OVERVIEW OF FINANCIAL RESULTS

In 2023, Standard Bank Group delivered earnings growth of 27% and a return on equity of 18.8%. This strong performance is underpinned by our robust and growing franchise and is reflective of the positive momentum in all our businesses.

Group results

In the twelve months to 31 December 2023 (FY23), the group recorded headline earnings of R42.9 billion, up 27% relative to the twelve months to 31 December 2022 (FY22) and delivered a return on equity (ROE) of 18.8% (FY22: 16.3%). This strong performance is underpinned by our robust and growing franchise and reflective of the good momentum in our business. Our Africa Regions franchise contributed 42% to group headline earnings. The top eight contributors to Africa Regions' headline earnings were Ghana, Kenya, Mauritius, Mozambique, Nigeria, Uganda, Zambia and Zimbabwe.

In FY23, the group effectively defended and grew its banking franchise and improved banking earnings and returns. Client franchise health showed improvements across a number of metrics. Active customers grew by 6% to 18.8 million, with growth recorded in both South Africa and Africa Regions. In addition, digital retail clients in South Africa increased by 8% as more clients transitioned to our convenient digital channels. In the year, the group recorded over 2.8 billion digital transactions for retail clients, up 30% year on year, and distributed over R41.1 billion on behalf of our South African clients via our digital wallet platform. Client satisfaction scores improved across various channels, particularly digital in South Africa.

The Insurance & Asset Management franchise recorded an improved insurance performance and growth in its assets under management year on year. Since the announcement of the Liberty minority buyout, the group has received over R5.7 billion in distributions related primarily to capital optimisation. In FY23, the group successfully bought out the minorities of Liberty2Degrees (L2D). L2D holds an attractive portfolio of commercial properties.

The group ended the year with a common equity tier 1 ratio of 13.7% (31 December 2022: 13.4%). This positions the group well to reward shareholders and continue to grow. The SBG board approved a final dividend of 733 cents per share which, when combined with the interim dividend, equates to a dividend payout ratio of 55% for FY23.

In 2023, the group mobilised over R50 billion of sustainable finance for corporate clients and provided over R2 billion in loans to SMEs to help business owners access affordable and reliable alternative energy products. In addition, the group disbursed over R145 million to homeowners and over R840 million to businesses for solar installations in South Africa.

Operating environment

In 2023, uncertainty remained elevated globally. The year was one of two halves. In the six months to 30 June 2023 (1H23), inflation remained elevated and interest rates continued to rise. In the second six months to 31 December 2023 (2H23), central banks paused whilst monitoring inflation trends and developing geopolitical risks. Across most markets, inflation was stickier than forecast and interest rate cuts were delayed. The International Monetary Fund (IMF) forecast global real gross domestic product (GDP) growth of 3.1% in 2023.

Sub-Saharan Africa also experienced inflationary pressures and monetary policy tightening. Higher debt costs increased fiscal pressures and sovereign risks in certain countries, which in turn, drove currency weakness. There was progress on Ghana's debt restructure, Kenya's funding outlook improved, and Nigeria took steps to liberalise the Naira. While currency movements were mixed across the group's portfolio of countries, they were weaker on average by the end of the year.

In South Africa, inflation peaked in March 2023 at 7.1%, and then declined to end the year at 5.1% in December 2023. The South African Reserve Bank increased interest rates by a cumulative 125 basis points by the end of May 2023 and then paused. The repo rate closed the year at 8.25%. While electricity disruptions and logistics constraints placed pressure on businesses and corporates, and in turn on the economy, progress was made during the year, particularly in the last quarter, towards delivering sustained improvements on both fronts. South Africa's real GDP grew at 0.6% in 2023.

Overview of performance

The group's products and services are grouped into i) Banking and ii) Insurance & Asset Management.

HEADLINE EARNINGS BY BUSINESS UNIT

¹ Restated, refer to page 111 – 114 for further detail.

Banking

Banking headline earnings reflected a strong performance, up 31% period on period. Banking ROE increased from 16.4% to 19.5%.

Loans and advances

Gross loans and advances grew by 7% year on year to R1.7 trillion. Subdued growth across the retail portfolios together with a decline in business lending was more than offset by strong growth in the Corporate and Sovereign lending portfolio. Higher interest rates negatively impacted demand and affordability and resulted in a slowdown across mortgages, card and personal unsecured lending in 2H23. In South Africa, personal unsecured loan applications increased but approvals declined. The business lending portfolio declined by 5% due to lower client demand linked to elevated rates, reduced appetite to invest, and higher early repayments. Renewable-energy deals and higher demand for trade facilities supported the corporate portfolio. The Africa Regions' loans and advances to customers grew by 20% in constant currency but was broadly flat in ZAR.

Total provisions increased by 15% to R64.0 billion. Total coverage increased from 3.6% at 31 December 2022 to 3.8% at 31 December 2023 driven by an increase in Stage 3 loans and related provisions. Stage 3 coverage decreased marginally from 50% at 31 December 2022 to 47% at 31 December 2023 driven by the increase in the proportion of early stage non-performing (Stage 3) loans which attract lower coverage.

Deposits and funding

Deposits from customers increased by 7% year on year to R1.9 trillion, driven by ongoing underlying client franchise growth. Wholesale-priced deposits grew by 7% and retail-priced deposits grew by 4%. Deposits from banks decreased by 4% year on year. Current and savings balances growth slowed as clients increased spending and/or moved their funds to term products to take advantage of more attractive interest rates. Term deposits grew by 12%.

Revenue

Revenue grew by 21%, driven by net interest income growth of 25% and non-interest revenue growth of 14%.

The group has amended the methodology for recognising interest on Stage 3 loans. This change resulted in an increase in net interest income and an equal and opposite increase in credit impairment charges. The change also resulted in a 7 basis point increase in the group's FY22 net interest margin to 432 basis points and a 8 basis point increase in the group's FY22 credit loss ratio to 83 basis points.

Net interest income growth was driven by strong average balance sheet growth (average gross loans to customers grew by 11%) and higher margins. The net interest margin increased by 62 basis points to 494 basis points. Strong margin expansion, driven by higher average interest rates across South Africa, Africa Regions and International (i.e. positive endowment), was moderated by pricing pressure in South Africa linked to increased competition in home loans, vehicle and asset finance, and corporate lending. Positive endowment contributed the equivalent of R10.8 billion uplift in net interest income in FY23 compared to FY22 (55 basis points).

A larger, increasingly engaged client base and annual price increases, combined with higher client trade and transactional activity resulted in 10% growth in net fee and commissions. Increased client card spend and travel supported healthy growth in card and foreign exchange related fees.

Trading revenue increased by 20% to R20.5 billion, driven by increased client-backed trades as well as market-specific opportunities linked to market dislocations which occurred during the year.

Growth in other gains on financial instruments was driven by an increase in the fair value financial investment portfolio and higher mark-to-market gains.

Credit impairment charges

Credit impairment charges increased by 22% to R16.3 billion. The increase in charges was driven by new loan origination, client strain driving partial payments, negative sovereign risk migration, and new defaults in the Industrial sector and legacy exposures in the Consumer sector. In South Africa, credit impairment charges increased across all portfolios, compounded by the non-recurrence of credit recoveries on the payment holiday portfolio in FY22 (R500 million). In Africa Regions, balance sheet growth, client-specific provisions, and risk migrations led to higher credit charges. The group's credit loss ratio increased from 83 basis points in FY22 to 98 basis points in FY23, at the top of the group's through-the-cycle credit loss ratio target range of 70 to 100 basis points.

Operating expenses

In FY23, we invested in our franchise and our client propositions. We hired over 1 000 people, increased our points of representation in South Africa, launched several new products (including our solar loan) and expanded our digital offerings and functionality. Operating expenses increased by 15% to R79.7 billion, impacted by inflationary pressures, particularly in Africa Regions. Staff costs grew by 17% driven by a larger staff complement, annual increases, and higher performance-linked incentives. Other operating costs grew by 12% driven by higher business activity-related spend.

Software, cloud, and technology-related costs increased by 14% due to higher spend on cloud migration and software licenses as well as personalisation and other focused AI-driven projects. System stability and availability was excellent throughout the year. Amortisation declined by 4% as the group's large historic IT programs started to roll off.

Growth in premises-related costs was well contained at 10%. Increased municipal charges and higher fuel costs linked to electricity disruptions in South Africa were offset by savings from continued infrastructure optimisation. In South Africa, continued rationalisation of our footprint led to a reduction in our branch square meterage (down 4% year on year) and our ATM network (down 6% year on year). Professional fees increased due to higher audit fees and higher legal fees related to collection initiatives. In addition, travel and entertainment costs increased as business-related activity continued to recover off a low base. Total income growth exceeded cost growth, resulting in strong positive jaws of 5.7% and a decline in the cost-to-income ratio to 51.4% (FY22: 53.9%).

Central and other

This segment includes costs associated with corporate functions and the group's treasury and capital requirements that have not been otherwise allocated to the business units. In FY23, the central headline loss amounted to R1.0 billion (FY22: loss of R1.4 billion). The loss decreased due to an increase in net interest income driven by higher average interest rates and a higher level of capital held at the Centre.

OVERVIEW OF FINANCIAL RESULTS

Insurance & Asset Management

Post the Liberty minority buyout in FY22, Liberty has been integrated into the group and is now included, with other related businesses, in the Insurance & Asset Management (IAM) business unit.

The insurance operations new business value increased by 13% year on year to R3.0 billion mainly due to an improved claims experience and increased sales. Insurance operating earnings grew by 23% to R3.9 million supported by the South African insurance business which increased operating earnings by 27% to R3.9 million.

Assets under Management (AUM) in the South African asset management businesses increased by 8% to R1.0 trillion. This growth was attributed to the STANLIB South Africa business given positive local and offshore investment market movements during 2023. Asset management operating earnings decreased by 20% to R928 million, largely as a result of higher planned operating expenditure in STANLIB.

Overall, IAM headline earnings grew by 22% to R2.8 billion in FY23 and delivered an ROE of 13.1% (FY22: 10.5%). The capital coverage of the key legal entities within IAM remain robust.

ICBC Standard Bank Plc

ICBC Standard Bank Plc (ICBCS) recorded a strong operational performance in FY23 driven by increased client activity linked to market volatility. ICBCS (via the group's 40% stake) contributed R1.3 billion to group earnings (FY22: R1.9 billion, R1.2 billion thereof related to the insurance settlement and R0.7 billion thereof related to ICBCS' operational performance).

Profit attributable

The group's profit attributable to ordinary shareholders increased by 29% to R44.2 billion. The primary driver of the difference between the group's headline earnings and profit attributable was fair value gains on investment property in Zimbabwe.

Capital and liquidity

The group's common equity tier 1 ratio (including unappropriated profits) was 13.7% as at 31 December 2023 (31 December 2022, 13.4%). The group's Basel III liquidity coverage ratio and net stable funding ratio both remained well above the 100% regulatory requirements.

Prospects

In 2024, while global risks are expected to persist, the IMF is forecasting a soft landing. Inflation is expected to continue to fall providing scope for interest rate cuts. The IMF expects global real GDP growth to be 3.1% in 2024, in line with 2023.

Real GDP growth in sub-Saharan Africa is expected to accelerate from 3.3% to 3.8% as higher levels of growth in East Africa more than offsets lower growth in South Africa and Nigeria. The interest rate outlook is mixed. While some markets may still see interest rate increases in 1H24 (Angola, Kenya, Nigeria and Zambia), most markets are expected to start cutting interest rates in 2H24. Overall, the outlook is positive, but the region remains at risk of global shocks and climate events. In addition, 13 countries in sub-Saharan Africa will hold elections in 2024, including six where the group operates, namely Botswana, Ghana, Mauritius, Mozambique, Namibia, and South Africa.

In South Africa, inflation is expected to decline to 5.0% on average in 2024, supported by a lack of demand-driven inflation, a lack of wage pressure and favourable base effects. The repo rate is expected to decline to 7.50% by year end (Standard Bank Research: 3 cuts of 25 basis points each starting in July 2024 and one 25 basis point cut in 2025). The electricity shortfall is expected to ease notably, relative to that experienced in 2023, driven by an increase in Eskom supply and the ongoing expansion of private sector generation capacity. Actions to ease the logistics constraints are also expected to gather pace. Together, this should support an improvement in real GDP growth to 1.2% in 2024. The South African election outcome is not expected to drive a change in policy direction. Accordingly, the continued gradual policy reform should be growth-supportive over time. Any acceleration in resolving the electricity, road, rail, and port constraints would aid this further.

While organic growth (in constant currency) is expected to remain relatively robust, the group's year-on-year trends in reported currency (ZAR) will be dampened by the currency devaluations experienced in certain of our Africa Regions' countries in 2023 and forecast for 2024. The guidance that follows is based on year-on-year movements in reported currency (ZAR).

For the twelve months to 31 December 2024 (FY24), we expect average interest rates to be marginally down and pricing to remain competitive. Balance sheet growth to remain slow in 1H24, but improve in 2H24. Accordingly, net interest income is expected to be up low-to-mid single digits year on year. Fee and commissions are expected to grow at mid-single digits supported by a larger client base, increased client activity and higher client spend. Trading revenue is likely to decline off a high base in FY23, but will be subject to market developments and client flow. While there is a heightened focus on costs, we need to continue to invest in our business to remain competitive and grow. Banking revenue growth is expected to be similar to banking cost growth and Jaws flat to positive.

Our clients are likely to remain constrained until interest rates start to decline. Credit impairment charges are expected to peak in the first six months of 2024, driven primarily by ongoing strain in Personal & Private Banking. For FY24, the credit loss ratio is expected to remain within but near the top of the group's through-the-cycle credit loss ratio range of 70 to 100 basis points. A continued improvement in IAM earnings is expected to be partially offset by a decline in ICBCS earnings (off a high base). The group's FY24 ROE is expected to remain well anchored inside the group's target range of 17% to 20%.

While uncertainty is expected to remain elevated, our business is well diversified, growing, and resilient. We are focused on delivering against our strategic priorities and remain on track to deliver on our 2025 targets. The group is also on track to deliver against its ambitious sustainable finance and renewable energy targets.

In 2024, we will continue to support our clients, develop our employees, and deliver sustainable growth and value to our shareholders and other stakeholders. In addition, as a leading financial institution on the continent, we recognise our responsibility to deliver positive impact. We do so by delivering against our purpose of driving Africa's growth.

The forecast financial information above is the sole responsibility of the board and has not been reviewed and reported on by the group's auditors.

All balances are stated net of applicable tax.

¹ Restated, refer to page 111 – 114 for further detail.

² The transactions with non-controlling shareholders primarily consist of the completion of the group's acquisition of the remaining non-controlling ordinary shares in Liberty Holdings Limited.

During 2023, the group assessed the presentation of the condensed consolidated statement of changes in equity within these results. It became evident that a more aggregated view of both the comparatives disclosed as well as movements and balances within these results, would provide more relevant and useful information which is more closely aligned to IAS 34 *Interim Financial Reporting* (IAS 34) disclosure requirements. As such the comparatives disclosed as well as movements and balances have been realigned to include the significant movements and balances for the financial year preceding the current reporting period (2022).

This change in presentation had no impact on the group's other primary statements or any ratios impacted by equity.

TAXATION

Direct taxation charge and effective direct taxation rate

DIRECT TAXATION RATE RECONCILIATION

	2023 %	2022 ¹ %
Direct taxation – statutory rate	27.0	28.0
Prior period tax	(0.2)	(0.2)
Total direct taxation – current period	26.8	27.8
Capital gains tax	1.5	(0.2)
Foreign tax and withholdings tax	3.8	3.7
Change in tax rate	0.0	0.3
Normal direct taxation – current period	32.1	31.6
Permanent differences:	(7.9)	(8.5)
Non-taxable income – dividends	(3.1)	(3.3)
Non-taxable income – other ²	(4.5)	(5.7)
Other	(0.3)	0.5
Effective direct taxation rate	24.2	23.1

¹ During 2023, the group assessed the presentation of the direct taxation rate reconciliation. It became evident, given the new group structure that a group direct taxation rate reconciliation view would provide more relevant and useful information as this is aligned to the other primary statements. As such the comparatives have been restated not only for IFRS 17 but to realign the presentation to a group direct taxation rate reconciliation.

