TECHNICAL ASPECTS:

Design Criteria

GISTM and best practice guidelines including Australian National Committee on Large Dams (ANCOLD) (Guidelines on Tailings Dams, July 2019). Site specific design criteria were specified by the EoR. Details are included in the Design Basis Report (DBR).

Stability Assessment and Mitigation Measures

A detailed stability assessment based on piezocone probing and laboratory test work was conducted in 2023 (KP Reference: RI301-00840/06 Rev A, July 2023).

All the FoS are above the recommended limits and thus no mitigation measures were required.

Construction of a buttress in the west flank due to a localised slip was completed in 2001.

Dam Breach Assessment

Assessment completed in 2023
(KP Reference: PR301-00726/18 Rev 0, 12 April 2022)

Area of Inundation

Has been identified by EoRs – please refer to Figures 2 & 3

Summary of Human Exposure

Consequence classification has been based on Population at Risk (PAR). Farmers have been identified and are being engaged through various means.
