diverse needs of our broad stakeholder base. These reports account to our stakeholders for our progress against objectives and targets. The following reports supplement this report and are tailored to meet our readers’ specific information requirements.

- **1 Annual integrated report**
  - The group’s primary report, our annual integrated report provides a holistic assessment of the group’s ability to create value over time. It considers the issues that are material to maintaining the commercial viability and social relevance required to achieve our strategy in both the short and long term.

- **2 Governance and remuneration report**
  - Provides a detailed review of the group’s governance and remuneration practices, including the group’s remuneration policy. The report also provides information on the audit committee and the remuneration committee.

- **3 Risk and capital management report**
  - Provides a detailed discussion of the management of strategic risks related to the group, including risk management and sustainability.

- **4 Report to society**
  - Provides an analysis of the issues material to the group’s creation of social value and its SE framework.

- **INTENDED READERS**
  - The group’s broad base of stakeholders, particularly clients, employees, business partners, regulators, government, and civil society organisations.

- **STAKEHOLDER ENGAGEMENTS IN 2016**

- **Political economy work**: After meeting with a wide range of stakeholders, we have included an analysis of the issues material to the group’s creation of social value and its SE framework.

- **Corporate social investment**: The group’s investment in social and environmental initiatives.

- **Group policy, advocacy and sustainability**: The group’s initiatives to support government and civil society organisations.

- **Investor relations**: The group’s engagement with investors, including the group’s governance and remuneration practices.

- **Civil society organisations and think tanks**: The group’s support for civil society organisations and think tanks.

- **Black professional organisations**: The group’s engagement with black professional organisations.

- **Democracy support programme**: The group’s commitment to support democratic values.

- **LET US KNOW WHAT YOU THINK**: We welcome your feedback on this report. Please email the team at gpas@standardbank.co.za with your feedback.

- **Moving Forward, Together**: We continue to fund political parties represented in the National Assembly as a contribution to a robust and maturing democracy in South Africa.

- **Road shows**
  - We support several organisations, including the Black Management Forum, the Association of Black Securities and Investment Professionals, and the Association for the Advancement of Black Accountants in South Africa.

- **Voice of the People**: We support several organisations, including the Black Management Forum, the Association of Black Securities and Investment Professionals, and the Association for the Advancement of Black Accountants in South Africa.

- **SE**
  - Social capital is the intangible value that is created through the networks of relationships between people and organisations. Social capital underpins and supports a well-functioning society and productive economy.

- **What we do**
  - Standard Bank supports political initiatives that are important to the competitiveness of the South African economy.

- **Why we do**
  - This approach helps us to focus on the quality of our stakeholder engagements, whether we are building social capital and trust, and where we need to improve.
To be the leading financial services organisation in, for and across Africa, delivering exceptional client experiences and superior value.

What are the social, economic and environmental (SEE) needs in Africa?

Africa is our home, we drive her growth

What contribution can financial services make to meeting these needs?

SEE our impacts:

- Invest in infrastructure (energy, water, transport and ICT)
- Invest in enterprise development, entrepreneurship, and innovation
- Contribute to employment creation
- Invest in education, learning and development
- Promote environmental sustainability (and climate change mitigation and adaptation)
- Facilitate inclusive economic growth
- Combat (financial and cyber) crime and corruption
- Advance African economic integration and development
- Invest in financial inclusion
- Support good governance

This report explains how we create shared value, how we’re responding to social, economic and environmental issues in Africa, the changes we’re making within the bank to better meet the expectations and requirements of our stakeholders, and the steps we’re taking to ensure the long-term sustainability of our business.

MATERIALITY
- Managing economic headwinds
- Understanding our clients
- Motivating our people
- Managing regulatory change
- Embracing innovation
- Leveraging our investments in IT

VALUE DRIVERS
- Client focus
- Employee engagement
- Risk and conduct
- Financial outcome
- Social, economic and environmental (SEE) outcome

SUSTAINABLE DEVELOPMENT GOALS
- A United Nations (UN) initiative with a set of 17 aspirational “Global Goals”.
- A strategic framework for the socioeconomic transformation of the African continent.

African Union
- The National Development Plan of South Africa that aims to eliminate poverty and reduce inequality by 2030.

“NWe are more than a bank”
A MESSAGE FROM OUR LEADERSHIP

JOINT LETTER FROM THE GROUP CHAIRMAN AND GROUP CHIEF EXECUTIVES

The sustainability and competitiveness of our company are inextricably linked to the prosperity and wellbeing of the societies in which we operate. Our measures of success cannot be limited to our share price, or the return on equity achieved for our shareholders. Our measures of success include our relevance and value to our diverse stakeholder groups, including our shareholders, clients and customers, employees and regulators, and our ability to deliver our purpose – to drive Africa’s growth.

We fulfil this purpose by succeeding at our core function – providing useful financial services efficiently, fairly and sustainably across 20 African countries. We help people to save for their futures. By providing insurance, trade finance, and other finance options, we help people and companies to manage and sustain a culture that insists on doing the right business the right way; that prioritises compliance with the letter and the spirit of the law; and that ensures that our organisational structures, decision-making processes, IT platforms, and measures of success reflect and support this.

We take proactive steps to embed and sustain a culture that insists on doing the right business the right way; that prioritises compliance with the letter and the spirit of the law; and that emphasises the Standard Bank values as a standard of conduct across the group.

We’ve made good progress on all three points, as discussed further.

When we reviewed and refined Standard Bank’s strategy in 2014, we identified three critical priorities that had to be met in order to fulfil our purpose:

- Sharpen our focus on our home continent, where we have a large geographic footprint, on-the-ground presence and deep local knowledge.
- Place our customers’ best interests at the centre of our business, and ensure that our organisational structures, decision-making processes, IT platforms, and measures of success reflect and support this.
- Take proactive steps to embed and sustain a culture that insists on doing the right business the right way; that prioritises compliance with the letter and the spirit of the law; and that emphasises the Standard Bank values as a standard of conduct across the group.

2016 was a tough year for sub-Saharan Africa, with GDP growth of just 1.4%. The region’s largest economies fared particularly poorly – Nigeria slid into recession, while South Africa’s economy grew by just 0.4%. The commodity price slump continued to hurt a number of countries that remain reliant on a single commodity export – although we are seeing encouraging moves toward diversification in some cases. African economies also had to contend with tighter global financing conditions, inflationary pressures arising from the strengthening US dollar, and, in many cases, high food prices due to the drought in eastern and southern Africa.

Several of our countries of operation continue to experience weak economic growth, high levels of inflation, and low levels of business confidence. A number of countries also experienced severe foreign currency shortages during the year. Despite these challenges, Standard Bank maintained a relatively low credit loss and non-performing loan ratios across most of our business.

AFRICA IS OUR HOME, WE DRIVE HER GROWTH

Joint CEOs: Sim Tshabalala and Ben Kruger

Chairman: Thulani Gcabashe

2016 was a tough year for sub-Saharan Africa, with GDP growth of just 1.4%. The region’s largest economies fared particularly poorly – Nigeria slid into recession, while South Africa’s economy grew by just 0.4%. The commodity price slump continued to hurt a number of countries that remain reliant on a single commodity export – although we are seeing encouraging moves toward diversification in some cases. African economies also had to contend with tighter global financing conditions, inflationary pressures arising from the strengthening US dollar, and, in many cases, high food prices due to the drought in eastern and southern Africa.

Several of our countries of operation continue to experience weak economic growth, high levels of inflation, and low levels of business confidence. A number of countries also experienced severe foreign currency shortages during the year. Despite these challenges, Standard Bank maintained a relatively low credit loss and non-performing loan ratios across most of our business.

We continue to deepen our strategic partnership with ICBC, working together to connect sub-Saharan Africa and China. The relationship between China and Africa is increasingly focused on supporting economic diversification, and on identifying incentives to attract Chinese manufacturers and service providers to make long-term investments in African economies, thus creating sustainable jobs in both China and Africa. Trade relations are becoming deeper and more mature, and entirely new opportunities are opening up in a range of sectors. Standard Bank and ICBC are extremely well-positioned to support this evolution, to support African industrialisation and infrastructure development, and to derive additional competitive advantage and financial benefit in doing so. In 2016, for example, we committed to jointly raising R10 billion to support the development of South Africa’s power generation infrastructure over the next five years.

The remit is on track to become a favoured currency in Africa. Standard Bank launched the Renminbi Internationalisation Initiative earlier this year to facilitate the development and delivery of RMB-denominated cross-border capabilities for our customers in China and Africa. Standard Bank and ICBC are working together to build and deliver further unique and competitive RMB capabilities for our clients.

AfricA is our home, we drive her growth

We track and monitor our portfolio performance against risk appetite thresholds monthly, enabling us to reduce exposures to underperforming sectors in good time, and to actively identify and pursue growth opportunities. On this basis, we’ve continued to grow our revenue in Africa, despite headwinds.

During 2016, we continued to grow our businesses in South Africa and our Africa Regions franchise, which in the 2016 financial year contributed 30% to the group’s total income and 25% to the group’s headline earnings. The group reported a 4% increase in headline earnings to R23 billion (December 2016). In retail banking, revenue growth was driven by a growing customer base, the introduction of new products and services, and more efficient ways of delivering these products and services.

We continue to grow our businesses in South Africa and our Africa Regions franchise, which in the 2016 financial year contributed 30% to the group’s total income and 25% to the group’s headline earnings. The group reported a 4% increase in headline earnings to R23 billion (December 2016). In retail banking, revenue growth was driven by a growing customer base, the introduction of new products and services, and more efficient ways of delivering these products and services.

We continue to deepen our strategic partnership with ICBC, working together to connect sub-Saharan Africa and China. The relationship between China and Africa is increasingly focused on supporting economic diversification, and on identifying incentives to attract Chinese manufacturers and service providers to make long-term investments in African economies, thus creating sustainable jobs in both China and Africa. Trade relations are becoming deeper and more mature, and entirely new opportunities are opening up in a range of sectors. Standard Bank and ICBC are extremely well-positioned to support this evolution, to support African industrialisation and infrastructure development, and to derive additional competitive advantage and financial benefit in doing so. Standard Bank and ICBC are working together to build and deliver further unique and competitive RMB capabilities for our clients.
Our business depends on the trust our customers place in us, and on our ability to provide them with consistently excellent customer experiences. Our commitment to putting our customers first requires us to be able to provide them with a full set of financial products and services in a seamless and integrated manner – to be a “universal bank”. We understand how frustrating it is when different parts of the bank don’t seem to be talking to one another, and we’re working hard to make sure this doesn’t happen. We’re making changes to enable us to serve our customers more quickly, efficiently, reliably and seamlessly. We are well on our way to completing our core platform modernisation programmes, greatly improving our capacity to design and deliver innovative, customer focused solutions.

In addition, we have implemented major changes to our operational structure and the ways in which business units work together, to incentivise and facilitate collaboration and information sharing within Standard Bank, and to remove unnecessary duplication. We aim to be the byword for quality, reliability and convenience across the full range of financial services that our customers and clients require.

We’ve recognised that we’re far better equipped to achieve consistent excellence in service when we organise ourselves in multidisciplinary customer service teams. We expect every one of our people to cultivate a habit of continuous learning and evolution, become experts in their fields, but learn from one another and become adaptable to ongoing change. Our new ways of working bring together small teams of specialists, from business, IT, risk and compliance, who are jointly responsible for identifying, designing and implementing ways in which we can better fulfil our customers’ needs and expectations. We’ve devolved decision making and accountability, and we’ve empowered and enabled these teams, who interact directly with our customers and clients, to serve them more effectively.

We play to our strengths – our on-the-ground presence and local knowledge, and the face-to-face contact we have with our customers through our branch networks – building the trust needed to deliver superior client experiences. We know that the last thing you want to hear from the branch manager or call centre is that a query or issue needs to be referred to head office so we’re making changes to empower our branch and call centre employees to assist you more effectively.

Customers with Standard Bank car finance are planning to drive across a national border are now able to instantly request a cross-border letter from Standard Bank.

Cybercrime is ranked as one of the main risks to banks and our clients, which is why security is built into everything we do. We continue to substantially invest in our cybersecurity capability, to strengthen the protection of our customers and Standard Bank.

More and more of our customers are transacting online, primarily through their mobile devices. We’re continually expanding our range of digital services and products, and developing more convenient, more individually targeted solutions.

In 2016, we continued to release new features and drive adoption of our universal mobile banking app. It was launched in Botswana, Ghana, Namibia, Swaziland, Uganda, Zambia and Zimbabwe, as well as our offshore financial services operations in Jersey and the Isle of Man. We continued to invest in our internet banking platform and implemented our internet banking solution for small enterprise clients in Namibia, Botswana, Uganda, Ghana, Swaziland, Zimbabwe and Nigeria.
OUR ETHICS AND VALUES

We’ve made a number of changes to embed our ethics and values across the group. All our people, from our executives to our front line, undertake regular, mandatory compliance training, covering a broad range of issues. We’ve piloted a new app that allows our people to do this training via their smart mobile devices, to maximise convenience and accessibility. The new training will be rolled out across the group during the first quarter of 2017. We ensure that we’re in full compliance with global standards and local regulations in all our countries of operation, and we work hard to build positive relationships with our regulators to understand their concerns, and to provide constructive input on policy and regulatory developments.

