11 November 2016

Fatal accident at E1 Shaft

It is with deep regret that Lonmin Plc confirms that Mr Joao Fernando Macamo, a Production Team Leader at E1 Shaft, was fatally injured following a tramping incident on Thursday 10 November 2016. No other employees were injured in the incident.

An investigation into the accident has begun, in conjunction with the Department of Mineral Resources and unions.

Chief Executive Officer, Ben Magara, said: "The distress of losing a colleague under such circumstances will be felt company wide. Our heartfelt condolences go to Mr Macamo's family, fellow crew members and friends".

Mr Macamo's family is being supported by the Company at this time.

Notes to editors

Lonmin, which is listed on both the London Stock Exchange and the Johannesburg Stock Exchange, is one of the world's largest primary producers of PGMs. These metals are essential for many industrial applications, especially catalytic converters for internal combustion engine emissions, as well as their widespread use in jewellery.

Lonmin's operations are situated in the Bushveld Complex in South Africa, where nearly 80% of known global PGM resources are found.

The Company creates value for shareholders through mining, refining and marketing PGMs and has a vertically integrated operational structure - from mine to market. Lonmin's mining operations

extract ore from which the Process Division produces refined PGMs for delivery to customers. Underpinning the operations is the Shared Services function which provides high quality levels of support and infrastructure across the operations.
