

MATERIALS STEWARDSHIP AND SUPPLY CHAIN MANAGEMENT

Sibanye-Stillwater strives to undertake its materials stewardship and supply chain management activities in a manner that is responsible, sustainable and adheres to internationally-recognised practices. To this end, we endeavour to ensure value-adding, cost-effective and sustainable service delivery that enables our operations to achieve their strategic growth and productivity objectives.

To attain the overall vision, the Company is committed to:

- integrating all aspects of materials stewardship and supply chain management
- encouraging our business partners to adopt progressive practices with regard to sustainable development
- being the 'customer of choice' by developing sustainable, collaborative and value-driven relationships with our business partners
- continually optimising and improving our processes to ensure ongoing relevance
- to source, utilise, re-use and dispose of materials in a manner that is optimal, appropriate and responsible with due regard to environmental, social, health and safety considerations
- to support the economies of our host countries through the local procurement of goods and services where practicable, and
- engaging with relevant stakeholders in an open manner regarding issues of materials stewardship and supply chain management.

Employees of Sibanye-Stillwater play a fundamental role in achieving these objectives by:

- taking ownership of responsible materials stewardship and supply chain management protocols and initiatives
- adhering to the Company's Materials Stewardship and Supply Chain Management policies and principles, and
- integrating responsible materials stewardship into everyday practice.