Doing the right business the right way means being aware of the indirect impacts of our actions, including impacts on the societies in which we operate, and impacts on future generations. We are embedding an approach we refer to as conscious risk-taking – being very clear about the social, economic and environmental impacts of every project or deal in which we get involved. In 2017, we will begin the process of extending our measurement, monitoring and reporting of the environmental and social impacts of our business practices beyond corporate and investment banking to include business banking. We recognise that environmental and social issues are increasingly a significant aspect of the risk review process, and we’re making changes to ensure that we manage these risks from the smallest to the largest forms of exposure. We also worked with executives across the group to strengthen our approach to human rights, in line with the UN Guiding Principles for Business and Human Rights.

STANDARD BANK GROUP STATEMENT ON HUMAN RIGHTS

“In Africa we drive her growth”

In keeping with our purpose, and our obligations as a responsible financial services firm in, for, and across Africa, Standard Bank Group is committed to respecting the human rights of people involved in and impacted by our business. This statement aims to achieve a consistent approach to respecting human rights across the group.

Human rights are the basic and universal rights that underpin each person’s inherent freedom, dignity, and equality as enshrined in the United Nations Universal Declaration of Human Rights and the International Labour Organisation Declaration on Fundamental Principles and Rights at Work. We have used these universal benchmarks as our starting point for defining human rights.

Our commitment to respecting human rights is embedded in our values and code of ethics and is fundamental to ensuring our legitimacy and reputation as a corporate citizen. While nation states have a primary responsibility to protect and promote human rights, we recognise that corporations are also obliged to respect human rights.

We take any adverse human rights impacts seriously. We seek to avoid human rights infringements and being complicit in the human rights risks of other parties. Our commitment to respecting human rights is included in many of our group policies and standards. In this way, we seek to integrate respect for human rights into our day-to-day operations and in the way we do business. Nevertheless, we acknowledge that this is a journey, one that may differ across our regions and countries based on the institutional and regulatory setting of each country where we operate.

Where local legislation may conflict with Standard Bank’s Statement on Human Rights, we will comply with the law while seeking, within our spheres of influence, to raise awareness of human rights and provide an example of good practice through our own conduct, while being mindful of the local context.

Providing a work environment for our people that respects their human rights and this commitment is reflected in our people policies and practices

Exercising due diligence in deciding who we do business with and understanding the potential human rights impacts of our business relationships, purchasing, lending and investing

Taking appropriate steps where we discover, or are made aware, that we have caused or contributed to actual or perceived human rights abuses. This may include disciplinarian, exiting a particular business relationship, or constructive engagement with others to promote better practice

Contributing to the combating of financial crime and corruption in all its forms, including extortion, bribery, and money laundering

Adhering to the Equator Principles in project financing

Encouraging our clients, suppliers and business partners to avoid human rights infringements in their businesses, and supporting their adoption of good practices to manage their human rights impacts

Requiring our people to report any alleged or suspected human rights violations to the group’s chief ethics officer or to make use of the group’s whistleblowing hotline.

Communicating about and reporting on our activities in the human rights arena through our report to society, and engaging with our stakeholders regarding the responsibilities of business in respecting and upholding human rights

Regularly reviewing our progress in meeting these commitments under the oversight of the group social and ethics committee.
OUR ROLE AS A RESPONSIBLE CORPORATE CITIZEN

We continue to play a proactive role in policy and legislative consultation processes, engaging with government departments and making submissions to the South African Parliament. In South Africa, we’ve been closely involved in the CEO Initiative, through which the business sector has partnered with government and organised labour to identify structural and regulatory barriers to economic growth, and to develop solutions to address these. These and other efforts undertaken jointly by business and government were crucial to averting a sovereign ratings downgrade during 2016. We continue to work with our colleagues in government, business and organised labour to restore our economy to a path of more rapid and more inclusive growth.

In 2016, we joined with other business leaders in South Africa in the CEO Pledge – a commitment to the constitution, good governance, democracy, the rule of law, social justice, and inclusive growth. We recognise that the stark inequality that characterises societies around the world, and South Africa in particular, needs to be urgently addressed, and that we as Standard Bank need to ensure that the business we undertake and the investments we make, constitute a significant contribution to supporting inclusive growth and job creation.

The student protests that we’ve seen across South Africa over the past two years are part of a broader global phenomenon of anti-establishment and youth protest. We’re confident in our Africa growth strategy, and that the business we undertake and the investments we make, constitute a significant contribution to supporting inclusive growth and job creation.

LOOKING AHEAD

Despite the current headwinds, the factors that underpin Africa’s long-term growth – including a young and growing population, greater urbanisation, improved governance and greater macroeconomic stability – remain firmly in place. Africa continues to offer a highly attractive investment environment for those with a long-term view. Growth is expected to recover to 3% in 2017, and to accelerate further in the medium term, powered by recovering commodity prices, urbanisation, investment in infrastructure and telecommunications, and growing intra-regional trade.

We’re proud of the board appointments made in 2016. We’ve made five additions to the board, giving us a very strong team in terms of expertise and in terms of a broad representation of geographies, sectors, gender, age and race. We’re working to improve alignment between the group board and our country boards. During 2016, we met with the board members in west, east and southern Africa, to engage on the group’s strategy and to ensure the alignment of our priorities. We recognise the growing contribution that countries outside South Africa are making to achieving our purpose, and we are committed to ensuring that we have strong relationships between countries and the centre. Our group risk and audit functions are working more closely with their counterparts in country, and participating in committees at country level. We’re also working to build stronger relationships between our teams at group level and our non-executives in country, to build closer relationships across the group.

We’re confident in our Africa growth strategy, and that we’ll continue to make good returns across the continent. We are also confident that our commitment to doing the right business, the right way, and placing our customers’ best interests first, will ensure that we continue to make a positive and substantial contribution to supporting inclusive economic growth on this continent we call home.

Jun 4 CEOs: Ben Kruger and Sim Tshabalala, and chairman Thulani Gcabashe

MESSAGE TO OUR STAKEHOLDERS:

LET’S MOVE FORWARD TOGETHER

In 2014, we undertook a review of our strategy and purpose, in light of changes in the global macroeconomic environment, a desire to focus more deliberately on driving growth on our home continent, and a commitment to reshaping our organisational structures and ways of working to better serve the needs of our customers and clients. The outcome of this process was a redefined purpose: “Africa is our home, we drive her growth”. Our purpose encapsulates our commitment to being more than a provider of financial products and services. We aim to be a catalyst for inclusive economic growth in our countries of operation. We are passionate about making life better for our fellow Africans through achieving our purpose.

As a bank that aspires to be socially relevant, we’ve been listening to our customers and clients. The outcome of this process was a redefined purpose: “Africa is our home, we drive her growth”. Our purpose encapsulates our commitment to being more than a provider of financial products and services. We aim to be a catalyst for inclusive economic growth in our countries of operation. We are passionate about making life better for our fellow Africans through achieving our purpose.

The purpose of our SEE framework is to create shared value for our stakeholders and Standard Bank – using our corporate assets to address social needs, while simultaneously identifying and creating new business opportunities.

SEE was launched in November 2016 to all our people in South Africa. We asked our people to let us know how they SEE what they do at Standard Bank differently and how they are part of our creation of shared value. Some of the responses can be found throughout the report. Just look out for the SEE More image. During 2017, our focus will be to take SEE to our Africa Regions.

WHAT IS SEE?

To SEE more means we can be more: a catalyst for change in Africa. Our success comes from using financial services to make life better for Africans, adding social, economic and environmental (SEE) value.

IMPACT IN NUMBERS

This is the value Standard Bank creates for society, both internally with our people and externally with other stakeholders, such as clients, governments and the rest of civil society.

ADDRESSING SOCIAL NEEDS TO HELP AFRICA GROW BY:

- Stable food production in future
- Eases financial burden
- Loans structured
- Workers and land retained
- Driving African growth

See shared value

Agricultural turnover totalling more than

700 permanent jobs saved in 2016

More than 700 permanent jobs saved in 2016

Direct impact on the lives of more than 5,033 South Africans

Standard Bank’s strategy is a sustainability strategy. We achieve our purpose of driving Africa’s growth by SEEing the social, economic and environmental value.
Standard Bank drives economic growth in Africa through creating social and environmental value, which also leads to more innovative and profitable ways of doing business.

**ECONOMIC**

In 2016, the Instant Money app had led to economic activity amounting to R9.2 billion by South Africans who in the past may have had to rely on cash transactions only.

More than 14.6 million transactions were processed in 2016 on our Instant Money app at an average value of R630 per voucher.

**ENVIRONMENTAL**

Investing in renewable energy provides a sustainable carbon neutral option.

Only 24% of sub-Saharan Africans have access to energy – World Bank

Provides energy with the least environmental impact and the longest shelf-life.

FINANCING SUSTAINABLE ENERGY SOLUTIONS BY:
knowing that our long-term profitability depends on the stability and wellbeing of our continent.

More than 14.6 million transactions were processed in 2016 on our Instant Money app at an average value of R630 per voucher.

Standard Bank’s success depends on creating value for the environment through conscious and responsible lending.

**IMPACT IN NUMBERS**

Partnersing with solar energy providers, Standard Bank facilitated the generation of 190 MW of solar photovoltaic energy.

This has the ability to provide 92 500 homes with sustainable electricity and improve energy security.
MANAGING ECONOMIC HEADWINDS

Africa is our home and we are committed to the expansion and deepening of our business across the continent. Economic growth has slowed significantly in several of our countries of operation. By carefully managing risk across our portfolio, limiting our exposure to the commodities sector, and successfully identifying and investing in growth sectors at national and regional level, we have continued to grow in Africa, and support African growth.

2016 was a challenging year for the global economy. Sub-Saharan Africa’s growth averaged just 1.4% – the lowest in 22 years. Regional per capita GDP is estimated to have contracted 1.1% in 2016, following an expansion of 0.4% in 2015.

Low commodity prices drove down growth in the region’s largest economies. South Africa grew by just 0.4% in 2016. Nigeria’s GDP contracted by 1.5%, while Angola’s growth slowed to 0.4%. Growth also slowed significantly in metal and mineral dependent economies such as the DRC, Mozambique, Botswana and Zambia. In contrast, many agricultural exporters, including Côte d’Ivoire, Senegal and Ethiopia continued to grow at 6% or more, supported by strong public infrastructure investment and buoyant private consumption.

Consumers in several countries were put under pressure by rising inflation, linked in some cases to high food prices caused by the severe drought in eastern and southern Africa. Large currency depreciations against the dollar were experienced in Angola, Ghana, Uganda, Mozambique, Nigeria and Zambia. Tough economic conditions heightened credit risk, and therefore interest rates.

In the face of these headwinds, we identified new investment opportunities in sectors with potential for growth and job creation, while decreasing our exposure to the commodity sector. During 2016, we expanded our offering in the consumer sector, in east African countries focused on growing their manufacturing and services sectors, and in local currency products. We used our large geographic footprint and our understanding of local markets to manage foreign currency liquidity shortages and grow our business with local and multinational customers.

We’re recognised as a bank with a deep understanding of the risks and opportunities in the 20 African countries we operate in, such as being awarded the Best Bank for Financial Risk Management in Africa by the Global Finance magazine – making us a partner of choice for businesses looking to expand into new markets. We work closely with businesses and insurers to identify and assemble competent risk mitigation arrangements, allowing us to underwrite and place risk for longer time periods in these markets.

WE TAKE A LONG-TERM VIEW. Our commitment to achieving positive outcomes for our customers requires us to stand by them during difficult times, doing all we can to see them through to better days, while fulfilling our fiduciary duty to shareholders. It’s an approach that benefits the bank and all our stakeholders, especially our clients.

For example, we have worked with our customers to extend their mortgages where necessary – keeping existing customers in their homes, and helping new customers to access the market through careful credit risk management.

Similarly, we’ve been working with South Africa’s farmers to see them through the prolonged drought, restructuring their debt where necessary.

Our systems enable us to respond quickly and appropriately to any changes in risk appetite or exposure, in ways that protect our customers and our brand.
Managing economic headwinds continued

GROWTH PROSPECTS IN 2017

We expect increased economic activity in sub-Saharan Africa in 2017, driven by a gradual recovery in commodity prices, ongoing investment in infrastructure development, and new government spending on the development of non-commodity sectors. The factors that underpinned Africa’s growth surge, including a young and growing population, greater urbanisation, improved governance and greater macroeconomic stability, remain in place in many countries and medium-term growth prospects remain favourable. Economic diversification is beginning to take place in some economies. Consumer-focused sectors, including food, IT, tourism, finance and retail, are attracting increasing investment. 

East Africa remains a highly attractive investment destination, with average national growth rates of 6% or more. This growth is driven largely through transport, and energy infrastructure and effective regional integration. At the beginning of 2016, we officially opened our representative office in Ethiopia, thereby strengthening our presence in this region.

MAXIMISING THE IMPACT OF ENTERPRISE DEVELOPMENT (ED) AND EMPOWERMENT FINANCING

Supporting the start-up of new enterprises is the best way to create new jobs. In South Africa, the Financial Sector Code requires that we spend 0.2% of our profit after tax to support enterprise development. The benefits of which are primarily black-owned SMEs (BSMEs). For 2016, we had R275 million (non-recoverable funds) available to support ED initiatives. However, we recognised that we could do so much more for ED if we were innovative with the use of these funds.

Commercial banks operate within strict regulatory constraints and risk parameters, which makes providing loans to SMEs and start-ups very difficult. A major criticism of banks has been the lending we do to small businesses is limited to those who can fulfil our standard collateralised lending requirements. We mobilised our ED funds to support “business unusual” BSME lending. We did this by establishing an independent trust whose mandate is to provide collateral and related support to enable BSMEs to access finance from commercial banks. In 2016, we directed approximately R90 million of our ED funds to the trust. The trust used this money to assist ED beneficiaries to access approximately R90 million worth of lending, which they would not have otherwise been able to access. We leverage the funds available in the trust to reduce the associated risk, enabling the BSMEs to qualify for interest rates much lower than they would have otherwise qualified for.

