MEDIA RELEASE

Sibanye-Stillwater boosts mathematics in the Free State

Johannesburg, 6 November 2017: Sibanye-Stillwater presented a state of the art mathematics laboratory to the Department of Education in the Free State province and the Mamello Secondary School in the Lejweleputswa Municipality at the end of October 2017. The facility is designed to improve the quality of mathematics learning and teaching of over 1,300 learners at the Mamello Secondary School.

The facility is an information and communications technology (ICT) enabled mathematics laboratory which intends to enhance the learning experience for the students by making it interactive and enjoyable, therefore addressing the notion that mathematics is difficult and abstract. The facility is resourced with an electronic board, 40 tablets, a laptop for the teachers and other manipulative tools.

Sibanye-Stillwater invested approximately R1.4 million on the mathematics laboratory as well as installing a borehole to reduce the school's water and electricity bill.

Since 2013, Sibanye-Stillwater has spent over R13.2 million in mathematics and science basic education in learners support, teacher development and infrastructure development in the Free State and Gauteng benefiting over 780 learners in grades 10 to 12 annually.

"We believe that this facility will enhance mathematics education in the local communities and develop a pipeline of learners that are able to succeed in careers which require mathematics and science. We are pleased that jobs were created through local SMMEs during the construction of this project. We trust that our partnership with the Department of Education, and with a particular focus on providing high quality mathematics and science education, we will continue to develop the skills necessary for technical sectors such as mining," said Neal Froneman, CEO of Sibanye-Stillwater.

Ends.

FORWARD LOOKING STATEMENTS

This announcement includes “forward-looking statements” within the meaning of the “safe harbour” provisions of the United States Private Securities Litigation Reform Act of 1995, including the statements related to expected production volumes. Forward-looking statements may be identified by the use of words such as “target”, “will”, “forecast”, “expect”, “potential”, “intend”, “estimate”, “anticipate”, “can” and other similar expressions that predict or indicate future events or trends or that are not statements of historical matters. The forward-looking statements set out in this announcement involve a number of known and unknown risks, uncertainties and other factors, many of which are difficult to predict and generally beyond the control of Sibanye-Stillwater, that could cause Sibanye-Stillwater's actual results and outcomes to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. These forward-looking statements speak only as of the date of this announcement. Sibanye-Stillwater undertakes no obligation to update publicly or release any revisions to these forward-looking statements to reflect events or circumstances after the date of this announcement or to reflect the occurrence of unanticipated events, save as required by applicable law.
