

4. Reserves and operational outlook

Robert van Niekerk
Head of SA region

SA PGM Investor Day
7 June 2018

NOT FOR RELEASE, PRESENTATION, PUBLICATION OR DISTRIBUTION IN WHOLE OR IN PART IN, INTO OR FROM ANY JURISDICTION WHERE TO DO SO WOULD CONSTITUTE A VIOLATION OF THE RELEVANT LAWS OR REGULATIONS OF SUCH JURISDICTION.

This presentation is for informational purposes only and does not constitute or form a part of any offer or solicitation to purchase or subscribe for securities in the United States or any other jurisdiction nor a solicitation of any vote of approval, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction.

The shares to be issued in connection with the offer for Lonmin plc ("Lonmin" and the "New Sibanye Shares", respectively) have not been and will not be registered under the US Securities Act of 1933 (the "Securities Act") and, accordingly, may not be offered or sold or otherwise transferred in or into the United States except pursuant to an exemption from the registration requirements of the Securities Act. The New Sibanye Shares are expected to be issued in reliance upon the exemption from the registration requirements of the Securities Act provided by Section 3(a)(10) thereof.

This presentation is not a prospectus for purposes of Directive 2003/71/EC (and amendments thereto, including Directive 2010/73/EU, to the extent implemented in any relevant Member State) (the "Prospectus Directive"). In any EEA Member State that has implemented the Prospectus Directive, this presentation is only addressed to and is only directed at qualified investors in that Member State within the meaning of the Prospectus Directive. This presentation is not directed to, or intended for distribution to or use by, any person or entity that is a citizen or resident or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would require any registration or licensing within such jurisdiction.

No statement in this presentation should be construed as a profit forecast.

Forward looking statements

This presentation contains forward-looking statements within the meaning of the "safe harbour" provisions of the United States Private Securities Litigation Reform Act of 1995. These forward-looking statements, including, among others, those relating to Sibanye Gold Limited's trading as Sibanye-Stillwater's ("Sibanye-Stillwater") financial positions, business strategies, plans and objectives of management for future operations, are necessarily estimates reflecting the best judgment of the senior management and directors of Sibanye-Stillwater and Lonmin.

All statements other than statements of historical facts included in this presentation may be forward-looking statements. Forward-looking statements also often use words such as "will", "forecast", "potential", "estimate", "expect" and words of similar meaning. By their nature, forward-looking statements involve risk and uncertainty because they relate to future events and circumstances and should be considered in light of various important factors, including those set forth in this disclaimer. Readers are cautioned not to place undue reliance on such statements.

The important factors that could cause Sibanye-Stillwater's and Lonmin's actual results, performance or achievements to differ materially from those in the forward-looking statements include, among others, our future business prospects; financial positions; debt position and our ability to reduce debt leverage; business, political and social conditions in the United Kingdom, South Africa, Zimbabwe and elsewhere; plans and objectives of management for future operations; our ability to service our bond Instruments (High Yield Bonds and Convertible Bonds); changes in assumptions underlying Sibanye-Stillwater's and Lonmin's estimation of their current mineral reserves and resources; the ability to achieve anticipated efficiencies and other cost savings in connection with past, ongoing and future acquisitions, as well as at existing operations; our ability to achieve steady state production at the Blitz project; the success of Sibanye-Stillwater's and Lonmin's business strategy; exploration and development activities; the ability of Sibanye-Stillwater and Lonmin to comply with requirements that they operate in a sustainable manner; changes in the market price of gold, PGMs and/or uranium; the occurrence of hazards associated with underground and surface gold, PGMs and uranium mining; the occurrence of labour disruptions and industrial action; the availability, terms and deployment of capital or credit; changes in relevant government regulations, particularly environmental, tax, health and safety regulations and new legislation affecting water, mining, mineral rights and business ownership, including any interpretations thereof which may be subject to dispute; the outcome and consequence of any potential or pending litigation or regulatory proceedings or other environmental, health and safety issues; power disruptions, constraints and cost increases; supply chain shortages and increases in the price of production inputs; fluctuations in exchange rates, currency devaluations, inflation and other macro-economic monetary policies; the occurrence of temporary stoppages of mines for safety incidents and unplanned maintenance; the ability to hire and retain senior management or sufficient technically skilled employees, as well as their ability to achieve sufficient representation of historically disadvantaged South Africans' in management positions; failure of information technology and communications systems; the adequacy of insurance coverage; any social unrest, sickness or natural or man-made disaster at informal settlements in the vicinity of some of Sibanye-Stillwater's operations; and the impact of HIV, tuberculosis and other contagious diseases. These forward-looking statements speak only as of the date of this presentation. Sibanye-Stillwater and Lonmin expressly disclaim any obligation or undertaking to update or revise any forward-looking statement (except to the extent legally required).