For example, a client providing a transport service might have a vehicle which she can use as 70% of the collateral needed. She can apply to the trust for the remaining 30% of the collateral, and qualify for the loan at an advantageous rate.

We used our remaining ED funds, approximately R12 million in 2016, to provide capacity development support to qualifying beneficiary companies, paying for specialists to provide them with general business and financial competencies, as well as technical assistance. For example, if a business can’t qualify for a loan because it lacks adequate financial records, we’ll provide an accountant to help get the records up to scratch. Or, if a construction business has landed a contract but lacks experience, we’ll provide a construction expert to help them ensure the success of the project. We use our core competence to deploy funding into the economy in support of BSME growth and development. We strengthen the viability of these enterprises through the support we offer, which makes them a better candidate for a commercial bank loan. In total in 2016, we dispersed an amount of approximately R502 million in loans to BSMEs, of which R90 million was provided through the trust.

Our model has enabled us to assist far more BSMEs than would otherwise have been possible — in the process, supporting enterprise growth, sustainability and job creation. We created shared value by mitigating lending risk, while providing the tools needed by the BSME. Our success rate since implementing this model in 2014 has been 100% performance on loans to BSMEs.

Our BizLaunch product is designed for start-up businesses, and offers simple, efficient solutions to make and receive payments. It also enables business owners to insure their personal investment in the business. BizLaunch is available to any new business, including sole proprietors with no trading history, as well as informal enterprises that previously used personal accounts to trade. It includes value-adding services and products. The BizConnect online platform for SMEs provides expert advice on developing systems, streamlining operations, improving the day-to-day running of a business and improving its growth prospects. It also offers the latest news, trends, statistics and solutions on general business, finance, agriculture and franchising, and allows users to interact with other business owners online.

We also support SMEs through the Standard Bank Incubator Programme. The incubator provides developmental support for start-up enterprises, and access to market opportunities for more established SMEs. The programme offers mentoring, coaching and professional development, together with technical facilities for 3D prototyping and small-scale manufacturing, and opportunities for entrepreneurs to network and identify opportunities for collaboration. The incubator also runs showcase days, during which it invites our corporate clients to meet with participating SMEs and explore opportunities to do business together. 600 SMEs have made use of the Incubator since 2015, and 150 start-ups became successful firms. Some received international recognition. In 2016, we also opened a SME hub in Pretoria, to further increase our reach and support to local entrepreneurs.

In 2016, we were awarded a full banking licence in Côte d’Ivoire, allowing us to commence banking operations in the Francophone West African market. The West African Economic and Monetary Union has substantial business advantages stemming from its stable single currency, shared central bank and stock exchange, as well as its increasingly harmonised business legal infrastructure and burgeoning population. Côte d’Ivoire is ideally positioned as a hub for the region, which also includes Benin, Burkina Faso, Guinea-Bissau, Mali, Niger, Senegal and Togo. The country has one of Africa’s fastest GDP growth rates, and is expected to maintain growth of about 6 – 7% or more over the next three years. Its rapid economic growth is based on public-investment led initiatives. In power and infrastructure in conjunction with successful public-private partnerships, natural resources (oil, gas and mining), agriculture, telecommunications, and the country’s consumer market — all important sectors of activity for Standard Bank. Establishing a banking presence in this market provides us with an important growth opportunity, strengthening our ability to drive Africa’s growth.

Managing economic headwinds continued

Côte d’Ivoire licence to operate

In 2016, we officially opened our representative office in Ethiopia, thereby strengthening our presence in this region.

Maximising our impact in empowerment financing and enterprise development

R502 million in loans made available to black businesses (that would not have access to such loans in the normal course of business)

R41 million paid out in loans to BizLaunch

R16 million directed towards an independent trust

R1.5 million paid out for ED business development support

R461 million directed towards growth and acquisition of black businesses

R11.5 million mobilised via the ED Independent Trust

R461 million directed towards growth and acquisition of black businesses

R275 million

FOR EXAMPLE

SME hub in Pretoria, to further increase our reach and support to local entrepreneurs.

ED funds in 2016: R461 million directed towards growth and acquisition of black businesses.

ED funds in 2016: R16 million directed towards an independent trust.

ED funds in 2016: R11.5 million paid out for ED business development support.

ED funds in 2016: R275 million

Maximising our impact in empowerment financing and enterprise development

R502 million in loans made available to black businesses (that would not have access to such loans in the normal course of business)

R41 million paid out in loans to BizLaunch

R16 million directed towards an independent trust

R1.5 million paid out for ED business development support

R461 million directed towards growth and acquisition of black businesses

R11.5 million mobilised via the ED Independent Trust

R461 million directed towards growth and acquisition of black businesses

R275 million
PARTNERING WITH GOVERNMENTS TO DELIVER DEVELOPMENTAL INFRASTRUCTURE

Standard Bank partnered with governments across Africa to deliver a number of major infrastructure deals during 2016.

In South Africa, we financed renewable energy projects that are producing more than 40% of the 1.760 MW produced by independent power producers, under the Renewable Energy Independent Power Producers Programme (REIPPP). The bank also co-financed 75% of Solar Capital’s R5 billion De Aar solar farm project.

In the transport sector, we and two other SA banks committed to provide R3 billion each to Transnet for the procurement of locomotives.

And in the IT sector, we partnered with Vumatel to finance delivery of broadband internet services, in one of the largest ever debt capital raising-based deals of its kind in the fibre-to-household industry. Vumatel plans to invest R3 billion in the project over two years.

In Ghana, we were a joint transaction arranger of a new five-year domestic bond that raised US$193 million, to finance government programmes in the 2016 budget.

In Tanzania, we finalised a US$95 million equivalent upsizing of the syndicated term loan facilities for Helios Towers Tanzania, to finance the next phase of expansion of its network of telecommunications towers across Tanzania.

In Namibia, we provided a Namibia term loan facility for HopSol Power Generation, making us the first commercial bank to finance a solar power generation project in the country.

And in Zambia, we approved a US$75 million facility to fund medium-term facilities in sectors, including SMEs, energy, agriculture, infrastructure development and other projects to boost growth. We also, in partnership with another institution, extended a $163 million loan to Zesco Ltd. to connect Zambia’s north-western province to the national grid.

In Kenya, we and two other global banks issued the National Treasury with a US$600 million syndicated loan to fund infrastructure development projects, and we partnered with General Electric East Africa to finance the procurement of digitised medical equipment to be distributed in public hospitals across the country.

In Ghana, we were a joint transaction arranger of a new five-year domestic bond that raised US$193 million, to finance government programmes in the 2016 budget.
Renewable energy is a huge potential growth area for Africa. Research done by McKinsey estimates that Africa has 10 terawatts of potential energy capacity, mostly solar, and a potential of 350 GW of hydro, 109 GW of wind capacity, and 15 GW of geothermal. Kenya is the world’s ninth largest producer of geothermal energy, and is rapidly developing its wind power resources. Ethiopia has one of Africa’s largest wind farms. Ghana is building the world’s fourth largest solar facility. South Africa has been recognised for one of the fastest rates of growth in the world for renewable energy investment through the Renewable Energy Independent Power Producers (REIPP) Programme, inclusive of wind, solar power and biogas.

Since 2012, we have dramatically increased the proportion of our energy investments directed toward renewable energy. 85% of the power infrastructure projects we have funded in the past four years have been solar, wind or hydro projects, while only 15% of our energy investment portfolio has been on fossil fuel projects. As a result of this shift, we’ve helped to finance 2,516 MW of energy across Africa since 2012.

We recognise, however, that coal continues to play a crucial role in Africa’s energy mix, both as a major source of affordable energy and a key employment sector. We are therefore working with our stakeholders in industry and government to implement a gradual shift away from investment in fossil fuels, towards renewable energy projects.

Considering environmental and social risks

Our environmental and social (E&S) risk approach is centred mainly on large qualifying transactions in corporate and investment banking (CIB), and is managed according to the Equator Principles (EP). Standard Bank became a signatory of the EP in 2009, and was appointed chair of the EP Association in 2015.

During 2016,

- 457 transactions screened overall for social and environmental associated risks.
- Three Equator Principle projects that reached financial close within 2016.
- US$2.6 billion invested since 2012.
- 85% of energy is from renewable sources.
- 15% of energy is from fossil fuels.

For more information on our E&S risk screening and EP projects for 2016, please refer to our additional online content at http://sustainability.standardbank.com.
INVESTING IN HEALTHCARE SUPPORTS SUSTAINABLE GROWTH

General Electric East Africa tendered for and won a contract with the Kenyan Government to finance, supply and maintain radiology equipment in 98 public hospitals throughout Kenya. Stanbic Bank Kenya and General Electric have developed a strong working partnership over the past four years, collaborating on a number of projects in the energy sector in Africa. We were therefore General Electric’s partner of choice in financing the radiology equipment contract. General Electric East Africa appointed Stanbic Bank Kenya as the joint-mandated lead arranger to arrange a club deal financing of the transaction, to the value of $80 million with a tenor of seven years. We developed a cost-efficient financial structure, led the negotiation and clarification of the transaction documents, and arranged the funding required, underwriting $40 million of the debt.

SEE THE VALUE OF FINANCING ECOTOURISM

During 2016, our corporate and investment teams were proud to play a crucial part in the growth of one of the largest ecotourism businesses in Africa, Wilderness Safaris. Our Botswana operation went into a US$35 million finance deal with Wilderness Safaris which will enable them to extend their positive impacts on conservation and rural development through nature-based tourism. Wilderness Safaris are custodians of over 2.3 million hectares of prime African wilderness, which includes a variety of ownership arrangements with rural communities in Africa, as well as some public-private partnerships, including various national parks. This loan has enabled their growth into East Africa, as well as enabled investment into the other eight African countries in which they operate, particularly Botswana, strengthening the impact they have on conservation and the economic development of rural communities in Africa.

INVESTING IN EDUCATION ENABLES INCLUSIVE ECONOMIC GROWTH

We believe that investment in improving educational outcomes is a crucial part of the effort to unleash Africa’s potential and drive her growth. We invest in education — from early childhood development to tertiary level — to nurture and develop our future employees, the young entrepreneurs who will start new businesses, and the girls and boys who will one day be the next generation of Africa’s leaders. We invest in their future, knowing that in generations to come they’ll be Standard Bankers — as executives, as new clients, as suppliers, and as shareholders.

Our Botswana operation went into a US$35 million finance deal with Wilderness Safaris which will enable them to extend their positive impacts on conservation and rural development through nature-based tourism. Wilderness Safaris are custodians of over 2.3 million hectares of prime African wilderness, which includes a variety of ownership arrangements with rural communities in Africa, as well as some public-private partnerships, including various national parks. This loan has enabled their growth into East Africa, as well as enabled investment into the other eight African countries in which they operate, particularly Botswana, strengthening the impact they have on conservation and the economic development of rural communities in Africa.

INVESTING IN EDUCATION ENABLES INCLUSIVE ECONOMIC GROWTH

We believe that investment in improving educational outcomes is a crucial part of the effort to unleash Africa’s potential and drive her growth. We invest in education — from early childhood development to tertiary level — to nurture and develop our future employees, the young entrepreneurs who will start new businesses, and the girls and boys who will one day be the next generation of Africa’s leaders. We invest in their future, knowing that in generations to come they’ll be Standard Bankers — as executives, as new clients, as suppliers, and as shareholders.

OUR MATERIAL THEMES

TAILORING PRODUCTS AND SERVICES TO MEET DIVERSE NEEDS

As a “Universal bank”, we are able to serve the full range of our customers’ financial services requirements. We help them to manage, grow and protect their savings, assets and wealth, borrow safely and affordably to expand their businesses, buy homes, study and fulfil their personal ambitions, and to make provisions to ensure their financial wellbeing in retirement, or in the event of unplanned events. While our customers might access any of these individual services from a competitor, we aim to ensure we’re their first choice delivering a fully integrated service that meets the full range of their needs. This is based on our understanding of their unique circumstances; the relationship of trust we’ve built with them, and the convenience and accessibility of our offering.

In a highly competitive environment, it’s imperative for us to put our customers at the centre of what we do and the products we design. If we fail to do so, they will certainly go elsewhere. This means developing and delivering solutions tailored to their individual needs and preferences. And it means putting what’s most convenient and appropriate to the customer ahead of what’s most convenient or profitable for the bank.

In 2015, executives across the group participated in a process which brought us much closer to our customers, and helped us to understand their perspectives and frustrations. Standard Bank’s senior leaders, across the business, spent a week at the frontline – in our branches and call centres. Our collective learning from this programme has informed various changes over the past year – changes designed to minimise customer frustrations, and to deliver a far more customer-focused service. We’ve made changes to a number of processes, products and delivery channels, improving response times and enabling more issues and queries to be resolved at the first point of contact.

Our presence across 20 African countries, and our strategic partnership with ICBC, enables us to connect our business and corporate clients with business opportunities across the continent, and to facilitate partnerships between Africa and China, while simultaneously providing seamless banking services across national borders. During 2016, we’ve worked closely with ICBC to structure joint financial solutions for a number of our multinational clients. With ICBC, we have committed and syndicated loans to Chinese companies for a total project size of $3.8 billion in Africa in 2016, as well as another $5 billion in the short to medium term.