² Primarily comprises non-taxable interest income.

Direct taxation rate

The increase in the effective direct taxation rate (from 23.1% to 24.2%) is mainly driven by:

- Increase in capital gains tax (CGT) attributable to Liberty's policyholder tax funds, as a result of increases in the fair value of certain equities and bonds which are subject to CGT.
- Decrease in the impact of exempt dividends earned in South Africa.
- Decrease in the impact of non-taxable interest income earned in Africa Regions.
- Increase in foreign and withholding tax in Africa Regions.

Partially offset by:

- Decrease in the corporate income tax rate in South Africa.
- The reduction in Other primarily due to the recognition and utilisation of previously unrecognised deferred tax asset on tax losses within Nigeria.

BUSINESS UNIT REPORTING

- 22** SBG structure of business units
- 24** Condensed consolidated business unit results
- 32** Personal & Private Banking
- 39** Business & Commercial Banking
- 45** Corporate & Investment Banking
- 50** Insurance & Asset Management

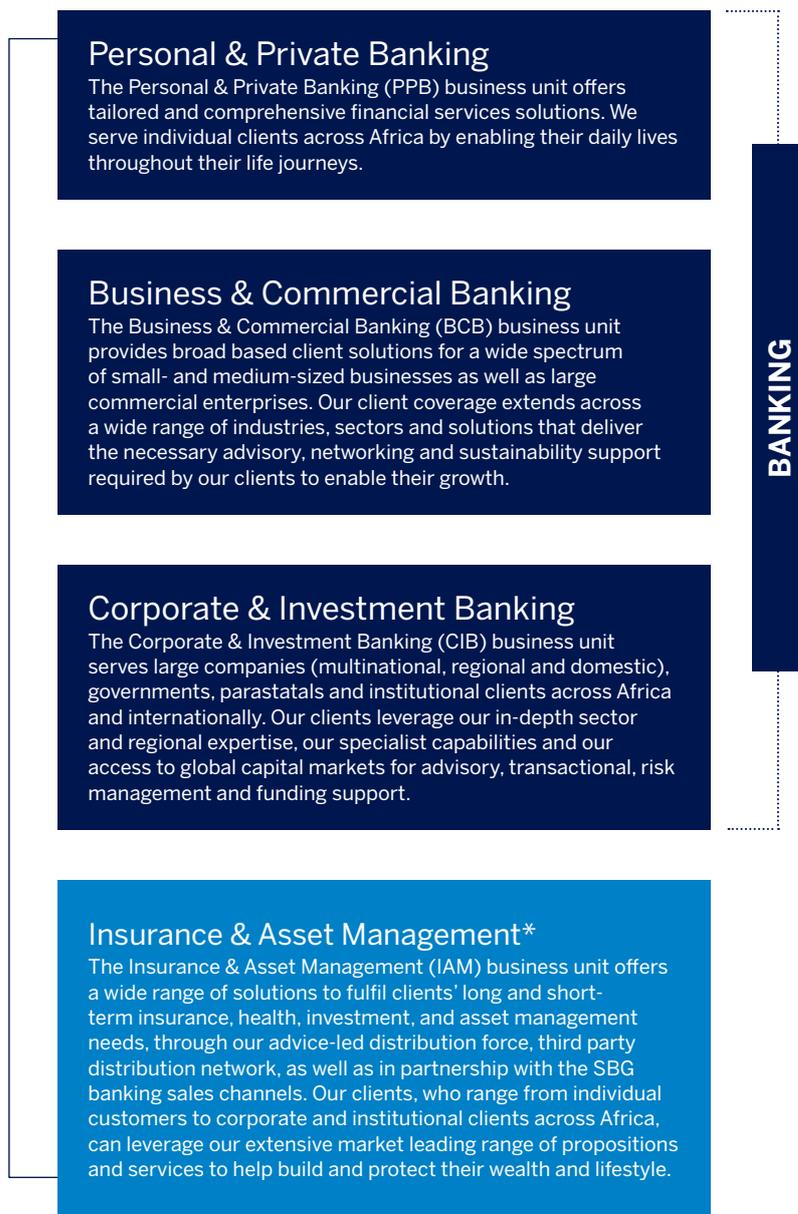

SBG structure of business units

Our operating model is client led and structured around our business units as follows:

Standard Bank Group

BUSINESS UNITS

The business units are responsible for designing and executing the client value proposition. Business units own the client relationship and create multi-product client experiences distributed through our client engagement network.

* Liberty previously reported separately has been fully integrated into Insurance & Asset Management.

BANKING				
		PPB	BCB	CIB
Home services	Tailored home financing solutions for home buyers and existing homeowners, across our retail market, including related value added services.	Retail home services		
Vehicle and asset finance	Comprehensive finance solutions in instalment credit, fleet management and related services across our retail, corporate and business markets.	Retail asset finance	Commercial asset finance, fleet and wholesale

Investment banking	Full suite of advisory and financing solutions, from term lending to structured and specialised products across equity and debt capital markets.			Investment banking

CENTRAL AND OTHER

- Banking hedging activities
- Unallocated capital
- Liquidity earnings
- Central costs

INSURANCE & ASSET MANAGEMENT*

Insurance

Life and health insurance

Development, sourcing and management of life and health insurance and contractual savings propositions distributed via advice-led, third party and banking distribution channels. Propositions include health insurance, long-term insurance products such as life, critical illness, disability, funeral cover, and various insurance plans sold in conjunction with related banking products.

Corporate benefits

Intermediated corporate benefits advice on competitive employee benefit solutions through our advice-led and third party distribution networks. The proposition consists of investment and risk solutions mainly through our umbrella offering as well as consulting services.

Short-term insurance

Development and management of short-term insurance solutions to protect against loss or damage of assets. Propositions are distributed by banking and brokerage networks and include homeowners' insurance, household contents, vehicle insurance and commercial all risk insurance.

Asset management

Investment management

Development and maintenance of local and offshore investment propositions. These include discretionary asset management, stockbroking, investment platform and discretionary fund management services, and traditional life company products.

Asset management

Development and maintenance of asset management propositions for institutional and wholesale clients. Propositions include collective investment schemes and pension fund administration.

ICBC STANDARD BANK PLC

Equity investment held in terms of strategic partnership agreements with ICBC

- ICBC Standard Bank Plc (40% associate)

* Liberty previously reported separately has been fully integrated into Insurance & Asset Management.

PERSONAL & PRIVATE BANKING

Personal & Private Banking (PPB)

PPB delivered headline earnings growth of 27% to R10 721 million, with an ROE of 22.4% (2022: 17.7%). This growth was underpinned by the strength of the client franchise and the implementation of key initiatives to engage, attract and retain the client base as the business navigated through a challenging operating environment.

Elevated interest and inflation rates curbed credit demand as client affordability reduced and consumer confidence declined. On the back of lower demand, disbursements reduced against the prior year albeit off a high base. It was pleasing to note that the business financed a cumulative R3 billion in green-aligned funding for homes and R148 million for solar installations in South Africa. Overall, loans and advances growth was muted at 2%. The deposit base grew by 7% compared to 2022, driven by a higher active client base and continued focus on client engagement and retention strategies. This balance sheet performance, together with positive endowment in a higher average interest rate environment, supported net interest income growth of 19% to R39 128 million.

The business' focus on client engagement, acquisition and retention strategies led to a 6% growth in the active client base to 15.6 million (previously PPB reported +17 million clients; due to the operating model change in 2023, 2.1 million clients now reside in the IAM portfolio) and saw higher transactional activity across the portfolio. The business continues to enhance its digital capabilities to align to client needs and optimise the cost to serve. On the back of this, digital transactional volumes increased by 30% with a decline in branch transactional volumes of 9% as clients continued to prefer online solutions. Overall, this delivered a pleasing 13% growth in net fee and commission revenue to R13 512 million. PPB's partnership with the Insurance & Asset Management business continued to yield good returns with inter-BU revenue attribution up by 7% to R3 344 million mainly due to an increased Flexi Funeral policy base and an improved claims experience. Non-interest revenue of R17 985 million, grew by 16% compared to 2022.

Credit impairment charges increased by 26% to R11 128 million, mainly due to the challenging macroeconomic environment and strain on client affordability. The credit loss ratio to customers landed at 165bps with a higher coverage ratio of 6.1% (2022: 5.4%), above pre-pandemic levels.

Operating expenses increased by 12% to R30 663 million, mainly due to the elevated inflationary environment, continued investment in digital capabilities to transform client experience, depreciation of local currencies against USD costs and increased business activity across the portfolio.

Income growth of 17.8% exceeded cost growth of 12.1% which resulted in positive jaws of 5.7% and an improved cost-to-income ratio of 53.7% (2022: 56.4%).

South Africa (SA)

The South African franchise reported headline earnings of R7 093 million, 6% lower than 2022 with an ROE of 19.1% (2022: 20.0%).

Customer loan growth was muted at 1% due to prudent and selective origination strategies and client affordability constraints considering the macroeconomic pressures. Deposits from customers grew by 8%. There was a change in the mix of the portfolio due to a combination of clients shifting funds to higher yielding solutions and deleveraging their portfolios. Balance sheet growth, together with the positive endowment impact in a higher average interest rate environment, supported net interest income growth of 9% to R27 603 million. This was partially offset by pricing pressure linked to increased competition, particularly in Home services. Elevated non-performing loans and higher funding costs further moderated growth.

Non-interest revenue of R12 406 million grew by 10% against 2022, mainly due to a larger active client base, growth in transactional activity, higher card interchange and inter-BU insurance attribution revenues. Card turnover volumes improved by 9% with Instant Money turnover up by 24%. Branch volumes continued to decline on the back of ongoing efforts to migrate clients to digital platforms by providing alternate devices for cash transactions and increasing digitisation of branch activities. The SBG Mobile App saw a 13% increase in number of clients and greater than 150 million logins in the month of December 2023. This resulted in a 23% increase in digital revenue from transactional activities on the App. System stability remained a top priority, with focus on improving infrastructure resilience and monitoring capabilities which led to increased system availability and an improved client Net Promoter Score.

Credit impairment charges increased by 32% to R9 976 million, largely due to consumer strain linked to the elevated interest and inflationary environment, increased non-performing loans and the non-recurrence of prior year's recoveries in the payment holiday portfolio. The business remains committed to keeping its clients in their homes through heightened client engagement with relevant solutions. Robust risk appetite management and collection optimisation strategies yielded effective outcomes. Total coverage increased from 5.4% to 6.1%, whilst coverage on non-performing loans improved due to book mix changes.

Operating expenses grew by 9% to R20 171 million, mainly due to investment in relationship management capabilities, annual salary increases, and strategic technology initiatives to support enhanced client experience through strengthening fraud detection and monitoring capabilities. The optimisation of the distribution network continues to be an important lever in reducing the cost to serve clients with a 4% reduction in branch square meterage against 2022, while increasing points of representation by 5% to 652; through the rollout of low-cost kiosks.

Total income growth of 9.1% grew faster than cost growth of 8.9% which resulted in positive jaws of 0.2% and a slightly lower cost-to-income ratio of 50.4% (2022: 50.5%).

Africa Regions (AR)

Africa Regions delivered record earnings of R1 477 million, up by more than 100% with an ROE of 19.9% (2022: 2.9%).

Net interest income grew by 28% (constant currency (CCY): 44%) to R8 341 million supported by good balance sheet growth and margin expansion due to positive endowment in a higher average interest rate environment. Growth in deposits of 4% (CCY: 23%) was supported by an increase in the active client base and continued efforts on client engagement and retention. Loans and advances growth of 6% CCY, was supported by improved digital lending capabilities, which enabled limit increases and redraws for customers within risk appetite. This was partially offset by higher funding costs.

Non-interest revenue of R4 982 million increased by 31% (CCY: 55%) driven by higher transactional activity on the back of an increasingly active client base, increased retention and engagement. This was partially offset by a combination of higher USD-based card processing costs following the depreciation of local currencies against the USD, as well as lower retail forex revenues driven by lower client volumes.

Credit impairment charges decreased by 9% (CCY: 0%) to R1 126 million compared to 2022 mainly due to enhancements in collection strategies. This was partially offset by higher forward-looking requirements linked to the adverse macroeconomic environment. The credit loss ratio landed at 179bps, an improvement when compared to prior year (2022: 205bps).

Operating expenses were up by 13% (CCY: 25%) to R9 139 million against 2022, driven by the higher inflationary environment, annual salary increases, cost of living adjustments following currency devaluations, technology investments in strengthening resilience and stability of systems and a general increase in business activity across the portfolio.

Income growth of 29% outpaced cost growth of 13%, resulting in positive jaws of 16.3% and an improved cost-to-income ratio of 68.6% (2022: 78.5%).

Standard Bank Offshore (SBO)

Net interest income grew more than 100%, supported by positive endowment in a higher average interest rate environment, together with higher yields earned on loan placements with the Standard Bank of South Africa. Non-interest revenue growth of 24% CCY, was underpinned by an increase in revenue earned from fiduciary services, in the Trust portfolio, on the back of improved client value propositions and the strengthening of the relationship management capability. Operating expenses grew by 59% CCY, largely driven by the investment in technology capabilities to improve client experience and relationship management, and higher performance-linked variable remuneration. Income growth of >100% outpaced cost growth, resulting in positive jaws and an improved cost-to-income ratio of 35.8% (2022: 48.7%).

Headline earnings grew by more than 100% to R2 151 million, with an ROE of 65.7% (2022: 24.6%). The business continues to focus on strengthening its offshore proposition for clients across Africa and scaling it across growth markets.

Looking ahead

PPB remains well positioned to drive sustainable growth and to support its clients through attractive opportunities that grow and deepen the client relationship. PPB remains focused on retaining the trust of its clients, shareholders and regulators through stable and secure systems, doing the right business the right way and transforming client experience. The business is on track to deliver its committed franchise growth and financial outcomes to assist the group in achieving its 2025 targets.

BUSINESS & COMMERCIAL BANKING

Business & Commercial Banking (BCB)

BCB achieved a 27% increase in headline earnings to R9 334 million, with an ROE of 37.0% (2022: 30.2%). This performance was supported by continued client franchise growth in a challenging operating environment which was marked by high interest rates, inflation, and currency fluctuations. Deliberate execution of the client-led relationship strategy resulted in good client franchise growth and increased transactional activity which formed the base of performance.

In 2023, the business focused on leaner and more cost-effective embedded products and enablement capability to deliver holistic client solutions and support growth which drove an improvement in client experience. This was further enhanced by process efficiency specifically related to call centres, merchant operations and vehicle asset finance processes, as well as enhanced digital onboarding and lending processes which led to faster turnaround times. BCB continued to develop its renewable energy solutions to help business owners access affordable and reliable alternative energy products, providing more than R2 billion in funding to small- and medium-sized enterprises.

Higher deposits from customers of 6%, together with positive endowment in a higher average interest rate environment, supported net interest income growth of 26% to R25 476 million. Loans to customers reduced by 3% (constant currency (CCY): flat) due to lower client demand, affordability constraints and confidence, as well as a stronger ZAR against Africa Regions currencies. Vehicle & Asset Finance disbursements grew by a moderate 2% to R26.6 billion, mostly driven by the Africa Regions portfolio. Business lending disbursements in South Africa softened to R23.2 billion, and in Standard Bank Offshore, prepayment levels were elevated and, combined with the reduced client demand for further offshore property investment, led to negative growth in loans and advances.

Non-interest revenue increased by 5% to R12 604 million, driven by higher transactional activity and strong growth in VAF fleet rental income of 29%. Double-digit turnover growth in card acquiring and commercial card further supported non-interest revenue growth, although this was tempered by compression in the net merchant discount, as well as elevated costs on USD based fee expenses.