Current resources and reserves*

- Reserves are above current infrastructure and are not project dependent
- Price assumptions are based on a three-year trailing average

4E PGM Mineral Resources (%)

4E PGM Mineral Reserves (%)

- Kroondal
- Rustenburg
- Mimosa
- Projects
- Blue Ridge
- Tailings

- PGM resources are inclusive of reserves,
- Represents attributable figures from Mimosa and Kroondal

Au %	4.92	0.79	0.74	6.69
Chrome %	0	22.58	14.23	0
Basket prices spot (R/4E oz)*	12,641	13,633	13,557	12,919

Source: Company information
Prices as at 5pm on 5 June 2018, exchange rate US\$/R12.77

Planned underground tonnes and costs

- Mimosa has a consistent profile
- Rustenburg's Siphumelele Merensky Reef is depleted after nine years
- Kroondal gradually mines out the PSA reserves

- Notes:
- Assumes 100% of Mimosa and Kroondal tonnes milled
 - Costs are represented at 2018 real terms
 - Assumed exchange rate for conversion of Mimosa capital expenditure: R11.53/US\$
 - Operating costs will include toll treatment costs from 2019, PoC costs currently offset against revenue

Planned underground ounces and costs

Note:

- Assumes attributable (50%) production from Mimosa and Kroondal
- Costs are represented at 2018 real terms
- Assumed exchange rate for conversion of Mimosa costs: R11.53/US\$
- Operating costs will include toll treatment costs from 2019, PoC costs currently offset against revenue

Planned capital expenditure

- Ore reserve development at Mimosa and Rustenburg conventional shafts is capitalised
- Kroondal and Bathopele ore reserve development is on reef and expensed

Note:

- Capital expenditure in 2018 real terms
- Assumed exchange rate for conversion of Mimosa capital expenditure: R11.53/US\$
- Represents attributable capital from Mimosa and Kroondal

Planned underground grade and recoveries

- Kroondal's changing mineralogy and declining grade affects plant recovery

Chrome production profile

- Beneficial chrome production is currently ~500 000 tonnes a year
- Beneficial tonnes increase to ~650 000 as the contract with IFM* expires in 2020

*IFM: International Ferro Metals

Note: Beneficial tonnes are sold at market related prices with little or no value realised from non-beneficial tonnes
Gross revenue assumes a chrome price of R2,600 per tonne

Dense media separation at Rustenburg UG2 concentrator

- Proven technology – working well at Kroondal
- Selectively discards waste at low residue values
- Some benefits include:
 - increases throughput by 80ktpm
 - increases PGM grade by ~12%
 - increases plant recovery by ~1.5%
 - improved milling efficiencies
 - allows more UG2 ore to be treated, therefore increases Rustenburg chrome by ~9,500 tonnes
 - allows for plant optimisation
 - reduces tailings deposition rate
- Capital of ~R350million, commissioned end 2020, 24-month pay back

Appendix

Planned ounces – mining method and reef type

Production by mining method

Production by reef type

Note:
 Excludes Mimosa operation
 Kroondal production represented at 100%; Only the UG2 reef is mined at Kroondal