Understand our clients

We help our clients to

- Manage, grow and protect their savings, assets and wealth
- Borrow safely and affordably to expand their businesses
- Buy homes, study and fulfil their personal ambitions
- Make provisions to ensure their financial wellbeing in retirement, or in the event of unplanned events

Partnering with fintechs

Masterpass – virtual wallet service

A large proportion of Africans remain unbanked. Working in partnership with mobile companies and other fintech services, we’re developing new, low-cost products that meet basic banking needs, while maximising customer convenience, such as our masterpass virtual wallet service.

We’re also developing new payment solutions that make it easier for small businesses to process non-cash payments – and to reduce the security risks associated with cash handling.

SnapScan

An example is our SnapScan app, with 500 000 registered customers, which enables customers to pay at point of sale using their phones, using Quick Read (QR) technology to process the payments. The benefit of SnapScan is twofold; consumers can pay for goods without having to physically present their cards (ensuring a heightened degree of safety), and customers who register can register online and are able to transact using the QR code (avoiding the need for expensive point of sale device fees). Both making transactional banking more accessible, affordable and safe.

SnapScan – using cell phones to pay at point of sale

We’ve also been working with our business clients to make banking services more convenient and accessible for their employees. We’ve established mini ‘branches’ within some of our clients’ offices, with access to a device or kiosk enabling electronic transactions. These kiosks are staffed by Standard Bank employees for a limited number of hours per week, enabling people to bank without leaving their workplace. In some companies, we’ve also installed ATMs onsite.

Understanding our clients

Understanding our clients
Keeping our customers safe from fraud

In addition to this, Standard Bank has continued to invest heavily in anti-fraud technology. These tools identify potentially suspicious transactions and proactively alert customers (and the bank) of these behaviours preventing unnecessary fraudulent transactions and associated losses.

Our focus on keeping our customers safe from fraud has resulted in approximately 90% of fraud being prevented or recovered.

Our Fraudstop and Whistleblowing programmes contributed significantly to this success. The Financial Crime and Cyber teams work in close collaboration to harden the environment and mitigate cyber-fraud risk.

Community Banking in Uganda

During 2016, Stanbic Bank Uganda launched Community Banking, an affordable banking offering aimed at NGOs. It provides a secure online platform which allows administrators to access and monitor their account anytime. The platform is free and allows for segregation of duties for different users. It also has a mobile money option, allowing organisations to pay beneficiaries directly into mobile money wallets. There are no transaction fees for internal transfers, cheque and cash deposits, and no account maintenance fees on accounts with a balance at least one million shillings.

STANDING BY OUR CUSTOMERS IN TOUGH ECONOMIC TIMES

We understand that our sustainability as a business depends on the financial health of our customers and clients. We’re committed to building long-term relationships with the people and businesses that we bank. This commitment requires us to find ways to support them through tough times.

Tough economic conditions in several of our countries of operation have heightened credit risk and levels of consumer and business debt. Banking sectors in several of our countries of operation, including Ghana, Nigeria, Tanzania and Uganda, saw a significant rise in non-performing loans (NPLs) during 2016. This resulted in a tightening of credit, particularly for customers deemed to be high risk such as small businesses and entrepreneurs.

In South Africa, a number of our corporate clients encountered serious financial difficulties during 2016. In each case, we partnered with our clients and other financial institutions to ensure that these businesses were able to stay in business, protecting thousands of jobs, while managing risk responsibly.

In South Africa, over the past few years financial pressures have impacted affordable homeowners, many of whom are finding it more difficult to make regular payments on their loans, including mortgages. We believe in partnering with our customers and doing our best to keep them in their homes. In 2016, our affordable housing loan book volume grew to 98 477 homes. We understand the economic challenges with which our customers are grappling, and we’ve worked hard to assist as many homeowners as we could to keep them in their homes without jeopardising Standard Bank’s sustainability.

During 2016, we were able to assist 5 662 affordable housing owners in financial distress through restructuring their loans to ease their financial pressures.
Understanding our clients continued

OUR MATERIAL THEMES

Partnersing with our agri-business clients to get through the drought

The WEF Global Risk Report 2016 identified the failure of climate change mitigation and adaptation as the top risk facing the globe in the near term. The related risk of water crisis was ranked third. Africa, with our high dependence on rain-fed agriculture, and the ineffectiveness of adequate water and sanitation infrastructure, is particularly vulnerable to climate change and to negative impacts on water and food security. We urgently need mitigation strategies, including the cultivation of more drought-resistant crops and the establishment of appropriate financing and insurance schemes, to help cope with the social, economic and environmental aspects of climate change.

Much of south-eastern Africa suffered the damaging impacts of the long-term drought during 2015 to 2016, with severe impacts on food inflation and food security. Madagascar, Mozambique, South Africa, Zambia and Zimbabwe were worst affected. Reports in June 2016, said more than 41.4 million people in the SADC region were food insecure, with about half needing urgent help, following the worst regional drought in 35 years. The region was about 28% short in terms of average cereal production, and livestock breeders had to pluck stock owing to lack of food and water. Food insecurity was expected to peak from October 2016 to March 2017.

These conditions placed commercial, small-scale and subsistence farmers under enormous pressure. In South Africa, Agbiz and AgriSA revealed that a significant number of commercial farmers were struggling to service their loans with large commercial banks. There were also reports of a rise in bankruptcy cases among small-scale emerging farmers. 39% of Standard Bank South Africa’s agri-business clients’ loans were restructured owing to the severe impact of the drought. We worked with them to restructure their loans and keep their farms solvent – in the process saving 706 permanent and seasonal farm labourer jobs, and keeping just under 50,000 hectares of land agriculturally productive. In terms of the economic activity and contribution towards GDP and food prices, these farms had a total turnover of more than R180 million.

Our efforts to develop innovative solutions to support our agriculture clients and impact positively on society more broadly have been central in informing our understanding of how we create shared value – how we ensure we’re more than just a bank. This supported the successful launch of our SEE More campaign.

ENABLING PAYMENT FOR SMALL-SCALE FARMERS IN EAST AFRICA

The tea industry in Kenya is the second largest income earner in the country and has a rich history dating back to 1903. The Kenyoni Tea Development Agency (KTDA) plays a crucial role with 70% of Kenya’s tea production coming from the 54 tea companies and 560,000 small-scale tea farmers that make up the KTDA. Tea is sold at auctions in Mombasa where brokers auction the tea on behalf of the producers. In the past, the tea settlement after the auction was done manually. This manual process would take a lot of time to reconcile and allowed some brokers to siphon producer payments for their own gain. This collaborative solution with the KTDA has resulted in much stronger economic base from which to transact ethically and transparently, resulting in the improved payments of small-scale tea farmers in East Africa.

In South Africa, we piloted a new exit interview process in 2016 to deepen our understanding of why people choose to leave the bank. These insights help inform our efforts to continuously evolve the culture and working environment to meet the changing needs of our people. This process will be implemented across our operations in 2017.

In order to understand what motivates and inspires our people, and where we can improve the work environment, we use insights obtained from employee surveys and additional research tools. We conducted the Experience@Work survey in South Africa and Uganda in 2016 and will continue to track employee feedback and insights in relation to our strategic priorities through a range of surveys in 2017.

Motivating our people
We believe that our people want more from work than a daily routine and a monthly salary. We want them to feel connected to our purpose, driving Africa’s growth; to our commitment to delivering the solutions with the best fit for our individual customers and clients; and to our promise to do the right business the right way.

We ensure that our people are empowered and recognised for delivering against our strategic objectives. And we work to ensure that they have every opportunity to achieve their full potential, and to develop the skills and adaptability needed to thrive in a rapidly changing world of work.

In order for us to provide the best solutions for our customers, we need our people to be motivated to give of their best and go above and beyond what is usually expected to deliver an exceptional client service.

Enhancing our people’s experience at work

In May 2016, we launched a new employee brand across the group. The key focus was to foster a deeper connection with Standard Bank’s purpose and show our people that each of them has an important role to play in driving Africa’s growth by seeing, being and doing more. The initial launch was followed by business area specific communication and a continuous drive to link the overall messaging to employees more closely to their immediate business context. Great examples of this are evident across our operations. Stanbic Nigeria introduced a comprehensive programme to encourage employees to commit to “doing more and being more”, while in Mozambique we have implemented a culture programme, aligned to the employee brand messaging. The SEE More campaign followed on to position the contribution of our people to society.

Read about the SEE More campaign on pages 22 – 25.

Our material themes

Fostering a deeper connection with our purpose and vision

The 2016 survey indicated an Employee Promoter Score of 86% in South Africa, and 89% in Uganda. 55% and 75% of our employees in South Africa and Uganda respectively participated in the Experience@Work survey. One of the measures of the survey is the Employee Promoter Score, which is calculated by aggregating employee responses to three questions:

- “I would recommend Standard Bank as a good place to work”
- “I am proud to be associated with Standard Bank”
- “Standard Bank energises me to go the extra mile”

The survey also indicated a voluntary attrition rate of 5.6% in South Africa, and 2.1% in Uganda, with the regrettable voluntary attrition rate being 14.3% globally, compared to the industry average of 14.3%.

The workforce of the future will require very different skills from the workforce of today. The “Fourth Industrial Revolution” refers to the transformation of systems of production, management, and governance currently underway, driven by technology, and by the opportunities created by the unprecedented manner in which people across the globe are now connected, via the internet and mobile devices. This “revolution” is likely to disrupt labour markets with increased demand for different sets of skills and experience than what are required today.

We are committed to contributing to the future employability of our employees by offering market-ready learning that is accredited and recognised within Standard Bank and outside the financial services sector. In 2016, we’ve implemented learning programmes on a range of client service and sales solutions relating to specific client segments and to support key client management systems, empowering our people to better serve our clients.

BUILDING AN AGILE, ADAPTIVE AND DIVERSE WORKFORCE

We aim to attract and retain smart, independent thinkers who are focused, tenacious and energetic, and who will keep our business agile and innovative. We invest in hiring and developing young people with specialised skills and with the potential to become future leaders.

Standard Bank is recognised as an employer of choice among graduates. In 2016, the South African Graduate Employers Association placed Standard Bank South Africa (SBSA) first as Employer of Choice in the Retail and Commercial Banking sector, and third for Most Aspirational Employer for 2016 across all participating organisations. We took second place in the Best Integrated Recruitment Campaign category for use of diverse means of engagement.

For many young graduates, securing their first job is a daunting challenge. In 2016, we employed 207 graduates across a variety of development programmes. We employed 33 graduates across Botswana, Ghana, Kenya, Mozambique, Nigeria and Zambia. In South Africa, we employed 174 graduates, of whom 81% were black and 46% were women. In 2017, we celebrate the 20th anniversary of our graduate programme and the bank’s unwavering commitment to investing in young talent.

In South Africa, we offer learnerships for black matriculants and graduates, providing them with work experience and access to development opportunities and the possibility of full-time employment. In 2016, we assisted 1,516 learners in South Africa to gain workplace experience and the possibility of full-time employment. SBSA achieved the maximum score for our skills development scorecard for black people on learnerships, internships and/or apprenticeships. We also provided bursaries to 145 deserving tertiary students studying for degrees in the fields of mathematical and actuarial science, technology, engineering and commerce in South Africa in 2016.

Nurturing young talent

We are committed to developing young employees with future leadership potential, and invest in ongoing management and leadership development programmes to accelerate their career growth.
Diversity is critical to the success of our business strategy, as it drives innovation and enables us to remain socially relevant in a fast-changing world. We seek to employ a diverse workforce that is able to understand and serve our equally diverse customer base. We aim to build an inclusive culture, where all of our people feel empowered and motivated, and we expect all our people to embrace and value diversity.

In South Africa, our Experience@Work survey asked employees whether they had seen progress in our efforts to support diversity, and if the group’s commitment to equity has become more visible over the last two years. 83% of participating employees agreed that the group is making progress in this regard, with a more visible commitment to employment equity, zero tolerance for racism and sexism in the workplace, and Inclusion initiatives to the regulatory framework in place and are working to improve the representation of black (African, Coloured and Indian) employees and women in senior and top management roles. We have also put a number of initiatives in place to create an inclusive environment for people with disabilities. As at the end of December 2016, in South Africa 40.7% of our senior managers are black (2015: 39.5%), while our top management is 22.2% black (2015: 20.9%). Women constitute 33.3% (2015: 21.7%) and 36.4% (2015: 36.7%) of top and senior management respectively. Development and advancement of our people is a critical contributor to diversification of the demographic of our senior and top management levels, and in 2016, over 50% of people promoted into top and senior management were black (2015: 50%). Middle management is 68% black (2015: 67%). In 2016, we retained level 2 broad-based black economic empowerment status under South African legislation.

We are also focused on improving the representation of women in executive positions. By the end of 2016, we had improved the representation of women in executive positions across the group to 30.1% compared to 28.1% in 2015. This compares very favourably to the global average of only 24% women in senior management roles in 2016.1

We provide a wide range of health and wellness services, and encourage our employees to take responsibility for their wellbeing through seeking advice and assistance on health, wellness and/or financial challenges. We provide individual and team counselling services to our employees to help them with personal problems, work stress, indebtedness, and illness among others. We train managers in managing absenteeism. In South Africa, we’ve been using the cost of total sick leave as a percentage of total payroll as our key measure of absenteeism since 2015. In 2016, this equated to 1.2% (2015: 1.3%) which is below the South African financial sector norm of 1.7%.² We will be extending our Sick Absence Management Framework to our other countries of operation during 2017.

Other interventions during 2016 included wellness days, a range of training and upskilling initiatives, completion of online training modules on financial fitness and sick absence management and our Get Active challenge.