Credit impairment charges increased by 41% to R3 454 million, influenced by a challenging global macroeconomic environment, and adverse currency impacts leading to an elevated credit loss ratio of 156bps.

Operating expenses increased by 14% to R21 362 million, due to the higher inflationary environments, continued investment in digital capabilities and increased business activities across the portfolio. This was exacerbated by the negative impact of currency conversion on USD expenditure.

Income growth of 18% outpaced cost growth of 14%, which resulted in positive jaws of 4.2% and a lower cost-to-income ratio of 56.1% (2022: 58.1%).

South Africa (SA)

The South African franchise delivered headline earnings of R6 439 million, up by 21% with an improved ROE of 45.9% (2022: 39.4%). Dedicated relationship teams and client value propositions assisted clients to continue operating and achieve growth despite a challenging economic environment.

Net interest income grew by 20% to R14 825 million. This growth was driven by a 7% increase in deposits from customers and positive endowment in a higher average interest rate environment. This was partially offset by a 1% decline in loans to customers due to customer affordability constraints, and competitive pricing pressures which placed strain on lending margins.

Non-interest revenue grew by 4% to R7 978 million, driven by increased client activity and strong growth in VAF fleet rental income. This growth was supported by the strategic focus on customer acquisition and sector value propositions, alongside increased transactional activity. The launch of our digital client onboarding process has successfully originated fully digitised, self-service transactional accounts tailored for small businesses. This, in conjunction with the introduction of our digitally originated Point of Sale device, underpins our commitment to facilitating seamless and efficient transactions. These initiatives supporting the ongoing migration to more affordable digital network resulted in a 7% growth in digital volumes, while physical volumes continue to decline by 6% against prior year.

Operating expenses increased by 12% to R12 131 million, reflective of a higher inflationary environment, ongoing investment in digital capabilities, system modernisation and increased marketing presence. Despite these challenges, prudent financial management resulted in income growth of 14% which outpaced cost growth of 12% resulting in positive jaws of 2.2% and a lower cost-to-income ratio of 53.2% (2022: 54.3%).

Africa Regions (AR)

The Africa Regions franchise achieved headline earnings of R1 094 million, down by 6% on 2022 (constant currency (CCY): 30%). The ZAR performance was dampened by the strengthening of the ZAR in relation to the local currencies. ROE decreased to 16.0% (2022: 17.6%), with most markets delivering ROE above the group's cost of equity.

Net interest income grew by 21% (CCY: 38%) to R8 200 million. This performance was supported by an 8% growth in customer deposits (CCY: 27%), positive endowment and margin expansion in a higher average interest rate environment. Loans to customers declined by 9% (CCY: up by 13%) due to a stronger ZAR against local currencies.

Non-interest revenue grew by 6% (CCY: 26%) to R4 278 million. Enhanced client experience through simple, convenient solutions led to a 4% growth in the active client base which drove higher transactional volumes. This, together with improved trade activity, were the main contributors to non-interest revenue growth.

Elevated credit impairment charges of R1 758 million, up by 70% (CCY: 80%), were primarily due to higher stage 3 provisions linked to several exposures specifically identified in East Africa and West Africa.

Operating expenses grew by 15% (CCY: 30%), attributed to the high inflationary environment, ongoing technology investments, the impact of US-denominated costs, and higher staff costs. This growth was further impacted by increased depositor insurance costs in response to an 8% (CCY: 27%) growth in the deposit base. Cost growth of 15% was greater than income growth which resulted in negative jaws of 0.4% and a higher cost-to-income ratio of 69.5% (2022: 69.2%).

BUSINESS & COMMERCIAL BANKING

Standard Bank Offshore (SBO)

The Standard Bank Offshore franchise demonstrated exceptional financial performance, achieving strong growth in headline earnings of more than 100% to R1 801 million, with an ROE of 41.2% (2022: 20.5%).

Robust income growth of more than 100% to R2 799 million was primarily driven by positive endowment due to higher average interest rates. Credit impairment charges of R229 million resulted from an increase in the stage 3 book.

Operating expenses grew by 45% (CCY of 29%), driven by increased staff costs and the impact of a weaker South African Rand on GBP expenditure. Despite this substantial growth in expenses, income growth outpaced cost growth which resulted in positive jaws of 54% and an improved cost-to-income ratio of 20.2% (2022: 27.7%).

The SBO franchise continues to identify opportunities to support clients and aligns with Standard Bank's commitment to provide comprehensive financial solutions across the geographies in which we operate.

Looking ahead

BCB is dedicated to actively supporting its clients in achieving their growth strategies by working closely with them to understand their ambitions and tailor financial solutions that facilitate and accelerate their growth trajectories. The business remains steadfast in its commitment to excellence and its pivotal role in supporting clients and the African continent in its energy transition.

BCB remains committed to delivering simplified solutions and streamline processes which will improve operational efficiency and enhance client experience. By prioritising client needs, simplifying operations, and actively participating in the energy transition, BCB positions itself as a resilient and forward-thinking financial institution ready to navigate the evolving landscape. The business remains on track to deliver its committed franchise growth and financial outcomes to assist the group in achieving its 2025 targets.

¹ An active client is defined by a single client transacting on at least one solution within a specific timeframe.

² Clients that actively transact with us on digital platforms (Mobile App, USSD and internet banking).

³ Digital composition expresses digital transaction volumes over total transaction volumes (i.e. digital, branch and ATM).

⁴ Decline in Mobile banking volumes driven by the Kenyan Central Bank's reintroduction of "Bank to Mobile Charges" that were previously waived during the Covid period.

⁵ A digital wallet stores money and is used to facilitate payments on mobile devices.

CORPORATE & INVESTMENT BANKING

Corporate & Investment Banking (CIB)

CIB generated headline earnings growth of 30% to R19 780 million, with an ROE of 22.3% (2022: 19.6%). This performance was driven by revenue growth of 19% to R63 558 million supported by good client franchise activity. Heightened geopolitical tensions across the globe remained a key theme in 2023, resulting in continued high inflation and interest rates as well as exchange rate volatility. Despite these challenges, CIB produced a strong performance as the business made significant strides against its priorities by deliberately growing and defending its diversified client franchise.

The business continued its focus on defending its multinational client base which was supported by strong local corporate client revenue growth across the continent. Particularly strong performances were noted in the Energy & Infrastructure, Telecommunication, Media & Technology, as well as the Diversified Industries sectors.

Loans to customers increased by 16%. The theme of Africa's energy transition and sustainable finance was key to strong loan origination in 2023, alongside good asset growth in the Telecommunication, Media & Technology and Mining & Metals sectors. Deposits from customers grew by 7%, due to increased client deposits in our Transaction banking South African business. This performance, as well as positive endowment in a higher average interest rate environment, resulted in net interest income growth of 26%. Non-interest revenue increased by 13% mainly due to strong trading revenues, particularly in 1H2023 with increased client activity and liquidity management opportunities in volatile markets.

Credit impairment charges were muted relative to 2022, mainly as a result of the restructuring of Ghana government debt during 2023, which resulted in a significant release of provisions raised in the prior year. This was offset by increased provisions due to client strain in the South African franchise, strong book growth which led to higher performing portfolio charges, and negative sovereign credit risk migration in certain markets.

Operating expenses increased by 16% to R28 975 million. Staff costs were impacted by higher inflationary salary increases and performance linked variable remuneration as we continue to invest in attracting and retaining talent, and strategic skills. Investments in signature programmes to improve system stability and client experience further impacted cost growth. Total income growth of 19% exceeded cost growth resulting in positive jaws of 2.9% and an improved cost-to-income ratio of 45.6% (2022: 46.7%).

Global markets (GM)

Global markets total income grew by 16% to R25 975 million in 2023. Client revenue continued to be the biggest contributor to Global markets' revenues and increased by 11% against the prior year, mainly due to heightened client activity in volatile markets. This was complemented by increased liquidity management revenues.

Africa Regions revenue base grew by 23%, benefitting from increased client activity, with the South African business increasing by 6%.

Headline earnings grew by 33% to R7 705 million.

GM remains a key differentiator for the CIB franchise and will continue to build its sustainable client revenue base as it leverages its client, sector and geographic diversity and scale.

Investment banking (IB)

Investment banking delivered strong revenues of R13 128 million, 19% higher than 2022. Net interest income (NII) growth of 22% was supported by record loan origination of R217 billion, up by 7%, and increased drawdowns on existing committed facilities. NII further benefitted from margin expansion in a higher average interest rate environment. Fee and commission income, within non-interest revenue (NIR), generated good growth in commitment fees on the back of strong origination. This growth was softened by muted advisory and knowledge-based fees given the difficult economic conditions and lower client activity.

Revenue growth remains well diversified across the Investment banking client franchise with all but one sector reporting double digit growth. Energy & Infrastructure remains the largest sector driven by Africa's energy transition.

Regionally, Africa Regions revenues increased by 28% with the South African franchise up by 9%, which was mainly driven by average asset growth of 20% and 7% respectively. Margin expansion on the back of higher average interest rates further supported growth.

The strong revenue print resulted in positive jaws of 2.6% and a cost-to-income ratio of 50.7% (2022: 51.8%).

Headline earnings grew by 18% to R4 562 million.

Transaction banking (TxB)

Transaction banking achieved revenue growth of 23% to R24 455 million. NII growth of 26% benefitted from positive endowment on the back of a higher average interest rate environment and increased average deposit balances in Africa Regions. NIR grew by 16%, supported by higher client activity and increased transactional volumes across the continent. This was partially offset by currency devaluations in some key markets.

Regionally, the South African franchise demonstrated a commendable 12% growth in revenue. The Africa Regions franchise achieved robust revenue growth of 29% mainly driven by margin expansion in the deposit book and double digit increase in asset balances, as a result of heightened utilisation of trade loans and higher drawdowns in working capital.

The strong revenue print resulted in positive jaws of 6.1% and a cost-to-income ratio of 49.8% (2022: 52.9%).

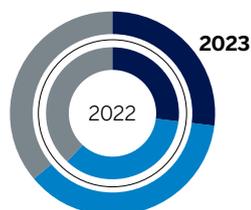

Headline earnings grew by 35% to R7 513 million.

Looking ahead

CIB has a diverse and strong client franchise and is uniquely positioned to support multinational and local corporates across Africa. The business remains committed to supporting its clients' sustainability journey and energy transition across the continent. CIB continues to focus on protecting its core client franchise and leading position in South Africa, and continuing to grow in the Africa Regions' countries in which it operates. This will be done through relationships with key clients and forging partnerships in both intra-Africa and intercontinental trade opportunities, as well as leveraging its multinational client presence and the ICBC partnership to grow trade and foreign exchange flows. The business is on track to deliver its committed franchise growth and financial outcomes to assist the group in achieving its 2025 targets.

INSURANCE & ASSET MANAGEMENT

Insurance & Asset Management (IAM)

Early in 2023, the group implemented refinements to the operating model. The outcome thereof was the establishment of a new business unit, Insurance & Asset Management (IAM), which sits alongside the three existing banking business units. This business unit includes the insurance, investment, and asset management businesses within the group. Consolidating these offerings allows for more efficient scaling of the businesses while also improving client value propositions and specialised risk management, all contributing to enhanced value for clients, advisers, and shareholders. Various legal entities reside within IAM, most notably Liberty Holdings Limited (LHL), including STANLIB and Liberty Group Limited (LGL), Standard Insurance Limited (SIL), Melville Douglas, Liberty Kenya Holdings Plc and Stanbic IBTC Pension Managers. The business unit is anchored in South Africa with the more material African businesses residing in Kenya and Nigeria.

IAM offers a wide range of solutions to fulfil clients' long and short-term insurance, health, investment, and asset management needs, and its clients range from individuals to corporate and institutional clients across the countries in which we have a presence. Within IAM, there are specialised insurance and asset management skills as well as advice-led distribution capabilities that enable the group to deliver holistic client value propositions. Solutions are distributed through the group's various distribution networks, including the large advisory partner and third-party distribution channels.

IAM's headline earnings grew by 22% to R2 820 million, with an ROE of 13.1% (2022: 10.5%) in a challenging macroeconomic and business environment.

The significant impact of IFRS17 prompted a change to the composition of the assets and exposures that previously resided within the Shareholder Investment Portfolio which has been renamed to the Shareholder Assets and Exposures portfolio. This portfolio consists of certain asset holdings and certain exposures derived off the long-term insurance liability book. The Shareholder Assets and Exposures portfolio is particularly sensitive to interest rate movements (both from interest rate sensitive exposures as well as the cash holdings) and unlisted property valuations.

Total operating earnings of R4 532 million were ahead of prior year (2022: R4 252 million). The Shareholder Assets and Exposures portfolio produced a profit of R418 million in 2023, up by 29%.

Insurance operations

Insurance operating earnings grew by 23% to R3 883 million, with South African insurance operating earnings increasing by 27% to R3 948 million. This, coupled with continued capital efficiency initiatives, has seen the ROE increase to 13.1% (2022: 10.5%).

In the long-term insurance businesses in South Africa, underwriting risk largely stabilised to pre-pandemic levels with retail mortality experience broadly within expectation, although client persistency deteriorated on certain books, particularly on regular premium investment propositions and certain risk propositions. Claims normalised during 2023, post the impact of the pandemic and certain natural disaster events in 2022.

Insurance operations new business value of R3 000 million increased by 13% compared to the prior year mainly due to an improved claims experience and increased sales.

The solvency capital requirement cover of LGL for 2023, remained robust at 1.81 times (2022: 1.76 times), and was above the target range of 1.3 to 1.7 times. The solvency capital requirement cover of SIL for 2023 settled at 2.65 times and was above the target of 2.0 times (2022: 2.68 times). These coverage ratios were prior to the payment of dividends relating to the 2023 results.

Long-term insurance indexed new business in South Africa increased by 8% to R11 550 million. This result was supported by strong sales of guaranteed investment plans and annuities. Focus remains on sales efforts and new business volumes in the prevailing tough consumer environment in South Africa. Gross written premiums, in short-term insurance operations in South Africa, increased by 7% to R3 476 million in a highly competitive market.

Mortality experience in the long-term insurance businesses in Africa Regions largely returned to pre-pandemic levels. Africa Regions long-term insurance indexed new business increased by 16% to R578 million. Group life assurance and group credit life sales in Kenya, as well as personal loan protection sales in Uganda and Lesotho, contributed positively to this result. Gross written premiums in Africa Regions short-term insurance businesses grew by 12% to R1 646 million. Good client retention rates in all businesses, coupled with an improvement in the productivity of brokers and agents, resulted in increased premiums recorded across most business lines.

Asset management

Asset management operating earnings decreased by 20% to R928 million. South African asset management operating earnings decreased by 54% to R237 million, largely as a result of higher planned operating expenditure on certain initiatives in STANLIB to enhance its ability to continue to produce consistently high quality investment performance. Net fee income was marginally ahead of 2022, with net external third-party customer inflows reflecting a number of mandates secured in the final quarter of 2023. Africa Regions and International asset management operations earnings grew by 7%, driven by increased fee income which benefited from exchange rate gains on USD denominated management fees, and higher assets under management and administration. The Africa Regions operations results started exhibiting the strain of exchange rate weaknesses across certain key markets in the second half of 2023.

Assets under management (AUM) in the South African asset management businesses increased by 8% to R1 007 billion. This growth was attributed to the STANLIB South Africa business given positive local and offshore investment market movements during 2023.

Looking ahead

The business remains committed to executing its strategy to focus on investment in value-adding initiatives and providing advice on a market leading range of propositions to take care of clients' needs while guiding them to build and protect their wealth and lifestyle. IAM will build richer, long-standing relationships with clients across the group and continue to enhance its client value proposition to deliver diversified revenues that complement the group's banking businesses through the cycle. The business remains committed to deliver franchise growth and financial outcomes to assist the group in achieving its 2025 targets.

2023	1 972 716	97 495	494

Net interest income and net interest margin

Increase in net interest income is largely due to balance sheet growth, higher average interest rates and change in portfolio mix. Driven by:

- New business volumes across the portfolio supported balance sheet growth which resulted in higher net interest income.
- Positive endowment due to higher average interest rates across most of the portfolio.
- Change in balance sheet mix due to local currency book growth outpacing foreign currency book growth in Africa Regions.

