Lonmin Update: Update

- Attendance today: We have a 1.8% average attendance across all shafts this morning.
- Lonmin is saddened by the loss of yet another life during this illegal strike. We strongly condemn the on-going violence and again urge all parties to actively work towards restoring peace and stability within our operations.
- Lonmin continues to seek a peaceful and sustainable solution to the current impasse and remains committed to negotiating the demands of the striking workers within the confines of South Africa's labour laws and importantly, a peaceful working environment.

- ENDS -

Notes to editors

About Lonmin:

Lonmin, which is listed on both the London Stock Exchange and the Johannesburg Stock Exchange, is one of the world's largest primary producers of Platinum Group Metals (PGMs). These metals are essential for many industrial applications, especially catalytic converters for internal combustion engine emissions, as well as their widespread use in jewellery.

Lonmin's operations are situated in the Bushveld Complex in South Africa, where nearly 80% of global PGM resources are found.

The Company creates value for shareholders through mining, refining and marketing PGMs and has a vertically integrated operational structure – from mine to market. Lonmin's mining operations extract ore from which the Process Division produces refined PGMs for delivery to customers. Underpinning the operations is the Shared Services function which provides high quality levels of support and infrastructure across the operations.