In 2016, a number of our chief executives were awarded accolades by various global and local industry bodies. Sola David-Borha, chief executive of Stanbic IBTC in Nigeria, won Businesswoman of the Year West Africa, at the 2016 All Africa Business Leaders Awards held in Lagos in October. Stanbic Bank Uganda chief executive Patrick Mweheire won the Ai 50 SRI CEO of the Year at the ninth annual African Investor Awards. And in South Africa, PBB South Africa chief executive Funeka Montjane was recognised as Businesswoman of the Year in the Corporate Category at the 2016 Businesswoman of the Year Awards.

We have healthy succession coverage for top leadership roles. Annualised voluntary turnover at executive level is 5.6%. We support a philosophy of promoting from within, thereby building a strong track record of career development for our people. 51% of appointments made in the group in 2016 were internal transfers and promotions.

ENABLING BOLD AND INSPIRATIONAL LEADERSHIP TO DELIVER ON OUR PURPOSE

We pride ourselves in attracting and retaining world-class leaders. We recognise the need to capacitate leadership to adapt quickly to a rapidly changing operating environment; to lead an increasingly diverse workforce, and to inspire our people.

OUR INVESTMENT IN THE LEADERSHIP TEAM HAS INCLUDED

- Engaging with the top 350 leaders across the group on the group strategy
- Providing bespoke leadership programmes for executives, based on their personal development priorities, including participation in international business school programmes, international assignments and exposure to different parts of the business.
- 4,307 employees across the group participated in a range of management and leadership programmes at our Global Leadership Centre.
- 350 top leaders attended 12 customised leadership development programmes initiated by specific business areas.
- 872 leaders attended 12 customised leadership development programmes initiated by specific business areas.

THE WELLBEING OF OUR PEOPLE

We provide a wide range of health and wellness services, and encourage our employees to take responsibility for their wellbeing through seeking advice and assistance on health, wellness and/or financial challenges. We provide individual and team counselling services to our employees to help them with personal problems, work stress, indebtedness, and illness among others. We train managers in managing absenteeism. In South Africa, we’ve been using the cost of total sick leave as a percentage of total payroll as our key measure of absenteeism since 2015. In 2016, this equated to 1.2% (2015: 1.3%) which is below the South African financial sector norm of 1.7%.² We will be extending our Sick Absence Management Framework to our other countries of operation during 2017. Other interventions during 2016 included wellness days, a range of training and upskilling initiatives, completion of online training modules on financial fitness and sick absence management and our Get Active challenge.

We have developed a financial fitness framework for the bank which includes providing employees with financial coaching, focusing on budgeting and improving behaviour related to personal money management.

An online financial fitness programme which provides effective tools for improved personal money management is available to employees.

I SEE MY JOB DIFFERENTLY...

Lesiba Victor Moseoetse – Small and medium-sized enterprises (SME) manager

Our existence is justified by how relevant we are to the community we operate in. Our success is defined by how many present and future lives we are improving and impacting positively.
We believe in a regulatory system that contributes to a safer financial system for all and that facilitates sustainable economic growth in Africa. We support the move towards a more principles-based regulatory framework that focuses on fair and beneficial outcomes for clients, as well as the stability and integrity of the financial system.

The pace, volume, and scope of changes in regulation remains a concern for us, and we work with policymakers and regulators to identify the likely effects of regulatory reform and potential unintended consequences. We continue to invest in our capabilities to understand and comply with the multiplicity of regulatory requirements facing a universal bank operating in more than 20 countries.

We support a regulatory framework that is appropriately balanced between promoting financial stability, protecting clients, ensuring a sustainable banking sector, and promoting economic growth. The characteristics of an effective regulatory framework are:

- Evidence-based regulatory impact assessments
- Clarity in what is required
- Consistency of application
- Appropriate to local conditions
- Efficiently and economically administered.

Our approach to managing regulatory change is based on three pillars:

- **FORESIGHT AND INSIGHT:**
  - Anticipating policy, legislative, and regulatory changes
- **ENGAGE:**
  - Responsibly influencing the design of regulation in support of an effective regulatory framework
- **COMPLIANCE:**
  - Supporting our people in doing the right business the right way through advising, training, monitoring, and reporting

This work is overseen by several board and management committees in the bank, including:

- Group risk and capital management committee
- Group audit committee
- Group risk oversight committee
- Group compliance committee

The central challenge confronting policymakers and regulators is how best to manage competing policy imperatives: the need for economic growth and financial stability, the need for greater financial inclusion and better consumer protection, and the need to allow for national discretion within globally consistent standards. Getting this balancing act wrong can have adverse consequences for developing economies. For example, proposed changes to the Basel Capital Framework, that require global banks to hold considerably more capital, could contribute to disinvestment from some African countries by some banks, restricting access to much-needed finance for infrastructure investment, cross-border trade, and renewable energy.

Global standard-setting bodies such as the Basel Committee on Banking Supervision and the Financial Stability Board continue to consider ways to strengthen the safety of the financial system. Current proposals include revisions to the assessment of credit and operational risk, and changes to how much capital banks are required to hold.
The Twin Peaks system is a game-changer for South African banks

The “Twin Peaks” model of financial sector regulation is being implemented in South Africa through the Financial Sector Regulation Bill. Once enacted, it will usher in substantial changes to the way in which banks and other financial services providers are supervised. Large financial firms – like ourselves – will be subject to conglomerate supervision by a new Prudential Authority. This means that the regulator will look at all the different businesses we have, both individually and in combination, to assess the health of the group as a whole and ensure that it is not “too big to fail.” The conduct of banks towards their customers will also now be supervised by the Financial Services Conduct Authority – a new supervisory body created to underpin the Financial Services Board that will focus on financial inclusion, the integrity of financial markets, and treating Customers Fairly.

Following on the Financial Sector Regulation Bill in 2017, will be the much-anticipated Conduct of Financial Institutions Bill which will outline the regulatory standards in relation to treating Customers Fairly and market conduct for all financial services providers. The social partners in Nedlac discussed the policy imperatives underpinning this Bill during 2016, and Standard Bank was part of this process.

Principles-based standards for regulating a wide range of matters are expected from the new regulatory authorities in 2017, including how the information customers receive about products and services is disclosed, how fees are disclosed, what fees can be charged, ensuring the fair treatment of customers, how conflicts of interest should be dealt with, improving the complaints management process, what conduct principles need to be in place for financial advisors, what levels of capital need to be held, how shadow banking should be managed, and what the recovery and resolution plans should contain.

Other significant regulatory changes on our radar

Consumer credit regulation remained a focus in 2016 as policymakers sought ways to tackle levels of indebtedness. Recent developments have seen specific proposals to assist vulnerable indebted customers, such as retrenched workers in the mining and manufacturing sectors. There are plans to improve the debt mediation and debt counselling system, clarify laws on debt collection, and increase the powers of the credit regulator to enforce the law. A cap on the amount which could be charged for fees and interest rates on loans was set in 2016, and the cap on the charge for credit life insurance will be released early in 2017.

The Financial Sector Regulation Bill is the start of South Africa’s move to the Twin Peaks system of regulation. Policymakers have started working on phase two of the move to Twin Peaks, which is making sure all other laws and regulations align with the Twin Peaks system. One of these is the Insurance Bill, which sets out the solvency and stability requirements for the insurance sector, but also puts in place the regulation for micro-insurance, to increase insurance cover to more people.

The Retail Distribution Review makes the provision of financial products more transparent and fair by improving the way in which financial institutions provide information to customers, knowing there is no conflict of interest within an institution, and requiring principles of good conduct for providers.

Globally, there is a move to improve and strengthen the monitoring and control of money laundering and countering terrorist financing. In South Africa, the Financial Intelligence Centre Amendment Bill improves the country’s monitoring systems by making sure banks, money transmitters, and other service providers are doing what they do best: detect and report crimes such as hacking and phishing can be prosecuted.

In South Africa, policymakers have outlined the Macroprudential Policy Framework that will be used to develop the Special Resolution Act, designed to manage financial crises. In this framework, policymakers discussing the most appropriate way to implement it. Standard Bank continues to work on ensuring there are Recovery and Resolution plans for operations across the group.

Regulatory trends in broader Africa

The scope and volume of regulatory change is far along in developing laws to improve cybersecurity and criminalise cyber-fraud and hacking. The draft Cybercrime and Cybersecurity Bill is designed to increase the cyber-safety of both the country and bank customers by, for instance, ensuring that online systems are protected and crimes such as hacking and phishing can be prosecuted.

In South Africa, policymakers have outlined the Macroprudential Policy Framework that will be used to develop the Special Resolution Act, designed to manage financial crises such as a financial crisis. The draft Cybercrime and Cybersecurity Bill is designed to increase the cyber-safety of both the country and bank customers by, for instance, ensuring that online systems are protected and crimes such as hacking and phishing can be prosecuted.

The Financial Stability Board at the request of the G20 is developing a framework for reporting on climate-related financial risks. The framework sets out principles for all public companies – not only those in the financial sector – to use when identifying and describing such risks, as well as risk mitigation actions that have been taken. The responsibility to disclose and manage climate-related financial risks is increasing in prominence globally, with the aim that investors, analysts, and bank supervisors consider this risk along with traditional risk types such as credit risk or operational risk. There is a growing concern that the lack of information about climate-related financial risks could undermine financial stability. For example, Michael Carney, the Governor of the Bank of England and Chairman of the G20’s Financial Stability Board, was quoted as saying: “This must change if financial markets are going to do what they do best: allocate capital to manage risks and seize new opportunities. Without the necessary information, market adjustments to climate change will be incomplete, late and potentially destabilising.”
ENGAGE: ADVOCATING FOR AN EFFECTIVE REGULATORY FRAMEWORK

We regularly engage with government departments, regulators, and members of parliament to provide input and feedback on policy and regulation. Our intention is to provide evidence-based analysis that will support policymakers in identifying and minimising unintended consequences associated with particular proposals, while remaining true to the intention of the proposed interventions.

In South Africa, one of the ways we engage with our stakeholders is through round-table discussions and policy dialogues, which bring leaders within the bank together with government leaders and officials, regulators, and policy analysts to discuss and understand the drivers behind policy and regulatory changes. In 2016, dialogues took place on property rights, and consumer credit. We are also active participants in various trade associations and business organisations, including the Banking Association of South Africa and Business Leadership South Africa.

We are currently working to extend this capability to our other countries of operation, and have visited several countries to gain insight into their policy systems and legislative processes, including Tanzania, Uganda, Nigeria, and Ghana.

Impact:

How will regulation impact on our customers and clients?

- 44 new regulations, policies or discussion documents*
- 21 submissions made on new regulatory requirements
- 19 issues analysed for impact
- Expands to other African operations

* Deemed material to Standard Bank, that were issued for comment, screened and finalised within 2016.

COMPLIANCE: SUPPORTING OUR PEOPLE IN DOING THE RIGHT BUSINESS THE RIGHT WAY

Strengthening our compliance capability

We’ve standardised our compliance model across the group, and have strengthened our compliance teams at both group and country level. This includes investing significantly in our compliance surveillance and training, and employing more compliance officers across our countries of operation. This supports the requirement to advise, train, monitor and report.

Compliance teams are playing a bigger role in executive level business decisions. Group internal audit and integrated operational risk are represented on the group compliance committee, and compliance is represented on various business and governance committees. Compliance meets regularly with internal audit to ensure that there is no duplication of effort, while increasing compliance coverage. The compliance monitoring team adopts a combined compliance monitoring assurance approach in its planning and reviews, including group internal audit, integrated operational risk, and the review teams of group compliance. This includes business compliance officers, exchange control compliance monitoring and financial services monitoring. Group compliance also works with integrated operational risk on ensuring that compliance incidents are loaded on the bank’s operational risk incident system, to support appropriate risk management.

Conglomerate supervision is expected to increase in 2017. This will require enhanced compliance cooperation with our businesses in our various countries of operation. Collaboration with Liberty on compliance-related matters has been enhanced, particularly in the area of anti-money laundering (AML) and combating the financing of terrorism.

There will be a strong focus on anti-bribery and corruption programmes in 2017.

During 2016, our compliance team enhanced the support it provides to board members and management teams in all our countries of operation. We undertook various visits to our operations across Africa, meeting with board members and executives to ensure a clear understanding of the issues, ensuring our compliance culture is effectively embedded across the group, and providing training to support the integration of compliance with risk and management activities.

We’ve introduced a number of technology solutions in the past year, to support more effective compliance surveillance and reporting. These include:

1. Significantly increased investment in AML controls. This supported the finalisation, in South Africa, of our AML remediation programme following the South African Reserve Bank (SARB) inspection in 2013.
2. Implementation of money remittance, surveillance and monitoring systems to support our partnership with clients.

During 2016, our compliance team enhanced the support it provides to board members and management teams in all our countries of operation. Group compliance also works with integrated operational risk on ensuring that compliance incidents are loaded on the bank’s operational risk incident system, to support appropriate risk management.
Over the past year, we’ve worked hard to encourage regulatory awareness and a culture of compliance among all our employees, using innovative technology to make compliance integral to how we think and work.

Since 2015, we’ve had a dedicated compliance training unit that focuses strongly on technology and innovation. Compliance training is compulsory, with consequences if training is not completed by all our people – including non-permanent employees, contractors and third party service providers.

