TECHNICAL ASPECTS:

Design Criteria

GISTM and best practice guidelines including Australian National Committee on Large Dams (ANCOLD) (Guidelines on Tailings Dams, July 2019). Site specific design criteria were specified by the EoR. Details are included in the Design Basis Report (DBR).

Stability Assessment and Mitigation Measures

A detailed stability assessment based on laboratory test work was conducted in 2023 (SLR Ref No.: 720.19129.00035 Rev 0, August 2023).

All the FoS are above the recommended limits and thus no mitigation measures were required.

Piezocone probing to be undertaken in H2 2023 to confirm phreatic surface and foundation material

Dam Breach Assessment

Assessment completed in 2023 (SLR Ref No: 723.026021.00001 Rev 1, July 2023)

Area of Inundation

Has been identified by EoRs – please refer to Figure 2

Summary of Human Exposure

Consequence classification has been based on Population at Risk (PAR). Communities have been identified and are being engaged through various means including Community Engagement Forums (CEF)