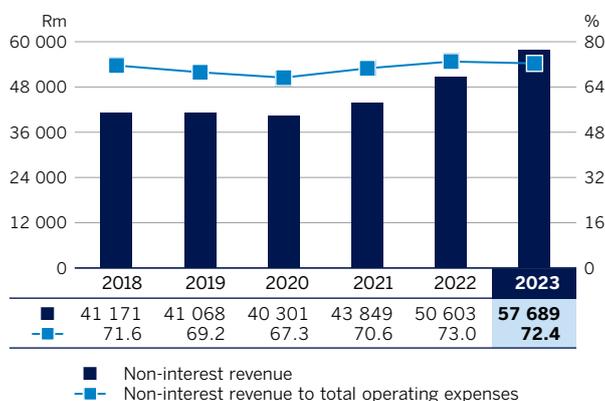

Partly offset by:

- Competitive new business pricing in home service registrations and vehicle and asset finance pay-outs as competitors re-entered the market.
- Corporate lending impacted by competitive pricing as client activity increased in a post-pandemic environment.
- Elevated non-performing loans led to increased interest in suspense particularly in the Retail market.

NON-INTEREST REVENUE ANALYSIS

Non-interest revenue

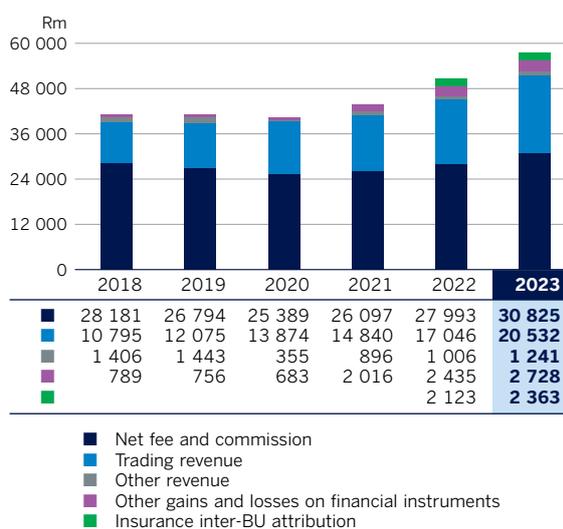

CAGR (2018 – 2023): 7%

Analysis of non-interest revenue

CAGR (2018 – 2023):

¹ Share of profit between the product houses and the distribution network.

Distribution of daily trading income

(frequency of days)

Net fee and commission revenue

- Higher account transaction fees due to a combination of a higher client base and client retention strategies, which resulted in growth in transactional volumes across the continent, as well as annual price increases.
- Continued growth in card-based commissions due to higher card issuing and acquiring turnover on the back of increased transactional volumes, particularly related to travel and e-commerce spend.
- Higher electronic banking fees due to a combination of clients' continued preference to process online transactions in real-time, alongside the adoption of digital fulfilment initiatives particularly in Africa Regions. Higher transactional volumes particularly in Zimbabwe following the roll out of USD ATMs further supplemented growth.
- Higher foreign currency service fees driven by higher volumes of exports in West Africa together with continued growth in committed balance sheet facilities related to Energy & Infrastructure in certain African markets.
- Higher documentation and administration fees earned as client demand for short-term lending facilities increased in Africa Regions.
- Arrangement, guarantee and other committed fees were supported by continued deal activity related to the energy transition across the continent.
- Growth in guarantee fees on the back of higher activity in the Financial Institutions, Sovereign and Energy & Infrastructure sectors contributed to higher other fee and commission revenue growth.
- Decrease in knowledge-based fees mainly due to reduced client activity related to securities transactions as a result of market conditions.
- Fee and commission expenses increased due to:
 - Higher card interchange costs and related volumes, particularly related to international spend.
 - Higher Mastercard and Visa expenses in line with higher transactional activity and a weaker ZAR against the USD.

Trading revenue

- Growth in fixed income and currencies driven by:
 - Increased foreign exchange client activity related to market conditions in South Africa, East Africa and West Africa.
 - Gains driven by currency devaluations in certain African markets.
- Lower commodities revenue due to the non-recurrence of 2022 gains on the back of higher commodity prices despite improved client activity.
- Equities performed well on the back of improved dividend yield from the existing portfolio.

Other revenue

- Increased rental income due to growth in the VAF fleet business.
- Higher demand for cash secure devices in small stores and garages.

Other gains and losses on financial instruments

- An increase in the fair value financial investment portfolio resulted in higher mark-to-market gains.

Insurance inter-BU attribution

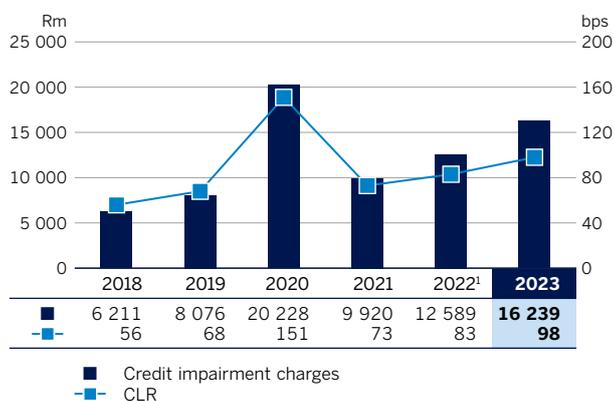

- Insurance revenue increased due to a combination of increased gross written premiums, an improved credit life claims experience and growth in the Flexi Funeral policy base.

² Includes post-write-off recoveries and modification gains and losses.

Credit impairment charges

- Lower sovereign impairments following a partial reversal of Ghana provisions post the restructure of government onshore Eurobonds raised in 2022 despite negative sovereign credit risk migration in Malawi and Angola.
- Elevated impairment charges in the SA franchise due to corporate non-performing loan portfolio largely driven by the existing non-performing loans in the Financial Institutions and Consumer sector.
- Continued momentum in corporate loan originations and increased drawdowns on existing committed facilities further contributed to growth in performing credit impairments.
- Increased charges in South Africa due to pockets of client strain linked to the elevated interest and inflation environment which resulted in clients being unable to meet their full debt obligations.
- Higher provisions in home services due to the adverse macroeconomic environment, compounded by the non-recurrence of credit recoveries in the prior year driven by strong repayment behaviour in the client relief population after the conclusion of the monitoring period.
- Elevated credit impairment charges in East Africa primarily driven by higher stage 3 provisions linked to several identified exposures.
- Increased stage 2 watchlist exposures in the agricultural sector due to industry specific risks in the Business segment.

The group uses a 25-point master rating scale to quantify each borrower's credit risk (corporate asset classes) or facility (specialised lending and retail asset classes). Ratings are mapped to the probability of defaults (PDs) through calibration formulae that use historical default rates and other data from the applicable portfolio.

ANALYSIS OF HEADCOUNT BY GEOGRAPHY

	Change %	2023 Number	2022 Number
South Africa	3	28 805	28 009
Africa Regions	2	13 969	13 679
International	11	677	612
Banking	3	43 451	42 300

Staff costs and headcount

- Higher fixed remuneration linked to annual inflationary salary increases and an increase in skilled staff complement.
- Increased incentive payment charges commensurate with the Group's performance.
- Growth in cash-settled share scheme costs associated with the 24% increase in the Group's closing share price and higher prior year deferred award allocations.
- Higher equity-settled share scheme costs due to:
 - Higher vesting of the Group's long-term incentive scheme awards linked to performance outcomes. The vesting of these awards are clearly defined and managed through specific performance criteria.
 - Increase in prior year deferred award allocations.

Other operating expenses

- Continued investment in software, cloud and technology related spend due to:
 - Depreciation of the ZAR on USD software licence costs.
 - The shift to demand-based system utilisation by migrating to the Cloud and software services which improved operational efficiency and our ability to scale.
 - Continued investment in the security and stability of systems to ensure consistent client experience.
- Increase in premises expenses due to higher municipal costs across the continent, as well as growth in fuel and maintenance costs relating to electricity outages in South Africa. This was partially offset by savings realised from the optimisation of the group's physical footprint by exiting third-party leases.
- Growth in professional fees due to increased audit fees and legal fees in line with credit collection strategies.
- Increase in marketing and advertising spend driven by campaigns to raise brand awareness and visibility, particularly in Africa Regions.
- Increase in marketing and advertising spend driven by campaigns to raise brand awareness and visibility, particularly in Africa Regions.
- Increase in other expenses driven by:
 - Higher insurance-related costs driven by growth of the deposit base.
 - Increased client-related activity which supported income generation.
 - Continued investment in the upskilling and reskilling of our people.

LIQUIDITY MANAGEMENT

Liquidity management overview

- Appropriate liquidity buffers were maintained in line with the assessment of liquidity risk across the geographies in which the group operates.
- The group's available contingent liquidity remains adequate to meet internal as well as regulatory stress testing requirements. Contingent funding plans, stress testing assumptions as well as early warning indicators continue to be reassessed for appropriateness considering the global economic environment and market conditions.
- The group continues to leverage its deposit franchises to provide the appropriate amount, tenor and diversification of funding across currencies and jurisdictions while supporting its current and planned funding requirements, and minimising funding costs and concentration risk.
- The group maintained both the liquidity coverage ratio (LCR) and the net stable funding ratio (NSFR) in excess of minimum regulatory requirements during 2023.
- Longer term funding increased by R50.1 billion through the issuance of negotiable certificate of deposits (NCDs), senior debt, syndicated loans as well as funding raised from development finance institutions (DFIs).
- R4.5 billion of Additional Tier 1 capital and R5.6 billion of Tier 2 was issued during 2023, the proceeds of which were invested in SBSA on the same terms and conditions.

Total contingent liquidity

- Portfolios of marketable and liquid instruments to meet regulatory and internal stress testing requirements are maintained as protection against unforeseen cash outflows. These portfolios are managed within ALCO¹-defined diversification and liquidity limits.
- Managed liquidity represents unencumbered marketable assets other than eligible Basel III LCR high-quality liquid assets (HQLA) which would provide additional sources of liquidity in a stress scenario.

	2023 Rbn	2022 Rbn
Eligible LCR HQLA ² comprising:	468	459
Notes and coins	22	21
Balances with central banks	61	54
Government bonds and bills	373	364
Other eligible liquid assets	12	20
Managed liquidity	161	172
Total contingent liquidity	629	631
Total contingent liquidity as a % of funding-related liabilities	30.6	32.6

¹ Assets and Liabilities Committee.

² Eligible LCR HQLA are defined according to the Basel Committee on Banking Supervision LCR and liquidity risk monitoring framework. The calculation considers any liquidity transfer restrictions that will inhibit the transfer of HQLA across jurisdictions.

Liquidity coverage ratio (average)

- The Basel III LCR promotes short-term resilience of the group's 30 calendar day liquidity risk profile by ensuring that it has sufficient HQLA to meet potential outflows in a stressed environment.
- The SBG and SBSA LCR metrics contained in the table below reflect the simple average of daily observations over the relevant periods.

	4Q23 Rbn	4Q22 Rbn
SBG¹		
Total HQLA	449	442
Net cash outflows	348	301
LCR (%)	129.1	146.8
SBSA²		
Total HQLA	324	283
Net cash outflows	254	219
LCR (%)	127.4	129.1
Minimum requirement (%)	100.0	100.0

¹ Includes daily results per quarter for SBSA, SBSA Isle of Man branch, Stanbic Bank Ghana, Stanbic Bank Uganda, Standard Bank Namibia, Stanbic IBTC Bank Nigeria, Standard Bank Isle of Man Limited and Standard Bank Jersey Limited and the simple average of three month-end data points for the respective quarter for the other Africa Regions' banking entities.

² Excludes foreign branches.

Structural liquidity requirements

Net stable funding ratio¹

- The objective of the Basel III NSFR is to promote funding stability and resilience in the banking sector by requiring banks to maintain a stable funding profile in relation to the composition of assets and off-balance sheet activities.
- The available stable funding is defined as the portion of capital and liabilities expected to be available over the one year time horizon considered by the NSFR.
- The amount of required stable funding is a function of the liquidity characteristics and residual maturities of the various assets (including off-balance sheet exposures) held by the bank.

	2023 Rbn	2022 Rbn
SBG		
Available stable funding	1 602	1 546
Required stable funding	1 321	1 246
NSFR (%)	121.2	124.1
SBSA²		
Available stable funding	1 078	1 046
Required stable funding	1 007	945
NSFR (%)	107.0	110.6
Minimum requirement (%)	100.0	100.0

¹ Period-end position.

² Excludes foreign branches.

Diversified funding base

- Funding markets are evaluated on an ongoing basis to identify optimal funding strategies that appropriately consider current and future competitive and regulatory environments.
- The group continues to prioritise growing its client deposit franchise with deposits sourced from South Africa, key markets in Africa Regions, Isle of Man and Jersey providing diverse and stable sources of funding for the group.

FUNDING-RELATED LIABILITIES COMPOSITION¹

	2023 Rbn	2022 Rbn
Corporate funding	643	599
Retail deposits ²	542	509
Institutional funding	513	429
Government and parastatals	128	171
Interbank funding	95	95
Senior debt	63	65
Term loan funding	33	39
Subordinated debt issued	27	26
Other liabilities to the public	9	4
Total Banking funding-related liabilities	2 053	1 937

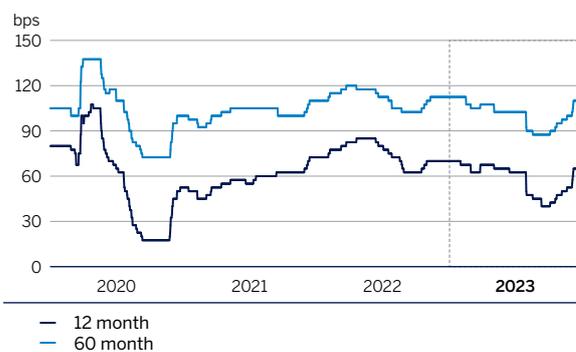

¹ Composition aligned to Basel III liquidity classification.

² Comprises individual and small business customers.

Funding costs

- The market cost of liquidity is measured as the spread paid on NCDs above the prevailing reference rate, namely three-month JIBAR.
- The graph is based on actively issued money market instruments by SBSA, namely 12- and 60-month NCDs.
- Demand for bank credit risk by institutional investors was strong in 2023 driven by the low supply of issuances in wholesale funding markets. The reduction in wholesale funding spreads measured based on 12- and 60-months NCD pricing levels reduced by 23bps and 15bps respectively in 3Q2023 driven by seasonal inflows in transactional deposits and deferrals in asset pipeline materialisation, which contributed to healthy liquidity ratios across the SA Banking sector. In 4Q2023, wholesale funding costs increased by 25bps primarily due to seasonal illiquidity in wholesale funding markets.

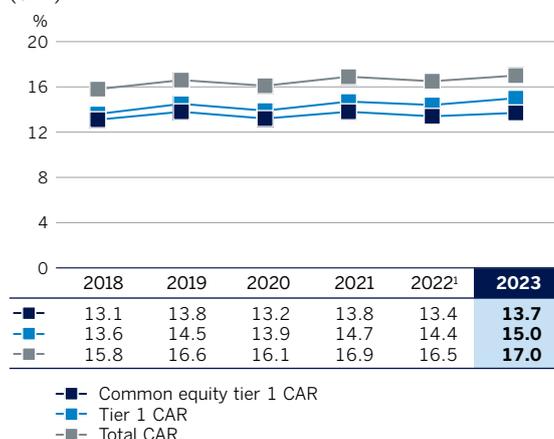

SBSA 12- and 60-month liquidity spreads

² SBSA Group is a consolidation of entities including subsidiaries as well as structured entities, whereas SBSA company is a legal entity.