Know your customer (KYC) is a crucial compliance requirement for banks the world over. It’s how we ensure that our services are not being used to process fraudulent, illegal or corrupt transactions, or used to channel funds to support terrorism or other illegal activities. But it’s often the source of frustration for customers, who might be unable to proceed with a transaction, or might find their bank account frozen, because they have failed to comply with KYC requirements. The KYC process has been particularly challenging in countries that don’t use a national identification system. In such cases, banks have relied on documents such as passports and drivers’ licences to ascertain a client’s identity. But these documents expire – creating challenges for the process. Over the past several years, we’ve been implementing electronic document management in all our countries of operation, to make the KYC process more efficient, and less of an inconvenience for our customers. The aim is to have only one digital record per client, and we’ve completed the scanning of all existing documents. We’re now in the process of implementing automatic document scanning in branches for all new clients.

Training and assessments are easy to access – everything is available online, and our system automatically sends individualised reminders of training requirements to our people, as well as user-friendly reports to enable line managers and business areas to track employee completion rates. We’re currently in the process of refreshing all of our compliance training modules and these will be rolled out in the second quarter of 2017.

The new training modules will be available on our people’s smart devices, enabling them to ensure that their training is up to date even if they’re out of the office.
EMBRACING INNOVATION

We understand the scale of disruption that is currently sweeping through the financial services industry. We recognise that banks need to work hard to maintain their relevance in an increasingly digital world.

We believe in rising to the challenge, by actively embracing disruption and innovation, by working with innovation partners to deliver better value for customers and clients, and by adopting a commitment to continuous engagement, experimentation, innovation and improvement. For us, the purpose of innovation is to find ways to make financial services more cost-effective, convenient, and relevant, to tailor solutions to meet diverse needs and preferences, and to make life easier and better for Africa’s people.

NEW WAYS OF WORKING

INNOVATION helps us to be the trusted first choice for our customers and clients, able to service the full range of their financial services requirements in a holistic manner. We recognise that our customers’ needs and expectations are evolving as rapidly as new technologies are developed. The evolution and spread of internet and mobile technologies has created an “always on” mindset – customers and clients expect to be able to transact and engage with their financial services providers whenever and wherever it is convenient and necessary for them to do so. We need to meet these expectations across all our areas of business, efficiently and cost-effectively.

TECHNOLOGY, no matter how sophisticated, will never fully replace the need to be able to sit with a customer, face-to-face, and talk through an issue when required. We don’t expect our branches to disappear altogether, but we do recognise that there will be fewer of them, and that they’ll undergo fundamental changes in the coming few years.

FOR EXAMPLE, when a customer requests a loan, an automated programme will run an immediate analysis of the customer’s creditworthiness based on income, spending patterns and past credit history, will assess this within the framework of the bank’s risk appetite and lending criteria, and provide an objective recommendation. On this basis, the employee will be able to make an almost instant decision on whether to grant a loan, and will communicate this directly to the customer.

Our customers want to deal with people who are able to take accountability for solving problems and achieving outcomes, at the initial point of contact. Our branch and call centre employees must be able to listen, understand and be empathetic. And they need to be capable and empowered to make decisions and assist the customer, there and then.

As part of the lessons learnt and the restructuring of our Personal & Business Banking (PBB) offering, we’re in the process of devolving more decision-making power to the frontline, supported by automated data processing capabilities. Frontline employees will have quick and convenient access to a customer’s transactional history with the bank, enabling them to assist customers at the initial point of contact.

Supported by automated data processing

Frontline employees empowered with decision making

Instant decisions and more efficient for clients

New ways of working (nWoW)
BECOMING A DISRUPTER

Our non-traditional competitors are gaining momentum. M-PESA in Kenya, for example, has become the most successful mobile phone-based financial service in the developing world, offering financial services at very low unit costs. We recognised this as an opportunity to extend our services to small businesses.

In 2014, we introduced Thill2Bank in Kenya. The solution, a partnership between Stanbic, M-PESA, and Kopo Kopo, enables merchants, shops, supermarkets and SMEs to accept payments on M-PESA. The payments reflect immediately in their bank accounts, without them needing to physically visit a branch to deposit cash or fill any forms. It also gives us a better understanding of their financial status, enabling us to offer them broader banking services and products, according to their needs and risk profile.

We’re harnessing the ability of fintechs to offer a bespoke, customer-driven service, at a competitive price, coupled with our 154-year track record and our commitment to building long-term customer relationships built on trust, to provide a more accessible, more affordable and more attractive service to our customers. We’ve partnered with China’s TenCent to launch the WeChat mobile wallet service, which enables users to make person-to-person payments from their bank account or credit card to another person’s account using smartphones. In South Africa, our partnership with MoneyGram – EcoCash – enables Zimbabweans living in South Africa to remit funds back home. We’re continually exploring new opportunities for viable partnerships. Our Pathfinders Challenge, for example, offers fintech entrepreneurs the chance to win R500 000 in prizes and business support.

In October 2016, our Shyft app was awarded a bronze international award in the Most Disruptive Innovation category at the 2016 EFMA-Accenture Distribution and Marketing Innovation Awards, in Barcelona. Shyft enables forex transactions while eliminating paperwork and queues. By accessing a “foreign exchange mobile wallet”, customers can buy a number of different currencies at a live rate, store the funds in eWallets, and make purchases using physical or virtual card capability, or make international transfers using the cross-border payments capability.

We embrace the opportunity to learn from disruptors, and are always alert to the potential to forge partnerships with innovators. Stanbic Ghana, for example, partnered with DreamOval to implement their Slydepay app — which has gone on to establish itself as Ghana’s leading online payment application. Slydepay serves both individuals and businesses, with solutions tailored for the local Ghanaian market. Individual customers are able to monitor their finances, make free payments by scanning QR codes or entering an email address, top up their accounts using VISA, Airtel Money, First Capital Plus Speedbanking vouchers and MTN Mobile Money. Businesses benefit from a cashless payment system, which allows payments to be conveniently collected and tracked. At the 2016 Ghana Banking Awards, Slydepay won Product Innovation of the Year 2015, and Stanbic Ghana came second in the categories Most Cashless Bank, and Best Bank for Savings and Deposits.

In Uganda, we used to experience long queues in our bank branches whenever it was time for school fees to be paid. Parents would queue for hours at the bank to withdraw cash, then hours at the school to pay their fees. The Pay+ solution has introduced quick and easy payments and collections, which have been taken up not only by schools, but also utility companies and insurance companies. Schools and companies are able to integrate the solution into their existing systems, and to track payments and reconcile accounts with minimum hassle. The platform is highly secure, signing on for collections is free, and financial reports generated by the system can be customised according to the business’ particular needs.
The Incubator team is small, but is able to make a big impact by drawing on the skills and expertise within other parts of Standard Bank, and by partnering with external organisations dedicated to nurturing entrepreneurs and small businesses.

Our IGNITOR BOOTCAMP and ACCELERATE programme helps entrepreneurs to take their businesses to the next level. Entrepreneurs attend a weekend boot camp, at which we assess and provide advice on their business proposals. The most promising candidates are selected for three months of acceleration and support. Start-ups can apply for the weekend boot camp at http://www.ignitor.co.za/. We ran six accelerate programmes in 2016, and we’ve begun partnering with our corporate clients to structure sector-specific accelerators.

We host monthly MASTERS AND MENTORS events in Johannesburg, Cape Town and Durban. Each event attracts over a hundred entrepreneurs, across industries and from every walk of life. Our guest speakers are seasoned entrepreneurs and knowledgeable experts that speak on various topics, from funding to B-BEEE, marketing, scaling and more.

We sponsor several global competitions for start-ups. Through the Incubator, we’ve partnered with START-UP GRIND, a global start-up community powered by Google for Entrepreneurs, as the country sponsor in South Africa. It’s designed to educate, inspire, and connect entrepreneurs.

Start-up Grind and Standard Bank host monthly events in Cape Town, Johannesburg and Durban, featuring successful local founders, innovators, educators and investors who share personal stories and lessons learnt on the road to building great companies.

We’re also the South African sponsor of SEEDSTARS, a global competition that invites technology entrepreneurs to pitch their business proposals. Start-ups have to get through an initial selection round, and are then invited to pitch to an investment panel and compete for the title of most promising seed-stage start-up. 12 competitors are selected from each of Cape Town, Johannesburg and Durban, and three per city advance to the final round at the Standard Bank Incubator. The competition provides participants with exposure to disruptive technology, inspirational discussions and networking sessions. The winner joins the global Seedstars Family and takes part in the regional and global Seedstars Summits with the opportunity to win up to $1.5 million in investment prizes.

The 2016 winner, ID Works, is a digital platform for artisans to showcase their skills, get rated and receive payment for jobs completed. In March 2016, Giraffe Jobs, the winner of the 2015 South African title, went on to compete with other 63 start-ups from around the world for the title of Seedstars World Global Winner. Giraffe took the top prize, winning $500 000. Its automated mobile recruitment app enables businesses to recruit employees faster and cheaper, and connects medium-skilled jobseekers with opportunities for free. Since launching in February 2015, Giraffe has attracted over 75 000 jobseekers and has placed candidates with hundreds of employers. Their story and others can be found on Standard Bank’s #EntrepreneurialSpirit blog.

Through the Incubator, we’ve partnered with GENERAL ELECTRIC to launch a joint Healthcare Professional Accelerator, to build the business and technical skills of healthcare professionals. In 2016, we presented our Incubator Framework to the Global Innovation Conferences/EFMA in Barcelona, and to the World Bank, as a model that could be replicated to support entrepreneurs around the world.
INNOVATION THAT MEETS SOCIAL NEEDS

In South Africa, the #FeesMustFall movement saw protests at campuses across the country in 2015 and 2016, causing severe disruption at many of the country’s tertiary institutions, resulting in extensive damage to and closure of some campuses, and putting the academic year at risk. Standard Bank is actively engaged in working with government and universities to develop and implement workable and sustainable solutions for affordable, accessible, quality higher education. We are working with the Ministerial Task Team mandated to develop a comprehensive funding and student support model for poor and “missing middle” students.

We have been closely involved in the development of the Ikusasa Student Financial Aid Programme (ISFAP), which aims to mobilise a range of funding sources, including developmental finance institutions, corporate funding, individual contributions and social impact bonds, to provide loans and/or grants to “missing middle” students. The pilot was launched in February 2017 for selected new university and college entrants. We have committed R25 million to the initiative, covering the total cost of funding for approximately 250 students, inclusive of fees, accommodation, travel, books, meals, social support, life skills training and medical support as required.

Standard Bank is also engaging with universities and corporate donors to develop alternatives to the surety traditionally required by students to obtain a loan. We are currently piloting a programme in conjunction with the University of Pretoria’s medical school and the Discovery Foundation. In 2016, the initial year, we dispersed R2.8 million to 79 students. This collaboration enables the Foundation to have a greater impact, as the funds can be used as surety to provide student loans, at a total value greater than that of the fund’s value, to students who do not usually qualify for typical student loans or government grants – commonly known as the “missing middle” students. We believe this solution has the potential to substantially expand the number of students that could qualify for an affordable loan, on a sustainable basis.

Surety for “missing middle” students

Emile du Plessis – Economics insights manager

I see things differently, because I analyse and understand the market, before I recommend strategies and products. Every day, I see what the people of South Africa are experiencing. Their life stages, accomplishments, discontent and economic behaviour. I pick up where firms are starting, when they are struggling or expanding. I translate it to our business partners, by providing advice on how best to respond. This gives us a competitive advantage to be first in supporting new businesses, helping students and assisting families. Simultaneously, we grow revenue and market share. I see things differently, because I look from outside in, the market is the sum of our current and future customers. Now we can understand and bank our customers better.
LEVERAGING OUR INVESTMENTS IN IT

Through our significant strategic investments we have established the foundation to enable us to become a first-class universal and digital bank in Africa. The investments we’ve made in our core platforms provide a significant competitive advantage enabling us to rapidly respond to customer needs and continue to leverage the investments to deliver leading digital banking solutions, driving benefits for client centricity, agility, integration of operations and risk optimisation.

We’ve replaced ageing systems with modern, integrated, agile and secure solutions. We’ve greatly enhanced our capacity to offer digital solutions across our products and services. We’ve strengthened our capacity for data analytics, enabling us to improve and personalise the services we provide to our customers; we’ve strengthened our resilience against cybercrime; and we’ve improved integration across our business units and countries of operation. Our IT modernisation programmes are on track for completion by the end of 2017, with our aim to have more than 95% of our customers on the platform. Our focus going forward is to derive maximum value from our investments.

Fuller digitising platforms across the group paves the way for a great customer experience across countries and products. Our strategic investments in IT are driving benefits for client centricity, agility, integration of operations and risk reduction. The investments have realised significant benefits to date and ongoing investments from 2017 will enable further improvements to customer service. The customer is at the heart of everything we do and we will continue to use our investments to further drive digitisation, make greater use of data analytics, and continue to strengthen cybersecurity to protect our customers and our assets.

A major component of our modernisation has been the implementation of our SAP core banking platform in South Africa. It currently comprises close to 6.5 million customers and over R30 billion in customer balances, and processes almost 60 million customer transactions a month. It provides us with a single source of customer data, giving us a holistic view of each customer’s various products and relationships with different parts of the group. We’re able to open new customer accounts more quickly, to serve existing customers more efficiently, and to undertake more accurate credit scoring. We’ve also strengthened our anti-money laundering controls.

Our SAP platform has enabled us to reduce product development costs and speed up the process of product development. During 2016, we’ve delivered several new products using the platform, including Shangani banking; a Lottery Solution; a tax-free fixed deposit; Money Market Select; and Flexi Deposit.