Kroondal – planned UG tonnes and costs

Note: Costs are represented at 2018 real terms

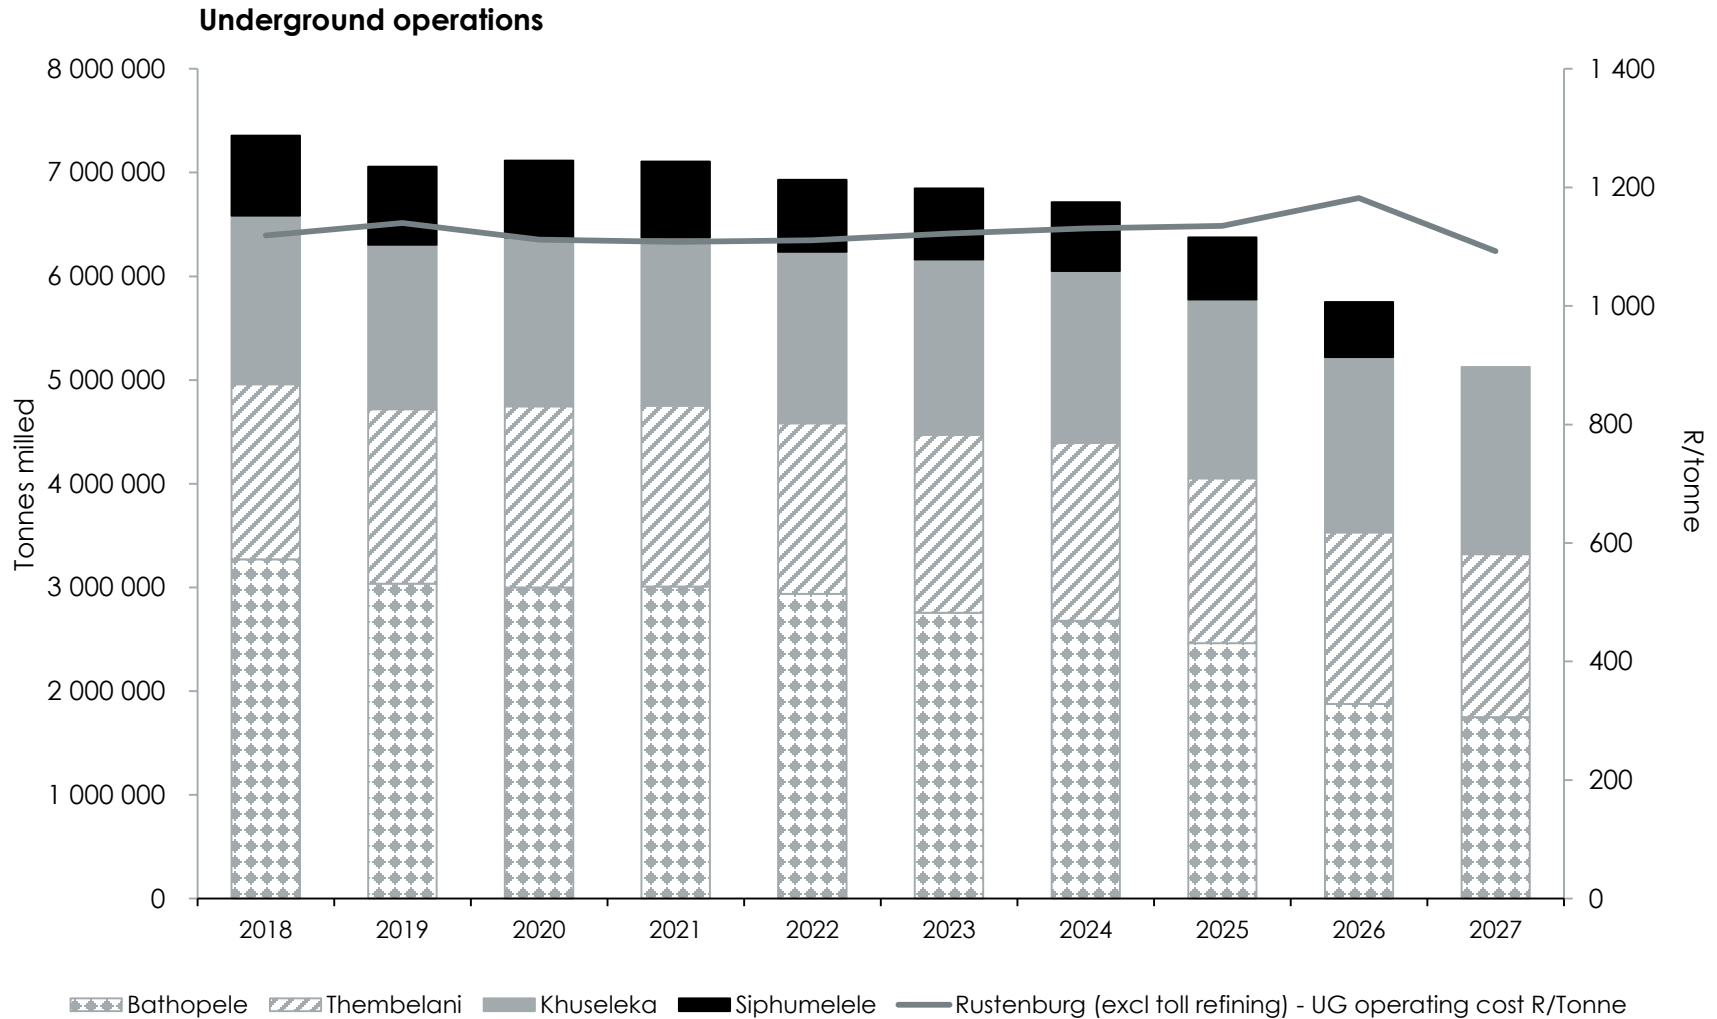

Kroondal a low unit cost producer

Kroondal – planned UG ounces and costs

Note: Costs are represented at 2018 real terms

Rustenburg – planned UG tonnes and costs

Note:
 Costs are represented at 2018 real terms
 Operating costs will include toll treatment costs from 2019, PoC costs currently offset against revenue

Rustenburg – planned UG ounces and costs

Underground operations– trackless and conventional mining

Note:
 Costs are represented at 2018 real terms
 Operating costs will include toll treatment costs from 2019, PoC costs currently offset against revenue

Mimosa – planned UG tonnes and costs

Note: Costs are represented at 2018 real terms

Figures are quoted as 100%

Assumed exchange rate for conversion of Mimosa costs: R11.53/US\$

A steady, efficient mining operation

Mimosa – planned UG ounces and costs

Planned production and underground operating costs

Note: Costs are represented at 2018 real terms

Figures are quoted as 100%

Assumed exchange rate for conversion of Mimosa costs: R11.53/US\$

Resources and reserves 2017

US Securities and Exchange Commission – Price and Rate Submissions 2017

Platinum Group Metals Price Deck:

The three year average prices for the Platinum Group Metals ("PGM") are tabulated below. Sibanye intends to declare the PGM Reserves at the three year average prices:

	Unit	Three Year Average: May 2014-April 2017	6 Month Average	Mineral Reserve Price
Platinum	US\$/oz	1,092	963	1,092
Palladium	US\$/oz	704	750	704
Rhodium	US\$/oz	901	859	901
Iridium	US\$/oz	575	728	575
Ruthenium	US\$/oz	46	41	46
Nickel	US\$/ton	12,185	10,439	12,185