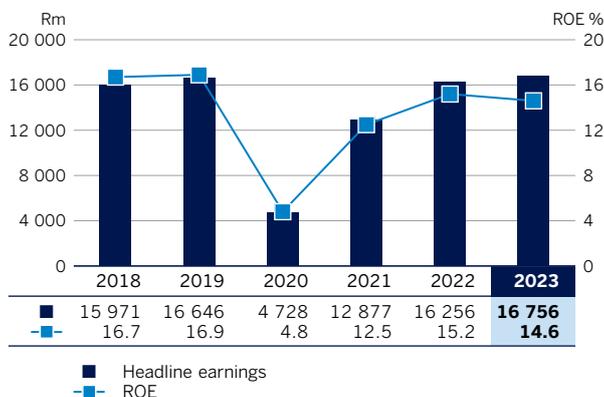

³ At an SBSA level, certain share-based payment schemes are accounted for on a cash-settled basis, but at a consolidated SBG level they are accounted for on an equity-settled basis. In addition, the hedges of those share schemes are recognised in the income statement at an SBSA level and in equity at an SBG level. Given SBG share price fluctuation, it is considered appropriate also to reflect SBSA's headline earnings as consolidated into SBG.

SBSA Group

In 2023, the South African operating environment was characterised by persistent challenges including continued loadshedding, underperforming rail and port infrastructure, as well as low business and consumer confidence which weighed on economic growth. Average consumer price inflation for the year landed within the Monetary Policy Committee target range at 5.9% (2022: 6.9%) with interest rates up by 1.25%. Global growth slowdown and rising geopolitical tensions placed further strain on the economy.

Given the strain in the South African operating environment, SBSA's headline earnings grew by 3% to R16 756 million with a return on equity of 14.6% (2022: 15.2%). SBSA contributed 38% of SBG's earnings performance (2022: 48%). Headline earnings were constrained by higher credit impairment charges, as well as higher operating expenses growth. Cost growth of 16.4% outpaced income growth of 13.4% which resulted in negative jaws of 2.9% and a cost-to-income ratio of 60.4% (2022: 58.8%).

Balance sheet metrics remained strong, with a CET1 capital ratio of 12.7%, LCR of 127.4% and NSFR of 107.0%, all above the regulatory minimum requirements and board-approved targets. Capital optimisation initiatives focused on a combination of demand and mix of the portfolio after considering the appropriateness of buffers and future changes in regulations. Contingent liquidity buffers remained adequate in catering for internal as well as regulatory stress testing requirements. Deposit diversification across the South African ZAR and foreign currency funding portfolio supported competitive funding costs while sustainably underpinning client lending growth in key sectors.

Gross loans and advances to customers increased by 8%, supported by strong energy transition and sustainable finance loan origination in the corporate portfolio, together with an increased demand for trade facilities as client activity increased. The higher average interest environment curbed disbursements and pay-outs which resulted in muted loan growth in home services, vehicle and asset finance, and lending solutions albeit off a high base. The business continued to support clients in the strained environment through heightened engagement and relevant solutions. Risk appetite was managed robustly, and collection optimisation strategies are yielding effective outcomes.

Deposits from customers increased by 7%, mainly due to targeted client acquisition and retention strategies, as well as pricing of product offerings which led to good growth in call, term and cash management deposits of 10%. Growth in current and savings accounts softened as households increasingly relied on quick access to liquidity due to economic pressures which reduced disposable income.

Net interest income grew by 16% to R54 555 million, supported by growth in average interest-earning assets and average interest-bearing liabilities, together with positive endowment in a higher average interest rate environment which led to margin expansion. This was partially offset by pricing pressures in a competitive market.

Net fee and commission revenue increased by 6% to R21 637 million due to a higher active client base, good growth in transactional volumes linked to travel and e-commerce, and annual price increases. In addition, client acquisitions and new client deals delivered improved cash transaction volumes from corporates in Transaction banking. This was partially offset by higher US dollar Mastercard and Visa expenses in line with increased transactional activity and a weaker ZAR against the USD.

Strong trading revenue growth of 15% to R9 847 million was achieved on the back of client demand for foreign exchange, increased structured funding and good risk management in a volatile environment. This was partially offset by lower commodities revenue due to the non-recurrence of prior period gains on the back of higher commodity prices.

Other revenue increased by 18% to R5 588 million, mainly due to a marked increase in vehicle and asset finance fleet rental income on the back of higher volumes on long-term rentals.

Other gains and losses on financial instruments increased by 8% to R2 463 million in line with asset growth in the fair value portfolio.

Credit impairment charges grew by 34% to R13 256 million. The key drivers of the increase included an 8% growth in loans to customers, new corporate defaults, provisioning linked to rapid interest rate hikes and the non-recurrence of prior year credit recoveries in the payment holiday portfolio. Notwithstanding the additional provisions raised, the credit loss ratio remained within the portfolio's through-the-cycle target range of 70 - 100bps with the credit loss ratio increasing to 98bps (2022: 79bps).

Operating expenses grew by 16% to R56 392 million driven by annual salary increases, an increase in skilled employee complement, as well as higher performance-linked variable remuneration that resulted in higher deferred incentive provisions. Continued investment in technology costs to support client experience, improve business agility by migrating to cloud software, the impact of a weaker ZAR on US dollar contracts, higher fuel and maintenance costs related to electricity shortages. The optimisation of the distribution network continues to be an important lever in reducing the cost to serve clients with a 4% reduction in branch square meterage against 2022, while increasing points of representation through the rollout of low-cost kiosks.

SBSA continues to focus on driving sustainable growth in South Africa by utilising its strong balance sheet position to grow market share in selected segments. SBSA will continue to support its clients to navigate through the challenging macroeconomic environment and be a partner for enabling the energy transition in the country. SBSA is on track to deliver franchise growth and financial outcomes to assist the group in achieving its 2025 targets.

The group uses a 25-point master rating scale to quantify each borrower's credit risk (corporate asset classes) or facility (specialised lending and retail asset classes). Ratings are mapped to the probability of defaults (PDs) through calibration formulae that use historical default rates and other data from the applicable portfolio.

AFRICA REGIONS LEGAL ENTITIES

Africa Regions

The Africa Regions business has a strong presence across 19 countries that continues to support sustainable economic growth by facilitating enhanced trade financing, transactional banking, risk management and investment opportunities.

Global economic conditions continued to be challenging in 2023 marked by effects of global geopolitical tensions including the multiple conflicts across Africa, which resulted in sustained high inflation rates, weaker local currencies and elevated interest rates that continued to weigh on developing economies. High debt service costs continued to place pressure on highly indebted sovereigns with elevated default risk remaining a concern across the continent. African countries with high exposure to dollar-denominated economic activity were impacted by the USD appreciation and as a result exchange rate volatility persisted, with significant local currency devaluations, predominantly in Nigeria, Angola and Malawi. The business continued to support its clients and sovereigns as they navigated through these challenges.

Strong portfolio diversification resulted in Africa Regions' contribution to the Standard Bank Group headline earnings increasing to 42% in 2023 (2022: 36%). Africa Regions' produced headline earnings of R18 209 million, up 49%, with an ROE of 28.1% (2022: 21.0%). Income growth of 24% outpaced operating expenses growth of 15% resulting in positive jaws of 9.0% and an improved cost-to-income ratio of 45.4% (2022: 49.0%).

Due to the volatility in currency across the continent, the commentary which follows is based on constant currency movements.

Balance sheet growth was supported by an increase in loans and advances to customers of 20% driven by ongoing momentum in corporate loan origination particularly in the Mining & Metals, Power & Infrastructure, and Telecommunication & Media sectors, as well as demand for trade facilities particularly in West Africa. This, together with employee scheme lending initiatives, as well as strong asset pipeline conversion and increased levels of disbursements in business lending further supported growth. Steady progress was made on the diversification of funding sources across the region.

Net interest income grew by 47%, due to good balance sheet growth and positive endowment in a higher average interest rate environment.

Net fee and commission revenue was up by 37%, driven by increased transactional activity linked to client acquisition, the impact of annual price increases, increased fees earned in the pension fund business driven by growth in the client base and associated Assets Under Management (AUM), as well as increased deal origination and trade activity.

Trading revenue was up by 32%, benefitting from increased client demand and volatility resulting in strong foreign currency (forex) flows in West Africa, higher client forex sales in East and West Africa driven by USD demand following local currency devaluation in these regions, and a release of a credit valuation adjustment provision on the maturing and settlement of a derivative transaction raised in 2H22.

Credit impairment charges reduced by 23%, mainly driven by a post restructure release of material impairments raised following the sovereign distress experienced in Ghana in 2022. Excluding this, elevated sovereign risk resulted in higher provisions in South & Central Africa, as well as increased stage 3 credit impairment charges for existing exposures in East and West Africa in Business banking and in the Consumer, Telecommunication & Media and Real Estate sectors in the corporate portfolio. These movements resulted in the credit loss ratio decreasing to 83bps (2022: 93bps) and remained within risk appetite.

Operating expenses grew by 33%, due to the heightened inflationary environments across the region, annual salary increases, an increase in skilled employees, higher depositor insurance costs, and Asset Management Corporation of Nigeria (AMCON) expenses in West Africa on the back of balance sheet growth. In addition, cost growth was further impacted by higher technology spend driven by continued software and cloud related expenses to support digital capabilities, and the impact of local currency devaluation on foreign currency denominated costs.

East Africa

East Africa headline earnings increased by 37% to R3 513 million with an ROE of 21.2% (2022: 17.3%).

Net interest income growth of 31%, supported by loan origination in the Sovereign, Power & Infrastructure, and Telecommunication & Media sectors, higher client demand for lending and trade facilities, and the positive endowment impact in a higher average interest rate environment.

Non-interest revenue grew by 19%, driven by a combination of higher trading revenue from improved foreign exchange margins, increased client activity, US dollar liquidity scarcity, higher advisory fees earned in Investment banking and improved transactional card-based activity.

Credit impairment charges increased by 19%, due to additional charges for existing non-performing loans in the Business segment and Consumer, Telecommunication & Media and Real Estate sector in the corporate loan portfolio. This was partly offset by the improved credit risk profiling and collection capabilities, as well as post write off recoveries.

Operating expenses were up by 21%, due to annual salary increases, an increase in skilled employees, continued software, cloud and technology related spend to support digital initiatives, coupled with higher legal fees.

South & Central Africa

South & Central Africa's headline earnings grew by 52% to R8 445 million with an ROE of 28.5% (2022: 25.4%).

Net interest income increased by 53%, supported by strong lending and loan origination, higher demand for trade facilities, increased financial investment placements across most markets and positive endowment from higher average interest rates, particularly in Zimbabwe, Malawi, Mauritius, and Zambia.

Net fee and commission revenue increased by 68%, mainly due to the onboarding of new corporate clients in Transaction banking and related transactional fees, together with higher transactional volumes following the roll out of USD ATMs in certain markets. Growth was further supported by continued demand for foreign currency and annual price increases.

Trading revenue grew by 15%, due to increased client activity on the back of volatile foreign exchange markets.

Credit impairment charges increased by 48%, due to higher sovereign credit risk migration in Malawi, regulatory-related growth in financial investment placements, together with the non-recurrence of recoveries received in Business banking in 2022.

Operating expenses were up by 41%, driven by persistent inflation and the hyperinflationary environment in Zimbabwe, continued investment in digitisation initiatives to support revenue and client growth, the impact of local currency devaluation on USD denominated costs, and increased travel and entertainment costs as normal business activity resumed. Cost containment measures continue to remain a key focus area for management in the region.

West Africa

West Africa's headline earnings increased by more than 100% to R6 251 million with an ROE of 33.7% (2022: 18.2%).

Net interest income grew by 51%, due to higher trade related lending, good loan origination and solid deposit growth. In addition, higher average interest rates particularly in Ghana and Nigeria resulted in positive endowment which further supported growth.

Net fee and commission revenue increased by 19%, due to a combination of higher transactional activity related to card and trade services, fees generated from increased loan origination and higher fees earned commensurate with growth in Assets Under Management (AUM) which surpassed the R32.0 billion mark in AUM's.

Trading revenue grew by 70%, driven by increased client activity related to foreign exchange and structured solutions to manage risk in a challenging environment, together with mark-to-market gains.

Credit impairment charges declined by 73%, following a partial release of Ghana's sovereign provisions raised in 2H22 post the government debt restructure. This was partially moderated by additional provisions for existing stage 3 matters in Business & Commercial Banking which reflected client strain in the region.

Operating expenses grew by 30%, due to the heightened inflationary environment, increased depositor insurance costs related to the continued growth in the deposit base, increased investment in digitisation and technology initiatives, and the impact of local currency devaluation on USD denominated technology contracts.

Looking ahead

The business remains focused on delivering superior client experience, building sustainable solutions to enable the continent to achieve its energy transition and is well positioned to deliver against its strategy. Ongoing investment in client journeys and digital capabilities will continue to support business growth. Countries are on track to deliver franchise growth and financial outcomes to assist the group in achieving its 2025 targets.

LIBERTY HOLDINGS GROUP

ANALYSIS OF CHANGE IN LIBERTY GROUP LIMITED (LGL) SAM OWN FUNDS

The table below provides explanations for the R209 million increase in the LGL SAM own funds for the period ending 31 December 2023 and includes comparative figures for the prior period ended 31 December 2022.

	Notes	2023 Rm	2022 Rm
Own Funds – Beginning of the period		30 149	29 606
New business value (NBV)	1	433	394
Expected release of risk margin	2	800	658
Variations/changes in operating assumptions		(709)	(776)
Operating experience variances	3	(842)	(454)
Operating assumption and modelling changes	4	133	(322)
Development costs ^a	5	(612)	(487)
Covid-19 impact			154
Economic adjustments ^a	6	4 462	510
Dividends and other capital changes	7	(4 165)	90
Own Funds – End of the period		30 358	30 149

^a Development costs reflecting expenses associated with group strategic initiatives were shown within economic adjustments in 2022 and have now been shown explicitly.

The significant line items in the build-up are explained in the notes that follow:

Notes to analysis of change in SAM Own Funds:

- The NBV captures the own funds generated over the contract boundary from LGL's various business lines during the period on a SAM basis.

The NBV allows for the best estimate profitability of new business over the contract boundary as measured on the SAM basis. Earnings from illiquidity premiums in excess of those included in the SAM liabilities, and earnings from credit investments, which both emerge annually as profits on the SAM basis, are included.

The NBV is adjusted for the new business risk margin which is the present value of the cost of the non-hedgeable capital requirements for new business sold in the year. This is based on a 6% cost of capital above the risk-free rate. This amount will be released over the expected lifetime of the new business on a SAM basis going forward.

The NBV for December 2023 increased compared to December 2022. This is mainly driven by an increase in Corporate Benefits and Bancassurance earnings as a result of strong underwriting profits.
- The risk margin released over the expected lifetime of the contracts in line with the expected change in the risk profile of these contracts through time. This result allows for the expected release of the risk margin over the period on the in-force business at the start of the year which provides for the 6% cost of capital on non-hedgeable risk above the risk-free rate. The release of the risk margin for December 2023 has increased compared to the prior year. This is largely as a result of a refinement in the attribution of the change in risk margin between the release of margin and NBV components for short boundary Corporate Benefits business.
- Mortality and morbidity variances were positive over the 2023 period whilst persistency experience, which drove most of year-on-year change, faced headwinds on certain product lines. Where appropriate, assumptions were strengthened to reflect experience. In addition, this item includes the allowance for costs related to projects and other costs that are expected to be once-off in nature, including the cost of the IFRS 17 project and simplification initiatives that were incurred during the period.
- Assumption and modelling changes for 2023 include changes to the mortality and morbidity basis which were partly offset by the strengthening of the persistency basis for product lines experiencing sustained headwinds. The loss for the 2022 full year period was largely due to the once-off strengthening of long-term expense assumptions to align the expense basis between SAM and IFRS 17 and the partial offset from adjustment to policyholder behaviour assumptions.
- Development costs reflect costs relating to group strategic initiatives.
- The economic adjustment of R4 462 million for December 2023 is predominantly driven by the impact of interest rate movements on interest rate sensitive liabilities with yields having increased over the period. In addition, it includes a write up in the value of Liberty Two Degrees (L2D) from cost to net asset value post the acquisition of minority shares, which increased own funds by R1 221 million. The prescribed yield curve under SAM has seen a marked increase at later durations, mainly in the extrapolation, relative to movement in yields at similar durations on the internal curves used under IFRS. This change has partly been driven by the introduction of the R2053 bond into the yield curve prescribed by the Prudential Authority. This resulted in an additional positive return on SAM own funds as compared to that observed under IFRS as changes to extrapolation cannot be hedged.
- For 2023, this item includes a net redemption of subordinated debt of R863 million (which reduces SAM own funds) and a dividend distribution of R3 298 million. For 2022, this relates mainly to two offsetting items being the net issuance of subordinated debt of R500 million (which increases own funds on a SAM basis) offset by a dividend distribution of R500 million. The residual R90 million was as a result of a number of smaller items that went through equity.