The Finacle Core Banking system is fully operational in Botswana, Ghana, Nigeria, Namibia, Swaziland, Tanzania, Uganda, Zimbabwe and Zambia. It currently comprises over two million transacting customers. Like SAP, Finacle offers a single view of each customer, quicker processing and turn-around times, quicker time to market for new products, the elimination of manual interfaces and the automation of bulk processes, which reduces room for error. The balance of our African operations will be migrated to the new platform by the end of 2017, with the exception of South Africa, which uses SAP, and Angola, Kenya and Mozambique, which use T24 Temenos.

The creation of shared value is achieved through the four key pillars of our IT strategy:

1. Quality of service through brilliant basics: Achieving continuous improvements in the quality of service to customers in terms of availability, reliability and security
2. Responsiveness to market: Leveraging innovative technology and new ways of working to achieve higher levels of agility, flexibility and responsiveness
3. Affordability: Managing costs by driving a lean IT operation and by embedding commercial pragmatism
4. Sustainability as the foundation of client excellence: Making Standard Bank IT an aspirational destination for IT professionals and embracing our diversity, social and ethical responsibility.

Leveraging our investments in IT continued

Our Material Themes

Bank as very good or excellent

Cost-savings for our customers – 11%. This provides convenience and banking, which represents an increase of 726 million transactions through Internet Banking – over 1 billion transactions.

A Digital Bank

We relied on our Universal Banking app to 11 countries during 2016. Our online banking features and smartphone apps have transformed the way that customers engage with the bank, enabling them to bank on their terms, wherever and whenever this suits them. Customers can open accounts online, manage their ATM limits, buy pre-paid airtime and electricity, make payments and transfers across borders quickly and easily, trade shares internationally on 29 stock exchanges and lodge homeowner insurance claims – all from their mobile phone. Our digital payments solutions are secure and convenient, affordable, and fully compliant with regulatory requirements. We also developed and implemented innovative Payment solutions like SnapScan and Masterpass, and Omnisure – an insurance technology solution – during 2016.

95% transactions are electronic

We also introduced a new Internet Banking platform for customers in South Africa in 2016, which will be extended to our other countries of operation in 2017.

We’ve expanded our digital offering for our corporate and investment clients across all our countries of operation. One example is Business Online, which has over 60 000 registered clients and is used by more than 70% of the top 40 JSE companies. Clients sign in through a single portal, and are able to access self-service banking and bank delivered administration. They can view their transaction activity and access Standard Bank products, 24/7. The platform can be integrated with a majority of accounting packages. It uses dual authentication (the provision of two passwords) to ensure enhanced security. Another example is Global Markets eCommerce, a single dealer platform available in 16 African countries across 70 global currencies. It enables immediate, secure and user-friendly forex trading, 24/7. Customers can obtain forex through Internet Banking or mobile. A third example is International Trade and Payments, which enables the reliable and efficient processing of international payments and trade transactions. The service offers full functionality in 10 other countries.

Cybercrime

Inherent in the advances of digitisation is the growing risk of cybercrime; the increasing sophistication and extent of cybercrime affecting our industry, which has resulted in a review of our cybersecurity strategy. The emphasis is on accelerating the delivery of security capabilities to counter the growing sophistication of cybercrime. A number of actions have already been completed and there is a focused programme to enhance security defences in response to the heightened risk. This is an area that we take extremely seriously and is considered a top priority.

Like all banks, we rely on our customers to take reasonable measures to protect themselves, including choosing strong pin numbers (not ones that are easy to guess, like birthdays, or consecutive numbers), keeping their cards within sight at all times, being vigilant when withdrawing cash at ATMs, never responding to phishing emails, and promptly reporting such emails to the bank.

We run regular awareness campaigns by email, banners and videos on the Standard Bank websites and internet about what to look out for and how to avoid phishing attacks. In South Africa, we participate along with the other banks in SABRC’s awareness campaigns, which focuses on a range of topics guided by fraud and crime trends in the banking sector.

The shortage of cybersecurity skills is a global challenge. As part of Standard Bank’s ongoing initiatives to develop our in-house cybersecurity skills, we’ve established a graduate programme specifically focused on this area.

Central cybersecurity operations developed at Standard Bank

Industry collaboration in fighting cybercrime

Effective information sharing and collaboration, across the industry and across geographies, is crucial to improve prevention, detection and mitigation of cybercrime.

In South Africa, the South African Reserve Bank (SARB) has committed itself to deepening cyber resilience in the sector – recognising the importance of stronger collaboration across the industry to improve prevention and detection. In August 2016, SARB established the Financial Sector Contingency Forum (FSCF), representing all major financial sector stakeholders, including Standard Bank. One of FSCF’s responsibilities is to put contingency plans in place in the event of a cyber-attack. We are also participating in industry level initiatives to strengthen resilience against cyber-attacks through the South African Banking Risk Information Centre (SABRIC) and Banking Association of South Africa (BASA). SABRIC has established a computer security incident response team (CSIRT), in which Standard Bank plays an active role. We liaise with the international cybersecurity community through our membership of bodies such as the Forum for Incident Response and Security Teams (FIRST), the International Security Forum (ISF), Gartner, Forrester, CEB Inc., the Financial Services Information Sharing and Analysis Centre (FS-ISAC), European Network and Information Security Agency (ENISA); and strategic vendor partnerships. We have also implemented strategic security solutions such as Nokorix, incoto, MWR Info Security, Risk Minder and Trusteer to ensure the safety of our customers and their banking transactions.

Similar collaborative efforts are increasingly necessary in our other countries of operation and we’ll be engaging with industry bodies and regulators in this regard during 2017.

Standard Bank’s Report to Society 2016
Leveraging our investments in IT continued

Quality of service, comprising availability, reliability and security, remains our top priority. Customers’ expectations of anywhere, anytime and always on banking continue to grow, and we are committed to fulfilling these expectations. We understand that system outages can cause delays in salary deposits, debit orders and the many other transactions that support economic activity.

During the year, we established our IT resilience programme to drive resilience engineering, identify and mitigate risks affecting system stability and recovery abilities. The primary focus of the resilience programme is to identify technology, process and people constraints that may affect the reliability, resilience and recovery time of critical systems. Issues identified are prioritised and remediated. This initiative has yielded positive outcomes in the form of a reduction in IT-related incidents over the last three years; and through these the overall Health Index has improved placing us in the second quartile when compared to other global organisations.

An engaged workforce is a critical success factor in the delivery of our sustainability objectives, and there has been a strong drive to enhance the culture in group IT and to make it a great place to work. There are several different initiatives that support this drive; examples include leadership development, lean IT, continuous improvement initiatives, innovation campaigns and our drive to elevate the status of engineering skill.

In 2016, we have moved from a project-based delivery model to a continuous delivery model through the utilisation of smaller, integrated, collaborative multi-disciplinary teams working together to continuously deliver value to our customers. This transition was cemented during 2016 and has become our new way of working for system engineering which encompasses a number of frameworks, including the internationally recognised Scaled Agile Framework with Agile, Lean and DevOps principles.

We have invested extensively in reskilling for the future through building capability on three levels; internally to group IT with customised skills development programmes, partnering with universities to influence and align the IT curricula, and industry level collaboration on the agile and DevOps methodologies. Our ambition is to ignite our people to a common purpose (the customer) and to re-skill and “future proof” for emerging technologies and new ways of working.

Our new ways of working have yielded substantial efficiencies in the development and enhancement of systems. In areas where this approach has matured we have measured reductions of over 80% in the cost of delivering features, creating capacity for more features to be delivered.

During 2016, we sponsored the building of a computer lab at the University of Johannesburg. We employed 28 new graduates in 2016, undertaking an Honours course on Big Data at Wits University. We employed 28 new graduates in 2016, identified through our code-jam initiatives.

We’ve also partnered with Africa Teen Geek, on their “#GirlGeek” and “#GirlGeek” initiative, which aims to attract female learners to careers in IT. The initiative provides mentoring to selected girls between the ages of eight and 18 years, together with real-life coding experience, and guides them through a basic JAVA programming skills qualification.

We’re collaborating at industry level on agile and DevOps methodologies. We founded the DevOps initiative, which aims to develop Lean, Agile and DevOps skills in South Africa and to build the local IT industry, and we sponsored one of the two DevOps events held in South Africa in 2016.

We’ve forged partnerships with a number of universities, to help to align their IT curriculums with emerging industry requirements. Several of our IT executives participate on university IT advisory boards, and meet regularly with universities to identify gaps in curricula and improve the business relevance of courses. We’re represented on the advisory boards of the Universities of Fort Hare and Pretoria, and we’re part of the Faculty of Science quality review process at the University of Johannesburg.

Our involvement in training initiatives includes a three-day training course, which was run at the University of Johannesburg in 2016 and which is on the radar for the University of the North West in 2017. Standard Bank employees teach technical IT skills to students, with a focus on continuous delivery skills, continuous integration skills and agility. We’ve also co-hosted a digital conference with the University of Pretoria to build capacity within academia and the bank. We’ve forged a partnership with “We think Code” to build coding skills for Africa – the initiative commenced in South Africa and will be expanded to other African countries in 2017.

During 2016, we sponsored the building of a computer lab at the University of Pretoria; and sponsored 30 students undertaking an Honours course on Big Data at Wits University. We employed 28 new graduates in 2016, identified through our code-jam initiatives.

MORE ON OUR SOCIAL, ECONOMIC AND ENVIRONMENTAL IMPACT

Standard Bank is committed to minimising our direct carbon footprint, by adopting green building principles in our new build projects, and by retrofitting more sustainable and efficient solutions to existing premises where possible. In 2016, we won the Energy Efficiency Award at the 2015-16 Eco-Logic Awards, for our head office building in Baker Street, Rosebank, Johannesburg, while our Canal Walk branch in Cape Town achieved a 4-Star Green Star Interiors v1 as Built rating. We report on our direct carbon footprint through the Carbon Disclosure Project (CDP). We’re also very conscious of our indirect carbon footprint, which derives from the projects we finance, and are exploring appropriate methods of measuring and disclosing this in future.

Standard Bank made a number of changes to our procurement policies and practices during 2016. Under the banner of Project Ignite, we strengthened and standardised procurement capability in our countries of operation, introduced a Group Sustainable Procurement Standard, and implemented steps to encourage sustainable practices within our value chain. These efforts were recognised at the Chartered Institute of Procurement and Supply annual awards, in May 2016, where Standard Bank Africa Procurement won Best Procurement and Supply Consultancy Project of the Year, and Procurement and Supply Chain Management Professional of the Year, and was noted for “sustainable procurement excellence”.

Procuring goods and services that empowers local businesses and supports economic transformation

In 2016, we installed new water meters at buildings and other key areas in our South African operations to enable us to better understand our consumption of water, especially considering the drought in 2016. This led us to make significant water use efficiency improvements in areas such as water-cooled equipment, low-flush toilets, shower heads and taps and more efficient irrigation systems using rain water harvesting. This resulted in reducing our consumption by 21% to 653,581 kilolitres in 2016.

In South Africa, we have made good progress on managing waste more effectively, reusing and recycling waste wherever possible, receiving certificates from our service providers. One of our main programmes completed this year was to make electronic statements available and paperless branches to reduce the need for printing. Since 2014, our paper consumption has reduced by 27% to 1,404 tons.

In 2016, we commissioned a study to determine the “Natural Capital” value of the property, that is, its biodiversity, including wildlife species, stored carbon and so on, and its ecosystem services, such as water flow, climate regulation and carbon sequestration. The value of the Natural Capital stocks of wildlife and stored carbon was found to be US$3 million. The value provided by the water flows, climate regulation and grazing was US$1.65 million. Taking into account all the Natural Capital flows and management costs, Mogale’s Gate’s Natural Capital value to society represents US$15.5 to US$41 million – 25 to 67 times greater than the property value. We continue to work with the researchers, to further develop the understanding of the value of natural capital and its broader benefits for society.

Understanding our water and waste impact

In 2016, we installed new water meters at buildings and other key areas in our South African operations to enable us to better understand our consumption of water, especially considering the drought in 2016. This led us to make significant water use efficiency improvements in areas such as water-cooled equipment, low-flush toilets, shower heads and taps and more efficient irrigation systems using rain water harvesting. This resulted in reducing our consumption by 21% to 653,581 kilolitres in 2016.

In South Africa, we have made good progress on managing waste more effectively, reusing and recycling waste wherever possible, receiving certificates from our service providers. One of our main programmes completed this year was to make electronic statements available and paperless branches to reduce the need for printing. Since 2014, our paper consumption has reduced by 27% to 1,404 tons.

In South Africa, we have made good progress on managing waste more effectively, reusing and recycling waste wherever possible, receiving certificates from our service providers. One of our main programmes completed this year was to make electronic statements available and paperless branches to reduce the need for printing. Since 2014, our paper consumption has reduced by 27% to 1,404 tons.

Understanding the economic value of Natural Capital

The economic value that nature and its diverse ecosystems freely provides society is not well-understood or quantified, mostly because it is taken for granted. Standard Bank owns a small property called Mogale’s Gate Biodiversity Centre (MGBC), near Magaliesburg in South Africa. This operates as a nature reserve, although not commercially. In 2015, we commissioned a study to determine the “Natural Capital” value of the property, that is, its biodiversity, including wildlife species, stored carbon and so on, and its ecosystem services, such as water flow, climate regulation and carbon sequestration. The value of the Natural Capital stocks of wildlife and stored carbon was found to be US$3 million. The value provided by the water flows, climate regulation and grazing was US$1.65 million. Taking into account all the Natural Capital flows and management costs, Mogale’s Gate’s Natural Capital value to society represents US$15.5 to US$41 million – 25 to 67 times greater than the property value. We continue to work with the researchers, to further develop the understanding of the value of natural capital and its broader benefits for society.

