### **Lonmin Update: Update**

- Following negotiations today, Lonmin has presented an offer to the employee delegate. The offer will be communicated to employees at the hill where they have been waiting for feedback before negotiations continue again tomorrow.
- We are encouraged that talks between all parties are underway and remain committed to unlocking the current situation through negotiations.

- ENDS -

## **Notes to editors**

### **About Lonmin:**

Lonmin, which is listed on both the London Stock Exchange and the Johannesburg Stock Exchange, is one of the world's largest primary producers of Platinum Group Metals (PGMs). These metals are essential for many industrial applications, especially catalytic converters for internal combustion engine emissions, as well as their widespread use in jewellery.

Lonmin's operations are situated in the Bushveld Complex in South Africa, where nearly 80% of global PGM resources are found.

The Company creates value for shareholders through mining, refining and marketing PGMs and has a vertically integrated operational structure – from mine to market. Lonmin's mining operations extract ore from which the Process Division produces refined PGMs for delivery to customers. Underpinning the operations is the Shared Services function which provides high quality levels of support and infrastructure across the operations.