IFRS NET ASSET VALUE TO SAM OWN FUNDS RECONCILIATION

The table below reconciles the differences between the LGL own funds under SAM and the current LHL IFRS NAV as at 31 December 2023 and includes comparative figures at 31 December 2022 restated for IFRS 17:

	Notes	2023			2022 ¹

SAM Own Funds		30 358			30 149		

¹ Restated on an IFRS 17 basis.

Notes to IFRS net asset value to SAM Own Funds reconciliation:

1. This represents the difference between the net asset value of L2D at the end of the period and the cost price of Liberty Two Degrees (L2D) shares. Note that as at 31 December 2023 L2D is classified as an Asset Holding Intermediary under SAM and LGL SAM own funds thus includes the write up to net asset value.
2. The reduction in LHL shareholder equity over the period ended 31 December 2023 was driven mainly by the impact of the dividend paid from Liberty to the Standard Bank Group in the period.
3. Sub-ordinated debt is not recognised as a liability in calculating the SAM own funds.
4. This item allows for the difference in valuation methodologies between the IFRS and SAM bases. The SAM basis sets a best estimate liability together with the SAM Risk Margin which aims to adjust the best estimate liabilities for the cost of non-hedgeable risk to get to a market consistent value. With the

implementation of IFRS17, the SAM and IFRS bases are more closely aligned in that similar to SAM, best estimate liabilities are established together with a risk adjustment representing the cost of non-financial risks. However, in addition to this, IFRS requires a Contractual Service Margin to be established which represents the unearned profit on a contract which is expected to be earned in the future resulting in no profit at initial recognition. This CSM is the most significant difference between the two bases (R19 365 million in 2023 and R18 569 million in 2022).

The SAM basis also uses the Prudential Authority's prescribed nominal and real yield curves to value all policies while the IFRS basis uses full internal nominal and real yield curves. Further to this, only certain "directly attributable" costs are included in the IFRS reserves as required by the IFRS 17 standard. There are also other less material differences between the bases, for example, the SAM basis allows for longer contract boundaries on certain books of business.

5. This item represents the additional deferred tax liability on a SAM basis.

LIBERTY HOLDINGS GROUP

ANALYSIS OF NEW BUSINESS VALUE FOR LONG-TERM INSURANCE

The New Business Value for long-term insurance business has been included below as supplementary information to the preceding new SAM disclosure.

	2023 Rm	2022 Rm
South African covered business		
SA Retail	2 017	1 921
Bancassurance Credit Life and Funeral	284	270
Corporate Benefits	449	307
Gross value of new business	2 750	2 498
Acquisition expenses	(1 569)	(1 570)
New business value before risk margin	1 181	928
New business risk margin and illiquidity premium deferral	(748)	(534)
New business value South Africa	433	394
New business value Liberty Africa Insurance	83	54
Total new business value	516	448

SOLVENCY CAPITAL REQUIREMENT COVERAGE

The following table summarises the available capital (or "own funds") and the solvency capital requirements (SCR) for Liberty Group Limited.

	2023	2022
Available capital (or own funds) (Rm)	30 358	30 149
SCR (Rm)	16 802	17 113
SCR coverage ratio (times)	1.81	1.76
Target SCR coverage ratio (times)	1.3 – 1.7	1.3 – 1.7

Liberty Group Limited's SCR cover ratio remains strong at 1.81 times at 31 December 2023, which is above the target range of 1.3 to 1.7 times. The coverage ratio increased slightly in 2023 primarily because of positive own fund changes (from operations, capital efficiencies arising from the Liberty Two Degrees transaction and an increase in the tail end of the Prudential Authority's yield curve, offset to some extent by dividends paid and the redemption of a subordinated note) and reductions in the SCR (from reduced market risk, including the sale of some more risky assets).

SHAREHOLDER ASSETS AND EXPOSURES

Before the implementation of IFRS 17, Liberty invested its capital in a Shareholder Investment Portfolio which was optimised to maximise long-term returns on a through-the-cycle basis. Following the introduction of IFRS 17, Liberty's balance sheet management strategy was revised and under Liberty's board-approved balance sheet management framework, certain market risk exposures resulting from policyholder liabilities are now retained in order to achieve regulatory capital coverage ratio stability. Liberty Group Limited's (LGL) Shareholder Assets and Exposures consists of:

- Net assets, mainly property and cash, held in excess of assets required to back liabilities (including policyholder liabilities and LGL listed subordinated debt instruments issued through an approved debt programme).
- Retained market risk exposure resulting from unhedged policyholder liabilities to ensure capital coverage stability (mostly interest rate risk associated with certain IFRS 17 GMM insurance contracts and a portion of market risk associated with IFRS 17 Participating contracts)

2023 (Rm)	South Africa Rand					Foreign Currency				Total Exposures	
	Cash	Debt ¹	Equity	Investment Properties ²	Other	Total	Cash	Debt	Equity		Total
LGL group shareholder net assets											16 414
Less: non-controlling interests											(3 726)
LGL group ordinary shareholder net assets	2 828	576	42	8 098	1 140	12 684			4	4	12 688
Retained market risk exposure ³	770	11 965	2 428	9 621		24 784	1	1 329	1 999	3 329	28 113
Targeted unhedged interest rate exposure on GMM contracts		10 942				10 942					10 942
Retained residual market risk exposure on participating contracts	770	1 023	2 428	621		4 842	1	1 329	1 999	3 329	8 171
Investment properties used to match certain other cashflow obligations such as annuities and liabilities for incurred claim obligations				9 000		9 000					9 000
Total net exposure by asset class	3 598	12 541	2 470	17 719	1 140	37 468	1	1 329	2 003	3 333	40 801

¹ The retained local bond market exposures reflect the sensitivity of the valuation of unhedged IFRS 17 policyholder liabilities to changes in interest rates. The local bond exposures that are not related to Variable Fee Approach (VFA) contracts (the VFA exposure movements are absorbed by the Contractual Service Margin) of R10.9 billion are sensitive to changes in the local bond curve. This risk has been expressed in notional equivalent terms of government bonds that have comparable duration characteristics to that of the underlying liability cashflows.

² The retained property market exposures reflect the sensitivity of earnings to the difference between the total return on underlying property assets held and any funding cost required to service liabilities backed by these assets. For the property exposures that are not related to VFA contracts (the VFA exposure movements are absorbed by the CSM) of R9 billion, the table above reflects the shareholder's economic exposures post the unbundling of L2D as well as the reallocation of property to back policyholder liabilities as approved by the Insurance & Asset Management Balance Sheet Management Committee.

³ Included in retained market risk exposure are exposures related to IFRS 17 Variable Fee Approach (VFA) contracts where risk mitigation has not been selected i.e. unhedged VFA non-unit linked exposures. In respect of these exposures, the IFRS 17 Contractual Service Margin (CSM) is expected to absorb the majority of the impact of market related movements in the period related to the non-unit linked exposures. As a result we expect little impact on shareholder earnings for these exposures, with these impacts being deferred into the CSM as long as the CSM remains positive. The exposures in respect of these VFA contracts (totalling R8.2 billion) are R0.7 billion local cash, R2.4 billion local equity, R1 billion local bonds, R0.6 billion property and R3.3 billion foreign assets.

LIBERTY HOLDINGS GROUP

SHAREHOLDER ASSETS AND EXPOSURES RETURN

	2023 Rm	2022 Rm
Gross result ¹	1 133	913
Taxation ²	(148)	(203)
Subordinated notes at fair value	(544)	(385)
Expenses (including asset management fees)	(23)	(2)
Net profit	418	323

¹ The basis for the calculation of the gross return on the Shareholder Assets and Exposures (formerly referred to as the Shareholder Investment Portfolio (SIP)) has changed in 2023 following the implementation of IFRS 17. Refer to the table showing the shareholder assets and exposures for a view of the shareholder assets and exposures under IFRS 17. The comparative period's gross result is still reported under the basis used to quantify the SIP return.

² The taxation treatment of income derived from assets backing capital is the normal taxation rules applicable to life investment portfolios. The taxation applicable to income derived from assets backing life funds and the 90:10 exposure is determined by the tax rates pertaining to each life tax fund to which the assets are allocated (I-E tax). In addition there is transfer tax at 27% on the net surplus, after the applicable I-E tax.

ACCOUNTING POLICY ELECTIONS

Basis of preparation and presentation

The Standard Bank Group Limited's (the group) financial results, including the condensed consolidated statement of financial position, condensed consolidated income statement, condensed consolidated statement of other comprehensive income, condensed consolidated statement of changes in equity and condensed consolidated statement of cash flows, for the year ended 31 December 2023 (results) are prepared, as a minimum, in accordance with the requirements of the JSE Listings Requirements, the requirements of the International Financial Reporting Standards (IFRS®), where applicable, and its interpretations as adopted by the International Accounting Standards Board (IASB®), the South African Institute of Chartered Accountants' (SAICA) Financial Reporting Guides as issued by the Accounting Practices Committee and Financial Pronouncements as issued by the Financial Reporting Standards Council, the presentation requirements of IAS 34 and the requirements of the South African Companies Act, 71 of 2008 applicable to condensed financial statements.

The group's results are prepared in accordance with the going concern principle under the historical cost basis as modified by the fair value accounting of certain assets and liabilities where required or permitted by IFRS.

All amounts relate to the group's consolidated results, unless otherwise indicated, are presented in South African rand (rand), which is the presentation currency of the group, and are stated in millions of rand (Rm), unless otherwise indicated.

2023 refers to the full-year results as at or ended 31 December 2023. 2022 refers to the full-year results as at or ended 31 December 2022. Change percentage reflects 2023 change on 2022, unless otherwise indicated.

The accounting policies applied in the preparation of the results, which are in terms of IFRS, are consistent with the accounting policies applied in the preparation of the group's 2023 annual financial statements. Refer to the group's annual financial statements, released concurrently with these results, for further detail.

The group's 2023 and 2022 financial information has been correctly extracted from the underlying 2023 audited consolidated annual financial statements, where applicable, which is available at <https://www.standardbank.com/sbg/standard-bank-group/investor-relations/results-and-reports> and were released concurrently with these results.

These results contain *pro forma* constant currency financial information. Refer to the *pro forma* constant currency paragraph within the other reportable items section of these results for further detail.

The board of directors of the group takes full responsibility for the preparation of these results.

The preparation of these results was supervised by the chief finance & value management officer, Arno Daehnke BSc, MSc, PhD, MBA, AMP.

These results were made publicly available on 14 March 2024.

Changes in accounting policies and adoption of new standards effective for the current financial year

The accounting policies are consistent with those reported in the previous year, apart from the items mentioned in this section. Disclosures and accounting policies have been amended as relevant. Refer to the IFRS 17 transition impact section that follows and the group's annual financial statements for the detailed accounting policies (annexure F, accounting policy 12).

The following accounting policies have been applied in preparation of these results as well as the restated 2022 results:

- IFRS 17, adopted on 1 January 2023, establishes principles for the recognition, measurement, presentation and disclosure of insurance contracts, including reinsurance contracts, that an entity issues, reinsurance contracts held as well as investment contracts with discretionary participation features (DPF) that an entity issues (provided the entity also issues insurance contracts), which are scoped into IFRS 17 measurement from IFRS 9. Refer to the group's annual financial statements for disclosure specifically relating to IFRS 17 and for the related accounting policies (annexure F, accounting policy 12).
- IAS 12[®] Income Taxes (IAS 12) (amendments) introduced a temporary exception to the requirements to recognise and disclose information about deferred tax assets and liabilities related to Pillar Two income taxes and targeted disclosure requirements for entities affected by GloBE (global anti-base erosion) model rules. The amendments are effective for annual periods starting on or after 1 January 2023 and are required to be retrospectively applied. It was announced in the 2023 budget that it is South Africa's intention to implement the related legislation during 2024. The amendments had no material impact on the group's annual financial statements for the current reporting period, as the estimated impact can only be determined once the tax law is enacted or substantively enacted, which is expected during the 2024 reporting period.

RESTATEMENTS

Stage 3 interest income change in calculation methodology

During the finalisation of the group results, the group amended its calculation of interest income on Stage 3 loans and advances for PPB and BCB clients.

Previously, interest income on stage 3 loans and advances was calculated using a portfolio approach. The interest income on the Stage 3 loan portfolio was calculated as the difference between the expected discounted and undiscounted recovery cash flows and was unwound on a straight-line basis over the expected period to resolution, being either recovery or write-off ("portfolio straight-line approach"). This modelling approach was utilised as a proxy for the IFRS 9 Stage 3 interest recognition requirement.

Going forward, interest income on stage 3 loans and advances will be calculated on a loan-by-loan basis. The change in calculation methodology is not a change in accounting policy. The interest income on Stage 3 loans will be calculated by multiplying the net carrying amount of each customer balance (after deducting credit impairments) by the effective interest rate of the loan, which is aligned to the requirements of IFRS 9 ("loan-by-loan outstanding balance approach").

During the change to the loan-by-loan outstanding balance approach, the group identified that by previously applying the portfolio straight line approach in calculating Stage 3 interest income, interest income and income statement credit impairments were erroneously understated by R1.3 billion.

The group has restated for this impact. This restatement has no impact on earnings attributable to ordinary shareholders or headline earnings but does impact the relevant ratios (being NIM, CLR, Cost-to-income and JAWS) which have been restated for this change. Furthermore, this change has no impact on gross loans and advances, balance sheet ECL provisions or coverage.

KEY MANAGEMENT ASSUMPTIONS

In preparing the group's results, estimates and assumptions are made that could materially affect the reported amounts of assets and liabilities within the next reporting period. Estimates and judgements are continually evaluated and are based on factors such as historical experience and current best estimates of future events. The following represents an extract of the material key management assumptions applied in preparing the group's financial results, for further detail relating to key management assumptions, refer to the group's annual financial statements that have been released in conjunction with these results.

The group's forward-looking economic expectations were applied in the determination of the expected credit loss (ECL) at the reporting date

A range of scenarios have been determined for base, bear and bull forward-looking economic expectations, as at 31 December 2023, for inclusion in the group's forward-looking process and ECL calculation:

South African economic expectation

- Idiosyncratic constraints such as the electricity shortfall, rail and port infrastructure insufficiencies as well as policy uncertainty continue to weigh on business and consumer confidence and weaken economic growth. Fragile global growth continues to place additional pressure on South Africa's terms of trade, reflecting the tight global financial conditions and rising geopolitical tensions and risks from ongoing, and potentially further, wars. Many countries are holding general elections this year. Locally, it is assumed that the African National Congress will likely not require a large coalition partner at the national level in the 2024 elections. This assumed election outcome underpins our expectation for general continuity in monetary and fiscal policy as well as the structural reform trajectory. The severe impact of electricity loadshedding should ease given the expected increase in Eskom's electricity supply as well as the ongoing expansion of private sector electricity generation, though the unreliable performance of Eskom's existing fleet remains a major risk. The impact of logistical challenges will probably ease only modestly this year, with the operational benefits of the policy interventions underway likely to prove slow to materialise. Further slow improvements in the implementation of reforms should boost potential gross domestic product (GDP) and economic growth over the medium term.
- One of the few potential global positives is the interest rate relief expected from many of the key central banks from around mid-2024. Domestic demand-driven inflation pressures remain weak. Gradual further decline in South Africa's headline consumer price index (CPI) inflation towards the mid-point of the inflation target band (by 2025) and lower inflation risks should see the policy rate reverting to a more neutral level over time. The prime interest rate is expected to reduce to 10.75% by the end of 2024. Despite the elevated fiscal risks, the expected retreat in global bond yields should support South African bonds. Under these assumptions, there is scope for modest rand gains – notwithstanding weak domestic fundamentals, the widening current account deficit and possibly remaining on the Financial Action Task Force (FATF) watchlist for a prolonged period.