Copper	US\$/ton	5,614	5,718	5,614

Exchange Rate:

The three-year average South African Rand to US Dollar exchange rate as at 30 April 2017 was R13.05/US\$. The South African Rand has been trading at R13.42/US\$ over the last six months. Sibanye Gold Intends to use an Exchange Rate of R13.05/US\$ for its Reserve declaration for its South African Operations.

Competent persons' declaration

The Competent Persons, designated in terms of SAMREC, who take responsibility for the reporting of Mineral Resources and Mineral Reserves and the overall regulatory compliance are the respective operational (per mining unit) and project based Mineral Resource Managers. The Competent Persons have sufficient experience relative to the type and style of mineral deposit under consideration and are full-time employees of Sibanye-Stillwater. The Competent Persons confirmation signatures are presented in the CPRs per operation.

The Competent Persons further consent is given to the disclosure of this Mineral Resource and Mineral Reserve statement.

Corporate governance on the overall compliance of the company's figures and responsibility for the generation of a Group consolidated statement has been overseen by the lead Competent Persons listed below. The lead Competent Persons have given written consent to the disclosure of the 2017 Mineral Resources and Mineral Reserves statement. They are permanent employees of Sibanye-Stillwater.

Competent persons for the SA PGM operations:

Lead: Andrew Brown, Vice President Mine Technical Services, MSc (Mining Engineering), SAIMM 705060

Leonard Changara, Unit Manager Geology, MSc (Geology), SACNASP 400089/08

Brian Smith, Unit Manager Survey, NHD (Mine Survey); MEng MRM; MSCC, SAIMM 702313
