

JOINT MEDIA RELEASE

Sibanye-Stillwater and Wits University collaborate on face shields for frontline health workers

Johannesburg, 21 August 2020: Sibanye-Stillwater (Tickers JSE: SSW and NYSE: SBSW) and the University of Witwatersrand (Wits) have collaborated to produce face shields for frontline health workers in communities around the Group's South African (SA) operations and in the Eastern Cape Province.

The face shields are made by student and community volunteers from the Wits School of Mechanical, Industrial and Aeronautical Engineering, in a partnership between Sibanye-Stillwater and Wits University's Digimine. In response to the COVID-19 challenges, Sibanye-Stillwater donated a laser cutter and material to the Digital Makerspace team at the Wits TMG Makerspace, Wits Tshimologong Digital Innovation Precinct to produce personal protective equipment (PPE).

To date, the volunteers have produced 6,700 shields from the Braamfontein campus at no cost, which have been distributed to Sibanye-Stillwater's SA mines and community members. This project has been used as a training platform, to enable the transfer of skills. The volunteers are working on producing face shields from recycled plastic to reduce the impact on the environment. The Group will distribute 3,700 face shields to health facilities around its operations in Gauteng, Free State and North West provinces.

"Wits University is grateful for the ongoing partnership with Sibanye-Stillwater and for the combined positive impact as a result, not only in the mining community but for our society in general. It is imperative that we always work collectively, but particularly in challenging times, such as the current COVID-19 pandemic. Our partnership is based on the principle of contributing to the well-being of all in our country and we are proud to be a part of this team. We wish to extend a special gratitude to the team at Wits TMG Makerspace, who spent countless hours producing PPE to keep us safe," Tanya Schönwald, Development Specialist at Wits commented.

CEO, Neal Froneman said, "We are pleased that our investment in innovation is delivering results and has contributed towards our social and health efforts to support local communities during COVID-19. This contribution is in addition to our donation of PPE and sanitisers to clinics and hospitals in areas around our operations and in the Eastern Cape Province. We will continue to look for opportunities to support our communities and health facilities to reduce the spread of COVID-19."

Ends.

FORWARD LOOKING STATEMENTS

The information in this announcement may contain forward-looking statements within the meaning of the "safe harbour" provisions of the United States Private Securities Litigation Reform Act of 1995. These forward-looking statements, including, among others, those relating to Sibanye Stillwater Limited's ("Sibanye-Stillwater" or the

"Group") financial positions, business strategies, plans and objectives of management for future operations, are necessarily estimates reflecting the best judgment of the senior management and directors of Sibanye-Stillwater. All statements other than statements of historical facts included in this announcement may be forward-looking statements. Forward-looking statements also often use words such as "will", "forecast", "potential", "estimate", "expect" and words of similar meaning. By their nature, forward-looking statements involve risk and uncertainty because they relate to future events and circumstances and should be considered in light of various important factors, including those set forth in this disclaimer. Readers are cautioned not to place undue reliance on such statements.

The important factors that could cause Sibanye-Stillwater's actual results, performance or achievements to differ materially from those in the forward-looking statements include, among others, our future business prospects; financial positions; debt position and our ability to reduce debt leverage; business, political and social conditions in the United States, South Africa, Zimbabwe and elsewhere; plans and objectives of management for future operations; our ability to obtain the benefits of any streaming arrangements or pipeline financing; our ability to service our bond instruments; changes in assumptions underlying Sibanye-Stillwater's estimation of their current mineral reserves and resources; the ability to achieve anticipated efficiencies and other cost savings in connection with past, ongoing and future acquisitions, as well as at existing operations; our ability to achieve steady state production at the Blitz project; the success of Sibanye-Stillwater's business strategy; exploration and development activities; the ability of Sibanye-Stillwater to comply with requirements that they operate in a sustainable manner; changes in the market price of gold, PGMs and/or uranium; the occurrence of hazards associated with underground and surface gold, PGMs and uranium mining; the occurrence of labour disruptions and industrial action; the availability, terms and deployment of capital or credit; changes in relevant government regulations, particularly environmental, tax, health and safety regulations and new legislation affecting water, mining, mineral rights and business ownership, including any interpretations thereof which may be subject to dispute; the outcome and consequence of any potential or pending litigation or regulatory proceedings or other environmental, health and safety issues; power disruptions, constraints and cost increases; supply chain shortages and increases in the price of production inputs; fluctuations in exchange rates, currency devaluations, inflation and other macro-economic monetary policies; the occurrence of temporary stoppages of mines for safety incidents and unplanned maintenance; the ability to hire and retain senior management or sufficient technically skilled employees, as well as their ability to achieve sufficient representation of historically disadvantaged South Africans in management positions; failure of information technology and communications systems; the adequacy of insurance coverage; any social unrest, sickness or natural or man-made disaster at informal settlements in the vicinity of some of Sibanye-Stillwater's operations; and the impact of HIV, tuberculosis and the spread of other contagious diseases, such as coronavirus ("COVID-19"). Further details of potential risks and uncertainties affecting Sibanye-Stillwater are described in Sibanye-Stillwater's filings with the Johannesburg Stock Exchange and the United States Securities and Exchange Commission, including the Integrated Annual Report 2019 and the Annual Report on Form 20-F for the fiscal year ended 31 December 2019.

These forward-looking statements speak only as of the date of the content. Sibanye-Stillwater expressly disclaims any obligation or undertaking to update or revise any forward-looking statement (except to the extent legally required).
