### **Lonmin Update: Attendance Figures/Update**

- Attendance today: We have a 4.2% average attendance across all shafts this morning. We expect that employees are waiting for the outcome of the Peace Accord meeting.
- Peace Accord and Process Agreement: The company is committed to doing what it can to reach a speedy and fair solution to this problem. We have made a clear commitment to negotiating substantive issues, but it needs to be done in the appropriate framework and we are one of a number of parties to that framework.

Please note: We are changing the circulation timing of these media briefs - from today, you will receive a morning attendance update (circa 10h00) and in the afternoon (circa 17h00) we will update on the status at the mine - that is if more information is available.

- ENDS -

**Notes to editors**

**About Lonmin:**

1. Lonmin, which is listed on both the London Stock Exchange and the Johannesburg Stock Exchange, is one of the world's largest primary producers of Platinum Group Metals (PGMs). These metals are essential for many industrial applications, especially catalytic converters for internal combustion engine emissions, as well as their widespread use in jewellery.

Lonmin's operations are situated in the Bushveld Complex in South Africa, where nearly 80% of global PGM resources are found.

The Company creates value for shareholders through mining, refining and marketing PGMs and has a vertically integrated operational structure – from mine to market. Lonmin's mining operations extract ore from which the Process Division produces refined PGMs for delivery to customers. Underpinning the operations is the Shared Services function which provides high quality levels of support and infrastructure across the operations.