- The bear case scenario sees persistent inflation, with an overtightening of policy rates leading to a global recession. Locally, reform momentum wanes due, for example, to a less benign election outcome than assumed in the base case. The electricity supply situation is assumed to be worse in this case, with more frequent and higher stages of loadshedding. Grid capacity constraints dampen renewable energy investments, while rail and port infrastructure challenges continue to hamper trade. Adverse climate-change related events, such as floods, are also assumed to be a more regular occurrence in this scenario. In addition to the probability of the bearish scenario exceeding that of the bullish scenario, the relative severity of this case reflects the negative asymmetry of the risks.
- The bull scenario sees a combination of global inflation quickly unwinding, policy rates moving lower earlier in 2024, global growth recovering rapidly and domestic reforms gaining more momentum. The electricity supply situation is slightly better than assumed in the base case over the short term and improves more materially in the medium term with stronger investment in embedded generation and the unlocking of grid capacity constraints. Reforms also yield private sector participation in port and rail infrastructure. Business confidence is higher, further boosting growth and the employment intensity thereof.

Africa Regions economic expectation

The Africa Regions scenario comprises the following outlook and conditions:

- Growth in sub-Saharan Africa is expected to recover to around 4.0% in 2024 from around 3.3% in 2023. Notably, heightened geopolitical tensions, high debt burdens and weather-related shocks from the ongoing El Niño event will be the primary downside risks for growth across sub-Saharan Africa in 2024.
- El Niño will have a varied impact on growth across Africa, especially considering technological advancements and infrastructure improvements in the agricultural sector. East African economies, such as Kenya, Uganda and Tanzania, are already experiencing above-normal levels of rainfall, while the southern parts, such as Malawi, Zambia and Mozambique, have drier conditions.
- Growth in most African economies is now approaching or has already reached pre-pandemic averages, demonstrating their resilience despite the confluence of recent shocks.
- Growth in Kenya could ease to 5.1% in 2024 from an expected 5.6% in 2023 due to the impact of El Niño and rising domestic arrears. In Uganda, growth will likely recover to 5.9% in 2023/24, from 5.2% in 2022/23, largely owing to increased oil sector investment. For Zambia, growth is expected at 4.4% in 2024, only slightly down from 4.5% in 2023. Positively, the non-mining economy has supported economic activity amid weaker mining growth over the past year. Growth in Nigeria could pick up to 3.4% in 2024 from 2.6% in 2023, due to higher crude oil production and the government's ongoing efforts to curb oil theft, together with new production streams. Angola, however, remains heavily reliant on its oil sector to grow. Further, persisting foreign exchange (FX) liquidity challenges informs our forecasts of Angola displaying poor growth prospects, pointing to further deceleration of GDP growth, to 1.1% in 2024, as both oil sector investment and production will likely remain subdued.

KEY MANAGEMENT ASSUMPTIONS

- The formation of the G20 common market framework in 2020 following the implosion of debt sustainability of economies that were already on the cusp prior to the pandemic, was expected to expedite debt restructuring resolution and boost the journey to restore debt towards more sustainable positions. Zambia, Ethiopia and Chad were the first economies initially to apply for debt restructuring under this framework, with Ghana following suit in 2022. Now, nearly four years later, questions are arising whether the common market framework needs to be significantly refined or shelved altogether, as scepticism towards its viability/usefulness grows. Further, the broad diversity in creditors that hold Africa's external debt has notably pivoted towards a larger share owed to non-Paris Club lenders, such as China, over the past two decades or so.
- The International Monetary Fund (IMF) has advocated for a proactive application of the IMF's lending-into-arrears policy, a strategy involving the IMF continuing to lend to countries even when they fall behind on debt payments, incentivising commercial creditors to agree to debt restructuring terms similar to those accepted by other creditors. This principle could be applied to Zambia's current situation and provide assurances to both creditors and debtors. Under the base case scenario, Zambia could secure an external debt restructuring deal in the second half of 2024, and Ghana could finalise an external debt restructuring deal in the first half of 2024. It is anticipated that Kenya will repay the USD2.0 billion Eurobond on maturity in June 24 and could also look to explore a Eurobond issuance in the first half of 2024 should they receive favourable pricing in the context of the current global risk environment. Although, as they look to test the waters after Cote d'Ivoire's issuance in Jan 23, their initial endeavour was to issue a Eurobond in FY2024/25. The government also remains keen to conduct a buyback of the USD2.0 billion Eurobond, at par. Furthermore, Nigeria and Angola may also consider issuing a Eurobond during 2024, subject to global risk conditions.
- The outlook for monetary policy in 2024 is somewhat mixed. Most markets are likely to begin easing monetary policy conditions from the second half of 2024. However, some economies such as Kenya, Zambia, Egypt, Angola and even Nigeria, are likely to tighten monetary conditions further in the first half of 2024, while other markets, such as Ghana, may even begin easing rates.
- Indeed, positively, with a soft-landing scenario now broadly expected for the global economy, risk appetite could be restored. This may revive external funding sources, which could bolster external positions and ease both FX volatility and liquidity shortages, while also anchoring inflation expectations. Enhanced geopolitical risks in 2024 could still bring about external account vulnerabilities.
- The political calendar will be unusually busy in 2024 with 13 countries expected to hold elections across sub-Saharan Africa, with Botswana, Mauritius, Mozambique, Ghana and Namibia among them.

United Kingdom economic expectation

- In the base case, global growth is around 2.5% in 2024, similar to 2023 but still low in historical terms. Within this, the United Kingdom (UK) is particularly weak, with next-to-no growth predicted for 2024 as higher base rates in previous years continue to constrain growth, and both business and consumer sentiment remain weak. A recession, being two consecutive quarters of negative growth, is possible but is likely to be mild. Weak growth is expected to deliver further falls in inflation, although it is likely that the easy part of the disinflationary process has passed and further declines in inflation towards the 2% target will be harder to achieve due to high wage growth levels. Nonetheless, wage pressures will ease moderately and this, together with the persistence of weak growth and falls in inflation should allow the Bank of England to reduce base rates in 2024. Lower base rates could weaken the currency, but the base case assumes that the Federal Reserve (the Fed) will be cutting policy rates as well and the differential between the UK and United States (US) will not change materially. In the base scenario, an easing in global financial conditions brought about by Fed easing should lift asset prices such as bonds and stocks. This is usually an environment in which 'riskier' currencies such as the pound gain, and 'safer' currencies such as the dollar, fall. The base case assumes that the 2024 election will be won by the opposition Labour Party but is unlikely to have a material impact on the growth and inflation outlook, nor financial market performance compared to the continuation of a Conservative government.
- The bear scenario assumes that inflation is not only stubborn but starts to re-accelerate. Supply chain stresses caused by tensions in the Middle East, particularly as they impact shipping through the Red Sea are seen as one cause of price pressure. Russia's progress in defeating Ukraine could also create more inflationary pressure, particularly where energy and food are concerned. Wage persistence and continued tightness of the labour market also keep inflation high, and the Bank of England is forced to respond with higher base rates in 2024. Rates can be reduced in the longer-term, but the increase in 2024 pushes the economy into a deeper recession and causes more distress in interest-sensitive sectors such as real estate. The pound falls, particularly against 'safe' currencies such as the dollar even if this scenario does not see the Fed have to raise policy rates in the same way as the Bank of England.
- The bull scenario sees inflation fall much faster than the base case, causing base rates to be cut sooner and more deeply than in the base case. Swift rate cuts, in turn, start to rapidly revive the economy with interest-sensitive sectors such as real estate recovering fast. And with wages outstripping inflation, at least early in the forecast period, consumer confidence improves and consumer spending returns rapidly. The sharp fall in interest rates and the rebound in the economy leads to improvement in the budget finances, allowing the new government to further drive growth with tax cuts and/or spending increases. The pound gains against the dollar on the assumption that the rapid fall in inflation and deep cuts in interest rates are seen in the US as well, with the result that global economic and financial market optimism increases significantly and pushes down the dollar as investors shun its safe-asset attributes.

Main macroeconomic factors

The following table shows the **main projected macroeconomic factors as at 31 December 2023** that were used to estimate the forward-looking impact on the ECL provision of financial assets. Each scenario, namely base, bear and bull, is presented for each identified time period.

Macroeconomic factors – 2023	2023 ¹	Base scenario		Bear scenario		Bull scenario	
		Next 12 months ²	Remaining forecast period ³	Next 12 months ²	Remaining forecast period ³	Next 12 months ²	Remaining forecast period ³

Sensitivity analysis of the forward-looking impact on the total ECL provision on all financial instruments relating to corporate, sovereign and bank products

The ECL methodology for corporate, sovereign and bank products is based primarily on client specific risk metrics. As such the forward-looking macroeconomic information is one of the components and/or drivers of the total reported ECL. Rating reviews of each client are performed at least annually, and entails credit analysts completing a credit scorecard and incorporating FLI at a client level. The weighting is reflected in both the determination of SICR as well as the measurement of the resulting ECL for the individual client. Therefore the impact of forward-looking economic conditions is embedded into the total ECL for each client. Therefore the below sensitivity analysis of the total ECL provision relating to the CIB client franchise excludes the impact of losses directly attributable to distress experienced on sovereign exposures, held primarily for prudential or liquidity management purposes.

	2023		2022	
	Total income statement charge Rm	Total ECL provision Rm	Total income statement charge Rm	Total ECL provision Rm
As reported	1 662	10 373	2 530	9 927
Scenarios				
Base	1 595	10 306	2 435	9 832
Bear	1 902	10 613	2 856	10 253
Bull	1 474	10 185	2 258	9 655

Sensitivity analysis of the forward-looking impact on ECL provision relating to home services, VAF, card, personal, business and other lending products

The level of the forward-looking balance sheet provisioning was maintained at 2022 levels due to the challenging macroeconomic environment, which was underpinned by aggressive monetary tightening, inflation and sharp and frequent changes in interest rates and other consumer pressures.

The following table shows a comparison of the forward-looking impact on the provision as at 31 December 2023, based on the probability weightings of the above three scenarios resulting from recalculating each of the scenarios using a 100% weighting of the above factors.

	2023		2022	
	Income statement charge/ (release) Rm	Forward-looking component of ECL provision Rm	Income statement charge/ (release) Rm	Forward-looking component of ECL provision Rm
Forward-looking impact on total ECL provision	44	2 182	165	2 172
Scenarios				
Base	(192)	2 000	(227)	1 780
Bear	754	2 979	1 834	3 840
Bull	(493)	1 712	(1 150)	856

Refer to the financial performance section for the carrying amounts of loans and advances.

Management judgemental adjustments

As mentioned in the sections above in determining the forward-looking impact, from an IFRS 9 perspective, the group has forecasted three possible future macroeconomic scenarios, being the base, bear and bull scenarios and attributed weightings to these three scenarios. Determining these scenarios and the assumptions underlying them are complex. Management judgemental adjustments are required in terms of IFRS 9 to take into account factors that do not form part of the normal modelling process and/or the above mentioned macroeconomic scenarios. These factors are incorporated as part of management judgemental adjustments. These factors may result from model or data limitations, recent events or expert credit judgement and are applied at a segment, industry or client level. These management judgemental adjustments are reviewed as part of the governance process surrounding credit risk and ECL. Management judgemental adjustments incorporated in the calculation of ECL as set out below:

	2023 Rm	2022 Rm
PPB and BCB industry and macroeconomic adjustments ¹	951	504
CIB sovereign adjustment ²	400	400
Total	1 351	904

¹ Additional impairments held to incorporate industry and macroeconomic factors which were not included in the underlying modelling. During 2023, industries experiencing continued and increased risk, influencing the assumptions applied in determining ECL as discussed above, include the agriculture industry.

² Additional impairments held to incorporate the credit risk relating to sovereigns.

³ The above disclosures, including comparatives, have been included from 2023 to provide a more appropriate analysis of out-of-model adjustments considering the nature and characteristics thereof.

OTHER REPORTABLE ITEMS

Change in group directorate

The following changes in directorate took place during the year ended 31 December 2023 and up to 14 March 2024:

Appointments		
S David-Borha	As non-executive director	13 March 2024
Retirements		
KD Moroka	As non-executive director	12 June 2023
JM Vice	As independent non-executive director	12 June 2023

Equity securities

During FY23, the group allotted 239 847 shares (2022: 367 506) in terms of the group's share incentive schemes. The group repurchased 2 789 239 (2022: no repurchased shares) shares during 1H23. The total equity securities held as treasury shares at 31 December 2023 was a long position of 18 690 366 shares (2022: long position of 21 771 571 shares).

The treasury shares requirements of IAS 32 *Financial Instruments: Presentation* were amended, as a result of IFRS 17, to provide an exemption from the requirement to be deducted from equity. SBG has elected not to deduct from equity its treasury shares that relate to this exemption, but to continue to account for these treasury shares as equity and to measure the reacquired equity instrument at fair value through profit or loss in accordance with IFRS 9. The total equity securities held as treasury shares as at 2022, noted above, have been restated by 8 178 769 resulting from the reinstatement of the group's treasury shares held in Liberty Holdings Limited during 2022.

Legal Proceedings defended update

Competition Commission – trading of foreign currency

On 15 February 2017, South Africa's Competition Commission lodged five complaints with the Competition Tribunal (Tribunal) against 18 institutions, including one against SBSA and two against a former subsidiary of the group, Standard New York Securities Inc (SNYS), in which it alleged unlawful collusion between those institutions in the trading of USD/ZAR. The group conducted its own internal investigations with the help of external counsel and found no evidence to support the complaints. Various litigation processes took place, with the Competition Commission being ordered to file a new complaint affidavit, which was done on 1 June 2020. The new complaint affidavit added further respondents, bringing the total to 25, including Standard Americas. In the group's view, the new complaint affidavit (and several supplementary affidavits) filed by the Competition Commission, continued to contain multiple procedural and substantive deficiencies. Further litigation processes ensued. On 8 January

2024 the Competition Appeal Court (CAC) (a bench of three judges) upheld SBSA's appeal against the Tribunal's decision not to dismiss the complaint referred pre-trial and dismissed the Competition Commission's complaint in its entirety. The CAC also dismissed the complaint referred against Standard New York Securities and upheld the appeal of Standard Americas against the order that it be joined belatedly as a respondent. The court found that neither SBSA nor Standard New York Securities should have been included in the referral of the complaint as no prima facie case had been made out against either and that the Tribunal should not have allowed the joinder of Standard Americas after lodging of the referral at the Tribunal. The Competition Commission delivered a notice of application for leave to appeal to the Constitutional Court, which excluded Standard New York Securities. SBSA and Standard Americas are opposing this notice. Our legal advice is that there is no obvious constitutional point to be raised in relation to SBSA and Standard Americas.

Pro forma constant currency information

The *pro forma* constant currency information disclosed in these results is the responsibility of the group's directors. The *pro forma* constant currency information has been presented to illustrate the impact of changes in currency rates on the group's results and may not fairly present the group's financial position and results of operations. In determining the change in constant currency terms, the income and expenditure items for the comparative financial reporting years have been adjusted for the difference between the current and prior years' cumulative average exchange rates, determined as the average of the daily exchange rates. The statement of financial position items have been adjusted for the difference between the current and prior years' closing rates. The measurement has been performed for each of the group's material currencies. The constant currency change percentage is calculated using this adjusted comparative amount.