**MORE ON OUR SOCIAL, ECONOMIC AND ENVIRONMENTAL IMPACT**

**Standard Bank South Africa BEE total score**

94.56

**South Africa**

Black Economic Empowerment (BEE) is a moral and commercial imperative for South Africa’s long-term future and the bank’s sustainability. Independent, accredited external auditors conduct independent assessments of our BEE performance against the Financial Services Sector Codes for Broad-based Black Economic Empowerment (‘FS Codes’). We continuously strive to ensure that we exceed the targets set down in the codes in order to be significant players in the transformation of our country. We achieved a BEE score of 94.56 in 2016, and improvement of 1.14 over our 2015 score of 93.42.

**Inclusive growth and economic transformation**

Many African countries are increasingly putting processes in place to transform their economies, by promoting indigenisation (local ownership). We engage constructively in debates on these developments in an effort to balance the legitimate expectations of economic transformation with the reasonable rights of investors. We take a multi-faceted approach to localisation and our relevance in the market, taking into account what we do for our people, our contribution to socioeconomic development, industry development and job creation. Ownership is an important element of this, and we comply fully with legislation that requires local shareholders to hold a percentage of shares.

In Nigeria, we support the Central Bank’s Financial Inclusion Strategy, as well as the Nigerian sustainability banking principles. In Uganda, we focus on aligning with the local government’s transformation priorities as set out in the country’s National Development Plan. In Namibia, we have transferred an initial 10% shareholding to our employees and a community trust, in line with regulatory requirements to increase local participation in the financial sector. The Zimbabwean Government is also embarking on policy implementation that will focus on the broad-based empowerment of its citizens.

**Achieved maximum of 16 points for preferential procurement on our B-BBEE scorecard**

25% of our total procurement spend went to black-owned enterprises.

**Africa Regions**

Inclusive growth and economic transformation

**The Siyakha Programme – CSI means business**

Every year in South Africa, young people exit the schooling system and begin their journey towards finding a career. Those who have come from middle class and privileged backgrounds may make the transition from school to higher education – and on to employment – relatively seamlessly. Most, however, are caught in a struggle to access post-secondary education or training, or to get their first job. This creates a barrier where these youth feel locked out of the labour market and ultimately locked out of inclusion into the economy. The Siyakha Programme is a partnership between The Centre for Social Development in Africa at the University of Johannesburg and Standard Bank. It is aimed to better understand the barriers that young people face when seeking work, and to assess how programmes offering workplace training affect outcomes for youth. In addition, the programme developed a plan that will improve transformation and financial inclusion in South Africa.

The programme studied various aspects that impact on young people’s ability to access work. One of the main barriers they face is the high costs of work seeking. The programme required a bank to partner with, who could provide the youth participating in the study with savings accounts. Globally, evidence suggests that savings helps young people see a future for themselves and better transition to work. The programme tests whether having a savings account helps youth to transition to work. We were the only bank to offer our services, providing the youth with savings accounts where we waived the opening account bank fees. Although this request came from our CSI department, it was collaboration with our business that enabled us to provide the accounts needed.

Early results suggest that participants that received an account and the financial literacy training had a higher sense of employability than those who did not. The savings intervention was also associated with young people feeling more positive about their future prospects. The study is ongoing and will contribute to a dialogue between the financial institutions, looking at how we structure our products, and government, informing their interventions of youth unemployment and financial inclusion. We are proud to have played a role in this research, seeing the youth in the project not only as participants in the study, but Standard Bank long-standing customers that we hope to see grow in their careers.

Promoting enterprise development (ED) through the supply chain

At Standard Bank, we promote enterprise development (ED) through our supply chain. In South Africa, our preferential procurement and supplier development initiatives focus on small black-owned and black women-owned suppliers in our supply chain. We work with potential suppliers to identify appropriate opportunities, and provide successful candidates with business development support. We also give qualifying suppliers access finance where needed. We’ve approved a R250 million fund, from which credit will be provided to support the development of small businesses within our supply chain, over a three- to five-year period. In 2016, we achieved the maximum of 16 points for preferential procurement on our B-BBEE scorecard. 25% of our total procurement spend went to black-owned enterprises, and 27% to black women-owned suppliers. In 2016, we reduced our foreign procurement suppliers by 13% in our efforts to shift from foreign suppliers to local suppliers where possible, and where appropriate, redirected in favour of black-owned and black women-owned suppliers.

Ownership is an important element of this, and we comply fully with legislation that requires local shareholders to hold a percentage of shares.

In Nigeria, we support the Central Bank’s Financial Inclusion Strategy, as well as the Nigerian sustainability banking principles. In Uganda, we focus on aligning with the local government’s transformation priorities as set out in the country’s National Development Plan. In Namibia, we have transferred an initial 10% shareholding to our employees and a community trust, in line with regulatory requirements to increase local participation in the financial sector. The Zimbabwean Government is also embarking on policy implementation that will focus on the broad-based empowerment of its citizens.

**The Siyakha Programme – CSI means business**

Every year in South Africa, young people exit the schooling system and begin their journey towards finding a career. Those who have come from middle class and privileged backgrounds may make the transition from school to higher education – and on to employment – relatively seamlessly. Most, however, are caught in a struggle to access post-secondary education or training, or to get their first job. This creates a barrier where these youth feel locked out of the labour market and ultimately locked out of inclusion into the economy. The Siyakha Programme is a partnership between The Centre for Social Development in Africa at the University of Johannesburg and Standard Bank. It is aimed to better understand the barriers that young people face when seeking work, and to assess how programmes offering workplace training affect outcomes for youth. In addition, the programme developed a plan that will improve transformation and financial inclusion in South Africa.

The programme studied various aspects that impact on young people’s ability to access work. One of the main barriers they face is the high costs of work seeking. The programme required a bank to partner with, who could provide the youth participating in the study with savings accounts. Globally, evidence suggests that savings helps young people see a future for themselves and better transition to work. The programme tests whether having a savings account helps youth to transition to work. We were the only bank to offer our services, providing the youth with savings accounts where we waived the opening account bank fees. Although this request came from our CSI department, it was collaboration with our business that enabled us to provide the accounts needed.

Early results suggest that participants that received an account and the financial literacy training had a higher sense of employability than those who did not. The savings intervention was also associated with young people feeling more positive about their future prospects. The study is ongoing and will contribute to a dialogue between the financial institutions, looking at how we structure our products, and government, informing their interventions of youth unemployment and financial inclusion. We are proud to have played a role in this research, seeing the youth in the project not only as participants in the study, but Standard Bank long-standing customers that we hope to see grow in their careers.

**Promoting enterprise development (ED) through the supply chain**

At Standard Bank, we promote enterprise development (ED) through our supply chain. In South Africa, our preferential procurement and supplier development initiatives focus on small black-owned and black women-owned suppliers in our supply chain. We work with potential suppliers to identify appropriate opportunities, and provide successful candidates with business development support. We also give qualifying suppliers access finance where needed. We’ve approved a R250 million fund, from which credit will be provided to support the development of small businesses within our supply chain, over a three- to five-year period. In 2016, we achieved the maximum of 16 points for preferential procurement on our B-BBEE scorecard. 25% of our total procurement spend went to black-owned enterprises, and 27% to black women-owned suppliers. In 2016, we reduced our foreign procurement suppliers by 13% in our efforts to shift from foreign suppliers to local suppliers where possible, and where appropriate, redirected in favour of black-owned and black women-owned suppliers.

25% of our total procurement spend went to black-owned enterprises.

**How to access our 2016 B-BBEE Scorecard**

**SE**

A business with an annual turnover more than R10 million but less than R50 million qualifies as a Qualifying Smaller Enterprise (QSE).

Exempt Micro Enterprises (EMEs). 14% of our total procurement spend went to black women-owned enterprises. In 2016, we reduced our foreign procurement on our B-BBEE scorecard. 25% of our total procurement spend went to black-owned enterprises, and 27% to Qualifying Small Enterprises (QSEs). 14% of our total procurement spend went to black women-owned suppliers. In 2016, we reduced our foreign procurement suppliers by 13% in our efforts to shift from foreign suppliers to local suppliers where possible, and where appropriate, redirected in favour of black-owned and black women-owned suppliers.
WE WELCOME YOUR FEEDBACK

Standard Bank’s commitment to supporting inclusive economic growth and prosperity in Africa is deep-rooted, long term and sincere. Inevitably, we do make mistakes. But we’re committed to learning from them, and doing better in the future.

To effectively assess our performance in terms of delivering shared value, we need to engage directly with you, our stakeholders. We need to ensure that we understand your needs and expectations. This understanding enables us to build trust, and to enhance the sustainability of the bank and the shared value we have the privilege of creating with and for you. We need to hear your perspectives about how we’re delivering, what we’ve got wrong, what we’ve got right, and how we can do better. Our doors are open. We’re listening. Please let us know how we’re doing and how we can continue to move forward, together.

To the Directors of Standard Bank

Group Limited

We have undertaken a limited assurance engagement on selected sustainability information, as described below, and presented in the 2016 Report to Society of Standard Bank Group Limited ("Standard Bank") for the year ended 31 December 2016 (the Report). This engagement was conducted by a multidisciplinary team including social, environmental, carbon and assurance specialists with relevant experience in sustainability reporting.

Subject Matter

We are required to provide limited assurance on the following selected sustainability information marked with ✓ on the relevant pages in the Report, prepared in accordance with Standard Bank’s internally developed guidelines:

• Ensuring that the selected sustainability information is presented in accordance with Standard Bank’s internally developed guidelines;
• Confirming the measurement or evaluation of the selected sustainability information against Standard Bank’s internally developed guidelines, including that all relevant matters are reflected in the selected sustainability information;
• Designing, establishing and maintaining internal controls to ensure that the Report is free from material misstatement, whether due to fraud or error and
• Identification of stakeholders and stakeholder requirements, material issues and commitments with respect to sustainability performance.

Our Independence and Quality Control

We have complied with the independence and all other ethical requirements of the Code of Professional Conduct for Registered Auditors issued by the Independent Regulatory Board for Auditors (IRA) that is consistent with the International Ethics Standards Board for Accountants Code of Ethics for Professional Accountants (AICPA, 2003), which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour.

KPMG Services Proprietary Limited applies the International Standard on Quality Control (ISQC) 1 and accordingly maintains comprehensive systems of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Our Responsibility

Our responsibility is to express a limited assurance conclusion on the selected sustainability information based on the procedures we have performed and the evidence we have obtained. We conducted our engagement in accordance with the International Standard on Assurance Engagements (ISAE) 3000 (Revised), Assurance Engagements other than Audit or Reviews of Historical Financial Information, issued by the International Auditing and Assurance Standards Board. That Standard requires that we plan and perform our engagement to obtain limited assurance about whether the selected sustainability information is free from material misstatement.

A limited assurance engagement undertaken in accordance with ISAE 3000 (Revised) involves assessing the suitability in the circumstances of Standard Bank’s use of its internally developed guidelines as the basis of preparation for the selected sustainability information, assessing the risks of material misstatement of the selected sustainability information, and gathered information, evaluated the procedures performed in response to the assessed risks.

The procedures we performed were based on our professional judgement and included inquiries, observation of processes followed, inspection of documents, analytical procedures, evaluating the appropriateness of quantification methods and reporting policies, and agreeing or reconciling with underlying records.

Given the circumstances of the engagement, in performing the procedures listed above we:

- Interviewed management to obtain an understanding of the control environment related to sustainability reporting.
- Tested the processes and systems at group level which generate, collate, aggregate, monitor and report selected key performance indicators and inspected related documentation, more specifically:
  - Interviewed and discussed with relevant management, key personnel and/or stakeholders of Standard Bank the definitions and boundaries for selected performance information, and gathered information from the data collection and report preparation processes.
  - Evaluated internal data management controls based on system walkthroughs.
  - Inspected selected internally and externally generated documents and records and performed comprehensive data analyses.
  - Re-calculated the selected sustainability information, where relevant.
  - Evaluated whether the information presented in the Report is consistent with our overall knowledge and experience of sustainability management and performance at Standard Bank and is not materially inconsistent with information contained in the Report.

The procedures performed in a limited assurance engagement vary in nature and form, and are less in extent than for a reasonable assurance engagement. As a result, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had we performed a reasonable assurance engagement. Accordingly, we do not express a reasonable assurance opinion about whether Standard Bank’s selected sustainability information is prepared, in all material respects, in accordance with Standard Bank’s internally developed guidelines.

Limited Assurance Conclusion

Based on the procedures we have performed and evidence we have obtained, nothing has come to our attention that causes us to believe that the selected sustainability information in the Statement of Standards on Assurance Engagements paragraph above for the year ended 31 December 2016 is not prepared, in all material respects, in accordance with Standard Bank’s internally developed guidelines.

Other Matters

The maintenance and integrity of the Standard Bank’s Website is the responsibility of Standard Bank’s management. Our procedures did not involve consideration of these matters and, accordingly we accept no responsibility for any changes to either the information in the Report or our independent limited assurance report that may have occurred since the initial date of its presentation on Standard Bank’s website.

Restriction of Liability

Our work has been undertaken to enable us to express limited assurance conclusions on the selected sustainability information to the Directors of Standard Bank in accordance with the terms of our engagement, and for no other purpose. We do not accept or assume liability to any party other than Standard Bank, for our work for this report, or for the conclusions we have reached.
