### Lonmin Update: Meeting with SACC

The South African Council of Churches, chaired by Archbishop Seoka, this afternoon facilitated a second meeting between a group of striking employees and Lonmin management.

It was a facilitated conversation to re-affirm the processes we have in place, and to appeal to striking workers to return to work and use the internal processes if they have grievances.

#### Notes to editors

##### About Lonmin:

1. Lonmin, which is listed on both the London Stock Exchange and the Johannesburg Stock Exchange, is one of the world's largest primary producers of Platinum Group Metals (PGMs). These metals are essential for many industrial applications, especially catalytic converters for internal combustion engine emissions, as well as their widespread use in jewellery.

Lonmin's operations are situated in the Bushveld Complex in South Africa, where nearly 80% of global PGM resources are found.

The Company creates value for shareholders through mining, refining and marketing PGMs and has a vertically integrated operational structure – from mine to market. Lonmin's mining operations extract ore from which the Process Division produces refined PGMs for delivery to customers. Underpinning the operations is the Shared Services function which provides high quality levels of support and infrastructure across the operations.