Only the 2023 *pro forma* constant currency information and accompanying 2022 comparatives, where applicable, contained in these results, have been reviewed by the group's external auditors and their unmodified reasonable assurance report prepared in terms of International Standard on Assurance Engagements 3420 *Assurance Engagements to Report on the Compilation of Pro Forma Financial Information Included in a Prospectus* (ISAE 3420) is available for inspection at the company's registered office on weekdays from 09:00 to 16:00.

The average exchange and closing rates used to determine the *pro forma* constant currency information can be found on page 3. The average exchange rates were calculated using the average of the average monthly exchange rates (determined on the last day of each of the months in the period).

IFRS RISK AND CAPITAL MANAGEMENT DISCLOSURES

OVERVIEW

The group's activities give rise to various financial and insurance risks. Financial risks are categorised into credit, funding and liquidity and market risk, of which an update from 2023 has been included in these results relating to concentration and market risks relating to Standard Bank Activities.

The group's approach to managing risk and capital is set out in the group's risk, compliance and capital management governance framework approved by the group risk and capital management committee.

BANKING

Concentration risk

Concentration risk is the risk of loss arising from an excessive concentration of exposure to a single counterparty, an industry, a product, a geography, maturity, or collateral. The group's credit risk portfolio is well-diversified. The group's management approach relies on the reporting of concentration risk along key dimensions, the setting of portfolio limits and stress testing. FY22 has been restated, where applicable, to align with the group restructure.

Market risk

Trading book market risk

Definition

Trading book market risk is represented by financial instruments, including commodities, held in the trading book, arising from normal global markets' trading activity.

Approach to managing market risk in the trading book

The group's policy is that all trading activities are undertaken within the group's global markets' operations.

The market risk functions are independent of the group's trading operations and are accountable to the relevant legal entity Asset-Liability Committees (ALCOs). ALCOs have a reporting line into group ALCO, a subcommittee of Group Leadership Council.

All value at risk (VaR) and stressed value at risk (SVaR) limits require prior approval from the respective entity ALCOs. The market risk functions have the authority to set these limits at a lower level.

Market risk teams are responsible for identifying, measuring, managing, monitoring and reporting market risk as outlined in the market risk governance standard.

Exposures and excesses are monitored and reported daily. Where breaches in limits and triggers occur, actions are taken by market risk functions to bring exposures back in line with approved market risk appetite, with such breaches being reported to management and entity ALCOs.

VaR and SVaR

The group uses the historical VaR and SVaR approach to quantify market risk under normal and stressed conditions.

For risk management purposes VaR is based on 251 days of unweighted recent historical data updated at least monthly, a holding period of one day and a confidence level of 95%.

The historical VaR results are calculated in four steps:

- Calculate 250 daily market price movements based on 251 days' historical data. Absolute movements are used for interest rates and volatility movements; relative for spot, equities, credit spreads, and commodity prices.
- Calculate hypothetical daily profit or loss for each day using these daily market price movements.
- Aggregate all hypothetical profits or losses for day one across all positions, giving daily hypothetical profit or loss, and then repeat for all other days.
- VaR is the 95th percentile selected from the 250 days of daily hypothetical total profit or loss. Daily losses exceeding the VaR are likely to occur, on average, 13 times in every 250 days.

SVaR uses a similar methodology to VaR, but is based on 251-day period of financial stress and assumes a 10-day holding period and a worst case loss.

The 10-day period is based on the average expected time to reduce positions. The period of stress for SBSA is currently the 2008/2009 financial crisis while, for other markets, more recent stress periods are used. Where the group has received internal model approval, the market risk regulatory capital requirements is based on VaR and SVaR, both of which use a confidence level of 99% and a 10-day holding period.

Limitations of historical VaR are acknowledged globally and include:

- The use of historical data as a proxy for estimating future events may not encompass all potential events, particularly those which are extreme in nature.
- The use of a one-day holding period assumes that all positions can be liquidated or the risk offset in one day. This will usually not fully reflect the market risk arising at times of severe illiquidity, when a one-day holding period may be insufficient to liquidate or hedge all positions fully.
- The use of a 95% confidence level, by definition, does not take into account losses that might occur beyond this level of confidence.

VaR is calculated based on exposures outstanding at the close of business and, therefore, does not necessarily reflect intra-day exposures. VaR is unlikely to reflect loss potential on exposures that only arise under significant market movements.

Trading book portfolio characteristics

VaR for the period under review

Trading book market risk exposures arise mainly from residual exposures from client transactions and limited trading for the group's own account. In general, the group's trading desks have run increased levels of market risk throughout the year for all asset classes when compared to 2022 aggregate normal VaR and stress VaR with a marginal increase in both levels noted at year end.

TRADING BOOK NORMAL VAR ANALYSIS BY MARKET VARIABLE

	Normal VaR			
	Maximum ¹ Rm	Minimum ¹ Rm	Average Rm	Closing Rm
2023				
Commodities risk	5	1	3	3
Foreign exchange risk	54	18	32	26
Equity position risk	23	7	11	8
Debt securities	78	22	44	24
Diversification benefits ²			(29)	(20)
Aggregate	109	34	61	41
2022

Debt securities	879	179	355	291
Diversification benefits ²			(350)	(318)
Aggregate	886	140	362	287

¹ The maximum and minimum SVaR figures reported for each market variable do not necessarily occur on the same day. As a result, the aggregate SVaR will not equal the sum of the individual market SVaR values, and it is inappropriate to ascribe a diversification effect to SVaR when these values may occur on different days.

² Diversification benefits is the benefit of measuring the SVaR of the trading portfolio as a whole, that is, the difference between the sum of the individual SVaRs and the SVaR of the whole trading portfolio.

Approach to managing interest rate risk in the banking book

Banking book-related market risk exposure principally involves managing the potential adverse effect of interest rate movements on banking book earnings (net interest income and banking book mark-to-market profit or loss) and the economic value of equity.

The group's approach to managing interest rate risk in the banking book (IRRBB) is governed by applicable regulations and is influenced by the competitive environment in which the group operates. The treasury and capital management team monitors banking book interest rate risk on a monthly basis operating under the oversight of group ALCO.

Measurement

The analytical techniques used to quantify IRRBB include both earnings and valuation-based measures. The analysis takes into account embedded optionality such as loan prepayments and accounts where the account behaviour differs from the contractual position.

The results obtained from forward-looking dynamic scenario analyses, as well as Monte Carlo simulations, assist in developing optimal hedging strategies on a risk-adjusted return basis.

INTEREST RATE SENSITIVITY ANALYSIS¹

		ZAR ²	USD	GBP	Euro	Other	Total
2023							
Increase in basis points	bps	100	100	100	100	100	
Sensitivity of annual net interest income	Rm	1 370	1 040	317	47	871	3 645
Decrease in basis points	bps	100	100	100	100	100	
Sensitivity of annual net interest income	Rm	(1 387)	(1 226)	(289)	(57)	(932)	(3 891)
2022							
Increase in basis points	bps	100	100	100	100	100	
Sensitivity of annual net interest income	Rm	1 745	1 142	450	81	960	4 378
Decrease in basis points	bps	100	100	100	100	100	
Sensitivity of annual net interest income	Rm	(1 783)	(1 332)	(435)	(4)	(994)	(4 548)

¹ Before tax.

² To provide a consistent disclosure of sensitivities across currencies, the ZAR sensitivity disclosure has been revised from 200bps to 100bps. This has resulted in a decrease in the level of FY22 sensitivity by R1 379m and R1 454m under the increasing and decreasing interest rate scenarios, respectively. Furthermore, the group amended its calculation of interest income on Stage 3 loans and advances for PPB and BCB clients. This has resulted in increased sensitivity of R355m in FY22 sensitivity under the 100bps increasing and R354m under the 100bps decreasing interest rate scenarios.

Foreign currency risk

Definition

The group's primary non-trading-related exposures to foreign currency risk arise as a result of the translation effect of the group's net assets in foreign operations and foreign-denominated financial assets and liabilities.

Approach to managing foreign currency risk

The group foreign currency management committee, a subcommittee of the group capital management committee, manages the risk according to existing legislation, South African exchange control regulations and accounting parameters. It takes into account naturally offsetting risk positions and manages the group's residual risk by means of forward exchange contracts, currency swaps and option contracts.

Hedging is undertaken in such a way that it does not constrain normal operating activities. In particular, for banking entities outside of the South African common monetary area, the need for capital to fluctuate with risk-weighted assets is taken into account.

The repositioning of the group's NAV by currency, which is managed at a group level, is a controlled process based on underlying economic views and forecasts of the relative strength of currencies, other than foreign operations.

Gains or losses on derivatives that have been designated as either net investment or cash flow hedging relationships in terms of IFRS are reported directly in OCI, with all other gains or losses on derivatives being reported in profit or loss.

Foreign currency risk sensitivity analysis

The following table reflects the expected financial impact, in Rand equivalent, resulting from a 10% shock to foreign currency risk exposures, against ZAR. The sensitivity analysis is based on net open foreign currency exposures arising from foreign-denominated financial assets and liabilities inclusive of derivative financial instruments, cash balances, and accruals, but excluding net assets in foreign operations. The sensitivity analysis reflects the sensitivity of profit or loss on the group's foreign-denominated exposures other than those trading positions for which sensitivity has been included in the trading book VaR analysis.

FOREIGN CURRENCY RISK SENSITIVITY IN ZAR EQUIVALENTS

		USD	Euro	GBP	Other	Total
2023						
Total net long/(short) position	Rm	338	(26)	301	406	1 019
Sensitivity (ZAR depreciation) ¹	%	10	10	10	10	
Impact on profit or loss	Rm	34	(3)	30	41	102
2022						
Total net long/(short) position	Rm	(1 382)	50	201	347	(784)
Sensitivity (ZAR depreciation) ¹	%	10	10	10	10	
Impact on profit or loss	Rm	(138)	5	20	35	(78)

¹ A 10% appreciation in ZAR will have an equal and opposite impact on profit or loss to the amounts disclosed above.

DECLARATION OF FINAL DIVIDENDS

Shareholders of Standard Bank Group Limited (the company) are advised of the following dividend declarations out of income reserves in respect of ordinary shares and preference shares.

Ordinary shares

Ordinary shareholders are advised that the board has resolved to declare a final gross cash dividend No. 108 of 733.00 cents per ordinary share (the cash dividend) to ordinary shareholders recorded in the register of the company at the close of business on Friday, 12 April 2024. The last day to trade to participate in the dividend is Tuesday, 9 April 2024. Ordinary shares will commence trading ex dividend from Wednesday, 10 April 2024.

The salient dates and times for the cash dividend are set out in the table that follows.

Ordinary share certificates may not be dematerialised or rematerialised between Wednesday, 10 April 2024, and Friday, 12 April 2024, both days inclusive. Ordinary shareholders who hold dematerialised shares will have their accounts at their Central Securities Depository Participant (CSDP) or broker credited on Monday, 15 April 2024.

Where applicable, dividends in respect of certificated shares will be transferred electronically to shareholders' bank accounts on the payment date.

Preference shares

Preference shareholders are advised that the board has resolved to declare the following final dividends:

- 6.5% first cumulative preference shares (first preference shares) dividend No. 109 of 3.25 cents (gross) per first preference share, payable on Monday, 8 April 2024, to holders of first preference shares recorded in the books of the company at the close of business on the record date, Friday, 5 April 2024. The last day to trade to participate in the dividend is Tuesday, 2 April 2024. First preference shares will commence trading ex dividend from Wednesday, 3 April 2024.
- Non-redeemable, non-cumulative, non-participating preference shares (second preference shares) dividend No. 39 of 456.09315 cents (gross) per second preference share, payable on Monday, 8 April 2024, to holders of second preference shares recorded in the books of the company at the close of business on the record date, Friday, 5 April 2024. The last day to trade to participate in the dividend is Tuesday, 2 April 2024. Second preference shares will commence trading ex dividend from Wednesday, 3 April 2024.

The salient dates and times for the preference share dividend are set out in the table that follows.

Preference share certificates (first and second) may not be dematerialised or rematerialised between Wednesday, 3 April 2024, and Friday, 5 April 2024, both days inclusive. Preference shareholders (first and second) who hold dematerialised shares will have their accounts at their CSDP or broker credited on Monday, 8 April 2024.

Where applicable, dividends in respect of certificated shares will be transferred electronically to shareholders' bank accounts on the payment date.

DECLARATION OF FINAL DIVIDENDS

THE RELEVANT DATES FOR THE PAYMENT OF DIVIDENDS ARE AS FOLLOWS:

ISIN	ZAE000109815	ZAE000038881	ZAE000056339
Namibian Stock Exchange (NSX)			
Share code	SNB		
ISIN	ZAE000109815		
Dividend number	108	109	39
Gross distribution/dividend per share (cents)	733.00	3.25	456.09315
Net dividend	586.40	2.60	364.87452
Last day to trade in order to be eligible for the cash dividend	Tuesday, 9 April 2024	Tuesday, 2 April 2024	Tuesday, 2 April 2024
Shares trade ex the cash dividend	Wednesday, 10 April 2024	Wednesday, 3 April 2024	Wednesday, 3 April 2024
Record date in respect of the cash dividend	Friday, 12 April 2024	Friday, 5 April 2024	Friday, 5 April 2024
CSDP/broker account credited/updated (payment date)	Monday, 15 April 2024	Monday, 8 April 2024	Monday, 8 April 2024

¹ The non-redeemable, non-cumulative, non-participating preference shares (SBPP) are entitled to a dividend of not less than 77% of the prime interest rate during the period, multiplied by the subscription price of R100 per share.

Tax implications

The cash dividend received under the ordinary shares and the preference shares is likely to have tax implications for both resident and non-resident ordinary and preference shareholders. Such shareholders are therefore encouraged to consult their professional tax advisers.

In terms of the South African Income Tax Act, 58 of 1962, the cash dividend will, unless exempt, be subject to dividends tax. South African resident ordinary and preference shareholders that are not exempt from dividends tax, will be subject to dividends tax at a rate of 20% of the cash dividend, and this amount will be withheld from the cash dividend with the result that they will receive a net amount of 586.40 cents per ordinary share, 2.60 cents per first preference share and 364.87452 cents per second preference share. Non-resident ordinary and preference shareholders may be subject to dividends tax at a rate of less than 20% depending on their country of residence and the applicability of any Double Tax Treaty between South Africa and their country of residence.

The company's tax reference number is 9800/211/71/7 and registration number is 1969/017128/06.

Shares in issue

The issued share capital of the company, as at the date of declaration, is as follows:

- 1 675 775 231 ordinary shares at a par value of 10 cents each
- 8 000 000 first preference shares at a par value of R1 each
- 52 982 248 second preference shares at a par value of 1 cent each and subscription price of R100.

DISCLAIMER

This document contains certain statements that are "forward-looking" with respect to certain of the group's plans, goals and expectations relating to its future performance, results, strategies and objectives. Words such as "may", "could", "will", "expect", "intend", "estimate", "anticipate", "aim", "outlook", "believe", "plan", "seek", "predict" or similar expressions typically identify forward-looking statements. These forward-looking statements are not statements of fact or guarantees of future performance, results, strategies and objectives, and by their nature involve risk and uncertainty because they relate to future events and circumstances which are difficult to predict and are beyond the group's control, including but not limited to, domestic and global economic business conditions, market-related risks such as fluctuations in interest rates and exchange rates, the policies and actions of regulatory authorities (including changes related to capital and solvency requirements), the impact of competition, inflation, deflation, the timing impact and other uncertainties of future acquisitions or combinations within relevant industries, as well as the impact of changes in domestic and global legislation and regulations in the jurisdictions in which the group and its affiliates operate. The group's actual future performance, results, strategies and objectives may differ materially from the plans, goals and expectations expressed or implied in the forward-looking statements. The group makes no representations or warranty, express or implied, that these forward-looking statements will be achieved, and undue reliance should not be placed on such statements. The forward-looking statements in this document are not reviewed and reported on by the group's external assurance providers. The group undertakes no obligation to update the historical information or forward-looking statements in this document and does not assume responsibility for any loss or damage arising as a result of the reliance by any party thereon.
